

Hasa, Inc. Wastewater Permit

Draft documents are available at the following locations:

Longview Public Library
1600 Louisiana Street
Longview, WA 98632

http://www.ecy.wa.gov/programs/swfa/industrial/misc_hasa.html

Dept of Ecology, Headquarters
Industrial Section
300 Desmond Dr. SE
Lacey, WA, 98502
(360) 407-7393

Special accommodations

To request ADA accommodation for disabilities, or printed materials in a format for the visually impaired, call Ecology at (360) 407-7668 or visit <http://www.ecy.wa.gov/accessibility.html>. Persons with impaired hearing may call Washington Relay Service at 711. Persons with speech disability may call TTY at 877-833-6341.

Comment period: September 16 - October 17, 2016

The Department of Ecology (Ecology) invites you to comment on the proposed renewal of the State Waste Discharge wastewater permit for Hasa's Longview bleach repackaging plant.

Changes to the permit

Proposed major changes to the permit include:

- Replacing the residual chlorine limit with a best management practice for removal of residual chlorine from the wastewater.
- Increasing the allowed amount of wastewater sent to Nippon's Longview mill from 2,000 gallons to 3,000 gallons each day.

More information on these changes is available in the permit's Fact Sheet.

You may request a public hearing to ask questions and submit verbal comments. To request a hearing, contact:

Angie Fritz,
Industrial Section
P.O. Box 47600
Olympia, WA 98504-7600
angela.fritz@ecy.wa.gov

If we determine there is significant public interest during this comment period to hold a hearing, we will extend the comment period to allow at least 30 days notice, and publish the time, date and location of the hearing.

Send written comments to:

Shingo Yamazaki
Dept. of Ecology
Industrial Section
P.O. Box 47600
Olympia, WA 98504-7600
shingo.yamazaki@ecy.wa.gov
Fax: (360) 407-6102

Commenting

Effective comments tell us if we correctly applied current laws, rules and regulations to this action. They:

- Are specific. Tell us what your concern is and how you think the proposed wastewater permit should change.
- Are focused. Refer to the conditions and requirements in the permit.
- Relate to the potential impacts to water quality or sediment from this action. Where possible, describe the state or federal rules and regulations you think have not been applied correctly.

When the comment period ends, we will review all comments received and make appropriate changes before finalizing the documents.

Facility information

Located in Longview at 3400 Industrial Way, Hasa receives sodium hypochlorite (bleach) in bulk tank trucks, off-loads it to bulk storage tanks, and repackages it into one gallon bottles for shipment.

Wastewater is discharged to Nippon Longview's wastewater treatment facility. After treatment, Nippon discharges their wastewater through Outfall 001/002 to the Columbia River.
