

What is the Law?

The law states that even where burning is permitted, everyone should try to reduce burning to the greatest extent possible.

Why?

Even unprocessed natural vegetation such as lawn clippings, leaves and pine needles produce **air pollutants** when burned.

This includes **carbon monoxide** and **fine particulates** which, when inhaled into the lungs, can have serious health impacts.

Children, the elderly and those suffering from chronic respiratory conditions such as **asthma, emphysema and bronchitis** are the most vulnerable to poor air quality. Reducing air pollution is one way Ecology is working to decrease toxics in the environment.

Learn Before You Burn

in

**Lincoln and Adams
Counties:**

How does the law affect you?

A Resident's Guide to Outdoor
Burning Regulations and Resources

What can I burn?

- In many areas, no residential burning is allowed. However, in some rural areas, you can burn yard and garden debris such as leaves and clippings. Piles must be no larger than 4 feet wide by 3 feet high and must be *at least* fifty feet away from structures. Piles larger than this require a burn permit.
- Recreational fires such as campfires and barbecues. Only burn briquettes, propane, and bare, untreated, dry firewood.
- Debris from land you own. This includes land clearing burning and pasture management, and **you must have a permit to burn.**

When can I burn?

You can burn year-round, excluding times when a burn ban has been issued by either Ecology or your local fire department.

You must **always** notify your local fire department when you are planning to burn, and you should also call your local conservation district to find out if you are legally able to burn.

What *can't* I burn?

- Burning garbage is illegal.
- You may not dispose of yard debris in a recreational fire.
- Burning ANYTHING in a burn barrel, including natural vegetation, is illegal. This is because a barrel limits the amount of oxygen that can get to a fire, which results in incomplete combustion and lots of smoke.
- It is illegal to do agricultural burning, land clearing burning or pasture burning without a permit.

What happens if I burn when I'm not supposed to?

You can be **fined up to \$10,000** per day, per violation! Illegal outdoor burning is one of the most common air quality violations. It pays to know the rules before you burn!

Who can I call for help?
