

April 5, 2025

Ms. Ha Tran
Washington State Department of Ecology
Industrial Section
P.O. Box 47600
Olympia, WA 98504-7600

Dear Ms. Tran:

We did not sample or test for acute toxicity in the first quarter of 2025. The Cosmopolis pulp mill remained curtailed for the entire quarter.

Per section S.2.F of the 2020 NPDES permit modification: *No monitoring for acute or chronic toxicity required if the first quarterly tests after curtailment shows compliance with toxicity limits in S16 and S17.* The pulp mill remained down the entire first quarter of 2025, and the 1st quarter 2023 testing confirmed compliance with the permit toxicity limits.

Respectfully,

David Pearmain
Sr. Lab Technician
Cosmo Specialty Fibers
