**Re: August 2013 Monthly Feed, Biomass and Disease Control Chemical Use for
American Gold Seafoods Net Pen NPDES Permits.**

Dear Ms. LeVander:

Please find the end of month biomass, feed and disease control chemical use summary report for August 2013. Site 3 will be harvested out and empty before the end of September and Site 2 will be the next site to harvest out fish by this fall. It should be noted that the Cypress sites have not received any medicated feed since October of 2012. These sites will go through a fallow period before being restocked with a new generation of fish starting in January of 2014. If there is any further information you need feel free to contact me anytime.

Best regards,

Kevin Bright, Environmental Permit Coordinator
American Gold Seafoods
