

Site Register

April 29, 2003

Department of Ecology, P.O. Box 47600, Olympia WA 98504-7600

Issue 97-23

This periodic publication alerts the public to the availability of reports, public comment periods, and other activities related to the study and cleanup of hazardous waste sites under Chapter 70.105D RCW, the MODEL TOXICS CONTROL ACT, and in accordance with WAC 173-340-600. Direct questions regarding SITE REGISTER circulation to Sherrie Minnick at (360) 407-7200 or shan461@ecy.wa.gov. Ecology's telecommunications device for the deaf (TDD) numbers are: Headquarters (360) 407-6006, Southwest Regional Office (360) 407-6306, Northwest Regional Office (425) 649-4259, Central Regional Office (509) 454-7673, Eastern Regional Office (509) 458-2055. The Department of Ecology is an Equal Opportunity and Affirmative Action Employer.

Publication #03-09-041(I)

Department of Ecology Model Toxics Control Act (MTCA) Science Advisory Board Meeting

The MTCA Science Advisory Board provides advice to Ecology with respect to scientific issues related to the implementation of MTCA. Its next meeting will be held on Wednesday, May 21. The public is welcome to attend.

When: May 21, 2003

Where: Park Place Building
1200 6th Avenue
15th Floor, Denali Rooms
Seattle WA

**Visitors must register at the 14th floor reception desk.*

Time: 12:30 p.m. – 5:00 p.m.

Agenda: To be announced

Information: Contact Dawn Hooper at (360) 407-7182 or e-mail dhoo461@ecy.wa.gov.

Additional information is available on Ecology's Web Site at www.ecy.wa.gov/programs/tcp/cleanup.html

Public Comment Period Extended – US Army Camp Bonneville, Remedial Action Unit 1, Remedial Action Unit 2, and Remedial Action Unit 3, Facility Site ID No. 5093080, Facility Site ID No. 9420069, Facility Site ID No. 5125990, Proebstel, Clark County

Ecology and the US Army are *proposing an Enforcement Order* to investigate and clean-up the Camp Bonneville site, located approximately five miles from the Vancouver city limits. The public comment period to review and comment on the Enforcement Order has been extended through May 15, 2003.

The Enforcement Order is available for review at the following locations:

- Vancouver Mall Public Library, 8700 NE Vancouver Mall Drive, Suite 285, Vancouver
- Department of Ecology, 300 Desmond Drive, Lacey, (360) 407-7224
- http://www.ecy.wa.gov/programs/tcp/sites/camp_bonneville/camp_bonneville_hp.htm

For more information or to submit written comments, please contact Ben Forson, Site Manager, at the Department of Ecology, PO Box 47600, Olympia WA 98504-7600, (360) 407-7227, e-mail bfor461@ecy.wa.gov.

PUBLIC COMMENT PERIOD: Through May 15, 2003

SITE HAZARD ASSESSMENTS

If it is determined that further work is required at a site after an initial investigation, a site hazard assessment may be conducted at the site that provides Ecology with basic information about the site. With that information, the Washington Ranking Method is used to estimate the potential threat the site poses, if not cleaned up, to human health and the environment.

Site hazard assessments will be conducted on the below-named sites. Their hazard ranking or determination of No Further Action will be published in the August 2003 Hazardous Sites List.

Douglas County – Contact Michael Spencer, Department of Ecology, (360) 407-7195
Waterville Water Wells, Facility Site ID No. 372, Waterville, 98858

Kittitas County – Contact Michael Spencer, Department of Ecology, (360) 407-7195

Carlson Distributing Co., Facility Site ID No. 768, Colville Branch Road, Colville, 99114

Proposed Delisting from Hazardous Sites List Available for Public Review & Comment – *Black Tie Formal Wear Lynnwood, Facility Site ID No. 46195557, 18027 Highway 99, Lynnwood, 98037, Snohomish County*

Ecology is *proposing to remove* the former Black Tie Formal Wear site from its Hazardous Sites List. The site is ranked a “5” on the list. A rank of “1” is the highest level of concern compared to other sites on the list, and a rank of “5” is the lowest.

From 1985 to 2000, tuxedos were dry cleaned and warehoused at the site. In the process, chemicals were released into the soil and ground water.

The cleanup involved installing a soil vapor extraction system beneath the building to remove the chemicals as vapors. The ground water was sampled quarterly for two years. It has been in compliance with state cleanup standards since October 2001.

Based on sampling results, Ecology has determined the site no longer poses a threat to human health or the environment and is proposing to remove the site from the Hazardous Sites List.

Documents are available for review at the Department of Ecology, Northwest Regional Office, 3190 160th Ave. SE, Bellevue WA 98008. Please call (425) 645-7190 for an appointment.

For more information or to submit written comments, please contact Brian Sato, Site Manager, at the Ecology address listed above or at (425) 649-7265, e-mail bsat461@ecy.wa.gov.

PUBLIC COMMENT PERIOD: 4/25/03 – 5/24/03

Agreed Order and Work Plan for Remedial Investigation/Feasibility Study Available for Public Review & Comment – *Rayonier Mill, 700 N. Ennis, Port Angeles, 98362, Clallam County*

Rayonier, Inc., the Lower Elwha Klallam Tribe, and Ecology have prepared an *Agreed order* and *Work Plan* to implement a Remedial Investigation/ Feasibility Study at the upland portion of the former Rayonier Mill site. These documents are available for public review and comment through May 7, 2003.

The purpose of the Remedial Investigation is to determine the nature and extent of the contamination in soil, surface water, ground water, and fresh water sediments. With that information, a Feasibility Study will be prepared to develop and evaluate alternatives for cleaning up the site.

The Agreed Order and Work Plan are available for review at the following locations:

- North Olympic Library, Reference Desk, 2210 S. Peabody St., Port Angeles
- Peninsula College Library, 1502 E. Lauridsen, Port Angeles
- Department of Ecology, 300 Desmond Drive, Lacey, (360) 407-6365 or swal461@ecy.wa.gov

For more information or to submit written comments, please contact Bill Harris, Site Manager, at the Department of Ecology, PO Box 47775, Olympia WA 98504-7775 or (360) 407-6253 or whar461@ecy.wa.gov.

PUBLIC COMMENT PERIOD: 4/7/03 – 5/7/03

Proposed Delisting from Hazardous Sites List Available for Public Review & Comment – Sound Battery, Facility Site ID No. 1247, 2310 E. 11th St., Tacoma, 98421, Pierce County

Ecology is *proposing to remove* the Sound Battery site from its Hazardous Sites List. This site is a state-lead Model Toxics Control Act (MTCA) site that discharges to the Commencement Bay Superfund site. Site hazard assessments were not conducted on sites that discharge to the Commencement Bay Superfund site. Instead, they were given a rank of “0” indicating Ecology considers them high priority for cleanup due to their relationship to the Commencement Bay site.

Sound Battery has been a manufacturer of lead-acid batteries since 1946. The 1/10-acre site had lead contamination above cleanup standards in site soil and ground water.

The cleanup included excavating lead-contaminated soil, sampling soil to confirm that cleanup goals had been met, mixing the soil with a liquid to bind the lead to the soil so that it would not leach, testing and then properly disposing of the soil at a solid waste landfill, backfilling excavated areas with clean soil, protecting Sitcum Waterway from discharge during excavation, and monitoring ground water quarterly.

As a result of the cleanup efforts taken and subsequent sampling results, Ecology has determined the site no longer poses a threat to human health and the environment and is proposing to remove the site from the Hazardous Sites List.

Supporting documentation may be reviewed at the following locations:

- Department of Ecology, Southwest Regional Office, 300 Desmond Drive, Lacey, (360) 407-6365
- Citizens for a Healthy Bay, 917 Pacific Avenue Suite 406, Tacoma, (253) 383-2429
- Tacoma Public Library-Main Branch Northwest Room, 1102 Tacoma Avenue South, Tacoma, (253) 591-5666

For more information or to submit written comments, please contact Guy Barrett, Site Manager, at the Department of Ecology, Southwest Regional Office, PO Box 47775, Olympia WA 98504-7775 or (360) 407-7115, e-mail gbar461@ecy.wa.gov.

PUBLIC COMMENT PERIOD: 4/21/03 – 5/21/03

Enforcement Order, Cleanup Action Plan, and State Environmental Policy Act (SEPA) Determination of Non-Significance (DNS) Available for Public Review & Comment – *Priceless Gas, 1110 Morgan Street, Davenport, 99122, Lincoln County*

Ecology is proposing an *Enforcement Order* to Merit Truck Stop, Inc. to address petroleum-contaminated soil and ground water at the former Priceless Gas site.

Up until 1998, when four underground storage tanks were closed at the site, the property was used to house a retail gas station and convenience store. Releases or spills from the underground storage tanks contaminated the soil and ground water.

The draft Cleanup Action Plan, which is based on information gathered during the Remedial Investigation/Feasibility Study, describes the cleanup that has been proposed for the site and outlines other requirements necessary to complete the work. The following cleanup actions are proposed:

- Recover gasoline found on the ground water;
- Install a trench to intercept and treat contaminated ground water;
- Remove petroleum-contaminated soils encountered during site work;
- Backfill excavated areas with clean fill;
- Grade and compact soils;
- Use institutional controls to control access and potential exposure to contaminated soils and ground water;
- Long-term monitoring of ground water at existing monitoring wells.

Ecology has determined the actions will not have an adverse impact on the environment and has issued a SEPA DNS. This means an Environmental Impact Statement is not required.

The Enforcement Order, draft Cleanup Action Plan, and SEPA DNS and Checklist are available for review at the following locations:

- Department of Ecology, Eastern Regional Office, 4601 North Monroe, Spokane WA 99205
- Davenport Public Library, 411 Morgan, Davenport

For more information or to submit written comments, please contact Michael Boatsman, Site Manager, at the Ecology address listed above or at (509) 329-3492, e-mail mboa461@ecy.wa.gov.

PUBLIC COMMENT PERIOD: 4/24/03 – 5/23/03

Agreed Order and State Environmental Policy Act (SEPA) Determination of Mitigated Non-Significance (MDNS) Available for Public Review & Comment – *Bellingham Port Weldcraft Site (also known as Weldcraft Steel & Marine Bellingham Bay, Gate 2 Boatyard, and Seaview Boatyard North), Facility Site ID No. 29583133, 9 Squalicum Way, Bellingham, 98225, Whatcom County*

Ecology and the Port of Bellingham are *proposing an Agreed Order to implement an Interim Action and Remedial Investigation/Feasibility Study* at the sediments area of the Port of Bellingham Weldcraft site. The site is located on Port of Bellingham property and is adjacent to Squalicum Harbor.

The Weldcraft facility was established in 1946 and has been primarily used as a boatyard since then. It is one of 12 cleanup sites around Bellingham Bay identified through the Bellingham Bay Demonstration Pilot Project.

Sampling conducted at the site over the past several years has confirmed the presence of metals, mercury, and tributyltin (a pesticide) in sediments. Diesel, gasoline constituents, and lead are the chemicals of concern in the upland area of the site.

The actions proposed in the Interim Action include cleaning up contaminated sediments, removing an inactive marine railway and creosote pilings, and using material dredged from Squalicum Waterway to construct a new habitat enhancement area on the outside face of the breakwater for Squalicum Harbor. Redevelopment will occur simultaneously. Following completion of the Interim Action, a Remedial Investigation/Feasibility Study will be conducted to determine the effectiveness of the Interim Action and the nature and extent of remaining contamination. The upland area of the site will be addressed at a later time.

The Port of Bellingham has determined that, with mitigation measures, the proposed Interim Action will not have an adverse impact on the environment and has issued a SEPA MDNS.

Open House & Public Meeting: Ecology will be hosting an Open House and Public Meeting to discuss the proposed actions.

Date: Thursday, May 15
Time: Open House – 6:30 to 7:00 p.m.
Public Meeting – 7:00 to 9:00 p.m.
Location: Port of Bellingham, 1801 Roeder Avenue, Bellingham WA

Documents are available for review at the following locations:

- Department of Ecology, Bellingham Field Office, 1204 Railroad Avenue, Suite 200, Bellingham WA 98225
- Bellingham Public Library, 210 Central Ave., Bellingham
- Department of Ecology, Northwest Regional Office, 3190 160th Ave. SE, Bellevue
- Ecology's Web Site: www.ecy.wa.gov/programs/tcp/sites/sites_information.html

For more information or to submit written comments, please contact Mary O'Herron, Site Manager, at Ecology's Bellingham Field Office address or at (360) 738-6246, e-mail mohe461@ecv.wa.gov.

PUBLIC COMMENT PERIOD: 4/29/03 – 5/28/03

Proposed Delisting from Hazardous Sites List Available for Public Review & Comment – *Dorman Tire Yard Fire (also known as Dorman Tire Fire), Facility Site ID No. 1297, 35704 Kinsman Road East, Roy, 98580, Pierce County*

Ecology is *proposing to remove* the Dorman Tire Yard Fire site from its Hazardous Sites List. The site is ranked a “2” on the list. A rank of “1” is the highest level of concern compared to other sites on the list, and a rank of “5” is the lowest.

The Dorman Tire Yard Fire site is situated in a rural area and is over 11 acres in size. It borders homes to the north, a wetland to the south, Kinsman Road to the west, and a tree farm to the east.

In the 1970s, the former owners used the property to store tires. They also stored tires on parts of neighboring properties, including the wetland. At that time, the tire pile was the second largest in the state. In addition to tires, the former owners stored miscellaneous materials (transformers, scrap wood) on the property.

In 1976 and 1982, the tires caught fire. As a result of the 1982 arson fire, over 3 million tires burned over five months. Nearly 2,000 tires remained and ended up in berms and ash piles around the site.

In 1994, Ecology removed about 1.8 million unburned tires from the site. Last fall, Ecology removed and disposed of over 6,200 tons (about 435 truck loads) of melted tires and contaminated soil, ash, and debris.

As a result of the cleanup actions and subsequent sampling results, Ecology has determined the site no longer poses a threat to human health or the environment and is proposing to remove the site from the Hazardous Sites List.

Supporting documentation may be reviewed at the following locations:

- Department of Ecology, Southwest Regional Office, 300 Desmond Drive, Lacey, (360) 407-6365
- Pierce County Library, Graham Branch, 9202 224th St. E., Graham, (253) 847-4030
- Pierce County Library, Parkland/Spanaway Branch, 13718 Pacific Ave. S., Tacoma, (253) 531-4656

For more information or to submit written comments, please contact Guy Barrett, Site Manager, at the Department of Ecology, Southwest Regional Office, PO Box 47775, Olympia WA 98504-7775 or (360) 407-7115, e-mail gbar461@ecy.wa.gov.

PUBLIC COMMENT PERIOD: 4/21/03 – 5/21/03

**Proposed Delisting from Hazardous Sites List Available for Public
Review & Comment – Robert Rosch Property, Facility Site ID No. 1271, 30220
72nd Ave. S., Roy, 98580, Pierce County**

Ecology is *proposing to remove* the Robert Rosch Property site from its Hazardous Sites List. The site is ranked a “1” on the list. A rank of “1” is the highest level of concern compared to other sites on the list, and a rank of “5” is the lowest.

Former owner, Robert Rosch, stored large amounts of chemicals, oils, paints, and unknowns on the 18-acre property. Dangerous and hazardous wastes were also stored on the property. As a result, the soil and ground water became contaminated with diesel, oil, and metals (lead, cadmium, and chromium).

In 1984, Ecology and the Tacoma-Pierce County Health Department removed and disposed of the dangerous waste. Usable and recyclable items were sold in 1989. In 1994, the remaining hazardous waste was removed. In 2000, all non-recyclable solid waste was removed and 2,500 cubic feet (250 truck loads) of contaminated soil was removed and disposed.

As a result of the cleanup efforts taken and subsequent sampling results, Ecology has determined the site no longer poses a threat to human health and the environment and is proposing to remove the site from the Hazardous Sites List.

Documents may be reviewed at the following locations:

- Department of Ecology, Southwest Regional Office, 300 Desmond Drive, Lacey, (360) 407-6365
- Pierce County Library, Graham Branch, 9202 224th St. E., Graham, (253) 847-4030
- Pierce County Library, Parkland/Spanaway Branch, 13718 Pacific Ave. S., Tacoma, (253) 531-4656

For more information or to submit written comments, please contact Bob Warren, Site Manager, at the Department of Ecology, Southwest Regional Office, PO Box 47775, Olympia WA 98504-7775 or (360) 407-6361, e-mail rwar461@ecv.wa.gov.

PUBLIC COMMENT PERIOD: 4/21/03 – 5/21/03

Proposed No Further Action (NFA) Determination for Soil Available for Public Review & Comment – Klickitat Valley Sawmills, Facility Site ID No. 32313865, 92 Main St., Klickitat, 98628, Klickitat County

Ecology and Klickitat County *are recommending that the soil* at the Klickitat Valley Sawmills site receive a No Further Action determination. Because residual amounts of petroleum-contaminated soil were left in-place beneath existing structures and pavement, it is also recommended that a Restrictive Covenant be placed on the property deed so the contaminated soil will not be disturbed. The site is ranked a “2” on the Hazardous Sites List. A rank of “1” is the highest level of concern compared to other sites on the list, and a rank of “5” is the lowest.

In July 2002, 529 cubic yards of petroleum- and lead-contaminated soil were removed and 11 ground water monitoring wells were sampled. The ground water sampling results revealed that one well contained diesel concentrations above state cleanup standards and various wells contained arsenic above state standards.

In addition to the No Further Action determination for soil, Ecology and Klickitat County are proposing that the ground water be monitored twice a year for a minimum of two years.

Documentation is available for review at the following locations:

- Goldendale Community Library, 131 Burgen St., Goldendale
- Klickitat Chevron, Main Street, Klickitat
- Department of Ecology, Central Regional Office, 15 W. Yakima Ave., Suite 200, Yakima WA 98902

For more information or to submit written comments, please contact Antonio Valero, Site Manager, at the Ecology address listed above or at (509) 454-7840, e-mail aval461@ecv.wa.gov.

PUBLIC COMMENT PERIOD: 4/24/03 – 5/27/03

**Engineering Design Report and Substantive Permit Requirements
Available for Public Review & Comment – *Hamilton Street Bridge (formerly
the Spokane Manufactured Gas Plant site and the American Tar Company site),
Facility Site ID No. 84461527, 111 N. Erie Street, Spokane, 99202, Spokane County***

The *Engineering Design Report* for the Hamilton Street Bridge site is available for public review and comment through May 6, 2003. This report, a requirement of a Consent Decree between Ecology, Avista Corporation, and Burlington Northern and Santa Fe Railway Company, provides design details necessary to accomplish cleanup at the site. It also includes a Compliance Monitoring Plan, which outlines the sampling and monitoring to be performed during and after cleanup; a Health and Safety Plan; and an Institutional Controls Plan, which describes ways to limit or prohibit activities at the site as a result of cleanup actions.

Draft Substantive Permit Requirements are also available for review. Cleanup actions conducted under a Consent Decree are exempt from the procedural requirements of state and local permits but “shall meet all substantive requirements of required permits” (RCW 70.105D.090). After consulting with appropriate state and local agencies, Ecology has identified the substantive requirements for these permits and will ensure they are complied with during implementation of the cleanup.

Contaminants associated with manufactured gas plant processes and/or coal tar processing have been found in site soils as deep as 80 feet. The contaminants include volatile organic compounds, semi-volatile organic compounds, polynuclear aromatic hydrocarbons, and metals. Relatively few of these chemicals were detected in ground water samples taken from points surrounding the soil-contaminated area.

Contaminants that are leaching into the ground water are undergoing biodegradation and attenuation through physical, chemical, and biological processes. Investigations indicate that the Spokane River is not being adversely impacted by the site.

The Engineering Design Report and the Draft Substantive Permit Requirements are available for review at the following locations:

- Department of Ecology, Eastern Regional Office, 4601 N. Monroe, Spokane WA 99205
- Spokane Public Library, 906 W. Main Ave., Spokane

For more information or to submit written comments, please contact Teresita Bala, Sit Manager, at the Ecology address listed above or at (509) 329-3543 or e-mail tbal461@ecv.wa.gov.

PUBLIC COMMENT PERIOD: 4/7/03 – 5/6/03

Draft Interim Action Work Plan and State Environmental Policy Act (SEPA) Determination of Non-Significance (DNS) Available for Public Review & Comment – *Unocal Edmonds Bulk Fuel Terminal, Facility Site ID No. 2720, 11720 Unoco Road, Edmonds, 98030, Snohomish County*

Ecology and the Unocal Oil Company *have completed a work plan* to conduct an Interim Action at the Unocal Edmonds Bulk Fuel Terminal site. The work plan is available for public review and comment through May 30, 2003.

The site, a former bulk fuel terminal, is divided into an Upper Yard and Lower Yard. It has petroleum-contaminated soil and ground water. Some shallow soil is also contaminated with sandblast grit that was used to clean tanks and piping.

The Interim Action, which is scheduled to begin this summer at the Lower Yard, will involve removing contaminated soil and sediment from a stormwater detention basin and from another area in the southwest portion of the site. Ecology has determined this action will not have an adverse impact on the environment and has issued a SEPA DNS.

Public Meeting: The Edmonds Citizen’s Awareness Committee will be holding a public meeting to discuss the proposed cleanup activities.

Date: Wednesday, May 14
Time: 5:30 to 6:30 p.m.
Location: Edmonds City Hall
Brackett Meeting Room, 3rd Floor
121 5th Avenue North
Edmonds WA
Contact: Frances Murphy, (425) 743-3339

Documents are available for review at the following locations:

- Edmonds Public Library, 650 Main St., Edmonds
- Mountlake Terrace Public Library, 23300 58th Ave. W., Mountlake Terrace
- Lynnwood Public Library, 19200 44th Ave. W., Lynnwood
- Department of Ecology, Northwest Regional Office, 3190 160th Ave. SE, Bellevue WA 98008, (425) 649-7190 for an appointment
- Ecology’s Web Site: www.ecy.wa.gov/programs/tcp/sites/sites_information.html

For more information or to submit written comments, please contact David L. South, Site Manager, at the Ecology address listed above or at (425) 649-7200, e-mail dsou461@ecy.wa.gov. For comments, include “Unocal Edmonds Comment” on the envelope or in the e-mail subject line.

PUBLIC COMMENT PERIOD: 5/1/03 – 5/30/03

VOLUNTARY CLEANUP PROGRAM

Through its Voluntary Cleanup Program, Ecology provides services to individuals cleaning up contaminated sites. For a fee, Ecology staff will review an independent cleanup report(s) and provide a written decision about the adequacy of the cleanup actions taken and described in the report. Upon a satisfactory review, a site (or just that phase of the cleanup) may receive a “No Further Action” decision from Ecology. The following reviews have been completed and decisions rendered.

Clark County - Callaham & Callaham, Facility Site ID No. 66366695, 10616 NE Hwy 99, Vancouver, 98685

Ecology’s Voluntary Cleanup Program has reviewed an independent cleanup report relating to this site. Based on this information, Ecology has concluded the release addressed in this report does not represent a threat to human health and the environment and has issued a **No Further Action** letter. For more information, please contact Jennifer Taylor at (360) 690-4798 or e-mail jtay461@ecy.wa.gov.

Clark County - Minit Mart 724, Facility Site ID No. 64539957, 15704 E. Mill Plain Blvd., Vancouver, 98684

Ecology’s Voluntary Cleanup Program has reviewed an independent cleanup report relating to this site. Based on this information, Ecology has concluded the release to soil addressed in this report does not represent a threat to human health and the environment and has issued a **No Further Action** letter **for soil**. For more information, please contact Craig Rankine at (360) 690-4795 or e-mail cran461@ecy.wa.gov.

Clark County - Roegner Heating Oil Tank, Facility Site ID No. 2484731, 4904 NE 40th Ave., Vancouver, 98661

Ecology’s Voluntary Cleanup Program has reviewed an independent cleanup report relating to this site. Based on this information, Ecology has issued an **Opinion Letter**. For more information, please contact Chuck Cline at (360) 407-6267 or e-mail chcl461@ecy.wa.gov.

Cowlitz County - Reynolds Metals Co Longview, Facility Site ID No. 1089, 4393 Industrial Way, Longview, 98632

Ecology’s Voluntary Cleanup Program has reviewed an independent cleanup report relating to the cable plant area of the site. Based on this information, Ecology has concluded the release addressed in this report does not represent a threat to human health and the environment and has issued a **No Further Action** letter **for the cable plant area of the site**. For more information, please contact Lisa Pearson at (360) 407-6261 or e-mail lpea461@ecy.wa.gov.

Kitsap County - Exxon Co USA 70488, Facility Site ID No. 62627685, 15475 NE 8th, Bellevue, 98007

Ecology’s Voluntary Cleanup Program has reviewed an independent cleanup report relating to this site. Based on this information, Ecology has concluded the release addressed in this report does not represent a threat to human health and the environment and has issued a **No Further Action** letter. For more information, please contact Teri Fisher at (425) 649-4446 or e-mail tfis461@ecy.wa.gov.

Kitsap County - Texaco Star Mart 121187, Facility Site ID No. 6767861, 3800 Kitsap Way, Bremerton, 98312

Ecology’s Voluntary Cleanup Program has reviewed an independent cleanup report relating to this site. Based on this information, Ecology has concluded the release addressed in this report does not represent a threat to human health and the environment and has issued a **No Further Action** letter. For more information, please contact Teri Fisher at (425) 649-4446 or e-mail tfis461@ecy.wa.gov.

Pierce County - Puget Sound Energy Buckley, Facility Site ID No. 45823153, NE of Buckley City Center, Buckley, 98321

Ecology’s Voluntary Cleanup Program has reviewed an independent cleanup report relating to this site. Based on this information, Ecology has concluded the release addressed in this report does not represent a threat to human health and the environment and has issued a **No Further Action** letter with a **Restrictive Covenant**. For more information, please contact Chuck Cline at (360) 407-6267 or e-mail chcl461@ecy.wa.gov.

VOLUNTARY CLEANUP PROGRAM (Cont.)

Snohomish County - Earl E Dutton, Facility Site ID No. 69471437, 615 80th St. SW, Everett, 98203

Ecology's Voluntary Cleanup Program has reviewed an independent cleanup report relating to this site. Based on this information, Ecology has concluded the release addressed in this report does not represent a threat to human health and the environment and has issued a **No Further Action** letter. For more information, please contact Teri Fisher at (425) 649-4446 or e-mail tfis461@ecy.wa.gov.

Snohomish County - Maltby Road Site, Facility Site ID No. 10853166, 2020 Maltby Road, Bothell, 98021
