FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

BENTON COUNTY

L & L Exxon Site Facility Site ID# 78835792 CSID# 7128
1315 Lee Boulevard, Richland

Public comment period: 10/15/14 – 11/15/14

Interim Action Plan Available for Public Review and Comment

Ecology plans to conduct an interim action at the L & L Exxon site at 1315 Lee Blvd. in Richland. An interim action is a partial cleanup designed to significantly reduce contaminants and/or exposure to contaminants.

The interim action will include injecting oxygen-releasing and other compounds underground to break down petroleum and PCE contamination into non-toxic products. Extraction wells will be installed to allow contaminated groundwater and vapors to be vacuumed out and removed from the site.

Please direct questions and written comments to site manager Jennifer Lind.

Site Manager: **Jennifer Lind**

KING COUNTY

Eastside Jeep and Eagle Site Facility Site ID# 2497 CSID# 5122
400 116th Ave NE, Bellevue

Public comment period: 10/30/14 – 12/1/14

Periodic Review Available for Public Review and Comment

Ecology invites you to review and comment on a document called a periodic review for a portion of the Eastside Jeep and Eagle site. A periodic review is conducted at least every five years after the initiation of a cleanup action at a site or property, as required by the Model Toxics Control Act (MTCA).

The purposes of the review are to evaluate site conditions and to ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy. Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

Please direct comments and questions to periodic review coordinator Eugene Freeman.

Crowley Marine Services Inc. 8th Ave S Site
7400 8th Avenue South, Seattle

Facility Site ID# 1940187

CSID# 2520

Interim Action Work Plan Suspended

In August 2014, an interim action work plan for the Crowley Marine Services Inc. 8th Ave S site was made available for public review and comment. The property owner was proposing to construct a rail spur and concrete pad which required cleanup of contamination in the area. The construction project and interim action have been suspended due to the high potential for archaeological resources in the area. The property owner is resuming work on the site remedial investigation and feasibility study.

Please direct questions and comments to site manager Victoria Sutton.

KITTITAS COUNTY

Big B Mini Mart Site
1611 Canyon Road, Ellensburg

Facility Site ID# 386

CSID# 4901

Negotiations for Agreed Order Extended

Ecology and Burlington Northern Sante Fe Railroad are negotiating an agreed order to conduct a remedial investigation/feasibility study at the Big B Mini Mart site.

Negotiations were scheduled to begin on March 24, 2014, and end on June 30, 2014. They were extended to July 31, 2014. They were extended again to Oct. 31, 2014, and now they have been extended to Nov. 30, 2014.

Please direct questions to site manager John Mefford.

PEND OREILLE COUNTY

Airport Kwik Stop Site
Highway 31 and Greenhouse Road, lone

Facility Site ID# 32584416

CSID# 4203

Monitoring Wells Installed

In 1994, underground storage tanks at the Airport Kwik Stop were removed and above ground storage tanks were used to store fuel. In 2008, a leak occurred in a pipe connection under the premium gas dispenser which resulted in spraying gasoline inside the dispenser.

In 2010 and 2011, soil and groundwater samples taken from the site showed certain petroleum-related contaminants exceeded state standards.

Four monitoring and remediation wells were installed October 1 through October 3 in an area of persistent soil and groundwater contamination (Cabin Grill area) downstream from a release caused by long-term leak in gasoline pumping station fitting.

Please direct questions to site manager Huckleberry Palmer.

PIERCE COUNTY

PRS Group, Inc. Site
3003 Taylor Way, Tacoma

Facility Site ID# 1245

CSID# 3255

Public comment period: 10/27/14 – 12/11/14

Change of Permit Status Available for Public Review and Comment

Ecology invites you to comment on a change of permit status for PRS Group Inc. (PRS). PRS's facility is located on the Tacoma tide flats at 3003 Taylor Way in Tacoma.

PRS is currently conducting activities that do not require a dangerous waste permit. Ecology proposes to terminate PRS's interim state-only status for treating, storing and disposing hazardous waste. Ecology is seeking comments on the proposed termination of PRS' interim status permit.

Ecology will consider and respond to all comments the public submits. Ecology will then make a final decision, and inform the facility and all people who comment. For more information about the site, please see the documents linked below.

Please direct questions and written comments to Ava Edmonson.

SPOKANE COUNTY

Holcim Inc. Site

Facility Site ID# 682

CSID# 726

South Lincoln Street and West First Avenue, Spokane

Negotiations Starting for Draft Cleanup Action Plan and Consent Decree

Ecology plans to begin negotiations on October 16, 2014, with Holcim (US) Inc. and the City of Spokane Valley for a draft cleanup action plan and consent decree.

The draft cleanup action plan evaluates cleanup options for the site and identifies Ecology's preferred cleanup actions. The consent decree is the legal agreement between Ecology, Holcim (US) Inc. and the City of Spokane Valley that implements the draft cleanup action plan.

Both of these documents are draft until Ecology reviews, considers and potentially amends the documents, if appropriate, based on public comment received during the comment period.

The site was previously used for cement manufacturing operations. Cleanup work focuses on the cement kiln dust (CKD) contamination which is a by-product of the cement manufacturing. The cleanup work is necessary because cement kiln dust (CKD) remains in two locations on the property. CKD is found on the Holcim property on the north plateau portion of the land. A smaller deposit is located north of the fence on property owned by the city.

CKD generally may contain arsenic, cadmium, and lead, and can have a high pH. The property is close to the Spokane River and aquifer. Past studies found arsenic in groundwater at levels that exceeded state standards.

Negotiations are anticipated to be completed in 60 days.

Please direct questions to site manager Jeremy Schmidt.

WHATCOM COUNTY

I & J Waterway Site

Facility Site ID# 3145643

CSID# 2012

701 Hilton Ave, Bellingham

Public comment period: 10/30/14 – 11/28/14

Remedial Investigation and Feasibility Study Available for Public Review and Comment

Ecology is asking for comments on an environmental report for the I & J Waterway cleanup site located on Bellingham's waterfront at 701 Hilton Ave. The report, called a remedial investigation and feasibility study, includes information about contaminated marine sediment, an evaluation of cleanup alternatives, and the identification of a preferred cleanup alternative.

The contamination is from multiple past sources including lumber mill operations, rock crushing, and food/seafood processing. The preferred cleanup alternative calls for a combination of removal, capping, monitoring of natural capping, and site-wide monitoring following construction.

Please direct comments and questions to site manager Lucy McInerney.

Site Manager: **Lucy McInerney**
Northwest Regional Office

- Ecology's Northwest Regional Office Toxics Cleanup Program – 3190 160th Avenue SE, Bellevue, WA. (Please contact Sally Perkins for an appointment at 425/ 649-7190 or Sally.Perkins@ecy.wa.gov.)

YAKIMA COUNTY

Moxee POTW Site
7520 Postma Road, Moxee

Facility Site ID# 42788675

CSID# 6057

Public comment period: 11/5/14 – 12/5/14

Interim Action Plan Available for Public Review and Comment

Ecology plans to conduct an interim action at the Moxee POTW site at 7520 Postma Road in Moxee. An interim action is a partial cleanup designed to significantly reduce contaminants and/or exposure to contaminants. The interim action will include injecting oxygen-releasing and other compounds underground to break down petroleum contamination into non-toxic products. Soil samples will be collected and groundwater will be monitored to measure the effectiveness of this cleanup.

Please direct questions and written comments to site manager Laura Klasner.

GLOSSARY

Agreed order - A legal agreement with Ecology to make sure the cleanup meets the standards of Washington State's cleanup law, the Model Toxics Control Act (MTCA).

Cleanup action plan (CAP) - A document that describes the selected cleanup method(s) and specifies cleanup standards and other requirements. It is based on information and technical analyses generated during the RI/FS and consideration of public comments and community concerns. A draft of the CAP (DCAP) is made available for public review and comment before finalizing.

Comment period - A time period during which the public can review and comment on various documents and Ecology or EPA actions. For example, a comment period is provided to allow community members to review and comment on proposed cleanup action alternatives and proposed plans. Also, a comment period is held to allow community members to review and comment on draft feasibility studies.

Consent decree - A formal legal agreement that is filed with a court. It describes studies and/or cleanup work to be done at a site and the terms under which that work is to be done.

Engineering design report - Engineering design reports outline the specific details for implementation and operation of the first phase of the cleanup actions.

ERTS - Environmental Report Tracking System

Five-year periodic review - A periodic review is conducted at least every five years after the initiation of a cleanup action at a site, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions, after cleanup is considered complete, and to ensure protection of human health and the environment.

Hazardous Sites List - A statewide list of contaminated properties. Ecology may remove a site from the list only after determining that all remedial actions except confirmational monitoring have been completed and compliance with the cleanup standards has been achieved at the site, or the listing was erroneous.

Independent cleanup action - Any remedial action without department oversight or approval and not under an order or decree.

LUST - Leaking Underground Storage Tank

NFA - No Further Action

Public participation plan - Outlines and describes the tools Ecology will use to inform the public about site activities, and it identifies opportunities for the community to become involved in this process.

PSI - Puget Sound Initiative

RCW - Revised Code of Washington

Remedial action - Construction work done to clean up a contaminated site.

Remedial investigation/feasibility study - Two distinct but related studies. They are usually performed at the same time, and together referred to as the "RI/FS."

Responsiveness summary - A summary of oral and/or written public comments received by Ecology during a comment period on key documents, and Ecology's responses to those comments.

RI/FS - See Remedial Investigation/Feasibility Study

SEPA - State Environmental Policy Act

Site Hazard Assessment (SHA) - An assessment to gather information about a site to confirm whether a release of hazardous substances has occurred and to enable Ecology to evaluate the relative potential hazard posed by the release.

UST - Underground Storage Tank

UXO - Unexploded Ordnance

Voluntary Cleanup Program (VCP) - The VCP is one of several options for cleaning up a hazardous waste site under the state's cleanup law. Under this option, property owners may perform a cleanup independently and request services from Ecology for a fee.

WAC - Washington Administrative Code

WARM, Washington Ranking Method - The method used to rank sites placed on the Hazardous Sites List.

Additional glossary terms may be found on the Ecology website at:
http://www.ecy.wa.gov/programs/tcp/tcp_acronym_list.htm
