*If you require this publication in an alternate format, please contact the Toxics Cleanup Program, 360-407-7170, or TTY (for the speech or hearing impaired) 711 or 800-833-6388.*

*Publication #05-09-041 B*

## ☐ Agreed Order Documents Available for Public Review and Comment - ProLogis Site, Tacoma

The Department of Ecology and ProLogis Development Services, Incorporated (ProLogis) propose to enter into a Model Toxics Control Act (MTCA, Chapter 70.105D RCW) Agreed Order to conduct a Remedial Investigation/Feasibility Study (RI/FS) of the ProLogis site located at 2000 Taylor Way, Tacoma, Washington.

The Remedial Investigation will determine the extent of contamination through extensive testing of soil and groundwater, and the Feasibility Study will evaluate all available engineering technologies to determine the method(s) to clean up the contamination found during the Remedial Investigation.

ProLogis is the owner of the property and is the Potentially Liable Party (PLP) for site investigation and cleanup actions, and related costs. The proposed Agreed Order requires ProLogis perform the RI/FS to determine if petroleum hydrocarbons, volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals are present at the site. Because the site is part of an area-wide groundwater problem in the Commencement Bay area with potentially combined plumes of contamination, area-wide groundwater contamination will not be addressed in this Agreed Order.

A copy of the Agreed Order and other documents may be found at:

- Ecology SW Regional Office, 300 Desmond Drive, Olympia (360) 407-6365
- Ecology's website:  
[http://www.ecy.wa.gov/programs/tcp/sites/proLogis/proLogis\\_property\\_hp.htm](http://www.ecy.wa.gov/programs/tcp/sites/proLogis/proLogis_property_hp.htm)
- Kobetich Branch Library, 212 Brown's Point Blvd. NE, Tacoma (253) 591-5639
- Citizens for A Healthy Bay, 917 Pacific Avenue, Suite 100, Tacoma (253) 383-2429

To submit comments or ask questions, please contact Panjini Balaraju at (360) 407-6243 or [pbal461@ecy.wa.gov](mailto:pbal461@ecy.wa.gov). For TTY, call 711 or 1-800-833-6388.

☛ **Public Comment Period: 1/19/05 – 2/18/05**

## ☐ **Agreed Order Documents Available for Public Review and Comment – Little Squalicum Park site, Whatcom County**

Ecology and the City of Bellingham (City) are proposing an agreed order to implement a remedial investigation/feasibility study at the Little Squalicum Park site (Site). The Site is located at 604 Marine View Drive and is currently undeveloped open space with public access. The Site has multiple owners including the City and Whatcom County. The portion of the Site owned by Whatcom County has been leased to the City for development as a park. Little Squalicum Creek runs through the Site and is fed by springs and storm water runoff from adjacent properties.

The Site is located next to both residential neighborhoods and heavy industrial facilities including the Oeser Company, an active wood-treating facility. The Oeser Company is a designated federal Superfund site and historic and on-going contamination issues at this facility are currently being addressed by the Environmental Protection Agency (EPA). (For more information about the status of EPA's activities at the Oeser Company Superfund site which is located adjacent to the Little Squalicum Park site, Sylvia Kawabata at 206-553-1078 or by email at [kawabata.sylvia@epa.gov](mailto:kawabata.sylvia@epa.gov))

Environmental investigations of the surface water, ground water, soil and sediments at the Little Squalicum Park site have confirmed the presence of hazardous substances including pentachlorophenol, dioxin, copper, zinc and polycyclic aromatic hydrocarbon ("PAH") compounds. As a result, the Site is subject to the investigation and cleanup requirements of the Washington State Model Toxics Control Act (MTCA).

The draft agreed order and draft public participation plan are available for review at the following locations:

- WA State Department of Ecology, Bellingham Field Office, 1204 Railroad Ave., Suite 200, Bellingham (360) 738-6250
- Bellingham Technical College Library, 3028 Lindbergh Ave., Bldg. A, Bellingham (360) 715-8383
- Bellingham Public Library, 210 Central Avenue, Bellingham (360) 676-6860
- WA Department of Ecology, WA State NW Regional Office, 3190 160<sup>th</sup> Avenue SE, Bellevue, WA 98008 (425) 649-7190
- Ecology's web site: [http://www.ecy.wa.gov/programs/tcp/sites/blhm\\_bay/sites/bel\\_bay\\_sites.html](http://www.ecy.wa.gov/programs/tcp/sites/blhm_bay/sites/bel_bay_sites.html)

For more information or to submit written comments, please contact Mary O'Herron, Site Manager, at Ecology's Bellingham Field Office address listed above or by email at [mohe461@ecy.wa.gov](mailto:mohe461@ecy.wa.gov).

☛ **Public Comment Period: 1/12/05 – 2/12/05**

---

## ☐ **Agreed Order Negotiations have begun between Ecology and Kaiser Trentwood - Spokane County**

The Department of Ecology and Kaiser Trentwood are negotiating an agreed order to conduct a Remedial Investigation and Feasibility Study at the site located at 15000 E. Euclid Ave., Spokane Valley, WA.

This site has polychlorinated biphenyls (PCBs), petroleum and metals in soil and groundwater. The Remedial Investigation will determine the extent of contamination through additional testing of soil and groundwater, and the Feasibility Study will evaluate all available engineering technologies to determine the method(s) to clean up the contamination found during the Remedial Investigation.

For more information, please contact Teresita Bala, Site Manager, at 509-329-3543 or email: [tbal461@ecy.wa.gov](mailto:tbal461@ecy.wa.gov)

## ☐ **Proposal to Remove Restrictive Covenant – Former New Wilson Ford, 5440 Leary Avenue Northwest, Seattle, 98107, King County**

Ecology is proposing to remove a restrictive covenant from the former New Wilson Ford site.

A restrictive covenant was originally placed on the property to restrict the use of the chlorinated solvent (PCE)-impacted groundwater while confirmational monitoring was completed. The portion of the property on which groundwater is impacted by PCE is distinct from the petroleum-contaminated portion of the property that is known as the New Wilson Ford site.

Ecology has re-evaluated the procedural approach and cleanup action performed at the site and has determined that the restrictive covenant is not necessary as part of the final remedy for the site because no petroleum contamination remains at the property at concentrations that exceed state cleanup levels.

In addition, the current and future owners of the property have incorporated a groundwater collection system as part of the proposed development plans for the property in order to eliminate any potential exposure to PCE-impacted groundwater from an off-property source. Therefore, Ecology plans to remove the restrictive covenant.

Documents are available for review at:

- WA Department of Ecology, Northwest Regional Office, 3190 160th Avenue SE, Bellevue WA 98008, (425) 649-7190 (please call for an appointment).

For more information or to submit written comments, please contact Brian Sato, at the Ecology address listed above or at (425) 649-7265, [bsat461@ecy.wa.gov](mailto:bsat461@ecy.wa.gov).

☛ **Public Comment Period: 1/26/05 – 2/24/05**

## ☐ **Duwamish/Diagonal Combined Sewer Overflow and Storm Drain -- Sediment Cleanup Follow-up Action**

This site has no address; it's a sediment site on the east side of the Duwamish River, upstream of Harbor Island and immediately downstream of Kellogg Island in the lower portion of the Duwamish River. The site is within the south industrial section of Seattle. The project is part of the Elliott Bay/Duwamish Restoration Program (EBDRP). The program is the result of a 1991 legal settlement reached by the City of Seattle and King County (then the Municipality of Metropolitan Seattle, or Metro) with the National Oceanic and Atmospheric Administration (NOAA).

This 7-acre sediment cleanup was completed in March 2004. In the early stages of the cleanup, actions by the contractor dredging in the highly contaminated southwest part of the site caused excessive contaminated dredged material to escape. This proposed follow-up action will address that problem.

The settlement projects include sediment remediation, habitat development and improvements, and pollution source-control measures. The U.S. Fish and Wildlife Service, Department of Ecology, Suquamish Tribe, Muckleshoot Tribe, NOAA, City of Seattle and King County administer the program and make up the EBDRP Panel.

- Proposed plan and Ecology memo available at: <http://dnr.metrokc.gov/wtd/duwamish/diagonal.htm>

Information repositories:

- Georgetown Gospel Chapel, 6606 Carleton Ave. S., Seattle  
Please call Pastor Leroy Hedman for an appointment. 206-767-3207
- Department of Ecology, 3190 160th Ave. S.E., Bellevue  
Please call for an appointment. 425-649-7190

For more information, contact: Rick Huey, (425) 649-7256, email: <mailto:rhue461@ecy.wa.gov>

☛ **Action planned to be complete by March 1, 2004**

---

## ☐ **Private Right of Action - Schade Brewery, Spokane**

Ecology has been notified that American West Bank may pursue a private right of action at the Schade Brewery site located at 528 E Trent Ave., Spokane, WA. The site has petroleum hydrocarbons, metals, polychlorinated biphenyls, and polynuclear aromatic hydrocarbons in soil. An independent remedial action will be conducted at the site, consisting of removal of some impacted soils, engineering controls with isolation and containment of affected soils not removed, and institutional controls.

For more information, please contact Patti Carter at 509-329-3522, or email at [paca461@ecy.wa.gov](mailto:paca461@ecy.wa.gov)

---

## ☐ **Voluntary Cleanup Program**

*Through its Voluntary Cleanup Program, Ecology provides services to individuals cleaning up contaminated sites. For a fee, Ecology staff will review an independent cleanup report(s) and provide a written decision about the adequacy of the cleanup actions taken and described in the report. Upon a satisfactory review, a site (or just that phase of the cleanup) may receive a "No Further Action" decision from Ecology.*
