## FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

### FRANKLIN COUNTY

<b>Pasco Landfill NPL Site</b>	<b>Facility Site ID# 575</b>	<b>Cleanup Site ID# 1910</b>
--------------------------------	------------------------------	------------------------------

**Kahlotus Road and U.S. Highway 12, Pasco**

**Public comment period: 3/20/17 – 4/20/17**

*Draft Notice of Construction for a Regenerative Thermal Oxidizer Available for Public Review and Comment*

Ecology invites you to review and comment on a draft air quality permitting documents for a regenerative thermal oxidizer (RTO) at the Pasco Landfill NPL site.

Ecology is overseeing cleanup of contamination at the closed landfill. Cleanup requires installation of the RTO to control emissions of gases that will be removed by the soil vapor extraction system in the industrial waste portion of the landfill.

The following documents are available for public review:

- The original 2014 and revised 2016 permit applications.
- The risk analysis report for hydrogen chloride emissions.
- A preliminary determination of approval.
- A technical support document for that preliminary determination.
- A recommendation that the applicant's Health Impact Assessment shows acceptable impacts to the public from this project.
- The City of Pasco's preliminary determination that the project will not cause adverse impacts to the environment under the State Environmental Policy Act.

Please direct questions and comments to the air quality permit writer:

## GRAYS HARBOR COUNTY

---

### Briggs Nursery

### Facility Site

### Cleanup Site

ID#

27459699

ID#

5803

715 South Bank Road, Porter

**Public comment period: 2/16/17— 3/20/17**

*Draft Periodic Review Report available for Public Review and Comment*

Ecology invites you to review and comment on the third periodic review for Briggs Nursery site. A periodic review is conducted at least every five years after beginning a cleanup action, as required by the Model Toxics Control Act.

The purposes of the review are to evaluate site conditions and ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy. Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

In the past, the Briggs Nursery site was used as a dairy farm. When Briggs purchased the site in 1991, they found evidence of petroleum contamination. They confirmed this with sampling in 1998.

Briggs entered the **Voluntary Cleanup Program** in 1999 and removed about 300 tons of contaminated soil. Some contaminated soil remains at the site under a building. Groundwater contamination was no longer detected during final sampling from 2002-2003.

An environmental covenant is in place for the site. A periodic review was conducted in 2012 and again in 2017. Both found that the cleanup remains protective of human and environmental health.

Please direct questions and comment to the Periodic Review Coordinator:

Panjini Balaraju

## KING COUNTY

---

Olympic Pipe Line Co. Kent (OPLC Kent Block Valve) Facility Site ID# 2401 Cleanup Site ID# 3070

74th Avenue South & South 259th Street, Kent

*Proposed Removal from Ecology's Hazardous Sites List*

In August 1989, OPLC discovered a release of gasoline and diesel fuel to soil and ground water due to the failure of the block valve. Following repairs to the block valve in 1989, OPLC excavated approximately 30 cubic yards of hydrocarbon impacted soil from the area immediately surrounding the block valve. Additional soil excavations were completed from 8/31-9/27, 1989 when another 1,950 tons of soil were removed. Approximately 168 gallons of contaminated ground water and product were pumped out and removed from the Site. Ground water was treated using air sparging technology for a number of years.

Ecology determined the Site meets state cleanup standards for soil and groundwater protective of human health and the environment. Therefore, Ecology proposed to delist the Site from the Hazardous Sites List. Contaminants included gasoline and diesel range petroleum hydrocarbons in soil and ground water.

Gas Works Park Play Area

Facility Site ID# 139

Cleanup Site ID# 2876

2000 N Northlake Way, Seattle

**Public comment period: 3/20/17 - 4/18/2017**

*Draft Plans for Interim Cleanup Actions for Public Comment*

The Department of Ecology (Ecology) is conducting a public comment period on draft plans for interim cleanup actions happening at Gas Works Park in Seattle. The interim actions include monitoring and treating arsenic contamination. The draft plans for review are:

- Draft Interim Action Work Plan: this describes the work to be done until the final cleanup is completed.
- Draft Amendment to an Agreed Order; this is an update to the existing legal agreement between Ecology, Seattle Parks & Recreation (SPR), and Puget Sound Energy (PSE).

# Site Register

## State Environmental Policy Act (SEPA) Checklist and Determination

A comment period was held 3/2/2017—3/16/2017 for a SEPA checklist and determination of non-significance. Ecology determined that the cleanup work will not have a significant adverse environmental impact. Potential impacts from construction activities such as noise will be addressed. You can review these documents at locations or website below.

## Site Description

Gas Works Park is a 20-acre park located at 2101 North Northlake Way. The park extends into Lake Union (the lake lies to the east, west and south of the park). The park's north end is bounded by Northlake Way.

From the early 1900s until 1956, gas companies operated a plant at the site that converted coal and oil into manufactured gas. A tar refinery also operated at the site, refining materials obtained as a by-product of the gas manufacturing process, and producing coal tar-based products.

The Gas Works Park uplands underwent an environmental cleanup in 2000 and 2001, in which two feet of clean topsoil was placed over a protective barrier. A groundwater remediation system was installed and operated from 2001 through 2006.

Sediment investigations offshore of Gas Works Park in Lake Union have indicated the presence of high levels of polycyclic aromatic hydrocarbons (PAHs). The City of Seattle and Puget Sound Energy are conducting Remedial Investigations and Feasibility Studies for these contaminated sediments.

Boeing Auburn

Facility Site ID# 2018

Cleanup Site ID# 5049

700 15TH ST SW, Auburn

**Public comment period: 3/8/17 — 5/8/17**

*Draft Remedial Investigation Report Available for Public Comment and Review*

The Washington Department of Ecology invites the public to review a draft report on a multi-year study into groundwater contamination at property owned by The Boeing Company in Auburn that has spread into parts of Algona and Auburn.

The study, called a remedial investigation, is the first phase in Washington's four part cleanup process for contaminated sites. It provides information needed for the next steps: evaluating cleanup options, preparing a cleanup action plan, and doing the cleanup work and any follow-up monitoring that may be needed.

Ecology is accepting comments on the document and has scheduled:

- **An online open house** will be available throughout the comment period
- **A public hearing** to record comments to be held 5-7 p.m. on 4/25 at Alpac Elementary School

The online and live events will feature information displays in English and Spanish. Childcare and Spanish translation will be provided at the live events. At the open house, experts from Ecology and state and federal health agencies will be available to answer questions about the investigation, next steps, and information about how the public can get involved.

Olympic View Sanitary Landfill

Facility Site ID# 79649975 Cleanup Site ID# 4217

10015 SW Barney White Rd, Port Orchard

**Public comment period: 3/2/17— 4/3/17**

*Draft Periodic Review Available for Public Review and Comment*

Ecology invites you to review and comment on a periodic review for the Olympic View Sanitary Landfill site. A periodic review is conducted at least every five years after beginning cleanup at a site or property, as required by the Model Toxics Control Act.

The purposes of the review are to evaluate site conditions and ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy. In addition, during this periodic review, Ecology considered the Site owner's request to modify the groundwater compliance monitoring program by reducing the number of wells monitored and changing the monitoring frequency of some wells. The downward trends in contaminant concentrations and the long monitoring record were factors that led Ecology to agree with some reductions in monitoring.

Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

Please direct comments and questions to the periodic review coordinator:

**Abitibi Consolidated Sales Corp**

**Facility Site**

**Cleanup Site**

**ID#**

**57759125**

**ID#**

**2884**

**4302 Chambers Creek Road, Steilacoom**

**Public Comment Period: 2/16/2017 – 3/20/2017**

*Draft Periodic Review Report available for Public Review and Comment*

Ecology invites you to review and comment on the periodic review for Abitibi Consolidated Sales Corp. site. A periodic review is conducted at least every five years after beginning a cleanup action, as required by the Model Toxics Control Act.

The purposes of the review are to evaluate site conditions and ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy. Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

Between 1919 and 2000, newsprint manufacturing and associated activities occurred on the Abitibi Consolidated Sales site. Soil and groundwater were contaminated with petroleum. Groundwater on the site also contains naturally occurring arsenic. Contaminated soil was removed, and groundwater was monitored for petroleum and arsenic from 2006 until 2008. Groundwater monitoring stopped once petroleum contamination met cleanup levels for a full year of monitoring.

While small amounts of contamination remains at the site, the periodic review finds that cleanup is still protective of human and environmental health. An environmental covenant is in place to restrict site use, and Ecology will do another review in five years.

Please direct questions and comment to the Periodic Review Coordinator:

Panjini Balaraju

Southwest regional Office

Occidental Chemical Corporation Site

Facility Site ID# 1212

Cleanup Site ID# 4326

**605 Alexander Avenue, Tacoma**

**Public comment period (extended): 1/27/17 – 4/27/17**

*Comment Review Extended: Draft Cleanup Documents Ready for Public Review and Comment*

The Occidental Chemical Corporation's Tacoma site was home to chemical production, ship building, and military operations from 1929-2002. Contamination from these operations has contaminated soil and groundwater at and near the property.

Contaminants at this site include: Chlorinated volatile organic compounds (CVOCs), sodium hydroxide, salt (sodium chloride), metals, by-products of chlorinated solvent production, poly-chlorinated Biphenyls (PCBs), and dioxins/furans.

You are invited to comment on the following draft documents:

- Agreed Order
- Feasibility Study
- Vapor Intrusion Report and Memorandum
- Porewater Sampling Report
- Corrective Action Permit

Ecology will consider and respond to all comments before making the documents final and making our final decision. You are also invited to an open house and public hearing to learn more and provide formal comment:

Wednesday, March 8, 2017, Open House 5–6 p.m., Public Hearing 6 p.m.  
Center at Norpoint, Cascade Ballroom

West Coast Door

Facility Site ID# 6308485 Cleanup Site ID# 2599

3102 and 3120 S. Pine St., Tacoma

**Public comment period: 3/2/17 — 4/3/17**

*Agreed Order & Public Participation Plan for Public Review and Comment*

We invite your comments on the draft agreed order for the West Coast Doors cleanup site in Tacoma. Historic industrial activities polluted soil and groundwater in the area with creosote-related compounds including carcinogenic polycyclic aromatic hydrocarbons (cPAHs) and benzene.

This agreed order requires West Coast Door to conduct a remedial investigation, feasibility study, and draft cleanup action plan. The investigation work called for under the new agreed order will help define the types and extent of site contamination.

Please direct comments and questions to the site manager:

Ellehammer Packaging

Facility Site

Cleanup Site

ID#

18371438

ID#

1121

**3139 Ferguson Court SW, Tumwater**

**Public Comment Period: 2/16/2017 — 3/20/2017**

*Draft Periodic Review Available for Public Review and Comment*

Ecology invites you to review and comment on the third periodic review for Ellehammer Packaging cleanup site. A periodic review is conducted at least every five years after beginning a cleanup action, as required by the Model Toxics Control Act.

The purposes of the review are to evaluate site conditions and ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy. Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

In 1995, solvents were spilled during a fire at the property. Tetrachloroethylene (PCE) was the main contaminant. The property owner entered the **Voluntary Cleanup Program**. They injected hydrogen peroxide into contaminated soil to destroy PCE and other contaminants. They also removed some contaminated soil. Some contaminated soil remains at the site under a building.

An environmental covenant is in place for the site. A periodic review was conducted in 2012 and again in 2017. Both found that the cleanup remains protective of human and environmental health.

## GLOSSARY

**Agreed order** - A legal agreement with Ecology to make sure the cleanup meets the standards of Washington State's cleanup law, the Model Toxics Control Act (MTCA).

**Cleanup action plan (CAP)** - A document that describes the selected cleanup method(s) and specifies cleanup standards and other requirements. It is based on information and technical analyses generated during the RI/FS and consideration of public comments and community concerns. A draft of the CAP (DCAP) is made available for public review and comment before finalizing.

**Comment period** - A time period during which the public can review and comment on various documents and Ecology or EPA actions. For example, a comment period is provided to allow community members to review and comment on proposed cleanup action alternatives and proposed plans. Also, a comment period is held to allow community members to review and comment on draft feasibility studies.

**Consent decree** - A formal legal agreement that is filed with a court. It describes studies and/or cleanup work to be done at a site and the terms under which that work is to be done.

**Engineering design report** - Engineering design reports outline the specific details for implementation and operation of the first phase of the cleanup actions.

**ERTS** - Environmental Report Tracking System

**Five-year periodic review** - A periodic review is conducted at least every five years after the initiation of a cleanup action at a site, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions, after cleanup is considered complete, and to ensure protection of human health and the environment.

**Hazardous Sites List** - A statewide list of contaminated properties. Ecology may remove a site from the list only after determining that all remedial actions except confirmatory monitoring have been completed and compliance with the cleanup standards has been achieved at the site, or the listing was erroneous.

**Independent cleanup action** - Any remedial action without department oversight or approval and not under an order or decree.

**LUST** - Leaking Underground Storage Tank

**NFA** - No Further Action

**Public participation plan** - Outlines and describes the tools Ecology will use to inform the public about site activities, and it identifies opportunities for the community to become involved in this process.

**PSI** - Puget Sound Initiative

**RCW** - Revised Code of Washington

# Site Register

**Remedial action** - Construction work done to clean up a contaminated site.

**Remedial investigation/feasibility study** - Two distinct but related studies. They are usually performed at the same time, and together referred to as the "RI/FS."

**RI/FS** - See Remedial Investigation/Feasibility Study

**SEPA** - State Environmental Policy Act

**Site Hazard Assessment (SHA)** - An assessment to gather information about a site to confirm whether a release of hazardous substances has occurred and to enable Ecology to evaluate the relative potential hazard posed by the release.

**TCP** - Ecology's Toxics Cleanup Program

**Total petroleum hydrocarbons (TPH)** - A term used to describe a large family of several hundred chemical compounds that originally come from crude oil. TPH is a mixture of chemicals made mainly from hydrogen and carbon.

**UXO** - Unexploded Ordnance

**Voluntary Cleanup Program (VCP)** - The VCP is one of several options for cleaning up a hazardous waste site under the state's cleanup law. Under this option, property owners may perform a cleanup independently and request services from Ecology for a fee.

**WAC** - Washington Administrative Code

**WARM, Washington Ranking Method** - The method used to rank sites placed on the Hazardous Sites List.

Find more glossary terms on Ecology's website: [www.ecy.wa.gov/programs/tcp/tcp\\_acronym\\_list.htm](http://www.ecy.wa.gov/programs/tcp/tcp_acronym_list.htm)
