Draft Agreed Order available for comment

Ecology and the current property owner, BMR-Dexter LLC, will enter into a legal agreement called an Agreed Order for the American Linen Supply Co Dexter Ave site (Site). The Site is located at and around the 700 Dexter Avenue North property (Property) in Seattle.

Under the Agreed Order, BMR-Dexter LLC will be required to:

- Prepare a Remedial Investigation (RI) and Feasibility Study (FS) Work Plan that describes the environmental investigations that will be performed to determine the full extent of the contaminated area on and around the Property.
- Implement the final RI/FS Work Plan approved by Ecology.
- If proposed, prepare an Interim Action Work Plan describing any cleanup actions to be implemented on the Property prior to its redevelopment.
- Implement the final Interim Action Work Plan, if proposed and after public comment and Ecology approval.
- Prepare RI and FS Report, that includes a study of alternative approaches to clean up the contaminated area, and
- Assist Ecology with drafting a Cleanup Action Plan and holding an additional public comment period on the draft RI and FS Reports and Cleanup Action Plan.

Public Comment Invited

Ecology invites you to review and comment on the following documents:

- **Draft Agreed Order**
- **Draft Public Participation Plan**

Ecology developed a public participation plan for the Site. The plan outlines and describes the tools and approaches that Ecology will use to inform the public about Site activities, and identifies opportunities for the community to become involved in this process.

Send your written comments to Tamara Cardona at taca461@ecy.wa.gov or USA mail to 3190 160th Ave S.E., Bellevue, WA 98008. Please indicate American Linen Supply Co Dexter Ave Cleanup Site.

Site Background

The Site is located north of downtown Seattle in the South Lake Union neighborhood. American Linen Supply Company operated a commercial

Facility Site ID #: 3573

Cleanup Site ID#: 12004

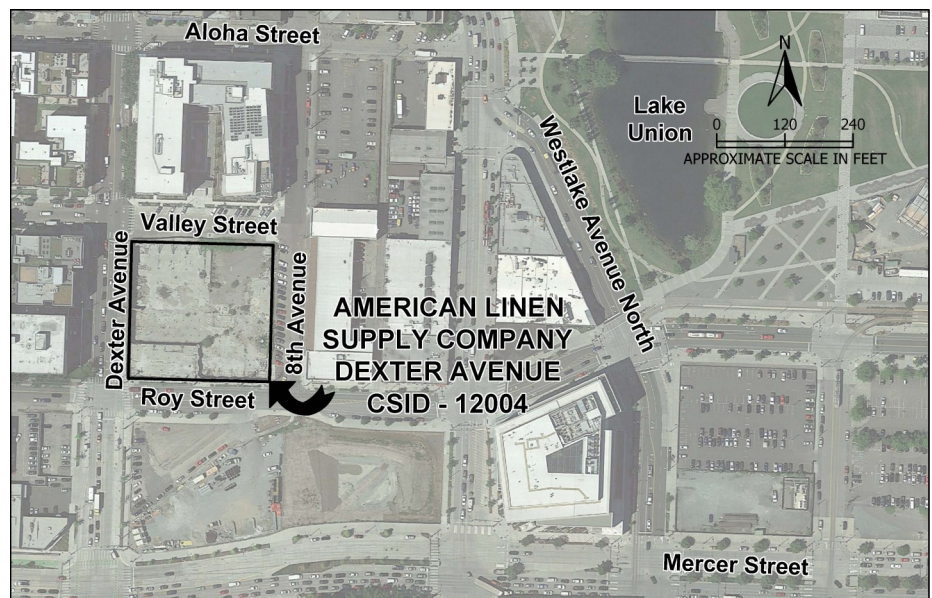

laundry at the Property from 1925 to 1995. Dry cleaning operations were also conducted from 1966 to about 1990. A gasoline station and a refueling facility operated on the Property between 1930 and 1966. Both the commercial dry cleaning operation and refueling operations released contaminants to the environment. All buildings have been demolished on the Property which will be redeveloped as a commercial office building with underground parking. Contamination extends beyond the Property, generally to the east and south. The Site covers both the area in which contamination from the dry cleaning and gasoline refueling facility operations was released and the area outside the Property to which it has traveled.

In 2013, the Property underwent a partial cleanup involving electrical resistance heating that removed and reduced a large mass of chlorinated solvents in soils. The general area of contamination outside of the Property is known from previous sampling. The area will be further defined by collecting additional soil, soil vapor, and groundwater samples.

Contaminants of Concern

Dry cleaning fluid, chemicals resulting from natural degradation of the dry cleaning fluid, and gasoline have contaminated soil, soil vapor, and groundwater. The contaminants of concern are:

- Tetrachloroethene (dry cleaning fluid)
- Trichloroethene (degradation product)
- Cis-1,2-dichloroethene (degradation product)
- Trans-1,2-dichloroethene (degradation product)
- Vinyl Chloride (degradation product)
- Gasoline
- Benzene (component of gasoline)
