FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

CLALLAM COUNTY

Sunnydell Dryke Shooting Facility Cleanup
Range Site ID# 1283666 Site ID# 3572
292 Dryke Road, Sequim

Public comment period: 3/30/17 – 5/1/17

Proposed Removal from Ecology's Hazardous Sites List

You are invited to comment on the proposed removal of the Sunnydell Dryke Shooting Range cleanup site from Ecology's Hazardous Sites List

The Sunnydell Dryke site is an active shooting range. The Department of Ecology proposes removing the site from the state's **Hazardous Sites**List. This list is a statewide record of contaminated properties that pose a risk to human health and the environment.

The Sunnydell Dryke Shooting Range opened in 1967 and has been used as an active shooting range and dog training facility to the present day. Soil, groundwater, and sediment on the site were contaminated with lead from shot and carcinogenic polycyclic aromatic hydrocarbons (cPAHs) from clay targets.

During cleanup, the property owners adopted several new management techniques and removed contaminated soil from the site. Because some contamination remains, an environmental covenant will restrict future land use on the site.

The satisfaction letter that describes how cleanup was done and why we believe it is complete is available for your review.

Please direct questions and comments to: Andrew Smith, Cleanup Project Manager 360-407-6316

Andrew.Smith@ecy.wa.gov

Continued on Page 2

You can find the satisfaction letter at the following locations:

- Ecology's website: https://fortress.wa.gov/ecy/gsp/Sitepage.aspx?csid=3572
- Sequim Branch Library, 630 North Sequim Avenue, Sequim
- By appointment at Ecology's SWRO, 300 Desmond Drive SE., Lacey, 360-407-6365 or Susan.Baxter@ecy.wa.gov

FRANKLIN COUNTY

Pasco Landfill NPL Site

Facility Site ID# 575

Cleanup Site ID# 1910

Kahlotus Road and U.S. Highway 12, Pasco

Enforcement Order 10651 to Extinguish Underground Fire Closed

Ecology is closing Enforcement Order 10651 for the Pasco Landfill NPL site. We issued the order in 2014, requiring the parties responsible for landfill cleanup to develop and carry out a plan to extinguish an underground fire in part of the landfill known as the Balefill Area.

The Balefill Area fire was confirmed to be out in late 2015. In addition, the responsible parties installed a vertical soil barrier near the former fire to better isolate combustible solid waste. The Balefill Area monitoring network was also expanded. These actions are designed to prevent future fires in the Balefill Area wastes.

Please direct questions to the site manager:

Charles Gruenenfelder Eastern Regional Office 509-329-3493 charles.gruenenfelder@ecy.wa.gov

KING COUNTY

J.H. Baxter & Co. Inc. 5015 Lake Washington Blvd N. Renton Facility Site ID# 2068

Cleanup Site ID# 93

Public comment period: 4/13/2017— 5/15/2017

Periodic Review Available for Public Review and Comment

Ecology invites you to review and comment on a document called a periodic review for a portion of the J.H. Baxter & Co. Inc site. A periodic review is conducted at least every five years after the initiation of a cleanup action at a site or property, as required by the Model Toxics Control Act.

The purposes of the review are to evaluate site conditions and to ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy. Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

The J.H. Baxter Co. Inc. Site is a former wood treatment plant, located on a 20 acre lot that operated from 1955 until closure in 1982. The primary contaminants of concern at the Site are pentachlorophenol (PCP) and polycyclic aromatic hydrocarbons (PAHs) into soil, groundwater, and lake sediments. In 1988, J.H. Baxter & Co. Inc. and the Department of Ecology entered into a legal agreement to perform a remedial investigation at the Site

The remedy at the Site included removal of contamination in source areas before soil stabilization, excavation of contaminated soil near a former tank farm followed by thermal treatment or off-site disposal, Removal and incineration of contaminated lake sediments, creation of a wetland buffer adjacent to Lake Washington, capping of residual soil contamination, groundwater monitoring of water discharging to Lake Washington, and implementation of institutional controls. An Environmental Covenant was recorded on the Property on August 4, 2010. Ecology issued a No Further Action letter for the Property on December 1, 2010.

Five groundwater compliance monitoring wells were sampled during 2014. None of the wells exceeded cleanup levels for any of the contaminants of concern.

Please direct comments and questions to the Periodic Review Coordinator:

Eugene Freeman
Northwest Regional Office
425-649-7191
Eugene.Freeman@ecy.wa.gov

You may review the documents at the following location:

Ecology's Northwest Regional Office Toxics Cleanup Program – 3190 160th Avenue SE, Bellevue, WA. (Please contact Sally Perkins for an appointment at 425-649-7190 or Sally.Perkins@ecy.wa.gov.)

For special accommodations or documents in alternate format, call 425-425-7117, 711 (relay service), or 877-833-6341 (TTY).

Boeing Auburn

Facility Site ID# 2018

Cleanup Site ID# 5049

700 15TH ST SW, Auburn

Public comment period: 3/8/17—5/8/17

Draft Remedial Investigation Report Available for Public Comment and Review

The Washington Department of Ecology invites the public to review a draft report on a multi-year study into groundwater contamination at property owned by The Boeing Company in Auburn that has spread into parts of Algona and Auburn.

The study, called a remedial investigation, is the first phase in Washington's four part cleanup process for contaminated sites. It provides information needed for the next steps: evaluating cleanup options, preparing a cleanup action plan, and doing the cleanup work and any follow-up monitoring that may be needed.

Ecology is accepting comments on the document and has scheduled:

- An open house to provide information, answer questions, and accept written comments about the investigation and draft report. It will be held 5-7 p.m. on 3/23 at Alpac Elementary School, 310 Milwaukee Blvd N, Algona
- An online open house will be available throughout the comment period
- A public hearing to record comments to be held 5-7 p.m. on 4/25 at Alpac Elementary School

The online and live events will feature information displays in English and Spanish. Childcare and Spanish translation will be provided at the live events. At the open house, experts from Ecology and state and federal health agencies will be available to answer questions about the investigation, next steps, and information about how the public can get involved.

Please direct questions to the site managers:

PIERCE COUNTY

Occidental Chemical Corporation Site

Facility Site ID# 1212

Cleanup Site ID# 4326

605 Alexander Avenue, Tacoma

Public comment period (extended): 1/27/17 - 4/27/17

Comment Review Extended: Draft Cleanup Documents Ready for Public Review and Comment

The Occidental Chemical Corporation's Tacoma site was home to chemical production, ship building, and military operations from 1929-2002. Contamination from these operations has contaminated soil and groundwater at and near the property.

Contaminants at this site include:

- Chlorinated volatile organic compounds (CVOCs)
- Sodium hydroxide
- Salt (sodium chloride)
- Metals
- By-products of chlorinated solvent production
- Poly-chlorinated Biphenyls (PCBs)
- Dioxins/furans

You are invited to comment on the following draft documents: Agreed Order, Feasibility Study, Vapor Intrusion Report and Memorandum, Porewater Sampling Report, Corrective Action Permit

Ecology will consider and respond to all comments before making the documents final and making our final decision. You are also invited to an open house and public hearing to learn more and provide formal comment:

Please direct comments and questions to the site manager:

Kerry Graber, Southwest Regional Office 360-407-0241

Kerry.Graber@ecy.wa.gov

Document review locations:

- Occidental Chemical Corporation website: https://fortress.wa.gov/ecy/gsp/Sitepage.aspx?csid=4326.

SNOHOMISH COUNTY

East Waterway Facility Site ID# 2733 Cleanup Site ID# 4297

Everett Harbor area, directly west of downtown Everett

Public comment period: 04/20/2017 - 05/19/2017

Draft Agreed Order for Public Review and Comment

Ecology invites you to review and comment on the Draft Agreed Order with the U.S. Department of the Navy for the East Waterway Site in Everett. The Draft Agreed Order with the Navy is a legal document between Ecology and the Navy (one of the Potentially Liable Persons, or PLP). This proposed agreement outlines Navy cooperation in the completion of the Remedial Investigation/Feasibility Study and Draft Cleanup Action Plan, which includes, but is not limited to providing access to its property and available data, and review and comment on draft reports.

For more information, contact:

Andrew Kallus, Site Manager 360-407-7259 Andrew.Kallus@ecy.wa.gov.

YAKIMA COUNTY

LaBamba Restaurant

Facility Site ID# 4171173 Cleanup Site ID# 3347

3202 Main Street, Union Gap

Public comment period: 04/19/2017 - 05/19/2017

Proposed Removal from Ecology's Hazardous Sites List

The Washington State Department of Ecology (Ecology) is proposing to remove the LaBamba site, located at 3202 Main Street, Union Gap, Washington, from its Hazardous Sites List. The Hazardous Sites List is a statewide list of contaminated properties. The site is currently ranked a "2" on the list. A rank of "1" is the highest level of concern compared to other sites on the list, and a rank of "5" is the lowest. This site was used as a gas station in the past. The pollution from the historical service station is no longer a threat to human health or the environment.

Contaminants: Gasoline and Diesel fuel Affected Media: Soil and Groundwater

For more information contact:

Jennifer Lind, Site Manager 509-454-7839 Jennifer.Lind@ecy.wa.gov

Supporting documents are available for review at the following locations:

Yakima Public Library, 102 North 3rd Street, Yakima, Phone: 509-452-8541 WA Department of Ecology, Central Regional Office, 1250 W Alder St, Union Gap, WA (call 509-575-2027 for an appointment)

NEWS & NOTES

Comments sought on Public Participation Grants

Ecology updating regulations for grant program, which funds public education and involvement at toxic cleanup sites

Washington's Public Participation Grant program seeks to increase public awareness and involvement in toxic cleanup projects and other environmental work. Grants for the program go to citizens and nonprofits to increase public outreach around contamination and environmental issues. The Washington Department of Ecology, which oversees the program, awarded \$3.5 million in Public Participation Grants in the 2013-15 budget cycle.

Ecology is now updating the regulations that govern the program. Ecology's proposed updates to the grant program seek to increase support for projects focused on disadvantaged communities that may be disproportionately impacted by toxic contamination and cleanup work. The proposed updates would also streamline the grant application process and standardize evaluations for grant proposals.

Ecology is seeking public comments on the proposed changes through May 22. A public meeting, including an overview of the changes and a hearing for public comment, will be held May 15 in Lacey and online via a webinar.

Review documents

- At Ecology's rules website for the Public Participation Grant program: http://www.ecy.wa.gov/programs/swfa/rules/wac173321/1613ov.html
- At the Washington Department of Ecology, 300 Desmond Drive SE, Lacey

Public meeting May 15 at 1:30 p.m.

- Attend in person at Washington Department of Ecology, 300 Desmond Drive SE, Lacey, or
- Via webinar:

GLOSSARY

Agreed order - A legal agreement with Ecology to make sure the cleanup meets the standards of Washington State's cleanup law, the Model Toxics Control Act (MTCA).

Cleanup action plan (CAP) - A document that describes the selected cleanup method(s) and specifies cleanup standards and other requirements. It is based on information and technical analyses generated during the RI/FS and consideration of public comments and community concerns. A draft of the CAP (DCAP) is made available for public review and comment before finalizing.

Comment period - A time period during which the public can review and comment on various documents and Ecology or EPA actions. For example, a comment period is provided to allow community members to review and comment on proposed cleanup action alternatives and proposed plans. Also, a comment period is held to allow community members to review and comment on draft feasibility studies.

Consent decree - A formal legal agreement that is filed with a court. It describes studies and/or cleanup work to be done at a site and the terms under which that work is to be done.

Engineering design report - Engineering design reports outline the specific details for implementation and operation of the first phase of the cleanup actions.

ERTS - Environmental Report Tracking System

Five-year periodic review - A periodic review is conducted at least every five years after the initiation of a cleanup action at a site, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions, after cleanup is considered complete, and to ensure protection of human health and the environment

Formal cleanups - TCP conducts or supervises formal cleanups (also called formal oversight) when site owners are under court order or decree, or when cleanups are funded by legislative initiatives. Formal cleanups will meet MTCA standards. The public can provide input during public meetings and comment periods.

Hazardous Sites List - A statewide list of contaminated properties. Ecology may remove a site from the list only after determining that all remedial actions except confirmatory monitoring have been completed and compliance with the cleanup standards has been achieved at the site, or the listing was erroneous.

Independent cleanups - Property owners conduct independent cleanups on their own, or with help from our Voluntary Cleanup Program (VCP). Independent cleanups still meet MTCA standards, but property owners set their own timelines. Owners can ask for our help through the VCP but do not have to. They only need to hold public meetings or comment periods if a site needs to be de-listed.

Independent cleanup action - Any remedial action without department oversight or approval and not under an order or decree.

LUST - Leaking Underground Storage Tank

NFA - No Further Action

Public participation plan - Outlines and describes the tools Ecology will use to inform the public about site activities, and it identifies opportunities for the community to become involved in this process.

PSI - Puget Sound Initiative

RCW - Revised Code of Washington

Remedial action - Construction work done to clean up a contaminated site.

Remedial investigation/feasibility study - Two distinct but related studies. They are usually performed at the same time, and together referred to as the "RI/FS."

RI/FS - See Remedial Investigation/Feasibility Study

SEPA - State Environmental Policy Act

Site Hazard Assessment (SHA) - An assessment to gather information about a site to confirm whether a release of hazardous substances has occurred and to enable Ecology to evaluate the relative potential hazard posed by the release.

TCP - Ecology's Toxics Cleanup Program

Total petroleum hydrocarbons (TPH) - A term used to describe a large family of several hundred chemical compounds that originally come from crude oil. TPH is a mixture of chemicals made mainly from hydrogen and carbon.

UXO - Unexploded Ordnance

Voluntary Cleanup Program (VCP) - The VCP is one of several options for cleaning up a hazardous waste site under the state's cleanup law. Under this option, property owners may perform a cleanup independently and request services from Ecology for a fee.

WAC - Washington Administrative Code

WARM, Washington Ranking Method - The method used to rank sites placed on the Hazardous Sites List.

Find more glossary terms on Ecology's website: www.ecy.wa.gov/programs/tcp/tcp_acronym_list.htm
