A Publication of the Washington State Department of Ecology

September 14, 2004 Department of Ecology, P.O. Box 47600, Olympia WA 98504-7600 TCP Issue 2004-19

This periodic publication alerts the public to the availability of reports, public comment periods, and other activities related to the study and cleanup of hazardous-waste sites under Chapter 70.105D RCW, the Model Toxics Control Act, and in accordance with WAC 173-340-600.

Direct questions regarding Site Register circulation to Linda Thompson at 360-407-6069 or ltho461@ecy.wa.gov.

For information on specific hazardous-waste sites, call the Department of Ecology office closest to you:

Ecology's Yakima office (Central Region): (509) 575-2490

Ecology's Spokane office (Eastern Region): (509) 329-3400

Ecology's Bellevue office (Northwest Region): (425) 649-7000

Ecology's Lacey office (Southwest Region): (360) 407-6300

If you require this publication in an alternate format, please contact the Toxics Cleanup Program, 360-407-7170, or TTY (for the speech or hearing impaired) 711 or 800-833-6388.

Publication #04-09-041 T

Consent Decree, Draft Cleanup Action Plan (DCAP) and State Environmental Policy Act and Determination of Non-Significance (SEPA DNS) Available for Public Review & Comment – Moses Lake City Maintenance Facility, 835 East Penn Street, Moses Lake, Grant County

The four-acre property is used for the storage, fueling and maintenance of city vehicles. Contamination is a result of leaks in underground fuel storage tanks and the handling and storage of petroleum products.

Cleanup at the site focuses on petroleum products in soil and groundwater and lead in soil. Ecology has selected the following cleanup measures: removing contaminated soil where petroleum hydrocarbon concentrations are above required state cleanup levels; transporting contaminated soil to a permitted disposal facility; filling areas where contaminated soil has been removed with clean soil; monitoring groundwater; and placing restrictions on the property to limit access and protect from any potential contamination that may temporarily remain after the cleanup. This includes a Restrictive Covenant.

The documents are available for review at the following locations:

- Department of Ecology, Eastern Regional Office, 4601 N. Monroe, Spokane, WA 99205
- Big Bend Community College Library, 7662 Chanute Street NE, Moses Lake, WA 98837.
- Ecology's Web site: http://www.ecy.wa.gov/programs/tcp/sites/moses_lake/moses_lake_hp.html

For more information or to submit comments contact Ms. Sandra Treccani at the Ecology address above. She may also be reached at (509) 329-3412, 1-800-826-7716 or by e-mail at satr461@ecy.wa.gov.

Public comment period: 9/2/04 - 10/1/04

Notice of Proposed Consent Decree and Cleanup Action Plan for Tiger Oil Site, 24th and Nob Hill Boulevard, Yakima County

Ecology is proposing to enter into a Consent Decree with Tiger Oil Corporation (Tiger) and Federated Service Insurance Company under the authority of Chapter 70.105D RCW, the Model Toxics Control Act. The Consent Decree states that Tiger will implement the proposed Cleanup Action Plan for the Tiger Oil Site (Site). In addition,

Ecology has issued a Determination of Non-Significance for work to be completed under the CAP

In 1982, approximately 18,772 gallons of petroleum product were released from the underground storage tank system at the retail petroleum station. Additional known releases of approximately 2,000 gallons and 50 gallons were reported to have occurred in 1983 and 1984, respectively. The released petroleum product has contaminated the soil and groundwater on the Tiger Oil station property and an adjacent property. Tiger purchased the station in October 1987. A Remedial Investigation and Feasibility Study (RI/FS) was completed, and an interim remediation system, consisting of a groundwater and soil vapor extraction (SVE) system, has been operating since 1995 to reduce the level of soil and groundwater contamination and to prevent off-site migration of petroleum product.

Ecology and Tiger have developed a Cleanup Action Plan to address the contamination. Planned cleanup actions at include continued operation of the groundwater treatment system, expansion of the soil vapor extraction system, underground storage tank (UST) removal, soil removal, natural attenuation, and groundwater monitoring. Further expansion of the soil vapor extraction system may be installed if testing results indicate that it is warranted.

After reviewing the State Environmental Policy Act environmental checklist, Ecology has determined that the cleanup actions will not have a probable significant adverse impact on the environment, and an Environmental Impact Statement is not required.

Copies of the Consent Decree and CAP are available for public review at:

- Yakima Valley Regional Library, 102 N 3rd Street, Yakima, WA
- Ecology's Central Regional Office, 15 W Yakima Ave., Suite 200, Yakima, WA 98902.

For more information or to submit comments contact Rachel Caron, at (509) 454-7835, or email: rcar461@ecy.wa.gov.

☛ **Public comment period:** **8/18/04 to 9/17/04**

☐ Notice of Proposed Settlement of Kaiser Aluminum's Mead Smelter Superfund Cleanup Site, 2111 E Hawthorne Rd., Mead, WA, Spokane County.

Ecology, United States Environmental Protection Agency and Kaiser Aluminum Corporation have reached a settlement to clean up cyanide and fluoride contamination found at the Kaiser Aluminum smelter. The 20 million dollar settlement is the result of bankruptcy negotiations between the two governmental agencies and bankrupt Kaiser Aluminum Corporation, and will, if approved by the bankruptcy court, release Kaiser Aluminum Corporation from liability for further cleanup costs under both the state and federal cleanup statutes. The settlement involves transferring the site to an independent Trust which will be set up to administer both cleanup funds and future work paid for by an environmental cleanup insurance policy.

Prior to bankruptcy in 2002, Kaiser Aluminum & Chemical Corporation owned and operated an aluminum smelter approximately seven miles north of downtown Spokane. The smelter was constructed in 1942 during World War II to supply aluminum to the war effort. The plant operated eight potlines, a prebake anode production facility with bake ovens, and a coke calciner. At full capacity, the plant produced in excess of 640 tons of aluminum a day. The aluminum plant has been sold to Commercial Development Corporation and will be redeveloped as commercial real estate. The Superfund cleanup site is located on the north side of the plant complex and consists of a 128,000 ton pile of smelting wastes. These wastes contain cyanide and fluoride, which has leached out of the pile into the underlying soils and groundwater. Contaminated groundwater containing cyanide and fluoride travels about 2 miles to discharge to the Little Spokane River.

The Draft Consent Decree provides for a court-appointed Trust to continue cleanup at the site. The preferred cleanup option for the site consists of: consolidation of the potliner waste into one pile and covering the pile with an engineered cap; evaluation of the water piping surrounding the consolidated pile, along with repair of any leaking piping; and the potential pumping and treatment of contaminated found in soil beneath the pile.

Using monies from the environmental insurance policy, the Trust will replace and inspect water system pressure mains located in the groundwater recharge area surrounding the potliner pile. The Trust will construct a new groundwater monitoring system and establish a point of compliance at the site property boundary. After five years, the Trust will evaluate the results of the groundwater monitoring to determine if the interim actions already in place (the cap on the waste pile and repair of leaking pipes) have been effective in cleaning up the aquifer. If not, further remedial actions will be investigated, beginning with an evaluation of whether a pump and treat system can be effective at removing cyanide and fluoride in the groundwater beneath the site. The environmental insurance policy will be used to fund the construction and maintenance of the pump and treat system or other necessary remedial measures.

There is a public meeting 6:30 p.m. on September 2, 2004 at Spokane Community College, Lair Auditorium, Bldg. #6

Copies of the Draft Consent Decree, Scope of Work and Remedial Action Plan are available for public review at:

- North Spokane Library, 44 E Hawthorne Rd., Spokane, WA (509) 457-5250
- Spokane Public Library, W 906 Main Ave., Spokane, WA (509) 444-5300
- Ecology's Eastern Regional Office, N 4601 Monroe, Suite 100, Spokane, WA (509) 456-2926
- Ecology's Industrial Section, 300 Desmond Dr., Lacey, WA (360) 407-6916

For more information or to submit comments contact [Paul Skyllingstad](mailto:psky461@ecy.wa.gov), at (360) 407-6949 or email: psky461@ecy.wa.gov.

☛ **Public comment period: 8/11/04 – 9/10/04**

☐ **Philip Services Corporation (PSC)-Georgetown recently requested a modification to their hazardous/dangerous waste permit** (the facility has also been known in the past as Chemical Processors ("Chempro") and Burlington Environmental), located at 734 S. Lucile St., Seattle, WA

PSC has recently requested a modification to their hazardous/dangerous waste permit. This request concerns the completion due dates for their Remedial Investigation and submitting a draft Feasibility Study Report. The public comment period associated with this request will start on July 19 and last for 60 days. A public meeting has been tentatively scheduled for August 31 at the Eagles Hall in Georgetown.

Releases from operations at the facility, including storage of wastes and chemicals in underground storage tanks, going back over 50 years, have contaminated on-site soils. Groundwater contamination has been detected between the facility and East Marginal Way (to the west). The facility closed as a hazardous/dangerous waste storage facility in 2003 and the facility property is not currently being used commercially. In early 2004, a subsurface barrier wall was constructed around the facility to contain contaminated groundwater on-site. A number of "vapor intrusion" mitigation systems have been installed in the down gradient area to protect buildings from VOCs in shallow groundwater, which are sufficiently concentrated to pose a threat to indoor air quality. PSC submitted their Remedial Investigation Report of the site in November 2003.

For more information, please contact [Ed Jones](mailto:edjones@ecy.wa.gov); (425)649-4449, edjones@ecy.wa.gov

The permit modification request may be reviewed during regular business hours at the following locations:

- Georgetown Gospel Chapel, 6606 Carleton Ave. S. (call 206-767-3207)
- Ecology's NWRO in Bellevue, 1204 Railroad Avenue, Suite 200, Bellingham, WA 98225 (425)-649-7000 (Please call for appointment.)

☛ **Public comment period: 7/21/04 – 9/18/04**

☐ Voluntary Cleanup Program

Through its Voluntary Cleanup Program, Ecology provides services to individuals cleaning up contaminated sites. For a fee, Ecology staff will review an independent cleanup report(s) and provide a written decision about the adequacy of the cleanup actions taken and described in the report. Upon a satisfactory review, a site (or just that phase of the cleanup) may receive a “No Further Action” decision from Ecology.

Independent Cleanup Action Reports Received 6/24/2003 through 3/30/2004:

Dear Reader,

I just recently realized that with the changing staff we missed publishing the Independent Cleanup Reports we received from June 2003 through March 2004 inclusive. This catch-up list is to correct that oversight. We have done a thorough search of our database in an effort to catch all reports we have received since June 2003.

These are remedial action reports Ecology has received from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under order or decree.

The following reports are sorted by county. For information on specific hazardous-waste sites, call the Department of Ecology office indicated below for each county.

*Sincerely,
Linda Thompson
Editor*
