FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

KING COUNTY

Harbor Island Superfund Site Seattle

Public comment period: 12/19/14 – 1/26/15

Periodic Review Available for Public Review and Comment

Ecology invites you to review and comment on a document called a periodic review for each of three Petroleum Tank Farm Terminals, which are part of the US EPA Harbor Island Superfund site:

- BP West Coast Products Terminal Harbor Island Site (former ARCO Harbor Island Terminal Site) – Cleanup Site ID 4426 and Facility Site ID 2024, at 1652 SW Lander St., Seattle.
- Shell Oil Harbor Island Terminal Site (former Equilon Enterprises LLC; former Texaco Harbor Island Site) – Cleanup Site ID 5051 and Facility Site ID 2030, at 2555 – 13th Ave. SW, Seattle.
- Kinder Morgan Liquids Terminal Harbor Island Site (former GATX Terminals Corporation Harbor Island) – Cleanup Site ID 6811 and Facility Site ID 88394523, at 2720 – 13th Ave. SW, Seattle.

A periodic review is conducted at least every five years after the initiation of a cleanup action at a site or property, as required by the Model Toxics Control Act (MTCA); and is part of the EPA five-year review for 2010 through 2014.

The purposes of the review are to evaluate site conditions for each of the petroleum terminals and to ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy.

Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

Please direct questions and comments to Ecology site manager Maura S. O'Brien.

All City Wrecking Site

Facility Site ID# 22342251

CSID# 3099

9438 Des Moines Memorial Drive, Seattle

Public comment period: 12/24/14 – 1/23/15

Periodic Review Available for Public Review and Comment

Ecology invites you to review and comment on a document called a periodic review for a portion of the All City Wrecking and Sales site. A periodic review is conducted at least every five years after the initiation of a cleanup action at a site or property, as required by the Model Toxics Control Act (MTCA).

The purposes of the review are to evaluate site conditions and to ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy. Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

Please direct questions and comments to periodic review coordinator Eugene Freeman.

KITSAP COUNTY

Crownhill Elementary School Site
1500 Rocky Point Road NW, Bremerton

Facility Site ID# 99722456

CSID# 4487

Responsive Summary Available for Public Review

Ecology held a 30-day public comment period from September 26 to October 27, 2014, on a draft agreed order, draft remedial investigation and feasibility study, draft cleanup action plan, and draft environmental covenants for Crownhill Elementary School and Bremerton United Methodist Church.

Ecology received three comments during the comment period; the agency's responses to the comments are now available.

Please direct questions to site manager Libby Goldstein.

KITTITAS COUNTY

Big B Mini Mart Site
1611 Canyon Road, Ellensburg

Facility Site ID# 386

CSID# 4901

Negotiations for Agreed Order Extended

Ecology and Burlington Northern Sante Fe Railroad are negotiating an agreed order to conduct a remedial investigation/feasibility study at the Big B Mini Mart site. Negotiations began on March 24, 2014, and were scheduled to end on June 30, 2014. They were extended to July 31, 2014. They were extended again to Oct. 31, 2014, to Nov. 30, 2014; to Dec. 3, 2014; and now to Jan. 31, 2015.

Please direct questions to site manager John Mefford.

PACIFIC COUNTY

Tetz Oil Raymond Site
3711 Ocean Avenue, Raymond

Facility Site ID# 627714793

CSID# 1060

Public comment period: 12/30/14 – 1/30/15

Site Proposed for Removal from Hazardous Sites List

Ecology invites the public to comment on the decision to remove the Tetz Oil Raymond site from the Hazardous Sites List.

Chevron removed 12.8 tons of petroleum-contaminated soil. Follow-up sampling did not find petroleum contamination above site-specific cleanup levels in soil or groundwater.

Ecology considers the cleanup complete. The site was cleaned up under the Voluntary Cleanup Program.

Please direct comments and questions to site manager Thomas Middleton.

Site Manager: **Thomas Middleton**

For public involvement information, contact Diana Smith by telephone at 360/ 407-6255 or at Diana.Smith@ecy.wa.gov.

SPOKANE COUNTY

Holcim Inc. Site

Facility Site ID# 52126416

CSID# 4580

South Lincoln Street and West First Avenue, Spokane

Negotiations Extended for Draft Cleanup Action Plan and Consent Decree

Ecology began negotiations on October 16, 2014, with Holcim (US) Inc. and the City of Spokane Valley for a draft cleanup action plan and consent decree. Negotiations originally were set for 60 days, but have now been extended until Jan. 16, 2015.

The draft cleanup action plan evaluates cleanup options for the site and identifies Ecology's preferred cleanup actions. The consent decree is the legal agreement between Ecology, Holcim (US) Inc. and the City of Spokane Valley that implements the draft cleanup action plan.

Both of these documents are draft until Ecology reviews, considers and potentially amends the documents, if appropriate, based on public comment received during the comment period.

The site was previously used for cement manufacturing operations. Cleanup work focuses on the cement kiln dust (CKD) contamination which is a by-product of the cement manufacturing. The cleanup work is necessary because cement kiln dust (CKD) remains in two locations on the property. CKD is found on the Holcim property on the north plateau portion of the land. A smaller deposit is located north of the fence on property owned by the city.

CKD generally may contain arsenic, cadmium, and lead, and can have a high pH. The property is close to the Spokane River and aquifer. Past studies found arsenic in groundwater at levels that exceeded state standards.

Please direct questions to site manager Jeremy Schmidt.

Site Manager:

Jeremy Schmidt
Eastern Regional Office
509/ 329-3484
Jeremy.Schmidt@ecy.wa.gov

Becker Buick Sprague Ave Site

Facility Site ID# 6237923

CSID# 5398

636 E. Sprague, Spokane

Public comment period: 12/11/14 – 1/15/15

Periodic Review Available for Public Review and Comment

Ecology invites you to review and comment on a document called a periodic review for the Becker Buick Sprague Ave site. A periodic review is conducted at least every five years after the initiation of a cleanup action at a site, as required by the Model Toxics Control Act (MTCA).

The purposes of the review are to evaluate site conditions after cleanup is considered complete, and to ensure protection of human health and the environment. The Becker Buick site is located at 636 East Sprague in Spokane. The site has been used as an automobile sales and service facility since 1953.

Cleanup actions began at the site in December 1991 when an underground storage tank containing waste oil was removed. Associated piping also was removed. The tank had been taken out of service in 1989 and a new tank installed to hold waste oil. Investigations led to removal of 8 tons of soil.

Additional investigations and cleanup continued in 2002 because of petroleum hydrocarbons in soil. Two underground storage tanks containing gasoline and the hydraulic automotive hoists inside the service building and associated piping were removed. Another 10 tons of soil were removed from the excavations.

Some contaminated soil remains at the site because it is under structures that could be damaged by trying to remove the soil. The groundwater at the site is not impacted by the contaminated soil. An environmental covenant was placed on the property to limit how the site may be used and protect the cleanup actions that have been taken at the site.

Ecology conducted a site visit June 4, 2014. The building that remains at the site and the concrete cover over contaminated soils eliminates potential direct exposure to contaminated soils. The concrete surface appears in excellent condition and no repair, maintenance or contingency actions have been required. The site continues to be occupied by the Becker Buick Automotive Dealership and provides automotive sales and service.

Ecology has determined the following based on the periodic review:

- The cleanup actions completed at the site appear to be protective of human health and the environment.
- Soil cleanup levels have not been met at the site; however, under WAC 173-340-740(6) (f), the cleanup action is determined to comply with cleanup standards, since the long-term integrity of the containment system is ensured and the requirements for containment technologies have been met.
- The covenant for the property is in place and will be effective in protecting public health and the environment from exposure to hazardous substances and protecting the integrity of the cleanup action.

Ecology will review all comments received during the comment period and modifications to the periodic review will be made based on public comment, if appropriate. If no significant changes are made, the review will be finalized. If significant changes are made, an additional public comment period will be held.

Please direct comments and questions to site manager Patti Carter.

Site Manager: **Patti Carter**

GLOSSARY

Agreed order - A legal agreement with Ecology to make sure the cleanup meets the standards of Washington State's cleanup law, the Model Toxics Control Act (MTCA).

Cleanup action plan (CAP) - A document that describes the selected cleanup method(s) and specifies cleanup standards and other requirements. It is based on information and technical analyses generated during the RI/FS and consideration of public comments and community concerns. A draft of the CAP (DCAP) is made available for public review and comment before finalizing.

Comment period - A time period during which the public can review and comment on various documents and Ecology or EPA actions. For example, a comment period is provided to allow community members to review and comment on proposed cleanup action alternatives and proposed plans. Also, a comment period is held to allow community members to review and comment on draft feasibility studies.

Consent decree - A formal legal agreement that is filed with a court. It describes studies and/or cleanup work to be done at a site and the terms under which that work is to be done.

Engineering design report - Engineering design reports outline the specific details for implementation and operation of the first phase of the cleanup actions.

ERTS - Environmental Report Tracking System

Five-year periodic review - A periodic review is conducted at least every five years after the initiation of a cleanup action at a site, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions, after cleanup is considered complete, and to ensure protection of human health and the environment.

Hazardous Sites List - A statewide list of contaminated properties. Ecology may remove a site from the list only after determining that all remedial actions except confirmational monitoring have been completed and compliance with the cleanup standards has been achieved at the site, or the listing was erroneous.

Independent cleanup action - Any remedial action without department oversight or approval and not under an order or decree.

LUST - Leaking Underground Storage Tank

NFA - No Further Action

Public participation plan - Outlines and describes the tools Ecology will use to inform the public about site activities, and it identifies opportunities for the community to become involved in this process.

PSI - Puget Sound Initiative

RCW - Revised Code of Washington

Remedial action - Construction work done to clean up a contaminated site.

Remedial investigation/feasibility study - Two distinct but related studies. They are usually performed at the same time, and together referred to as the "RI/FS."

RI/FS - See Remedial Investigation/Feasibility Study

SEPA - State Environmental Policy Act

Site Hazard Assessment (SHA) - An assessment to gather information about a site to confirm whether a release of hazardous substances has occurred and to enable Ecology to evaluate the relative potential hazard posed by the release.

UST - Underground Storage Tank

UXO - Unexploded Ordnance

Voluntary Cleanup Program (VCP) - The VCP is one of several options for cleaning up a hazardous waste site under the state's cleanup law. Under this option, property owners may perform a cleanup independently and request services from Ecology for a fee.

WAC - Washington Administrative Code

WARM, Washington Ranking Method - The method used to rank sites placed on the Hazardous Sites List.
