I. INTRODUCTION

This annual report is submitted to the Environmental Protection Agency (EPA) by the Washington State Department of Ecology for State Fiscal Year 2001 (SFY 01), July 1, 2000 - June 30, 2001. This report describes how Washington State has met the goals and objectives of its State Revolving Fund (SRF) program for SFY 01 and reflects the actual use of SRF funds.

II. EXECUTIVE SUMMARY

The Department of Ecology (Ecology), as the designated agency for the state of Washington, has the sole responsibility for management of the SRF program and is the primary contact with EPA on SRF issues.

The annual report explains how Ecology has used the SRF program and the progress of meeting/achieving the goals and objectives for State Fiscal Year SFY 01.

Ecology began reporting on the SFY rather than the federal fiscal year (FFY) in SFY 98. The change has resulted in loan agreements being signed in both SFY 00 and SFY 01. This is due to loan offers being valid for up to one year. Consequently, this annual report discusses local governments identified for funding on the SFY 00 IUP and the SFY 01 IUP.

Projected dates for signing binding agreements and disbursements were optimistic and in most cases the actual dates occurred later than projected. Also, some funds reserved for specific local governments were declined and some communities did not need all of the funds reserved for them.

Washington's SRF has been capitalized with twelve federal capitalization grants between SFY 90 and 01 and the corresponding state match. The following Figure 1 shows these funds by year as well as the allocation of the funds for administration and loans. Any minor discrepancies in dollar values are due to rounding.

**Figure 1
Washington SRF Funding SFY 90 Through SFY 00**

SFY	Title VI Grant Amount	Title II Funds	20% State Match	Administration Allowance	Net Capitalization Grant and State Match Available for Projects
1990	\$16,402,815	\$969,996	\$3,474,562	\$694,912	\$20,152,461
1991	\$16,966,719	\$66,030	\$3,406,550	\$681,310	\$19,757,989
1992	\$35,689,698	\$182,786	\$7,174,497	\$1,434,899	\$41,612,082
1993	\$33,789,195	\$0	\$6,757,839	\$1,351,568	\$39,195,466
1994	\$33,425,073	\$0	\$6,685,015	\$1,337,003	\$38,773,085
1995	\$20,739,807	\$0	\$4,147,961	\$829,592	\$24,058,176
1996	\$21,419,838	\$0	\$4,283,968	\$856,794	\$24,847,012
1997	\$22,509,234	\$0	\$5,401,847	\$900,369	\$27,010,712
1998	\$23,415,183	\$0	\$4,683,036	\$936,607	\$27,161,612
1999	\$23,417,163	\$0	\$4,683,433	\$936,687	\$27,163,909
2000	\$0	\$0	\$0	\$0	\$0
2001	\$46,758,889	\$0	\$9,351,778	\$1,870,356	\$57,981,023
Total	\$294,533,614	\$1,218,812	\$60,050,486	\$11,830,097	\$347,713,527

In SFY 01, Ecology made 30 binding commitments totaling \$49,305,281. Twenty-three of these commitments were with local governments for Section 212 Water Pollution Control Facilities projects, one for Section 319 Nonpoint Source Pollution Control projects, and six for Section 320 Comprehensive Estuary Conservation and Management projects. An overview discussion of the projects is located in the following section and a breakdown of the binding commitments is shown in Exhibit 1.

III. GOALS AND PROGRESS

A. Short-Term Goals and Progress

1. Goal - Work with Ecology's Water Quality Financial Assistance Advisory Council to revise and update the SRF rule (Chapter 173-98 WAC "Uses and Limitations of the Water Pollution Control Revolving Fund") that includes but is not limited to:

- Priority rating and evaluation system
- Financial hardship criteria
- Program eligibility
- Use of local priorities in the rating system

Progress – Ecology staff met with the Water Quality Financial Assistance Advisory Council on a bimonthly basis to assist with the revising and updating the SRF rule. The revised and updated SRF rule was adopted in December 2000.

2. Goal - Continue to integrate state and federal funding programs, within federal and state laws, the SRF with the Centennial Clean Water Fund (Centennial), and the federal Clean Water Act (CWA) Section 319 Nonpoint Source Program (Section 319) to maximize limited state and federal grant and loan funds to improve and protect the water quality of the state of Washington.

Progress - Ecology began to merge the SRF and Centennial programs in 1995 by running the funding cycles concurrently. In 1997, Ecology integrated the CWA Section 319 funding cycle with the SRF and Centennial funding cycle. This integrated funding cycle has been well received by local governments and Indian tribes.

3. Goal - To continue to develop and implement the SRF program so that financial assistance for water pollution control needs is available in perpetuity to communities statewide.

Progress - Ecology monitors the SRF program to ensure that the fund is available in perpetuity. Analysis has shown that the fund will be available in perpetuity providing the overall interest is at or above the inflation rate. The current inflation rate is 2.4% and the weighted average interest rate for all loans is 3.1.%

4. Goal - To provide low-interest loans to local governments for 19 water pollution control facility projects.

Progress - In SFY 01, Ecology signed loan agreements with local governments to help finance 23 water pollution control facilities projects. The following Figure 2 shows the number of agreements and the type of projects.

Figure 2
Water Pollution Control Facilities Projects

Number of Loan Agreements	Project Type
2	Facilities Design, Combined Sewer Overflow
9	Facilities Construction, Wastewater Treatment Plant Improvements
1	Facilities Planning, Combined Sewer Overflow Reduction Plan Update
3	Construction, Sewer System Improvements
1	Construction, Additional Subsurface Effluent Disposal Field
1	Facilities Design, Wastewater Treatment Plant and Sewer System Improvements
1	Facilities Design, Wastewater Treatment Plant Upgrade
5	Refinance Municipal Debt

5. Goal - To provide low interest loans to local governments for nine nonpoint source pollution control activities.

Progress – Ecology signed one loan agreement with a local government to finance a nonpoint source pollution control project. The project is for farm irrigation conversion.

6. Goal - To provide low interest loans to local governments for two comprehensive estuary conservation and management projects.

Progress – Ecology signed six loan agreements with local governments to finance comprehensive estuary conservation and management projects. The following Figure 3 shows the number of agreements and the type of projects.

Figure 3
Comprehensive Estuary Conservation And Management Projects

Number of Loan Agreements	Project Type
1	Stormwater Facility Construction
1	Wetland Acquisition
1	Creek Restoration
3	On-Site Sewer System Repair Program

7. Goal - To provide five low-interest loans to local governments to refinance debt obligations for municipally-owned water pollution control facilities.

Progress - Ecology signed five loan agreements with local governments to refinance debt obligations for municipally-owned water pollution control facilities.

8. Goal - To administer the SRF program and provide technical and financial assistance to loan recipients and potential applicants.

Progress - Ecology continues to administer the SRF program and provide technical and financial assistance to SRF recipients and potential applicants. Ecology's financial and project managers work closely with all recipients to help ensure water quality is improved and protected in the most cost-effective manner.

9. Goal – To continue working with EPA in implementing the SRF and to develop the FY 02 Intended Use Plan (IUP) and capitalization grant agreement.

Progress – Ecology submitted the SRF IUP to EPA in September 2001 for approval.

B. Long-Term Goals and Progress

1. Goal - To integrate, to the greatest extent possible, the SRF with the Centennial Clean Water Fund (Centennial), and the federal Clean Water Act Section 319 Nonpoint Source Program (Section 319) to maximize limited state and federal grant and loan funds to improve and protect the water quality of the state of Washington.

Progress - SFY 01 marked the sixth year that Ecology has used an integrated approach in offering financial assistance to local governments and Indian

tribes. This integrated approach includes administering the SRF, Centennial, and Section 319 programs funding cycles concurrently and leveraged funds together within the laws and limitations established by state and federal law. The integrated funding cycle has been well received by local governments and Indian tribes. It can provide applicants with a full funding package for their water quality projects. Ecology plans on using the integrated approach for future funding cycles.

Benefits of a combined funding cycle include:

- Cost savings.
- A single application for the three programs.
- One evaluation and selection process for all projects.
- Offer lists published in a single volume.
- Separate funding lists for the three programs.
- Merge/leverage limited funds.
- Simplify and streamline the funding cycle process.

The integrated process was recognized by Governor Gary Locke in a 1997 booklet entitled, "Governing for Results". The booklet, in part, discusses customer service improvements accomplished through the merging of the funding cycles. In addition, Governor Locke personally commended Ecology staff who worked on the integrated process as being innovative and creative.

2. Goal - To provide financial assistance to communities to achieve compliance with state and federal water pollution control requirements, implement nonpoint source pollution control programs, and develop and implement estuary conservation and management programs.

Progress – Ecology has aggressively pursued this goal by developing and implementing the SRF program to provide financial assistance to communities with water quality problems. Ecology has actively marketed the program through the development and distribution of a marketing brochure, a web site for all water quality funding programs, and SRF presentations at numerous meetings, conferences, and seminars.

In addition, Ecology has reserved, through state regulation, 20 percent of SRF funds for the implementation of nonpoint source pollution control programs and for the development and implementation of comprehensive estuary conservation and management programs. In SFY 01, Ecology signed binding commitments with one community in the nonpoint category and six in the estuary category.

Through SFY 01, Ecology signed 67 loans for a total of over \$30.7 million to help with nonpoint source pollution. Ecology plans to continue to promote the innovative use of SRF funds.

3. Goal - To protect public health and water quality, and to achieve overall improvement and protection of the environment.

Progress - Ecology continues to refine its rating and ranking process to achieve this goal. Ecology used a new evaluation process during the FY 00 funding cycle. This process was refined for the SRF FY 2001 funding cycle. The process incorporates changes from previous funding cycles, suggested by Ecology's external group, the Water Quality Financial Assistance Advisory Council (Council). The Council is comprised of representatives from many stakeholder groups which includes loan and grant recipients. The Council reviewed the previous evaluation and ranking process and identified areas where changes were needed. Ecology used these recommendations to develop the evaluation system used for the FY 01 funding cycle.

In their most important guidance, the Council recommended to continue using evaluation criteria with assigned point values. Ecology had used points in the past but had not used them for several funding cycles. In the revised system, evaluators assigned points for answers provided by applicants to questions in five categories. An additional category at the beginning of the questionnaire requests the applicant discuss the overall water quality problem and how the problem will be solved or addressed by the project. No points are assigned, but the answer serves as frame of reference for applicants and evaluators. The categories are:

- Overall water quality problem and how the problem will be solved or addressed by the project.
- Specific public health and water quality impairments caused by the problem and pollution prevention aspects. (Category total: 340 points)
- How the project addresses the water quality problem/ measures of success. (Category total: 340 points)
- Local initiatives taken to make the proposed project a success. (Category total: 120 points)
- State of Washington or Federal mandates that this proposed project addresses. (Category total: 100 points)
- Local Priority-Setting Process. (Category total: 100 points)

Ecology evaluated the proposals, assigned points, and used the points to develop a statewide priority list in numerical order. At their discretion, other state agency staff involved in water pollution control and public health provided funding recommendations to Ecology evaluators.

4. Goal - To encourage local governments to develop and implement projects which will prevent water quality degradation, including wetland protection projects.

Progress - The SRF program can be used to fund those projects that will prevent water quality deterioration and protect wetlands. In SFY 01, one loan agreement was signed with a local government for wetland preservation.

5. Goal - To assist communities with financial difficulties in meeting required public health and water quality standards while maintaining the health and perpetuity of the SRF according to federal law and guidance.

Progress - If a facilities project causes a community financial hardship, Ecology can give additional hardship assistance so that the project might be more affordable. This hardship assistance can include extending the term out to 20 years and lowering the interest rate as low as zero percent if needed. We are carefully monitoring our loan portfolio to ensure the perpetuity of the SRF program.

Financial hardship assistance may be available to loan recipients for the existing residential need portion of a water pollution control facility construction project if the project will cause a residential sewer user charge in excess of 1.5 percent of the median household income.

In SFY 01, six local governments were offered and accepted financial hardship assistance. They included Lewis County Water District No.2, the city of Shelton, Skamokawa Water and Sewer District, Skagit County, PUD No. 1 of Stevens County, and the town of Pe Ell.

6. Goal - To provide the type and amount of financial assistance most advantageous to communities, consistent with the long-term health of the fund.

Progress - The terms of SRF financial assistance are established and included in Chapter 6 of the program guidelines. However, after the guidelines were published Ecology evaluated the current SRF loan portfolio to determine if loan interest rates and terms could be reduced from the current level and still maintain the fund in perpetuity in accordance with federal law. The analysis showed that the fund was very robust and could remain so with much lower rates for FY 01.

In addition, the lower rates will have a positive impact on the water quality of the state, the fiscal health of small towns struggling to fund projects, and lower interest rates helped market the program. For example, during the SRF FY 2000 funding cycle approximately \$25 million was requested for projects by local governments, and this funding cycle over \$228 million was requested.

For FY 2001, the following terms are offered to applicants:

Repayment Period	Interest Rate
Up to five years:	0.5 percent
15 to 20 years:	1.5 Percent

In order to formally offer these lower interest rates, Ecology made minor changes to the rule governing the SRF program (Chapter 173-98 WAC). These changes created a simplified schedule for determining each year's interest rates and also allow the agency to further lower those rates when analysis shows that lowering the rates will not adversely affect the health of the SRF loan portfolio.

Applicants may be considered for financial hardship terms if their proposed projects would cause user charges to exceed 1.5 percent of the median household income. If Ecology determines that financial hardship exists, it may structure SRF agreements with terms to help keep user charges below the financial hardship level, if possible. Hardship terms may include lengthening the repayment period to a maximum of 20 years and/or adjusting the interest rate to as low as 0 percent.

To date, only 22.5 percent of the fund has been used for zero percent interest loans. The majority of the fund has been loaned for longer terms with higher interest rates based on the Bond Buyers Index. (See Exhibit 14)

7. Goal - To administer the SRF program so that the financial integrity, viability, and revolving nature are maintained in perpetuity.

Progress – Please see Long-Term Goals and Progress number 6.

8. Goal - To integrate local watershed planning legislation passed during the 1998 legislature in evaluating and prioritizing water quality project proposals. The local watershed planning approach to water quality management involves:

- Phase 1 - establishment of a watershed planning unit that includes representatives of state, county, and tribal governments located in one or more of the 62 water resource inventory areas of Washington State.
- Phase 2 – development of watershed assessments that address, where applicable, water quantity, instream flows, and habitat.
- Phase 3 – development of a watershed plan based on recommendations of watershed assessment and begin to implement water quality protection and prevention projects.

Progress – Ecology established a Local Prioritization Process in its evaluation system as a pilot for SFY 00. This process allowed local governments and Indian tribes to prioritize projects within their WRIA and assign points to projects. Due to the fact that only 16 out of 62 watershed planning units had been established at the beginning of SFY 00, Ecology decided to not include them as an option in the Local Prioritization Process. However, Ecology modified the Local Prioritization Process for SFY 01 that included as an option watershed planning units to prioritize projects in lieu of ad hoc groups.

IV. DETAILS OF ACCOMPLISHMENTS

A. Fund Financial Status

1. Binding Commitments

As shown in Exhibit 2, Ecology entered into twenty-three agreements in SFY 01 totaling \$36,992,281.

In addition to the \$36,992,281 described above, Ecology entered into one binding agreement for \$10,000,000 with a local government to help correct nonpoint pollution problems. These projects were funded in accordance with the goals of Section 319 of the CWA.

Ecology also entered into binding agreements for \$2,313,000 with local governments to finance six estuary management projects. These projects were funded in accordance with Section 320 of the CWA and are included in the “Washington Water Quality Management Plan to Control Nonpoint Source Pollution” dated April 2000.

Exhibit 4 shows binding commitments with respect to federal grant payments requested. The CWA requires that binding commitments for 120 percent of the federal grant payment be made within one year following the receipt of the federal grant payment. Exhibit 4 shows that Ecology met this requirement.

2. Sources of Funds

Exhibit 3 shows the sources of SRF funds by quarter for SFY 01. During the fiscal year, \$6,624,221 in payments were made through increases to the Letter of Credit (LOC). The state appropriated \$1,325,149.57 for the required 20 percent match. There was \$3,710,279.40 of interest earnings on the state match and bond moneys, and \$18,266,154.37 from repayments (including principal and interest). In addition, \$1,229,069.24 was earned through interest on loans during construction.

3. Disbursements and Guarantees

Exhibit 5 shows that during SFY 01 \$40,631,258 was disbursed to loan recipients for projects and to Ecology for program administrative costs. Exhibit 9 compares the actual and projected disbursements for SFY 01. Over the course of SFY 01 actual disbursements were approximately 97 percent of those projected. In the first quarter and second quarters actual disbursements exceeded the projection and in the third and fourth quarters projections exceeded actual expenditures. It is extremely difficult to estimate projected disbursements due to readiness to proceed and unexpected delays by the loan recipient. Ecology will continue to try to be more accurate in its cash flow projections by working closely with loan recipients.

4. Financial Statements

Exhibits 10 through 12 present the unaudited financial statements for the SRF program, including a balance sheet; statement of revenues, expenses and changes in fund balances; and statement of changes in financial position. The statements reflect financial activity for SFY 01 and SFY 00.

The balance sheet, Exhibit 10, presents the end-of-year balance between the assets of the fund and the liabilities of the fund, plus the fund equity (i.e. contributed capital plus the fund balance). The balance sheet shows total assets of \$343,450,735.78. These funds represent total current assets of \$83,806,411.21 and loans receivable of \$259,644,324.57.

The total current liabilities of the fund consist of \$420,075.36.

The total equity of the fund is \$343,030,660.42. This is comprised of contributions from the federal and state LOC's and the fund balance from Exhibit 11. Thus the total assets equal the sum of the total liabilities and fund equity on the balance sheet.

Exhibit 11 presents the Statement of Revenues and Expenses. On the revenue side, in SFY 01 the fund was comprised of \$3,628,270.11 in interest earned from investments and \$7,963,349.71 in interest earned on loans for total revenues of \$11,591,619.82. The expenditures of the Fund consisted of \$1,113,174.41 in program administration costs. The net fund balance for the year, which will be carried over to next year, was \$58,641,220.79.

This is the seventh year the SRF fund balance has been positive. In past years, a negative fund balance was expected due to the costs of program administration and the small amount of actual revenue earned from interest on loans and investments.

The Statement of Cash Flows, Exhibit 12, shows the net cash provided by operating activities, net cash provided by capital and related financing activities, and net cash used in investing activities. In SFY 01 there was net cash from operating activities of \$9,586,503.19, net cash provided by capital and related financing activities of \$7,951,735.57, and net cash used in investing activities of \$28,227,196.66. These three numbers equal cash and cash equivalents for the end of the year of \$68,930,856.69.

Ecology believes the financial statements provided in this annual report accurately reflect the financial condition of the SRF and illustrate the sound management of the fund by the state of Washington.

5. Credit Risk of the SRF

The SRF loan agreement requires a dedicated source of funds for repayment of the loan. Dedicated sources of revenue are a general obligation pledge or a revenue pledge. In addition, in the event of SRF loan default, state law enables Ecology to withhold any state funds otherwise due to the community and direct that such funds be applied to the indebtedness and deposited into the SRF account.

B. Financial Assistance Activity

Exhibit 1-3 and Exhibit 7 illustrate the level of financial activity of the fund for SFY 01.

Exhibit 1 details the communities and their respective projects that Ecology signed binding commitments with in SFY 01. The chart is separated into three sections: Part 1 lists the Section 212 Publicly Owned Treatment Works projects; Part 2 lists Section 319 Nonpoint Source Management projects; Part 3 lists Section 320 Comprehensive Estuary Conservation and Management projects; and Part 4 shows the binding commitment made to provide for program administration costs.

For each project, this exhibit shows the communities served, project number, grant or loan assistance amount, binding commitment or grant agreement date, construction start date, initiation of operation date, the type of assistance being provided, and the interest rate and maturity of all new loans.

Exhibit 2 shows a breakdown of binding commitment by quarter. Exhibit 3 illustrates the sources of SRF funds for SFY 01 broken down by quarter.

Exhibit 6 shows the SRF assistance amount provided to each Section 212, 319, and 320 projects by needs category.

C. Provisions of the Operating Agreement/Conditions of the Grant

Ecology negotiated with EPA and agreed to 22 conditions in the Operating Agreement or Grant Agreement. Eleven conditions have been met and need no further description and 11 conditions have been met and are more fully described below.

The following 11 conditions have been met as described in the operating agreement or the capitalization grant agreement:

1. Agreement to Accept Payments
2. State Laws and Procedures
3. State Accounting and Auditing Procedures
4. Recipient Accounting and Auditing Procedures
5. Use of the LOC
6. Repayments
7. Annual Audit
8. Annual Report
9. Annual Review
10. Anti-lobbying
11. Drug-Free Workplace

The following nine conditions have been met as described more fully below:

1. Provide a 20 Percent State Match

The State Treasurer deposited into the SRF a payment that always totaled at least 20 percent of the federal funds, on or before the date that the federal funds were deposited.

2. Binding Commitments

As described earlier, Exhibit 4 shows binding commitments with respect to federal grant payments requested. In SFY 90 - SFY 01, Ecology met the federal binding commitment requirement.

3. Expeditious and Timely Expenditure

In SFY 01, the state of Washington disbursed all cash draws and other available SRF funds in a timely and expeditious manner. Exhibit 1, "New Projects Receiving SRF Financial Assistance," shows the estimated construction start dates for projects. Ecology is monitoring the projects to ensure timely initiation of operations in accordance with the established schedules.

4. First Use of Funds For Enforceable Requirements

Ecology has met the first use requirement. All National Municipal Policy projects have been provided funding and have met enforceable requirements of the CWA or are proceeding in meeting the requirements.

5. Eligible Activities of the SRF

All projects funded were for eligible activities of the SRF.

6. MBE/WBE Requirement

All SRF recipients were required to follow MBE/WBE objectives according to federal and state law. Ecology will comply with the SRF Operating Agreement regarding the MBE/WBE requirement.

7. Other Federal Authorities

Ecology and all recipients of SRF funds have complied with mandates of applicable federal requirement authorities. Recipients of SRF assistance agreed to comply as they signed SRF financial assistance agreements.

8. State Environmental Review Process (SERP)

During SFY 01, Ecology conducted environmental reviews on all Section 212 projects proposed for funding in accordance with the State Environmental Review Process (SERP). All Section 212 projects funded were determined to be in compliance with the SERP.

9. Cash Draw Procedures

Exhibit 5 shows that \$40,631,258 was disbursed in SFY 01. It also details the draws for the federal and state shares and the federal share as a percent of disbursements.

- D. Amendments to the State Revolving Fund Rule, Chapter 173 98 WAC (Uses and Limitations of the Water Pollution Control Revolving Fund) and the Chapter 173-95A WAC (Uses and Limitations of the Centennial Clean Water Fund).

During SFY 01 Ecology staff revised both the SRF and Centennial rules. The revised rules will be used for SFY 02 and future funding cycles.

The SRF rule has worked well, but it needed to be updated in order to improve Ecology's flexibility in providing effective and efficient financial assistance to local governments and Indian tribes. Ecology had rescinded the Centennial rule several years ago and it was determined that program should be governed by rule rather than guidelines. The Reasons for updating the rules include:

- Simplify the SRF and Centennial programs
- Consistency and predictability of program requirements for local governments and tribes
- Help ensure the perpetuity of the SRF fund
- Timely award of SRF and Centennial funds
- Hillis Decision – Decision issued by the state supreme court that affects Ecology's water rights permitting process. The decision held that certain agency policies regarding water rights decision making should have been adopted as formal rules. Ecology has determined that when local governments are affected by Ecology decisions involving how permits are issued and how grant and loans are distributed, it needs to be in rule rather than in guidelines

Once the SRF and Centennial rules were adopted the two programs would be as cohesive as possible recognizing state and federal requirements. The revised SRF and Centennial rules became law on December 24, 2000.

The following Figure 4 shows the rules development timeline. The tables present a matrix of specific issues that were included in the adopted rules.

Final Matrix of Proposals for Specific Issues in SRF and Centennial Rule Development

This set of tables reflects final changes to the proposals for specific major issues for the SRF rule (Chapter 173-98 WAC) and Centennial rule (Chapter 173-95A WAC) amendments. The tables use the recommendations of the Financial Assistance Council (as discussed in five meetings between November, 1999 and August, 2000), changes based on public input during workshops in April, 2000, and the recommendations of Ecology staff and management. These recommendations are encompassed in the rule proposal as prepared for and filed September 20, 2000.

Table One: Administrative IssuesPage 19
Table Two: Financial IssuesPage 21
Table Three: Eligibility IssuesPage 25
Table Four: Summary of specific changes from current practice proposed for Chapter 173-95A WAC (Centennial Rule).....Page 26
Table Five: Summary of specific changes from current practice proposed for Chapter 173-98 WAC (SRF Rule)Page 26

Table One: Administrative Issues			
Issues	Final Proposals	In Centennial Rule	In SRF Rule
Funding cycle	Define minimum time periods, notices, etc. - exact dates not set (no change from current practice)	Section 040	Section 040
Evaluation system for applications	Retains and refines pilot system used in FY 2000 and FY 2001, specifies main headings and point share; individual questions may change with legislative priorities, etc.	Section 040	Section 040
Local prioritization system for applications	<ul style="list-style-type: none"> • Retains and refines pilot system used in FY 2000 and FY 2001 • States philosophy -- why we have local prioritization • Uses WRIAs as local prioritization area • Subcommittee will address further changes - more detail in annual guidelines 	Section 050	Reference to Centennial rule, no specific language in SRF rule
Timely use of funds	<ul style="list-style-type: none"> • Projects must be started within 16 months of the final offer list • Exceptions and exception process defined 	Section 100	Section 090

Table One: Administrative Issues

Issues	Final Proposals	In Centennial Rule	In SRF Rule
Project length	<ul style="list-style-type: none"> • Projects must be completed within 5 years of the final offer list • Allows extensions totaling no more than one year, when WQ Program Manager agrees that there is adequate reason • Adequate reasons are spelled out in the rule – examples might be a natural disaster, environmental window for in-stream work, or a mandate such as a compliance order 	Section 100	Section 090
Submittal timing and approval of prerequisite documents	Prerequisite documents must be approved by end of application cycle for project to be eligible for funding consideration. The draft documents must be sent at least 60 days prior to end of application cycle for approval by end of application cycle per Chapter 173-240 WAC	Section 080	Section 060
Signage on projects	Signage required on projects and other acknowledgement in published materials, etc., but not overly prescriptive	Section 110	Section 120
Growth Management Act	May not sign facilities funding agreements (except in cases of public health need or environmental degradation) with out-of-compliance public body until public body is in compliance with GMA (no change from current practice)	Section 070	Section 075
Coordination with other state and federal funding agencies and programs	Coordinate maximum funding amounts with other state and federal agencies	Section 110	n/a
Administration of other state and federal grant funding provided by the state legislature (or from other sources) to Ecology	Other grant funds will be managed in a manner consistent with the Centennial rule	Section 030	n/a

Table Two: Financial Issues

Issues	Final Proposals	In Centennial Rule	In SRF Rule
Affordability / financial hardship determination	<ul style="list-style-type: none"> • Rate 1.5 percent of MHI, but remove consideration of some factors not eligible for funding under our programs • Defendable O/M/R costs may be included in hardship consideration even though they are not eligible for funding • Use latest census data, inflated annually by Consumer Price Index 	Section 030	Section 030
Categories / set-asides	<p>Centennial:</p> <ul style="list-style-type: none"> • Amount equal to 1/3 of competitive funding is reserved for use by activities projects • Maximum of 2/3 for facilities construction projects where hardship has been shown, unless demand for the reserve is limited <p>SRF:</p> <ul style="list-style-type: none"> • Nonpoint source and estuary combined, so only two categories • No more than eighty percent from facilities category unless demand for funding in the other category is limited. 	Section 030	Section 050
Emergency funding	Centennial only: On case-by-case basis, identify available funds, or request permission from legislative staff to use deobligated funds (no change from current practice)	Section 040	n/a
In-kind goods and services as match for grants	<p>Activities: Allow all applicants to use any combination of in-kind and cash for match with \$250,000 ceiling amount but allow higher ceiling amounts (\$500,000) for activities grants when match is all cash</p> <p>Facilities: Only for STEP projects (no change from current practice)</p>	Section 030	n/a

Table Two: Financial Issues

Issues	Final Proposals	In Centennial Rule	In SRF Rule
Interest rates and loan terms	Interest rates based on market rate for tax-exempt municipal bonds (no change from current practice)	Section 030	Section 030
Coverage factor for loans	SRF loan recipients will no longer be required to include a coverage factor	n/a	Section 110
Selection and eligibility of facilities refinancing under SRF	<p>Defines two categories:</p> <ol style="list-style-type: none"> 1. Interim refinance (applicant went forward on own accord but project still in progress - for example, paid for design but project not constructed yet) <ul style="list-style-type: none"> • Treated like normal application 2. Refinance (project complete) <ul style="list-style-type: none"> • Shorter, simpler application • All project prerequisites must have been met at time of project, not retroactively • No Ecology debt will be refinanced • Funded only if there is limited demand for funding for other projects • Rank by financial capability • First payment is due six months from signed agreement 	n/a	Section 120

Table Two: Financial Issues

Issues	Final Proposals	In Centennial Rule	In SRF Rule
<p>Ceiling amounts and match for <u>activities</u> projects</p>	<p>Centennial:</p> <ul style="list-style-type: none"> • Grant ceiling amounts \$250,000 when matched with any combination of cash and/or in-kind; \$500,000 when match is all cash; 25 percent match • Loan ceiling amounts \$500,000, no match required <p>SRF:</p> <ul style="list-style-type: none"> • Loan ceiling amounts - half of estuary / nonpoint category 	<p>Section 030</p>	<p>Section 050</p>
<p>Ceiling amounts, grant eligibility, and match requirements for <u>facilities</u> planning, design, and construction projects under the Centennial fund</p>	<ul style="list-style-type: none"> • Facility construction loan-only except partial grant funding for construction projects in cases of financial hardship • No grants for growth, facilities design, site-specific planning, or comprehensive sewer / stormwater planning in any cases • No more than 50 percent of project cost, or \$5,000,000 (whichever is lower) from Ecology grant sources, then no more grants for the specific project for the life of the project • No more than one-third of competitive grant amount to any one project in a single fiscal year • Applicant receiving less than 50 percent of project cost, or less than \$5,000,000 (whichever is lower) in a single fiscal year will be given priority for the difference in subsequent fiscal years given that the applicant can show that the project is proceeding • No more than two-thirds of competitive grant amount for a fiscal year to all facility construction projects 	<p>Section 030 and Section 060</p>	<p>n/a</p>

Table Two: Financial Issues			
Issues	Final Proposals	In Centennial Rule	In SRF Rule
Ceiling amounts and match requirements for <u>facilities</u> planning, design, and construction projects under the SRF	Loan only, ceiling amounts are half of facilities category	n/a	Section 050

Table Three: Eligibility Issues

Issues	Final Proposals	In Centennial Rule	In SRF Rule
Private property improvements such as agricultural BMPs	Centennial only: As current but with more limited and clearly defined exceptions for demonstration projects	Section 060	n/a
Limitations on commercial / industrial / institutional (C/I/I) flows	<ul style="list-style-type: none"> • Loan-only in all cases • A maximum 30 percent of the Ecology share of the total eligible project cost may be intended for non-residential needs • Flows from primary and secondary schools are considered part of residential flow 	Section 060	Section 050
Previously funded objectives (projects addressing same needs as projects Ecology has funded in past)	<ul style="list-style-type: none"> • Ineligible for grants, eligible for loans (no change from current practice) • Will clarify and define in more detail in guidelines 	Section 060, also Section 030	n/a
Solid and hazardous waste, drinking water, flood control	Do not fund projects where primary focus is solid and/or hazardous waste, drinking water, or flood control (no change from current practice)	Section 060	Section 050
State agency projects	Do not fund state agency projects, except continuing to fund activity projects with state institutions of higher education when they are not part of the school’s statutory responsibilities	Section 060	Section 050
Stormwater facilities / activities	Clarifies eligibility, provides clearer guidance	Section 060	n/a

Table Four: Summary of specific changes from current practice proposed for Chapter 173-95A WAC (Centennial Rule)
“Approvable” prerequisite documents no longer accepted
Grant eligibility for construction of facilities no longer allowed unless hardship is shown
Ceiling amount raised for activities projects when match is all-cash; with lower ceiling amount all applicants may use in-kind for all of match
Ceiling amount raised for facilities projects when hardship is shown
Do not fund state agency projects, except continuing to fund activity projects with state institutions of higher education when they are not part of the school’s statutory responsibilities
Timely use of funds: Start project within 16 months of the final offer list, complete project within 5 years of the final offer list
Signage required on projects and other acknowledgement in published materials, etc.

Table Five: Summary of specific changes from current practice proposed for Chapter 173-98 WAC (SRF Rule)
“Approvable” prerequisite documents no longer accepted
Do not fund state agency projects, except continuing to fund activity projects with state institutions of higher education when they are not part of the school’s statutory responsibilities
Timely use of funds: Start project within 16 months of the final offer list, complete project within 5 years of the final offer list
Signage required on projects and other acknowledgement in published materials, etc.
Coverage factor no longer required for loans

E. Ecology Loan Tracking System.

1. Problem Statement

The SRF provides low-interest loans to local governments for projects that improve and protect the State's water quality. There is currently no automated system that adequately tracks the administration of these loans, currently totaling around \$400 million, or which provides for timely and accurate reporting of revenue status for short and long-term loan program management, or for reporting to policymakers and stakeholders.

For the past decade, loan agreement and financial detail has been entered and tracked in several non-integrated systems and paper files. These include Contracts & Grants Payable, Access databases and Excel spreadsheets in Water Quality and the Fiscal office, accounts payable paper files, accounts receivable paper files, AFRS (Washington State general ledger accounting system), Federal Grants Receivable system, Loan Amortization application, and Accounts Receivable system. Much of the same information is re-entered five or six times by as many staff. This has resulted in difficulties reconciling conflicting information, and a high time/labor cost in retrieval.

As more loans are now entering repayment stage, the need for ready access to accurate, actual and forecasted loan activity (repayment activity, in particular) has become critical.

The typical life of a loan ranges from five to 20 years. Transaction longevity, and the need to manage loan funds in perpetuity, make it necessary to develop a solution that better lends itself to the long-term integrity and retrievability of loan data.

2. Project Statement

The purpose of this project is to review and document Ecology's business rules for managing loans receivable and to automate the financial tracking of these loans by establishing a Loans Receivable System that meets Ecology's business requirements.

3. Estimated Project Duration

- Phase 1 – 11/15/2000 to 4/1/2001 (Phase 1 is complete)
- Phase 2 – 4/1/200 to 8/31/2001 (Phase 2 is complete)
- Phase 3 – 12/1/01 to 5/30/2002

- Phase 4 – 5/31/2002 to 8/13/2002
- Phase 5 – 8/14/2002 to 10/11/2002
- Phase 6 – 10/14/2002 to 12/13/02
- Phase 7 – 12/16/2002 to 1/29/03
- Phase 8 – 1/30/2003 to 4/29/2003

4. Estimated Project Cost:

\$948,021

5. Project Objectives

The project is intended to provide the following benefits.

- Updated business rules and processes associated with loans receivable
- Documented business requirements based on business rules
- A loans receivable system that supports long-term receivables administration, revenue tracking and forecasting, loan activity reporting and analysis, system maintenance and enhancement, and which is makes application and data readily available to any authorized Ecology employee
- Integration with existing Ecology Contracts & Grants Payable System, Cashiering, Loan Amortization application, Employee Plus Information Computer System (EPIC), Common Access Security System (CASA) and, to the extent possible, Office Of Fiscal Management's general ledger accounting system (AFRS). This integration eliminates most redundant data entry and associated reconciliation efforts, improves data quality, and speeds information retrieval.

6. Critical Success Factors:

- Executive management commitment and support
- Staff resources dedicated to the project
- Professional project management

- Phased implementation
- Scope management
- Post-implementation support
- Communication (regular meetings)
- Committed team
- Adequate funding and resources

7. Project Phases

The proposed project consists of 8 phases. Phase 1 and 2 are complete and staff are working on Phase 3.

Phase 1 –Preliminary Analysis, Scoping and Planning – Project planning and preliminary analysis

Deliverables:

- Project Authorization Package
- Statement of Work for Phase 2 – Analysis & Preliminary Design
- Business requirements
- Contractor selected to start Phase 2

Phase 2 – Analysis & Preliminary Design – Project planning, detailed analysis, development of data migration strategy, recommendations for system architecture.

Deliverables:

- Architectural recommendation
- Documented business use cases and preliminary business rules for new system
- Updated business requirements and priorities
- Preliminary data dictionary
- Preliminary inventory of reports and screens
- Data migration strategy
- Project plan for remainder of project, including risk identification and mitigation strategies
- Cost and resource estimates for the remainder of project
- Statement of Work and Contractor selected for remainder of project, assuming implementation is approved

Phase 3 – Detail Design

Deliverables:

- Screen and report layout and specifications
- Process specifications
- Updated data dictionary
- Database entity relationship diagram
- Detailed business rules
- Conceptual class diagrams, activity diagrams as applicable to selected architecture.
- Detailed data migration plan and updated project plan
- Project team signoff on design

Phase 4 – Construction – Construction iterations are time-boxed and include analysis, design, prototyping, coding, unit testing, test data, integration and documentation. User demonstrations are done at the end of each iteration, and remaining use case iteration assignments and time estimates are re-evaluated.

Deliverables:

- Updated data dictionary and database entity relationship diagram
- Test dataset(s) and acceptance test plan(s)
- Project team signoff for each construction iteration demonstration
- Draft user documentation
- Draft system documentation
- Lessons learned

Phase 5 – Data Migration – Concurrent with Phases 4, 6, 7

Deliverables:

- Data validation report(s)
- Lessons learned
- Project team signoff on data validation

Phase 6 – User Testing & Acceptance, Training

Deliverables:

- Lessons learned
- Project team signoff on system functionality

Phase 7 – Transition to Production

Deliverables:

- Updated system documentation
- Updated user documentation
- Future enhancements list
- Lessons learned
- Project team signoff on transition to production

Phase 8 – Ongoing Maintenance

8. Project Organization

Project Sponsors: Megan White, Water Quality Program; Nancy Stevenson, Financial Services

Project Steering Committee: Carol Fleskes, Nancy Stevenson, Debbie Stewart, Megan White, Gary Zeiler, Steve Carley

Ecology Project Manager: Kreighan McAuliffe, Applications & Data Services

Contractor Project Manager: To be determined.

Business Leads: Brian Howard, Water Quality Program; Bernadette Williams, Fiscal Office

Business Team: Steve Carley, Jon Peterson, Brian Howard, Tammy Riddell, Patty Warren, Gordon Wiggerhaus, Bernadette Williams, Jim Massaia, Cheryl Hanson

Ecology Systems Analyst/Technical Lead: Kreighan McAuliffe, Applications & Data Services, Ed Loft, Logical Senior Consultant

Technical Team: Kevin Barbee and Randy Moore, Miles Neale, and Michael Heiser

Section 319 Projects	\$10,000,000					
Section 320 Projects	<u>\$2,313,000</u>					
Sub Total:	\$49,305,281					
Program Administration	<u>\$1,870,356</u>					
Total:	\$51,175,637					

Notes:

1. Projects complying with federal cross-cutting authorities = \$36,992,281
2. Between SFY 90 - SFY 00, there were a total of \$326,284,793 in binding commitments signed. This amount does not include program administration. Cumulative binding commitments include projects underway as well as completed projects that did not use all funds encumbered and were consequently deobligated and will be offered to eligible communities the next funding cycle. Cumulative binding commitments also includes completed projects that used all funds encumbered. Cumulative binding commitments do not include deferred interest or interest on the principal through the term of the loan.
3. Five binding commitments were for refinancing municipal wastewater debt.

1. Organization of the Fund

Washington's Water Pollution Control Revolving Fund (the Fund) was established pursuant to Title VI of the Federal Water Quality Act of 1987 (the Act). The Act established the State Revolving Fund (SRF) program to replace the construction grants program. The SRF provides loans at reduced interest rates to finance the entire cost of qualified projects for the construction of publicly owned water pollution control facilities, nonpoint source pollution control projects, and development of estuary conservation and management plans. Loans made by the Fund must be repaid within 20 years, and all repayments, including interest and principal, must be credited to the Fund.

The Fund was capitalized by a series of grants from the U.S. Environmental Protection Agency (EPA) starting in 1989. States are required to provide an additional 20 percent of the Federal capitalization grant amount as matching funds in order to receive the grant from EPA. As of June 30, 2001, EPA awarded approximately \$295,752 in capitalization grants to the State, and the State is required to provide \$59,150 to the Fund as its matching share. The State match is transferred to the Fund from the State's Centennial Clean Water Fund at time of cash draw.

The Fund is administered by the Washington State Department of Ecology (WDOE) through the Water Quality Program Office (the Program). The Program's primary responsibilities for the SRF includes obtaining capitalization grants from EPA, soliciting potential interested parties, negotiating loan agreements with local communities, reviewing and approving payment requests from loan recipients, managing the loan repayments, and conducting inspection and engineering reviews to ensure compliance with all applicable laws, regulations, and program requirements.

The Fund does not have any full-time employees. WDOE charges the Fund for time spent on SRF activities by its employees, and the Fund reimburses WDOE for such costs in the following month. The charges include the salaries and benefits of the employees, as well as indirect costs allocated to the Fund based on direct salary costs. Employees charging time to the Fund are covered by the benefits available to Washington State Employees. The Fund is also charged indirect costs through the cost allocation plan for general state expenses.

The Fund is included in the state of Washington's general purpose financial statements as an expendable trust fund, which uses the modified accrual basis of accounting. Due to differences in reporting methods, there may be differences between the amounts reported in these financial statements and the general purpose financial statements.

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements for the Fund are presented as a nonexpendable trust fund which uses the accrual basis of accounting whereby revenues are recorded as earned and expenses are recorded when the liability is incurred. The State has elected to follow the accounting pronouncements of the Governmental Accounting Standards Board (GASB), as well as statements issued by the Financial Accounting Standards Board on or before November 30, 1989, unless the pronouncements conflict with or contradict GASB pronouncements.

Cash and Cash Equivalents

All moneys of the Fund are deposited with the State Treasurer's Office, and are considered cash. According to State law, the Treasurer is responsible for maintaining the cash balances and investing excess cash of the Fund. Consequently, management of the Fund does not have any control over the investment of the excess cash. The statement of cash flows considers all funds deposited with the Treasurer to be cash or cash equivalents, regardless of actual maturities of the underlying investments.

Loans Receivable

WDOE operates the Fund as a direct loan program which makes loans to communities through funding by the Federal capitalization grant for 83.3 percent of the loan amount, and funding by State matching for 16.7 percent of the loan amount. Loan funds are disbursed to the local agencies after they expend funds for the purposes of the loan and then request reimbursement from the Fund. Interest is calculated from the date the funds are disbursed. After the final disbursement, the loan amount and repayment schedule are adjusted for actual funds disbursed and interest accrued during the project period. No provision for uncollectible accounts has been made as all loans are current, and management believes that all loans will be repaid according to the loan terms.

Contributed Capital

In accordance with generally accepted accounting principles (GAAP), funds received from EPA and, Washington State for the capitalization of the Fund are recorded as contributed capital, as discussed in Note 4.

Reclassifications

Certain amounts in the 2000 unaudited financial statements have been reclassified to conform to the presentation in the 2001 financial statements.

ATTACHMENT 1
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2001
(in thousands)

3. Loans Receivable

The Fund makes loans to qualified agencies for projects that meet the eligibility requirements of the Clean Water Act. Loans are financed by capitalization grants, state matches and revolving funds. The interest rate is established at 75 percent of the Bond Buyers Index for 15- to 20-year loans and 60 percent of the index for 6- to 14-year loans. For the year ended June 30, 2001 interest rates varied between 0.5 and 1.5 percent. The Fund also makes zero interest rate loans for communities that meet specific financial hardship criteria. The repayment period can be extended to 20 years in situations that cause severe financial hardship to the community. As of June 30, 2001, the Fund had made 35 zero interest rate hardship loans for approximately \$53 million. Loan repayments are required to start one year after project completion. Details of loans receivable as of June 30, 2001 are summarized below:

Loans by Category:

Loans receivable by project status at June 30, 2001 are as follows:

	<u>Loan Authorized</u>	<u>Remaining Commitment</u>	<u>Outstanding Balance</u>
Completed projects	\$ 242,656	\$ 0	\$ 191,016
Projects in progress	<u>127,680</u>	<u>49,216</u>	<u>80,637</u>
Totals	<u>\$ 370,336</u>	<u>\$ 49,216</u>	271,653
Less amount due within one year			<u>12,009</u>
Loans receivable, June 30, 2001			<u>\$ 259,644</u>

Loans mature at various intervals. The scheduled minimum principle repayments on completely disbursed loans in subsequent years are as follows:

Year ending June 30:	<u>Amount</u>
2002	\$ 12,009
2003	11,958
2004	11,284
2005	9,611
2006	9,530
Thereafter	<u>122,900</u>
	<u>\$ 177,292</u>

3. Loans Receivable (continued)

Loans to Major Local Agencies:

As of June 30, 2001, the Fund made loans to the following four major local agencies. The aggregate outstanding balance for each of these agencies exceeds \$5 million. The outstanding balances of these loans represent approximately 72 percent of the total loans receivable.

<u>Agency</u>	<u>Authorized Loan Amount</u>	<u>Project Period Interest</u>	<u>Loan Amount At Completion</u>	<u>Outstanding Balance</u>
City of Burlington	\$ 5,500	\$ 294	\$ 5,687	\$ 5,687
City of Camas	9,292	720	10,012	9,845
Douglas County	7,239	570	7,809	7,413
City of Ephrata	5,892	0	5,879	5,581
City of Kennewick	9,393	670	10,064	9,360
King Co. Dept Nat Resources	13,838	0	13,383	13,146
Mason County	11,623	53	10,768	10,618
Metro Seattle/King County	48,800	8,213	57,013	45,516
City of Olympia	36,580	0	36,580	29,061
City of Pasco	23,700	2,346	25,072	23,293
City of Puyallup	13,625	780	14,405	14,333
City of Snohomish	10,855	0	10,855	8,330
City of Walla Walla	<u>13,780</u>	<u>830</u>	<u>14,576</u>	<u>14,378</u>
Total	<u>\$ 210,117</u>	<u>\$14,476</u>	<u>\$222,103</u>	<u>\$196,561</u>

The loan amount at completion may not agree with the authorized loan amount plus capitalized project period interest. Communities may elect to pay capitalized project period interest separately or add the amount to the final loan amount. Further, the authorized loan amount is based on estimates, and final project costs may be different than estimated.

4. Contributed Capital and Fund Balance

The Fund is capitalized by grants from the EPA authorized by the Clean Water Act and by matching funds from the State. All funds drawn are recorded as contributed capital from the EPA and Washington State. As of June 30, 2001, the EPA awarded capitalization grants of \$295,752 to the State, of which \$236,928 has been drawn for loans and administrative expenses. The State has provided matching funds of \$59,150. The following summarizes the capitalization grant awarded, amounts drawn on each grant as of the balance sheet date, and balances available for future loans:

	Grant	Draws through June 30,	June 30,	Draws June 30,	Available June 30,
	Amount	2000	2001 Draws	2001	2001
1989-1991	\$ 70,278	\$ 70,278	\$ 0	\$ 70,278	\$ 0
1992	33,789	33,789	0	33,789	0
1993	33,425	33,425	0	33,425	0
1994	20,740	20,740	0	20,740	0
1995	21,420	21,420	0	21,420	0
1996	22,509	21,876	633	22,509	0
1997	23,415	22,635	253	22,888	527
1998	23,417	6,141	5,738	11,879	11,538
2000	46,759	0	0	0	46,759
Totals	<u>\$ 295,752</u>	<u>\$ 230,304</u>	<u>\$ 6,624</u>	<u>\$ 236,928</u>	<u>\$ 58,824</u>

As of June 30, 2001, State matching contributions were:

	June 30, 2000	2001 Contribution	June 30, 2001
Washington State Matching Contributions	<u>\$ 46,052</u>	<u>\$ 1,325</u>	<u>\$ 47,377</u>

5. Contingencies and Subsequent Events

Contingencies

The Fund is exposed to various risks of loss related to torts, thefts of assets, errors or omissions, injuries to state employees while performing Fund business, or acts of God.

The Fund maintains insurance for all risks of loss which is included in the indirect costs allocated to the Fund. There have not been any claims against the Fund since its inception in 1989 and no contingencies came to our attention during our audit which requires disclosure or accrual under Statement of Financial Accounting Standards No. 5.

The Fund is contingently liable to EPA for approximately \$98,000 (Federal share) resulting from a compliance issue raised by the Office of the Inspector General. The matter involves charges made to the Fund for inadequately documented administrative costs. The Office of the Inspector General has questioned the costs as inadequately documented, however, the ultimate resolution of this matter will be determined by EPA program officials. In the opinion of management, the final resolution of this matter will not have a material effect on the financial position of the Fund.

Subsequent Events

No events occurring subsequent to the balance sheet date which require adjustment to, or disclosure in, the financial statements came to our attention.
