- ☐ Water will discharge to ground with 100% infiltration, with no potential to reach surface waters under any conditions. (If checked, skip to section V.)

B. **Discharge Point(s) Latitude and Longitude:** Provide latitude and longitude in degrees (°), minutes ('), and seconds (") for each of your facility's discharge point(s). List **all** discharge points. Use an extra sheet of paper if necessary. For sites with 100% infiltration, identify provide the location where the water collects for infiltration **or** the center of the facility if no stormwater collects onsite.

For the discharge identifier, list the name, number, or letter used on your site map to identify the point(s) of discharge. The identifier can be a maximum of three characters long and **must be unique** for each discharge point.

If you identify more than one discharge point, mark the discharge point(s) you will sample to comply with the permit sampling requirements by checking the Sample Point box.

**NOTE: Ecology uses the unique identifier given to identify the sampling point in WQWebDMR.**
