Cleanup plan for site being developed

Ecology is announcing a public comment period about cleanup of the Blaine Marina, Inc. site. Documents regarding the cleanup are available now for review:

- **Draft Cleanup Action Plan (DCAP):** describes preferred cleanup methods for contamination, and specifies cleanup standards and requirements at the site.
- **State Environmental Policy Act (SEPA) Checklist and Determination of Non-significance:** describes potential environmental impact of the cleanup work.
- **Amendment to Agreed Order (AO):** outlines steps for completing the DCAP.

In 2012 Ecology and the Port entered into a legal agreement called an agreed order. It required that the Port repair a failing section of bulkhead, conduct an environmental investigation of the site, and prepare a draft cleanup plan based on its findings. The Port completed these tasks over the last several years. Ecology is now requiring the Port to take some additional actions to complete the design of the cleanup plan for the site. These are described in the amendment to the agreed order.

Ecology invites you to review and comment on these documents December 12, 2016—January 25, 2017. See the column to the left for information on where to find them.

Site History & Background

The Blaine Marina, Inc. site is located in the western portion of the Port’s Blaine Harbor industrial area. The Port has leased this property to Blaine Marina, Inc. for use as a tank farm and fueling facility since the 1950’s. In 1955 the tenant installed three aboveground storage tanks to store gasoline and diesel fuel for dispensing at the fueling dock, and also for filling tanker trucks to deliver home heating oil. The fueling facility also once supported commercial and recreational boating activities at the marina.

Investigations across the site have found petroleum, metals, volatile organic compounds, and naphthalene in groundwater and soil in and around the site. Most contamination at the site appears to be the result of an accidental fueling release by the tenant reported in May 1990. Contaminants exist at potentially harmful levels and must be addressed under Washington’s cleanup law, the Model Toxics Control Act (MTCA).

El Departamento de Ecología está anunciando el periodo de comentario público referente a la limpieza ambiental del sitio de Blaine Marina Inc.

Si le gustaría obtener este documento, o más información sobre este sitio, en español, favor de comunicarse con Gretchen Newman al 360-407-6097 o preguntas@ecy.wa.gov.

Environmental Cleanup at Blaine Marina Inc. Site

Public Comment Period:

- ◆ Blaine Marina, Inc. Cleanup Site
- ◆ December 12, 2016—January 25, 2017
- ◆ Documents available for review—see inside for details and site information.

A cleanup plan is being developed at the site, and Ecology invites you to look at it and related documents, and submit comments.

Also, if 10 or more persons request it, Ecology will hold a public meeting regarding the documents for this site.
