

Agreed Order Available for Comment

A PUGET SOUND INITIATIVE site

Reaching the goal of a healthy, sustainable
Puget Sound now and forever!

The Washington Department of Ecology (Ecology) would like your comments on a proposed agreed order for cleanup of the West Bay Marina site. You can now review and comment on these documents:

- **Agreed Order**—A legal agreement requiring West Bay Marina Associates to clean up the site according to Ecology's final cleanup action plan (see below).
- **Public Participation Plan**—Describes the tools Ecology will use to inform the public and gather input on the cleanup.

Ecology Wants Your Comments!

We are accepting comments on these documents from **May 8 - June 8, 2015**. The box to the right shows where to review documents and how to submit comments.

Site Contamination and Cleanup Plan

From 2008 - 2013, West Bay Marina Associates and Ecology investigated the site. We found dioxins above cleanup levels in soil at the north end of the site.

We finalized the cleanup action plan in fall 2014 after a comment period. To clean up the site, West Bay Marina Associates will:

- Remove six trees to reach dioxin-contaminated soil.
- Remove and dispose of the contaminated soil and tree roots.
- Fill the excavated area with clean soil and restore the area with new plantings. This will include six new trees.

All work will be done above the ordinary high water mark of the neighboring stream. You can read more on our website.

What Happens Next

After the comment period, we will respond to comments. We will also finalize the agreed order. Then, West Bay Marina Associates will clean up the site according to the cleanup plan. They hope to do the cleanup this year.

Comments Accepted

May 8 through June 8, 2015
