Addendum*

## Addendum to the March 17, 2004 issue:

### **☐ Compliance Monitoring Report and Letter of Completion Available for Public Review & Comment – Salmon Bay Steel (a.k.a. Kent Central), Facility Site ID No. 2325, 22011 84<sup>th</sup> Avenue South, Kent, 98032, King County.**

Cleanup is complete at the Salmon Bay Steel (a.k.a. Kent Central) site. The Compliance Monitoring Report and Ecology letter of completion are available for public review and comment through April 15, 2004.

The site was used for scrap metal reprocessing and slag processing. Activities on site left behind soil contaminated with petroleum (total petroleum hydrocarbons), polychlorinated biphenyls (PCBs), and lead.

The site has been cleaned up to industrial standards. Constructed covers, a storm water management system, and a piped drainage system were installed; institutional controls were implemented; and compliance monitoring of ground water and water discharged from the wet pond were required to ensure that cleanup actions were effective at the site.
