

How can apps help me find safer products?

Using a smartphone app is one way to identify and avoid toxic ingredients in personal care products—but how do you know which app to use?

Here's what to look for:

- ✓ **Safety transparency:**
Look for apps that openly share how they assess product safety.
- ✓ **Chemical lists:**
Choose apps that provide the lists of chemicals considered in their evaluations.
- ✓ **Independent evaluation:**
Opt for apps that independently assess products, avoiding ties to specific brands to ensure unbiased results.

Ready to use an app while you shop?

These are examples that provide the information we look for:

Clearya

EWG

Yuka

Ecology doesn't endorse or review these apps.
