RE: Discharge Monitoring Report for the First Quarter, 2013

Dear Industrial Stormwater Permittee:

Your facility has coverage under the Washington State Department of Ecology's (Ecology) Industrial Stormwater General Permit. This permit requires that you sample the stormwater discharge from your facility and report the results to Ecology each quarter on a Discharge Monitoring Report (DMR).

Ecology is tracking DMR submittals, and noted the following for the first quarter of 2013:

As of July 19, 2013, Ecology does not have a first quarter 2013 DMR on file for your facility.

According to the permit:

- Discharge monitoring reports must be submitted to Ecology within 45 days of the end of the reporting period.
- If your facility did not discharge during the reporting period, you must still submit the DMR, checking the box for "No Discharge" during the reporting period.

If stormwater discharged from your facility and you did not collect a sample, please submit the DMR as soon as possible and explain why you did not collect a sample.

If you collected samples and have not yet submitted the DMR, submit the required DMR no later than August 2, 2013

Industrial Stormwater Permittee

Ecology relies on complete and accurate DMR information to assess your compliance with permit conditions. Non-compliance with permit requirements including monitoring, DMR submittal, and other conditions of the permit may result in enforcement action by Ecology. Compliance with this notification does not mean you have complied with all permit conditions.

PLEASE NOTE: Permittees can submit DMRs electronically in a secure on-line system called WQWebDMR. Entering your own data will ensure timely compliance with your deadlines and accuracy in data entry. You are encouraged to read the information at:

www.ecy.wa.gov/programs/wq/permits/paris/index.html

If you have questions about how to register for WQWebDMR, contact Ecology's WQWebDMR staff at WQWebPortal@ecy.wa.gov, or (360) 407-7097 (Olympia area), or (800) 633-6193/option 3.

Paper DMRs can be mailed to Ecology at:

Department of Ecology
Water Quality Program - DMR Violation Response
PO Box 47696
Olympia, WA 98504-7696

If you feel you received this notice in error, or need clarification or assistance, please contact Charles Gilman at charles.gilman@ecy.wa.gov, or (360) 407-6437.

Sincerely,

A handwritten signature in black ink that reads "Bill Moore". The signature is written in a cursive, flowing style.
