Department of Ecology, PO Box 47600, Olympia, WA 98504-7600

September 15, 2010

HAZARDOUS SITES LIST & NOTICE OF HAZARD RANKING

This issue is an updated Hazardous Sites List as required by WAC 173-340-330. It includes all sites that have been assessed and ranked using the Washington Ranking Method. Also listed are National Priorities List (NPL) sites. Additions to the list, changes in remedial status of sites on the list, and removals from the list are published twice a year. Placing of a site on the Hazardous Sites List does not, by itself, imply that persons associated with the site are liable under Chapter 70.105D RCW. For additional information about a site on this list, please contact the appropriate indicated person. Please direct questions regarding circulation of the Hazardous Sites List or Site Register to Linda Thompson at (360) 407-6069 or ltho461@ecy.wa.gov. Ecology is an equal-opportunity employer. If you require special accommodations, please contact the Toxics Cleanup Program at (360) 407-7170. Persons with hearing loss can call 711 WA Relay Service. Persons with a speech disability can call 877-833-6341

HOW A SITE GETS ON THE HAZARDOUS SITES LIST

Sites on the Hazardous Sites List (excluding NPL and TSP sites) have undergone a preliminary study called a Site Hazard Assessment (SHA). An SHA provides Ecology with basic information about a site. Ecology then uses the Washington Ranking Method (WARM) to estimate the potential threat the site poses, if not cleaned up, to human health and the environment. The estimate is based on the amount of contaminants, how toxic they are, and how easily they can come in contact with people and the environment. Sites are ranked relative to each other on a scale of one to five. A rank of one represents the highest level of concern relative to other sites, and a rank of five the lowest. Hazard ranking helps Ecology target where to spend cleanup funds. However, a site's actual impact on human health and the environment, public concern, a need for an immediate response, and available cleanup staff and funding also affect which sites get first priority for cleanup.

HOW A SITE GETS REMOVED FROM THE LIST

A site may be removed from the list only if the site is cleaned up. In some cases, long-term monitoring and periodic reviews may be required to ensure the cleanup is adequate to protect the public and the environment. Ecology will hold a public notice for any site it proposes to remove from the Hazardous Sites List.

HOW TO ACCESS DEPARTMENT OF ECOLOGY SITE FILES

To review a file or record pertaining to a site on the Hazardous Sites List, please contact the Public Disclosure Coordinator listed for the region in which the site resides.

- Central Regional Office: Roger Johnson, 15 W Yakima Ave. Ste. 200, Yakima 98902-3463, (509) 454-7658, rjoh461@ecy.wa.gov
- Eastern Regional Office: Kari Johnson, N 4601 Monroe St., Spokane 99205-1265, (509) 329-3415, kajo461@ecy.wa.gov
- Industrial Section: Kathy Vermillion, 300 Desmond Dr. SE, Lacey 98503-1274, (360) 407-6916, kver461@ecy.wa.gov
- Northwest Regional Office: Sally Perkins, 3190 160th Ave. SE, Bellevue 98008-5452, (425) 649-7190, sper461@ecy.wa.gov
- Northwest Regional Office: Sally Alexander, 3190 160th Ave. SE, Bellevue 98008-5452, (425) 649-7239, saal461@ecy.wa.gov
- Nuclear Waste Program: Valarie Peery, 3100 Port of Benton Blvd., Richland 99352, (509) 372-7920, vpee461@ecy.wa.gov
- Site Cleanup/Underground Storage Tank Unit: Carol Dorn, 300 Desmond Dr. SE, Lacey 98503, (360) 407-7224, cesg461@ecy.wa.gov
- Southwest Regional Office: Debbie Nelson, 300 Desmond Dr. SE, Lacey 98503-1274, (360) 407-6365, dene461@ecy.wa.gov

Ecology provides additional information about each site through its various site lists located at: <http://www.ecy.wa.gov/programs/tcp/sites/sites.html>

Hazardous Sites List

SITE REGISTER SPECIAL ISSUE -- September 15, 2010

SITES REMOVED FROM THE HAZARDOUS SITES LIST

Ecology may remove a site from the list only after determining that all remedial actions except confirmational monitoring have been completed and compliance with the cleanup standards has been achieved at the site, or the listing was erroneous.

Hazardous Sites List

SITE REGISTER SPECIAL ISSUE -- September 15, 2010

Awaiting Further Remedial Action:

Only a Site hazardous Assessment has been completed at the site.

Remedial Action in Progress:

Ecology has oversight. This can include sites undergoing: 1) Remedial Investigation/Feasibility Study; 2) Interim Action (any remedial action that partially addresses the cleanup of a site); 3) Cleanup Action (active construction).

Construction Complete:

This category includes sites where all major cleanup construction has been completed, but various levels of operation/maintenance/monitoring may continue to be performed at the site.

Site Hazard Assessment (SHA):

An process to confirm the presence of hazardous substances and to determine the relative risk the site poses to human health and the environment. If more action is needed, a Remedial Investigation/Feasibility Study is started.

Interim Action:

Any remedial action that partially addresses the cleanup of a site.

Remedial Action:

Any action to identify, eliminate, or minimize any threat posed by hazardous substances to human health or the environment, including any investigative and monitoring activities of any release or threatened release of a hazardous substance and any health assessments or health effects studies.

State Remedial Investigation/Feasibility Study (RI/FS):

An in-depth study conducted to:

- Determine detailed site characteristics and define the extent and magnitude of contamination at a site;
- Evaluate potential impacts on human health and the environment and establish cleanup criteria; and
- Evaluate cleanup alternatives.

The RI/FS may be conducted as two separate steps, but is usually combined into one study. A draft of the RI/FS report is made available for public review and comment before finalizing.

Independent Remedial Action:

This category includes all sites with independent remedial actions currently underway or completed, but work not verified by Ecology, or sites that have entered Ecology's Voluntary Cleanup Program.

Washington Ranking Method (WARM):

The results of the Site Hazard Assessment step are used in the Washington Ranking Method (WARM) to yield a WARM score--a number between 1 and 5. A score of 1 represents the highest level of risk and 5 the lowest. Generally, federal Superfund sites and sites ranked 1 or 2 are higher priority for cleanup. Factors that enter into site hazard ranking include: the amount and type of contaminants present, how easily contaminants could come into contact with people and the environment, and the level of public concern.

National Priorities List (NPL):

Environmental Protection Agency (EPA) list of hazardous waste sites identified for possible long-term response. These sites are managed by the State under the Model Toxics Control Act (MTCA), managed by EPA under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) requirements, managed by both (co-lead), or under a Federal Facilities Tri-Party Agreement.

Tacoma Smelter Site (TSP):

For almost 100 years, Asarco operated a copper smelter in North Tacoma (Ruston). The pollution from the smelter is being addressed by both EPA and Ecology. In 1983, EPA listed the Commencement Bay Nearshore/Tideflats (CB/NT) Superfund Site on the NPL. The CB/NT Superfund Site includes four operable units associated with the Asarco smelter: Asarco Tacoma Smelter (OU 02), Asarco Off-Property (OU 04), Asarco Sediments (OU 06), and Asarco Demolition (OU 07). The Asarco Superfund sites are focused on the highest contamination close in to the smelter. In late 1990, Ecology expanded the investigation of the extent of contamination from the smelter. The extent of contamination is over 1,000 square miles and called the Tacoma Smelter Plume. Contamination decreases with distance from the smelter, and the levels outside of the Superfund operable units are generally moderate. For information, go to <http://www.ecy.wa>.
