

# Site Register

A Publication of the Washington State Department of Ecology

September 28, 2004 Department of Ecology, P.O. Box 47600, Olympia WA 98504-7600 TCP Issue 2004-20

*This periodic publication alerts the public to the availability of reports, public comment periods, and other activities related to the study and cleanup of hazardous-waste sites under Chapter 70.105D RCW, the Model Toxics Control Act, and in accordance with WAC 173-340-600.*

*Direct questions regarding Site Register circulation to Linda Thompson at 360-407-6069 or [ltho461@ecy.wa.gov](mailto:ltho461@ecy.wa.gov).*

*For information on specific hazardous-waste sites, call the Department of Ecology office closest to you:*

*Ecology's Yakima office (Central Region): (509) 575-2490*

*Ecology's Spokane office (Eastern Region): (509) 329-3400*

*Ecology's Bellevue office (Northwest Region): (425) 649-7000*

*Ecology's Lacey office (Southwest Region): (360) 407-6300*

*If you require this publication in an alternate format, please contact the Toxics Cleanup Program, 360-407-7170, or TTY (for the speech or hearing impaired) 711 or 800-833-6388.*

*Publication #04-09-041 U*

## ❑ Cascade Helicopters Draft Compliance Monitoring Plan Available for Public Comment - Cashmere-Dryden Airport in Cashmere, Washington

Cascade Helicopters, Incorporated owned and operated an aerial pesticide applicator business from approximately 1973 through 2000. Remedial Investigation revealed soil contaminated with pesticides and petroleum products above regulatory levels in areas formerly used by Cascade Helicopters, Inc. The soil contamination is primarily located in the upper two feet of soil, but was shown to be located as deep as seven feet. No pesticide or petroleum contamination was detected in groundwater above human health based regulatory levels.

The Cleanup Action Plan identified the cleanup actions selected by Ecology for the remediation of contaminated soils at the Cascade Helicopters Site. Ecology has selected excavation and off-site disposal as the cleanup action for the site.

The Compliance Monitoring Plan (CMP) contains the Health and Safety Plan, Sampling and Analysis Plan, Technical Specifications, Summary of Work and Earth Works, Construction Drawings, and Contractor Bid Package for the site. At the completion of construction, an as-built report will be available for public to view at the Ecology office in Yakima

You are invited to review and submit written comments on the draft CMP.

### Documents are available for public review at:

- Ecology's Central Regional Office, 15 W Yakima Ave., Suite 200, Yakima, WA
- Chelan County Public Works, 350 Orondo Avenue, Wenatchee WA
- Cashmere Public Library, 300 Woodring, Cashmere WA

For technical questions, please contact: Tom Mackie (509) 454-7834, email: [tmac461@ecy.wa.gov](mailto:tmac461@ecy.wa.gov)

For other questions or to be placed on the site mailing list, please contact:

Antonio Valero (509) 454-7840, email: [aval461@ecy.wa.gov](mailto:aval461@ecy.wa.gov)

Para asistencia bilingue, favor de hablar a: Antonio Valero (509) 454-7840, email: [aval461@ecy.wa.gov](mailto:aval461@ecy.wa.gov)

☛ **Public comment period: 9/8/04 – 10/8/04**

**☐ Consent Decree, Draft Cleanup Action Plan (DCAP) and State Environmental Policy Act and Determination of Non-Significance (SEPA DNS) Available for Public Review & Comment – Moses Lake City Maintenance Facility, 835 East Penn Street, Moses Lake, Grant County**

The four-acre property is used for the storage, fueling and maintenance of city vehicles. Contamination is a result of leaks in underground fuel storage tanks and the handling and storage of petroleum products.

Cleanup at the site focuses on petroleum products in soil and groundwater and lead in soil. Ecology has selected the following cleanup measures: removing contaminated soil where petroleum hydrocarbon concentrations are above required state cleanup levels; transporting contaminated soil to a permitted disposal facility; filling areas where contaminated soil has been removed with clean soil; monitoring groundwater; and placing restrictions on the property to limit access and protect from any potential contamination that may temporarily remain after the cleanup. This includes a Restrictive Covenant.

The documents are available for review at the following locations:

- Department of Ecology, Eastern Regional Office, 4601 N. Monroe, Spokane, WA 99205
- Big Bend Community College Library, 7662 Chanute Street NE, Moses Lake, WA 98837.
- Ecology's Web site:  
[http://www.ecy.wa.gov/programs/tcp/sites/moses\\_lake/moses\\_lake\\_hp.html](http://www.ecy.wa.gov/programs/tcp/sites/moses_lake/moses_lake_hp.html)

For more information or to submit comments contact Ms. Sandra Treccani at the Ecology address above. She may also be reached at (509) 329-3412, 1-800-826-7716 or by e-mail at [satr461@ecy.wa.gov](mailto:satr461@ecy.wa.gov).

☛ **Public comment period: 9/2/04 - 10/1/04**

---

**☐ Proposed Interim Cleanup Action and State Environmental Policy Act (SEPA) Determination Available for Public Review and Comment - Evergreen Infiltration Range, Fort Lewis, Washington**

Ecology is proposing an Interim Cleanup Action for the Evergreen Infiltration Range located within Fort Lewis south of Interstate 5 adjacent to Evergreen Avenue. The Evergreen Infiltration Range was formerly used to conduct live fire military training with fixed machine guns firing into a berm. The berm is now highly contaminated with lead including lead bullet fragments.

The proposed interim cleanup action consists of excavating soils from the berm that contain concentrations of lead above the MTCA soil cleanup standard. Lead bullet fragments will then be removed from the excavated soils followed by stabilizing the remaining soils. The treated soils will then be transported to active firing ranges where they will be used as berm material.

Ecology has determined the proposed interim cleanup described in the "Interim Cleanup Action Plan, Evergreen Infiltration Range" will not have an adverse impact on the environment and has issued a SEPA DNS.

The Interim Cleanup Action Plan, SEPA Environmental Checklist and DNS and fact sheet are available for review at the following locations:

- WA Department of Ecology, 300 Desmond Drive, Lacey, WA

Phone: (360) 407-6365 or (360) 407-6366 (call for an appointment)

- Grand Staff Library, Bldg. 2109, Pendleton Avenue, Fort Lewis, WA  
Phone: (253) 967 – 5889 (call for library hours)

For more information or to submit written comments, please contact Leon Wilhelm at (407) 6362 or email at leow461@ecy.wa.gov.

☛ **Public comment period ends: 11/1/04**

---

## **Responsiveness Summary Available – Holly Street Landfill Site, Bellingham, Whatcom County**

Draft final remedial design documents for the Holly Landfill site were issued for public review on March 1, 2004. The remedial design documents included a Design Analysis Report, a Construction Quality Assurance Plan, and design plans and specifications. Ecology has completed a Responsiveness Summary responding to a total of seven comment forms, letters or e-mails received during the 30-day public comment period. The comments received did not result in substantive changes to the documents therefore they are considered final. Construction is expected to begin by the end of September.

The Holly Street Landfill site is a 13-acre historic solid waste landfill located in the Old Town district of Bellingham. In the late 1800s, the site was part of the original Whatcom Creek estuary and mudflat. From the early 1900's to 1953 various filling activities occurred to increase usable upland areas including disposal of municipal waste. Wastes disposed at the site included debris and scrap materials, consistent with landfill disposal practices of the time.

Solid waste covers approximately 9.1 acres on the northwest side of Whatcom Creek and 3.8 acres on the southeast side (Maritime Heritage Park). The City of Bellingham (City) currently owns 8.3 acres of the 13-acre landfill site, including all landfill properties located along the Whatcom Creek shoreline. Various private property owners own the remainder of the site.

The cleanup will address the physical presence of solid waste, methane production, as well as impacts to Whatcom Creek. It includes excavation of refuse along the northern shoreline of Whatcom Creek coupled with construction of an engineered cap, and placement of material along the southern shoreline to stabilize the bank. The cleanup also includes long term protection through legal restrictions on property use and monitoring of the cleanup action. The northern shoreline excavation and cap system is expected to control current releases of copper and zinc to Whatcom Creek that occur when estuary water mixes with the solid waste in the bank.

Consistent with the Bellingham Bay Comprehensive Strategy issued in 2000, the cleanup also restores historically lost habitat at the mouth of Whatcom Creek. In addition, the City is constructing public access facilities concurrent with the cleanup.

The Responsiveness Summary has been placed at the following locations:

- WA State Department of Ecology, Bellingham Field Office, 1204 Railroad Avenue, Suite 200, Bellingham
- Bellingham Public Library, 210 Central Avenue, Bellingham
- WA State Department of Ecology, NW Regional Office, 3190 160<sup>th</sup> Avenue SE, Bellevue, WA 98008 (425) 649-7190
- Ecology's web site:  
[http://www.ecy.wa.gov/programs/tcp/sites/blhm\\_bay/sites/bel\\_bay\\_sites.html](http://www.ecy.wa.gov/programs/tcp/sites/blhm_bay/sites/bel_bay_sites.html)

For more information, please contact Lucy McInerney, Site Manager, at (425) 649-7272 or by email at [lpeb461@ecy.wa.gov](mailto:lpeb461@ecy.wa.gov).

☐ **Draft Agreed Order Available for Public Review & Comment – Former Scott Paper Mill – MJB Properties, Inc.,** *Facility Site ID No. 2690, located at Q Avenue and 17th Street, Anacortes, 98221, Skagit County*

Ecology and Kimberly-Clark Corporation are proposing an agreed order to conduct a Remedial Investigation/Feasibility Study for both upland and marine areas of the southern portion of the former Scott Paper Mill site. The work is to be conducted in conjunction with work conducted on the northern portion of the site under a separate consent decree.

Pulp milling and other operations at the site resulted in contamination that includes wood and sulfur waste in soil, metals and petroleum hydrocarbons in soil and groundwater, and polychlorinated biphenyls (PCBs) in sediments.

The proposed agreed order and draft public participation plan are available for review at the following locations:

- Anacortes Public Library, 1220 10th Street, Anacortes
- WA Department of Ecology, Northwest Regional Office, 3190 160th Avenue SE, Bellevue, (425) 649-7190 (call for an appointment)
- Ecology's web site: [http://www.ecy.wa.gov/programs/tcp/sites/scott\\_paper/scott\\_hp.html](http://www.ecy.wa.gov/programs/tcp/sites/scott_paper/scott_hp.html)

For more information or to submit written comments, please contact Ron Timm, Site Manager, at (425) 649-7185, e-mail [rtim461@ecy.wa.gov](mailto:rtim461@ecy.wa.gov)

☛ **Public comment period: 9/29/04 – 10/28/04**

---

☐ **Agreed Order Documents Available for Public Review and Comment – Cornwall Avenue Landfill Site,** *Bellingham, 98225, Whatcom County*

Ecology, the Port of Bellingham (Port), and the City of Bellingham (City) are proposing an Agreed Order to implement a Remedial Investigation/Feasibility Study at the former Cornwall Avenue Landfill site (Site).

The Cornwall Avenue Landfill site is approximately eight-acres in size and is located at the south end of Cornwall Avenue, adjacent to Bellingham Bay. Most of the Site was originally tide flats and sub-tidal areas of Bellingham Bay. From 1888 to 1946, the Site was used for sawmill operations, including log storage and wood disposal. From 1946 to 1965, the Port held the lease on the state-owned land, subleasing the property to the City from 1953 to 1962. The City used the Site for municipal waste disposal. In 1962, the City entered into a lease with another Port tenant (American Fabricators) who continued waste disposal operations at the Site until 1965. Landfill operations ended at the Site in 1965, and a soil layer was placed on top of the municipal waste.

Previous environmental investigations of the Site indicate the presence of hazardous substances in groundwater, surface water, soil and/or sediments above state cleanup standards, including arsenic, copper, lead, mercury,

silver, zinc, cyanide, polychlorinated biphenyls (PCB), bis (2-ethylhexyl) phthalate, polycyclic aromatic hydrocarbon (PAH) compounds and fecal coliform.

The Site is one of several cleanup sites identified in the Bellingham Bay Comprehensive Strategy, a bay-wide guidance document issued in 2000. The Comprehensive Strategy integrates sediment cleanup, control of pollution sources, habitat restoration and aquatic/shoreline land use on a bay-wide scale.

The draft Agreed Order and draft public participation plan are available for review at the following locations:

- WA State Department of Ecology, Bellingham Field Office, 1204 Railroad Avenue, Suite 200, Bellingham
- Bellingham Public Library, 210 Central Avenue, Bellingham
- WA Department of Ecology, WA State NW Regional Office, 3190 160<sup>th</sup> Avenue SE, Bellevue, WA 98008 (425) 649-7190
- Ecology's web site:  
[http://www.ecy.wa.gov/programs/tcp/sites/blhm\\_bay/sites/bel\\_bay\\_sites.html](http://www.ecy.wa.gov/programs/tcp/sites/blhm_bay/sites/bel_bay_sites.html)

For more information or to submit written comments, please contact Lucy McInerney, Site Manager, at (425) 649-7272 or by email at [lpeb461@ecy.wa.gov](mailto:lpeb461@ecy.wa.gov).

**☐ Washington State Register Public Notice for Toxics Cleanup Program Policy and Procedure Changes**

Below is a table of Toxics Cleanup Program (TCP) policies, procedures, or implementation memos that have been updated, deleted, or are newly created. A description of each document, the document number, description of the document contents, and the action taken are included.

To receive a copy of any one of the following documents please contact Carol Dorn at (360) 407-7224.

TCP Policy (POL) Number	Title	Description	Change	Contact for Copies
POL 130A	Coordination of SEPA and MTCA	This policy clarifies the relationship and coordination between the State Environmental Policy Act and the MTCA regulation.	Updated and includes attachment	Carol Dorn (360) 407-7224
POL 310A	Policy 310A Initial Investigations	This policy provides guidance regarding the initial investigation process set forth in WAC 173-340-310.	Updated and includes Attachments A and B	Carol Dorn (360) 407-7224

**☐ Voluntary Cleanup Program**

*Through its Voluntary Cleanup Program, Ecology provides services to individuals cleaning up contaminated sites. For a fee, Ecology staff will review an independent cleanup report(s) and provide a written decision about the adequacy of the cleanup actions taken and described in the report. Upon a satisfactory review, a site (or just that phase of the cleanup) may receive a “No Further Action” decision from Ecology.*

## Site Hazard Assessment

*If it is determined that further work is required at a site after an initial investigation, a site hazard assessment (SHA) may be conducted at the site that provides Ecology with basic information about the site. With that information, the Washington Ranking Method is used to estimate the potential threat the site poses, if not cleaned up, to human health and the environment.*

*Site hazard assessments will be conducted on the below-named sites. Their hazard ranking or determination of No Further Action (NFA) will be published in the special edition of the August 2004 Site Register, the Hazardous Sites List.*

**Grant County – Todd Phillips, Grant County Health District (509) 754-6060, ext. 18**
