FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

BENTON COUNTY

Ron's Food Mart Kennewick 1821 S Washington St, Kennewick	Facility Site ID#	9524655	Cleanup 7052 Site ID#
--	----------------------	---------	--------------------------

Public Comment Period: 4/12/2018 – 5/14/2018

Third Periodic Review Draft Report Completed

Ecology invites you to review and comment on a document called a periodic review for the Ron's Food Mart site. A periodic review is conducted at least every five years after the initiation of a cleanup action at a site or property, as required by the Model Toxics Control Act. The purposes of the review are to evaluate Site conditions and to ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy. Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

Direct questions and comments to:
Jeff Newschwander, periodic review coordinator
509-454-7842 or Jeff.Newschwander@ecy.wa.gov

Documents can be reviewed at:

- Central Regional Office, 1250 W Alder St, Union Gap (contact the public records coordinator for an appointment: 509-454-7658 or cropublicrequest@ecy.wa.gov)
- Ecology's Ron's Food Mart Kennewick webpage: <https://fortress.wa.gov/ecy/gsp/Sitepage.aspx?csid=7052>

GRANT COUNTY

Short Stop Fuel Site

Facility Site ID# 94125562 Cleanup Site ID# 6902

1154 Southwest Basin Street, Ephrata

Public Comment Period: 4/23/18 – 5/23/18

Draft Five-Year Periodic Review Report Available

Ecology invites you to review and comment on the draft periodic review report for the Short Stop Fuel site. We conduct a periodic review at least every five years after beginning cleanup at a site, and this is the second periodic review for this site. The purpose of the review is to evaluate current site conditions and to ensure the continued protection of people and the environment.

In 1990, three underground storage tanks were removed from the site, and investigation showed soil and groundwater were contaminated with petroleum products. As much contaminated soil as was possible was excavated. A soil and groundwater remediation system began operating in 1995, and quarterly groundwater quality monitoring started and continued through 2005 until contaminants were below cleanup levels for five consecutive sampling events. Because some contaminated soil remains where excavation isn't possible, an environmental covenant was filed in 2007 to keep the soil from being disturbed and inform future owners. Ecology visited the site March 8, 2018, and found that the cleanup actions remain intact.

Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

Please direct questions and comments to the site manager:

KING COUNTY

Maury Island Open Space Cleanup Site **Facility Site ID#** **2901216** **Cleanup Site ID#** **1532**
Maury Island

Public Comment Period: **4/9/2018 – 5/23/2018**

Documents available for public comment and review

Ecology invites you to review a cleanup plan, and associated documents, for the Maury Island Open Space Cleanup Site on Maury Island. The plan is part of a legal agreement between Ecology and King County that requires them to design the cleanup work described in the plan. A future legal agreement will require them to implement the work. The following documents are available for review:

- Cleanup Action Plan: describes the cleanup work to address site contamination.
- Remedial Investigation: details an investigation of the nature and extent of contamination at the site.
- Feasibility Study: identifies 5 alternatives, and a preferred alternative, for addressing the contamination.
- State Environmental Policy Act (SEPA)-Determination of Non-Significance (DNS): Ecology determination that the cleanup work is not likely to harm the environment.

CHS Auburn Site (Cenex Valley Supply Coop) **Facility Site ID#** **2487** **Cleanup Site ID#** **5119**
238 8th Street SE, Auburn

Public Comment Period: **4/6/2018 – 5/7/2018**

CHS Auburn Draft Consent Decree and cleanup documents available for public review and comment

Ecology and CHS Inc., will enter into a legal agreement called a consent decree that requires cleanup at the CHS Auburn site (also known as Cenex Valley Supply Coop). The consent decree, along with the Remedial Investigation (RI) and Feasibility Study (FS) reports and a Draft Cleanup Action Plan (DCAP) are available for public review and comment.

Site Register

The site covers approximately 10.5 acres. The identified chemicals of concern are petroleum hydrocarbon compounds (diesel, gasoline, oil, benzene, toluene, ethylbenzene, and xylenes) in soil and groundwater. Remedial activities have been ongoing since 1994, with one groundwater remediation system, designated as the Central System, currently active. The contaminated groundwater plume has reduced in size since 1994. The proposed cleanup will address the remaining soil and groundwater contamination in a targeted area of the site using focused air sparging, monitored natural attenuation, and institutional controls.

You are invited to comment on the following documents:

- RI report, which describes the nature and extent of contamination and remediation at the site
- FS, which describes alternatives evaluated to clean up the site and the preferred alternative
- DCAP, which describes the proposed remedial alternative to clean up the site
- Draft Consent Decree, the legal agreement filed in court that requires CHS Inc. to conduct the cleanup
- State Environmental Policy Act (SEPA) Checklist and Determination of Non-Significance (DNS)
- Updated Public Participation Plan. The plan outlines and describes the tools and approaches that Ecology will use to inform the public about site activities, and it identifies opportunities for the community to become involved in this process.

Bothell Former Hertz site

Facility Site ID# 11687976 Cleanup Site ID# 7906

18030 Bothell Way NE, Bothell

Public Comment Period: 4/12/2018 – 5/11/2018

Bothell Former Hertz Agreed Order and environmental documents available for public review and comment

Ecology and the City of Bothell will enter into an agreement called an Agreed Order that requires the city to clean up the Bothell Former Hertz site.

The site is generally located on both sides of the newly constructed SR 522 roadway, between Bothell Way NE and 98th Avenue NE / NE 180th Street, in Bothell, Washington. A Hertz Rentals facility with an office, warehouse and shop building, smaller buildings, and asphalt-paved parking and storage formerly occupied the site.

During removal of USTs in 1993, petroleum contaminated soils were found to extend underneath the former buildings. Chlorinated solvents (chemicals commonly associated with dry cleaners) were found in groundwater. These came from the Bothell Service Center Simon & Son Cleanup site, which is being cleaned up separately. Interim action soil cleanups were conducted in 2010, 2012, and 2013.

Site Register

Chemicals of concern remaining in groundwater after the interim action cleanups are:

Total petroleum hydrocarbons (gasoline, diesel and motor oil range)

- Arsenic
- Halogenated volatile organic compounds (HVOCs), from the adjacent Bothell Service Center Simon & Son dry cleaning site, which is a separate state cleanup site.

You are invited to comment on the following documents:

- Draft Agreed Order to clean up the site.
- Draft Remedial Investigation/Feasibility Study (RI/FS)
- Draft Cleanup Action Plan (DCAP)
- Draft Compliance Monitoring Plan
- Updated Public Participation Plan
- State Environmental Policy Act (SEPA) Checklist and draft Determination of Non-significance (DNS)

The 2011 Agreed Order (No. DE 8375) to conduct the RI/FS and write the DCAP has been closed out. The new Agreed Order for cleanup will be finalized after Ecology has reviewed all the public comments on the above documents and determined that no significant changes are necessary.

Send your written comments to (indicate Bothell Former Hertz site in your comment):

Bothell Landing

Facility Site ID# 73975762 Cleanup Site ID# 3013

18120, 18126, 18132 Bothell Way NE & 10001 Woodinville Dr, Bothell

Public Comment Period: 4/12/2018 – 5/11/2018

Bothell Landing Agreed Order and environmental documents available for public review and comment

Ecology and the City of Bothell will enter into an agreement called an Agreed Order to clean up the Bothell Landing site. The site is generally located at the intersection of Woodinville Drive/SR 522 and Bothell Way NE/ former SR 527, in Bothell, Washington. The city acquired properties on which the site lies in 2008 for construction of the SR 522 realignment.

A strip mall, restaurants, and historic gas stations with multiple abandoned petroleum underground storage tanks (USTs) formerly occupied the site. Petroleum hydrocarbons associated with the service stations were found in soil and groundwater. Five USTs were removed during construction of the park in 1998. Chlorinated solvents (chemicals commonly associated with dry cleaners) were found in groundwater. These came from the Ultra Custom Care Cleaners site, which is being cleaned up separately. Interim action soil cleanups of petroleum hydrocarbons were conducted in 2010, 2013, 2014, 2015, and 2017.

Site Register

Chemicals of concern remaining after the interim action soil cleanups are:

- In soil: Gasoline range petroleum hydrocarbons and benzene
- In groundwater: Arsenic

You are invited to comment on the following documents:

- Draft Agreed Order to clean up the site
- Draft Remedial Investigation/Feasibility Study (RI/FS) Report
- Draft Cleanup Action Plan (DCAP)
- Draft Compliance Monitoring Plan
- Updated Public Participation Plan
- State Environmental Policy Act (SEPA) Checklist and draft Determination of Nonsignificance (DNS).
- The 2009 Agreed Order (No. DE 6294) to conduct the RI/FS and write the DCAP has been closed out. The new Agreed Order for cleanup will be finalized after Ecology has reviewed all the public comments on the above documents and determined that no significant changes are necessary.

Send your written comments to (indicate Bothell Landing in your comment):

Bothell Paint & Decorating

Facility Site ID# 93536765 Cleanup Site ID# 3051

18004 & 18005 Bothell Way NE, Bothell

Public Comment Period: 4/12/2018 – 5/11/2018

Bothell Paint Agreed Order and environmental documents available for public review and comment

Ecology and the City of Bothell will enter into a new agreement called an Agreed Order to clean up the Bothell Paint and Decorating site. The site is generally located along Bothell Way NE / SR 522 west of 98th Avenue NE in Bothell, Washington.

Historical operations on the property included automobile repair and dealerships, retail paint and flooring, and sandblasting. There was one underground storage tank (UST) containing gasoline, which was removed in 1988. Petroleum hydrocarbons including gasoline were found in soil and groundwater. Interim action soil cleanups for petroleum hydrocarbons and metals were conducted in 2010, 2013, and 2014.

Chemicals of concern remaining at the site after the interim action cleanups are:

- In soil: Gasoline and motor oil-range petroleum hydrocarbons
- In groundwater: Diesel and motor oil range petroleum hydrocarbons, and arsenic

Ecology invites comments on the following documents:

- Draft Agreed Order to clean up the site.

Site Register

- Draft Remedial Investigation/Feasibility Study (RI/FS) report
- Draft Cleanup Action Plan (DCAP)
- Draft Compliance Monitoring Plan
- Updated Public Participation Plan
- State Environmental Policy Act (SEPA) Checklist and draft Determination of Non-significance (DNS)
- The 2009 Agreed Order (No. DE 6296) to conduct the RI/FS and write the DCAP has been closed out. The new Agreed Order for cleanup will be finalized after Ecology has reviewed all the public comments and determined that no significant changes are necessary.

Grand Street Commons

Facility Site ID# 97763114 Cleanup Site ID# 3018

1750 22nd Avenue S, Seattle

Public Comment Period: 4/20/2018 – 5/19/2018

Prospective Purchaser Consent Decrees available for comment

Grand Street Commons, LLC (GSC) plans to redevelop several properties in southeast Seattle for a mix of affordable and market-rate housing. GSC is a partnership between Mount Baker Housing Association (MBHA), Lake Union Partners, and HAL Real Estate. The development will be located near the intersection of S. Grand Street and Rainier Avenue S.

As part of the project, GSC and MBHA plan to clean up about 3.2 acres of contaminated property. The contamination came from a commercial dry cleaning operation (former Penthouse Drapery) and a commercial equipment manufacturing facility (former Belshaw Brothers Inc.)

Ecology is entering into legal agreements called Prospective Purchaser Consent Decrees with MBHA and GSC for investigation and cleanup of the Site. We invite your input on the following documents:

- **Prospective Purchaser Consent Decree with GSC**
- **Prospective Purchaser Consent Decree with MBHA**
- **Public Participation Plan** – describes how Ecology will inform the community about activities at the site and opportunities for input

Contaminants of concern include:

- **Soil:** Petroleum hydrocarbons in the gasoline range (TPH-G), diesel-range hydrocarbons (TPH-D), benzene, xylenes, cadmium, lead, and PCE.

Site Register

- **Groundwater:** PCE, TCE, cis-1,2-dichloroethene (DCE), 1,1,1-trichloroethane (TCA), 1,1-dichloroethene, 1,1-dichloroethane, 1,4-dioxane, gasoline range (TPH-G), diesel-range hydrocarbons (TPH-D), benzene, and xylenes.
- **Soil Gas:** Benzene, xylenes, naphthalene, TCE, and vinyl chloride.

PIERCE COUNTY

Stutz Oil

Facility Site ID# 1768931 Cleanup Site ID# 2045

3003 Harborview Drive, Gig Harbor

Public Comment Period: 4/16/2018 – 5/16/2018

Proposed Removal from Ecology's Hazardous Sites List & Removal of Environmental Covenant

Ecology invites public comment on the proposed removal of the Stutz Oil site from the State's Hazardous Sites List and removal of an environmental covenant which restricts development activities.

In the past, fuel was stored on the site in five above-ground storage tanks (ASTs). Gasoline and diesel from the ASTs leaked into soil and groundwater. The property owners worked with Ecology under the Voluntary Cleanup Program to remove contaminated soil and monitor the groundwater. Soil samples indicate that site soils meet the State cleanup levels and no additional cleanup is required. In addition, all groundwater samples analyzed for TPHs are below the laboratory detection limits. Ecology has determined that no further cleanup action is necessary.

Document review locations:

STEVENS COUNTY

US EPA Anderson Calhoun Mine Site
Calhoun Road, Leadpoint

Facility Site ID# 8070626 Cleanup Site ID# 4519

Public Comment Period: 4/23/18 – 5/23/18

Draft Five-Year Periodic Review Report Available

Ecology invites you to review and comment on the periodic review report for the US EPA Anderson Calhoun Mine site. We conduct a periodic review at least every five years after beginning cleanup at a site, as required by the Model Toxics Control Act. The purposes of the review are to evaluate site conditions and to ensure continued protection of human health and the environment when institutional controls are part of a cleanup.

Former zinc, lead, and barium mining and milling operations affected approximately 92 acres of the property. Remnants of ore milling operations include a 43-acre tailings impoundment containing an estimated one million cubic yards of lead-zinc and barium tailings. Containers and drums containing hazardous and nonhazardous substances and electrical equipment containing polychlorinated biphenyls were removed and disposed. Contaminated materials in the tailings impoundment were excavated and consolidated then covered with a protective barrier and protected with access controls. Ecology visited the site August 3, 2017, and found no indications that the cleanup has been compromised.

Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

WALLA WALLA COUNTY

Walla Walla Farmers Co-op Site

Facility Site ID# 769

Cleanup Site ID# 916

111 North 9th Avenue, Walla Walla

Public Comment Period: 5/1/18 – 5/30/18

Proposal to Remove Walla Walla Farmers Co-op from the Hazardous Sites List

Ecology is proposing to remove the Walla Walla Farmers Co-op site from its Hazardous Sites List. **The Hazardous Sites List** is a statewide list of contaminated properties. Sites are ranked on a scale of 1 to 5 with 1 presenting the highest risk. In 1990, Ecology ranked this site a 1 due to pesticide contamination in groundwater.

Investigation, cleanup, and monitoring of the contamination occurred from 1985 to 2017. Following four consecutive quarters of groundwater monitoring results meeting state standards, we believe that the site no longer poses a threat to human health or the environment.

YAKIMA COUNTY

Washington Central Railroad Roundhouse **Facility Site ID# 545** **Cleanup Site ID# 4945**

6 E Arlington, Yakima

Public Comment Period: 3/29/2018 – 4/28/2018

Proposed removal from the Hazardous Sites List available for review and public comment

Ecology is providing an opportunity for the public to comment on the proposed removal of the Washington Central Railroad Roundhouse site from the Hazardous Sites List.

The contaminant is the result of the site was used as a railroad engine maintenance and repair facility for over 100 years, starting in the late 1800's. Possible PCE was used to degrease engine parts as part of the engine maintenance.

Public Comment Period: 3/29/2018 – 4/28/2018

2017 Annual Report for Well Water Sampling Ultra Yield Micronutrients Facility received

This site has been produced zinc micronutrient fertilizer since 1972. Raw materials used in the manufacturing processes were dry, powder or granular, ash-like materials rich in zinc and other metals. These materials were typically reacted with sulfuric acid to extract the zinc. The final product was dried into granules or retained in liquid form, then sold for agricultural use. Since some of the materials used in the manufacturing process were considered to be hazardous waste and since some of that material was released at the site, the site is being managed as a Resource Conservation and Recovery Act (RCRA) Corrective Action. RCRA Corrective Action Sites are cleaned up in accordance with Washington's Model Toxics Control Act.

620 North 34th Avenue, Yakima

Public Comment Period: 4/12/2018 – 5/14/2018

Periodic Review Draft Report Completed

Ecology invites you to review and comment on a document called a periodic review for the Harvest Orchard Park site. A periodic review is conducted at least every five years after the initiation of a cleanup action at a Site or Property, as required by the Model Toxics Control Act. The purposes of the review are to evaluate site conditions and to ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy. Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

Jeff Newschwander, periodic review coordinator or
[509-454-7842](tel:509-454-7842) or Jeff.Newschwander@ecy.wa.gov

PIERCE COUNTY

Gig Harbor Dry Cleaners (aka T&Y Management Inc) Facility Site ID# 72694822 Cleanup Site ID# 12675

6978 Kimball Dr, Gig Harbor

Determination of No Further Action

Ecology has determined that no further action is necessary at the Gig Harbor Dry Cleaners site. The site is cleaned up. A total of 1,432.90 tons of PCE contaminated soil was removed and disposed of at a permitted landfill.

In October 2014, PCE was discovered in soils beneath the Gig Harbor Dry Cleaners building. The release was reported to Ecology in March 2015. The building was removed and the soils were excavated until PCE concentrations in soil sampled were less than the MTCA Method A cleanup levels. PCE degradation product concentrations were never detected in soil exceeding any MTCA cleanup level. For groundwater, PCE and its degradation products were never detected.

GLOSSARY

Agreed order - A legal agreement with Ecology to make sure the cleanup meets the standards of Washington State's cleanup law, the Model Toxics Control Act (MTCA).

Cleanup action plan (CAP) - A document that describes the selected cleanup method(s) and specifies cleanup standards and other requirements. It is based on information and technical analyses generated during the RI/FS and consideration of public comments and community concerns. A draft of the CAP (DCAP) is made available for public review and comment before finalizing.

Comment period - A time period during which the public can review and comment on various documents and Ecology or EPA actions. For example, a comment period is provided to allow community members to review and comment on proposed cleanup action alternatives and proposed plans. Also, a comment period is held to allow community members to review and comment on draft feasibility studies.

Consent decree - A formal legal agreement that is filed with a court. It describes studies and/or cleanup work to be done at a site and the terms under which that work is to be done.

Engineering design report - Engineering design reports outline the specific details for implementation and operation of the first phase of the cleanup actions.

ERTS - Environmental Report Tracking System

Five-year periodic review - A periodic review is conducted at least every five years after the initiation of a cleanup action at a site, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions, after cleanup is considered complete, and to ensure protection of human health and the environment.

Formal cleanups - TCP conducts or supervises formal cleanups (also called formal oversight) when site owners are under court order or decree, or when cleanups are funded by legislative initiatives. Formal cleanups will meet MTCA standards. The public can provide input during public meetings and comment periods.

Hazardous Sites List - A statewide list of contaminated properties. Ecology may remove a site from the list only after determining that all remedial actions except confirmatory monitoring have been completed and compliance with the cleanup standards has been achieved at the site, or the listing was erroneous.

Independent cleanups - Property owners conduct independent cleanups on their own, or with help from our Voluntary Cleanup Program (VCP). Independent cleanups still meet MTCA standards, but property owners set their own timelines. Owners can ask for our help through the VCP but do not have to. They only need to hold public meetings or comment periods if a site needs to be de-listed.

Independent cleanup action - Any remedial action without department oversight or approval and not under an order or decree.

Site Register

LUST - Leaking Underground Storage Tank

NFA - No Further Action

Public participation plan - Outlines and describes the tools Ecology will use to inform the public about site activities, and it identifies opportunities for the community to become involved in this process.

PSI - Puget Sound Initiative

RCW - Revised Code of Washington

Remedial action - Construction work done to clean up a contaminated site.

Remedial investigation/feasibility study - Two distinct but related studies. They are usually performed at the same time, and together referred to as the "RI/FS."

RI/FS - See Remedial Investigation/Feasibility Study

SEPA - State Environmental Policy Act

Site Hazard Assessment (SHA) - An assessment to gather information about a site to confirm whether a release of hazardous substances has occurred and to enable Ecology to evaluate the relative potential hazard posed by the release.

TCP - Ecology's Toxics Cleanup Program

Total petroleum hydrocarbons (TPH) - A term used to describe a large family of several hundred chemical compounds that originally come from crude oil. TPH is a mixture of chemicals made mainly from hydrogen and carbon.

UXO - Unexploded Ordnance

Voluntary Cleanup Program (VCP) - The VCP is one of several options for cleaning up a hazardous waste site under the state's cleanup law. Under this option, property owners may perform a cleanup independently and request services from Ecology for a fee.

WAC - Washington Administrative Code

WARM, Washington Ranking Method - The method used to rank sites placed on the Hazardous Sites List.
