

Site Register

WASHINGTON STATE DEPARTMENT OF ECOLOGY TOXICS CLEANUP PROGRAM

APRIL 10, 2008

The Site Register is published every two weeks to inform you about public comment periods, public meetings, hearings, and other information related to the study and cleanup of hazardous waste sites under the Model Toxics Control Act, Chapter 70.105D RCW.

You may also find information about public hearings, meetings, workshops, and open public comment periods on Ecology's web page. Go to www.ecy.wa.gov and click on the Public Involvement Calendar.

If you have questions or want to be added to the mailing list (electronic or paper) for the Site Register, contact Linda Thompson at 360/407-6069 or e-mail Ltho461@ecy.wa.gov. Specific regional contacts are listed after each entry.

If you need this publication in an alternate format, please call the Toxics Cleanup Program at 360/407-7170. Persons with hearing loss may call 711 for Washington Relay Service. Persons with a speech disability may call 877/833-6341.

FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

BENTON COUNTY

US Ecology, Inc., 23 miles northwest of Richland on the Hanford Site Facility Site ID# 311

Public comment period:
3/14/08 - 4/14/08

Agreed Order/Consent Decree

Ecology has an agreed order with US Ecology, Inc., to conduct a Remedial Investigation and focused Feasibility Study to identify the nature and extent of hazardous chemical contamination at its low-level radioactive waste disposal facility. US Ecology's contractor has prepared a public participation plan for this work as a requirement under the agreed order.

The draft public participation plan is available for review at the following locations:

- Richland Public Library, 1270 Lee Boulevard, Richland **509/942-7446**
- Ecology's Nuclear Waste Program, Richland, WA. (Please call **509-372-7920** for an appointment.)
- Ecology Headquarters Office, 300 Desmond Drive, Lacey, WA 98503. (Please call **Carol Dorn** at **360/407-7224** or e-mail **Cesg461@ecy.wa.gov** for an appointment.)

• Ecology's website at www.ecy.wa.gov/programs/nwp/commentperiods.htm

• Ecology's Public Involvement Calendar: www.ecy.wa.gov

For more information, please contact **Jennifer Ollero**, Site Manager, at Ecology address listed above or at

509/372-7988 or e-mail **Joll461@ecy.wa.gov**. For public involvement information, please contact **Madeleine Brown**, Public Involvement Coordinator at **509-372-7936** or e-mail **Mabr461@ecy.wa.gov**.

CLARK COUNTY

Support Terminals Operating Partnership, L.P. Tank Farm (STOP Tank Farm) 5420 NW Fruit Valley Road, Vancouver Facility Site ID# 61862781

Negotiations for an Agreed Order

Ecology and Stop Terminals Operating Partnership, L.P. (subsidiary of NuStar Energy, L.P.) have begun negotiations for an Agreed Order to complete a Remedial Investigation and Feasibility Study at the STOP Tank Farm site in Vancouver. Evidence of petroleum contamination to soil was discovered during the decommissioning of an underground gasoline vapor recovery tank in 2001. Also in 2001, a gasoline spill from an underground storage tank was reported to Ecology. Benzene and other petroleum constituents have been documented at levels above state cleanup standards in groundwater.

The site was added to Ecology's database of "Confirmed and Suspected Contaminated Sites" in 2005. Based on a site hazard assessment conducted in 2006, the site has been assigned a Washington Ranking Method risk rank of 2 (A rank of 1 designates sites having the greatest risk to human health and the environment. A rank of 5 indicates the lowest risk).

For more information about this site, please contact **Rod Schmall**, Site Manager, at the Ecology's Vancouver Field Office, 2108 Grand Blvd., Vancouver, WA 98661 address listed above or at **360/690-4798** or e-mail **Rosc461@ecy.wa.gov**.

KING COUNTY

Former General Electric Dawson Street Plant, 220 S. Dawson Street, Seattle Facility Site ID# 2522

**Public comment period:
3/26/08 – 4/25/08**

Agreed Order

Ecology has issued an agreed order to The General Electric Company (GE) for the former Dawson Street Plant.

GE is required to submit a focused feasibility study (FFS) and other cleanup action documents under this order. The FFS will evaluate soil, groundwater and indoor air cleanup options. Ecology will

review these options and select a final option(s) for the final cleanup. The FFS may include one or more pilot studies to evaluate possible cleanup action options. This action will not adversely impact the environment. Ecology is issuing a State Environmental Policy Act (SEPA) determination of non-significance (DNS) for this activity.

The agreed order is available for review at the following locations:

- New Holly Library, 7058 32nd Ave. S., Seattle, WA 98118 **206/386-1905**
- Ecology Northwest Regional Office, 3190 160th Ave. SE, Bellevue, WA 98008-5482. (Please call **425/649-7190** for an appointment.)
- Ecology's website at <http://www.ecy.wa.gov/programs/hwtr/foia/index.html>
- Ecology's Public Involvement Calendar: <http://apps.ecy.wa.gov/pubcalendar/calendar.asp>

For more information or to submit written comments, please contact **Dean Yasuda**, Site Manager, at the Ecology address listed above or at **425/649-7264** or e-mail Dyas461@ecy.wa.gov.

PIERCE COUNTY

DuPont Corporate Park, 2800 Center Drive N., DuPont Facility Site ID# 51474982

**Public comment period:
3/17/08 – 4/15/08**

Proposed Removal of DuPont Corporate Park L.L.C. from an Existing Restrictive (Environmental) Covenant

Ecology proposes removing 2800 Center Drive North, DuPont, WA ("the Site") from an existing restrictive (environmental) covenant for the DuPont Corporate Park site. The Site is owned by the DuPont Corporate Park LLC ("DCP"). The DCP completed a cleanup of the Site under Ecology's Voluntary Cleanup Program. Ecology has determined that:

- Lead-contaminated areas of the site have been cleaned up to meet Model Toxics Control Act (70.105D RCW) standards for unrestricted land use.
- The site qualifies for a No Further Action (no further cleanup work is needed).

Before 2006, the Site was part of the neighboring Intel property. In 1995, Weyerhaeuser cleaned up the Site to meet state industrial cleanup standards and sold it with a restrictive covenant placed on the property deed.

The Site has now been cleaned up to meet state cleanup standards for unrestricted land use. Ecology proposes to remove the Site from the restrictive covenant that covers this property and the Intel property. The restrictive covenant will remain on the Intel property deed.

Documents related to the cleanup are available for public review at:

- DuPont Public Library, 1540 Wilmington Dr., Dupont, WA 98327 **253/964-4003**

• Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, WA 98504-7775. (Please call **360/407-6365** or e-mail Dene461@ecy.wa.gov for an appointment.)

• Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/duPontCP/dupont_hp.htm.

For more information or to submit written comments, please contact **Scott Rose** at **360/407-6347** or e-mail Sros461@ecy.wa.gov.

Eddon Boat Park, 3711 and 3805 Harborview Drive, Gig Harbor Facility Site ID# 1301959

Negotiations for an Agreed Order/ Consent Decree

Ecology and the City of Gig Harbor are negotiating an Agreed Order to implement a Cleanup Action Plan for the Eddon Boat Park site. Negotiations began on April 1, 2008 and will end on May 1, 2008. Several stages of site investigations have been completed under the Voluntary Cleanup Program over the past two years. The site uplands contained petroleum hydrocarbons in surface soils in a localized area (since removed). The site uplands contain localized areas of polyaromatic hydrocarbon and metals in soils. The site sediments contain mercury, copper, lead, PCB, tributyltin, phthalates, and polyaromatic hydrocarbons. The Agreed Order is to implement a Cleanup Action plan for removing the remaining upland site contamination, and conducting a dredging and capping project for site sediments, to take place beginning June, 2008.

For more information, please contact **Joyce Mercuri**, Site Manager, at the Ecology address listed above or at **360/407-6260** or e-mail Jmer461@ecy.wa.gov.

Reid's Automotive, 3512 South 84th Street, Lakewood Facility Site ID# 62353322

**Public comment period:
4/14/08 – 5/14/08**

Proposed Removal from Hazardous Sites List

Ecology proposes to remove Reid's Automotive from the Hazardous Sites List. The site, formerly Art's Auto Doctors, was primarily operated as an auto repair facility since it was developed in 1975. Soil contamination was discovered in 2002. Petroleum hydrocarbons were detected above MTCA standards. An underground storage tank was also discovered on site. It contained oily water and had contaminated the surrounding soil. No evidence of groundwater contamination was found.

A site hazard assessment was conducted in 2005 and the site was ranked a two (one represents the highest relative risk and a five the lowest relative risk). The site was then listed on the Hazardous Sites List. Reid Automotive entered the Voluntary Cleanup Program in 2007. Cleanup activities at the site included excavation of gasoline and heavy oil range hydrocarbon contaminated soil and removal of an underground storage tank and its piping.

Reid's Automotive submitted an Interim Remediation report documenting cleanup efforts at the site. An Ecology site manager reviewed the report and determined that:

- The site is no longer a threat to human health or the environment.
- The cleanup actions at the site meet MTCA standards.
- No further action is needed.

The remediation reports will be available at the following locations:

- Tacoma Public Library, 765 South 84th Street, Tacoma, WA 98444 **253/591-5666**.

• Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, WA 98504-7775. (Please call **360/407-6365** or e-mail **Dene461@ecy.wa.gov** for an appointment.)

• Ecology's website at **http://www.ecy.wa.gov/programs/tcp/sites/reidsAuto/reidsAuto_hp.htm**

For more information or to submit written comments, please contact **Scott Rose**, Site Manager, at the Ecology address listed above or at **360/407-6347** or e-mail **Sros461@ecy.wa.gov**. For public involvement information, please contact **Meg Bommarito**, Public Involvement Coordinator at **360/407-6255** or e-mail **Mbom461@ecy.wa.gov**.

SPOKANE COUNTY

**Aluminum Recycling Corporation,
Spokane Facility Site ID# 627**

**Public comment period:
3/13/08 – 4/11/08**

Periodic Review Available to the Public

Ecology invites the public to review and comment on a periodic review of the Aluminum Recycling Corporation site. The eight-acre site is located at 3412 East Wellesley in the Hillyard neighborhood of Spokane. The site lies over the Spokane Valley-Rathdrum Prairie Aquifer, a sole source aquifer that provides drinking water to more than 500,000 people.

A periodic review is conducted every five years after the initiation of a cleanup action as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions, after cleanup is considered complete, and to ensure protection of human health and the environment.

The Hillyard Processing Company leased land from the BNSF Railway Company and operated an aluminum dross reprocessing facility at the site. Aluminum reprocessing reportedly began

in 1954, and the activities continued through several changes in operators.

Aluminum Recycling Corporation was the latest operator of the facility until 1987 when the property was abandoned.

Cleanup at the site focused on chloride, fluoride, nitrate, and nitrite in groundwater and elevated levels of lead in soil. In 2001 dross and soil mixed with dross, was excavated and consolidated into an on-site pit. The pit area was capped with a cover system designed to minimize surface water from reaching the consolidated dross and soil materials. The surface water was routed into a lined evaporation pond on-site.

Institutional controls including access restrictions and a restrictive covenant, which limits land uses, were placed on the property. These restrictions limit or prohibit any activity that may interfere with the integrity of the cleanup actions and also requires future owners to comply with the restrictions. Restrictions include fences, signs, land use for industrial purposes only, and limitations on groundwater withdrawal and use. These institutional controls have proven effective in reducing exposure and protecting the integrity of the cleanup action.

Since June 1997, quarterly groundwater sampling has been conducted at four monitoring wells for chloride, fluoride, nitrate and nitrite. Since completion of the cleanup action, monitoring wells MW-4 and MW-6 (upgradient and furthest downgradient) show no cleanup level exceedances for any constituents. MW-3 and MW-5 are closer to the consolidated dross and show varying increasing and decreasing contaminant trends. Nitrite has not exceeded cleanup levels at any of the wells. Overall, contaminant concentrations are showing the trends expected for a five-year time frame. Quarterly groundwater monitoring will continue, and further periodic reviews will be required as long as institutional controls are in place at the site.

The periodic review (Publication No. 08-09-024) may be reviewed at the following locations:

- Spokane Public Library, Hillyard Branch 4005 N. Cook, Spokane
- Ecology Eastern Regional Office, 4601 N. Monroe, Spokane. (Please call **Mrs. Johnnie Landis** at **509/329-3415** for an appointment.)
- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/alum_recy/alum_recy.html

For more information or to submit written comments, please contact **Sandra Treccani**, Site Manager, at the Ecology address listed above or at **509/329-3412** or e-mail Satr461@ecy.wa.gov.

General Electric Spokane Site, 4323 East Mission Avenue, Spokane Facility Site ID# 630

Public comment period:
3/13/08 – 4/11/08

Periodic Review Available to the Public

Ecology invites the public to review and comment on a periodic review of the General Electric Spokane site. The GE property covers less than 2 acres and is approximately 1200 feet south of the Spokane River. This is the second periodic review conducted for the GE Site and covers the time from the 3rd quarter of 2002 through the 2nd quarter of 2007.

A periodic review is required by the Model Toxics Control Act (MTCA) at least every five years after the initiation of a cleanup action.

The review evaluates site conditions, after cleanup is considered complete. It also ensures the cleanup action is protective of human health and the environment.

GE owned and operated a transformer service shop from 1961 to 1980. Oils containing Polychlorinated Biphenyls (PCBs) and Total Petroleum

Hydrocarbons (TPH) were released to soils during service operations. Investigations in the mid to late 1980s confirmed PCBs and TPH in soils and dry wells at the GE property, at the Avista property to the west, and the Riley property to the north. PCBs were also found in groundwater.

Cleanup actions began in 1991 and were completed in 1999. Cleanup actions included vitrification of soils, a process where contaminants are encapsulated in place; removing, vitrifying, and grouting of soils from dry wells; removing contaminated soil off-site; placing an asphalt cap over remaining PCBs in soil at the northwest corner of the site, and long-term groundwater monitoring.

Groundwater quality for PCBs continues to improve as a result of the cleanup actions at the site. Two monitoring wells still show PCB levels that exceed standards but show decreasing levels of PCBs, and the remaining wells show nondetections or meet the required standards. Groundwater monitoring will continue into the future, and the institutional controls outlined below will continue to prevent exposure to PCBs in groundwater.

The asphalt cap over PCB-contaminated soils at the GE property continues to minimize movement of PCBs to groundwater and prevent direct contact with or ingestion of PCBs in the soil.

Institutional controls have proven effective in reducing exposure and protecting the integrity of the cleanup action. Access restrictions and a restrictive covenant, which limit land uses, were placed on the property. These restrictions prohibit any activity that may interfere with the integrity of the cleanup actions and also require future owners to comply with the restrictions. Restrictions include fences, inspecting and maintaining the asphalt cap on the GE property, restricting groundwater use and limiting land use to industrial for the GE property and adjacent properties to the immediate west (Avista) and north (Riley).

The cleanup actions at the site are performing as expected. Further periodic reviews are required as long as institutional controls are in place at the site.

The periodic review may be reviewed at the following locations:

- Spokane Public Library, 906 West Main, Spokane, WA 99202
- Ecology Eastern Regional Office, 4601 N. Monroe, Spokane, WA 99205-1295. (Please call **Mrs. Johnnie Landis** at **509/329-3415** for an appointment.)
- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/genElecSpo/genElecSpo_hp.htm

For more information or to submit written comments, please contact **Teresita Bala**, Site Manager, at the Ecology address listed above or at **509/329-3543** or e-mail Tbal461@ecy.wa.gov.

THURSTON COUNTY

Downtown Safeway, 609 4th Avenue, Olympia Facility Site ID# 6105358

Public comment period:
4/10/08 – 5/9/08

Agreed Order for Remedial Investigation and Interim Cleanup Action, and SEPA Determination

Ecology is working with the City of Olympia to investigate and clean up the Downtown Safeway site. This is the planned site for the new Olympia City Hall building.

The City has agreed to do the following work:

- Interim action (partial cleanup action) to investigate and clean up possible pollution from underground storage tanks. These tanks will be addressed first to prevent further contamination.
- Remedial investigation of the extent and nature of pollution at the site.

- Feasibility study to compare possible cleanup actions.
- Draft cleanup action plan. This plan will guide the final cleanup process.

The agreed order and State Environmental Policy Act (SEPA) determination are available to view and comment at:

- Timberland Olympia Library, 313 8th Avenue SE, Olympia, WA 98501-9300 **360/352-0595**
- Ecology Southwest Regional Office, Toxics Cleanup Program, 300 Desmond Drive, Lacey, WA 98504-7775. (Please call **360/407-6365** or e-mail **Dene461@ecy.wa.gov** for an appointment.)
- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/dntwnSafeway/dntwnSafeway_hp.htm

For more information or to submit written comments, please contact **Guy Barrett**, Site Manager, at the Ecology address listed above or at **360/407-7115** or e-mail **Gbar461@ecy.wa.gov**. For public involvement information, please contact **Hannah Aoyagi**, Public Involvement Coordinator at **360/407-6790** or e-mail **Haoy461@ecy.wa.gov**.

INDEPENDENT CLEANUPS

A property owner may conduct an independent cleanup of contamination and submit reports to Ecology. When a property owner applies to Ecology for review of their independent cleanup, the site enters the Voluntary Cleanup Program. After review, Ecology sends a letter to the property owner stating either that additional work is required to be removed from the list of hazardous waste sites or that no further action is needed.

OTHER DEPARTMENT NOTICES

Notice of Revision to Ecology Policy 840: Data Submittal Requirements

All sediment quality (“SEDQUAL”) data must now be submitted to Ecology’s Environmental Management System (EIM) data base. The purpose of Policy 840 is to describe the requirements for submitting environmental monitoring data generated/collected during the investigation and cleanup of contaminated sites under the Model Toxics Control Act (MTCA) and the Sediment Management Standards. This policy applies to all Ecology staff, potentially liable parties, prospective purchasers, state and local agencies, Ecology contractors that investigate or manage the cleanup of contaminated sites.

Also, data must now be submitted to EIM prior to Ecology issuing a Voluntary Cleanup Program (VCP) opinion letter.

Additional information about data submittal instructions may be found on Ecology’s EIM web site at: <http://www.ecy.wa.gov/eim/>

The revised policy may be obtained by contacting **Ann McNeely** at **360/407-7205** or e-mail **Amcn461@ecy.wa.gov**.

If you have any questions or comments regarding the policy revision, please contact **Charles San Juan** at **360/407-7191** or e-mail **Csan461@ecy.wa.gov**, or by mail at the following address: Department of Ecology, Toxics Cleanup Program, P.O. Box 47600, Olympia, Washington 98504-7600.
