Questions? Please contact Cheryl Ann Bishop at 360-407-6848 or [cherylann.bishop@ecy.wa.gov](mailto:cherylann.bishop@ecy.wa.gov). Site contacts are found after each entry.

To request Americans with Disabilities Act accommodation including materials in a format for the visually impaired, please call 360-407-7170 or visit [ecology.wa.gov/Accessibility](http://ecology.wa.gov/Accessibility). Persons with impaired hearing may call Washington Relay Service at 711. Persons with a speech disability may call 877-833-6341.

## FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

### GRANT COUNTY

Warden City Water Supply Wells 4 & 5 Site 1800 West 1st Street, Warden	Facility Site ID#	2802409	Cleanup Site ID#	1618
--	-------------------	---------	------------------	------

**Public Comment Period: 7/30 — 8/28/2018**

*Draft Remedial Investigation and Feasibility Study Available for Public Review and Comment*

Ecology seeks your input on the draft Remedial Investigation and Feasibility Study (RI/FS) Report for the Warden City Water Supply Wells 4 & 5 site. The RI documents the extent and locations of ethylene dibromide (EDB) contamination in soil and groundwater at the site. The FS evaluates cleanup options.

From 1971 to 1992, Simplot stored, blended, and transported agricultural chemicals, including EDB, at the site. After the City of Warden discovered EDB in wells 4 and 5, they started using wells 6, 7, and 8. Soil at the Simplot property was found to contain EDB at levels that are a potential risk for groundwater contamination and consistent with EDB levels in groundwater.

Direct questions and comments to the site manager:

## KING COUNTY

---

**Texaco Strickland**

**Facility Site ID# 27496218 Cleanup Site ID# 12541**

**6808 196th Street SW, Lynnwood**

**Public Comment Period: July 8 – August 6, 2018**

*Agreed Order and Public Participation Plan available for public review and comment*

Ecology will enter into a legal agreement called an Agreed Order with Potentially Liable Persons: Chevron Environmental Management Company and Strickland Real Estate Holdings LLC.

We invite you to review and comment on the following documents:

- Draft Agreed Order
- Draft Public Participation Plan

Contamination came from a former service station and lube facility.

- In soil and groundwater: Petroleum products (Gasoline, Diesel, Oil-range Total Petroleum Hydrocarbons), Benzene, Toluene, Ethyl-Benzene, Xylene (BTEX).
- In soil only: Naphthalene.

A service station operated on the site from 1959 until 1974. In 1977 a lube facility began operations on the Site. In 1995, several oil and heating oil underground storage tanks (USTs) were closed in place, and one oil UST was removed. Jiffy Lube took over operations from 2004 until 2006 when the facility closed. Aloha Café currently operates a coffee house on the property.

Submit comments to (please reference “Texaco Strickland” in your comment):

# Site Register

Boeing Auburn Fabrication property

Facility Site ID# 2018

Cleanup Site ID# 5049

700 15th St SW # Mc5e-63, Auburn

Public Comment Period: 7/19/2018 – 9/7/2018

*Boeing Auburn Corrective Action Permit and Public Participation Plan Available for Public Review and Comment*

Ecology is overseeing cleanup of contamination on and off the Boeing Auburn Fabrication property. To clean up the facility, Boeing must have a special permit, called a corrective action permit. They have operated under a corrective action permit since April 2006. This permit now needs to be reissued. This is a procedural matter, not a result of any new development on the site. We have also updated the Public Participation Plan.

The following documents are available for review:

- **Public Participation Plan:** Creates a process to communicate with and receive feedback from the public about the cleanup.
- **Corrective Action Permit and Application:** Permit that requires Boeing to continue cleaning up the property.

## Site background

Boeing historically treated, stored, and disposed of hazardous waste at its Auburn facility at 700 15th St. SW. Contamination on the property varies by location, but it includes traces of metals, petroleum hydrocarbons, and solvent chemicals.

## PIERCE COUNTY

---

**Tacoma Coal Gas**

**Facility Site ID# 1249**

**Cleanup Site ID# 3675**

**22nd and A Street in Tacoma**

**Public Comment Period: 8/5/2018 – 9/3/2018**

*Agreed Order Available for Public Review and Comment*

Ecology invites the public to comment on a legal agreement called an Agreed Order. The order requires current and past property owners of a historic coal gasification facility to study contamination at the site. A Public Participation Plan, which describes how Ecology will keep the public informed about the cleanup process, is also available for viewing.

Send written comments using Ecology's online comment form: <http://wt.ecology.commentinput.com/?id=hQADK>

## SPOKANE COUNTY

---

**BNSF Railway Black Tank Property Site**

**Facility Site ID# 98615712 Cleanup Site ID# 3243**

**3202 East Wellesley, Spokane**

*Consent Decree Negotiations for a Cleanup Action Plan*

Ecology is entering into negotiations for a Consent Decree to complete a Cleanup Action Plan at the BNSF Railway Black Tank Property with BNSF Railway and Marathon Oil Company. The 60-day negotiation period begins July 30, 2018. The site housed a 50-foot-diameter, above-ground, black tank that stored petroleum products that were spilled or leaked during historic site activities. An approximately 7-acre plume is on groundwater 170 feet below the ground surface.

Please direct questions to:

Jeremy Schmidt, site manager

**509-329-3484** or [jeremy.schmidt@ecy.wa.gov](mailto:jeremy.schmidt@ecy.wa.gov)

## YAKIMA COUNTY

---

**Interstate 82 Exit 33A Yakima City Landfill**  
**805 North 7th St, Yakima**

**Facility Site ID# 1927**

**Cleanup Site ID# 3853**

**Public Comment Period: 7/9/2018 – 8/8/2018**

### *Agree Order Available for Public Review and Comment*

Ecology is providing an opportunity for the public to comment on the Agreed Order (AO) for the “Interstate 82 Exit 33A Yakima City Landfill” site. The AO directs the Potentially Liable Persons (PLPs) to update environmental information and prepare cleanup options.

Ecology is asking for your comments on the Agreed Order. You are invited to:

- Review the Agreed Order
- Send comments to Ecology

### **Site Background**

The site is currently owned by OfficeMax Inc. and was historically used by the City of Yakima as a local dump and as a log storage yard by Boise Cascade. Previous environmental investigations of the site indicate the presence of contamination from gasoline, pesticides, and other materials that were buried at the site.

The city has plans to improve the infrastructure of the site and surrounding area. Environmental data will be collected to help support the final cleanup.

## NEWS & NOTES

### Comments accepted through August 10, 2018, on Frequently Asked Questions (FAQs) Regarding Vapor Intrusion (VI) and Ecology's 2009 Draft VI Guidance (Implementation Memo No. 21)

In October 2009, we released a draft vapor intrusion guidance document titled *Guidance for Evaluating Soil Vapor Intrusion in Washington State: Investigation and Remedial Action* (Publication No. 09-09-047). Over the last several years, a number of questions have been raised on whether certain portions of the 2009 draft guidance are still applicable. *Guidance for Evaluating Soil Vapor Intrusion in Washington State* is available at <https://fortress.wa.gov/ecy/publications/SummaryPages/0909047.html>

To address these questions, we've prepared *Draft Implementation Memo No. 21*, which provides answers and recommendations for addressing the technical and policy changes that have occurred since the 2009 guidance was originally issued. The draft memo is now available for public review and comment at <https://fortress.wa.gov/ecy/publications/SummaryPages/1809046.html>

Send your comments through Friday, August 10, 2018, to:

Mark E. Gordon, P.E.  
Department of Ecology – Toxics Cleanup Program  
P.O. Box 47600  
Olympia, WA 98504-7600

### Rule Adoption and Repeal Notice for Underground Storage Tank Regulations

On July 18, 2018, the Ecology repealed existing Chapter 173-360 WAC and adopted new Chapter 173-360A WAC, Underground Storage Tank (UST) Regulations. The new chapter modifies and replaces the repealed chapter. The new chapter will be published in the Washington State Register on August 1, 2018, and become effective on October 1, 2018.

The text of the new rule, and a summary of changes to the existing rule, are available on our web page: <https://ecology.wa.gov/Regulations-Permits/Laws-rules-rulemaking/Rulemaking/WAC-173-360-Mar16>. You can also learn more by reading our focus sheet. It can be found at: <https://fortress.wa.gov/ecy/publications/documents/1809057.pdf>.

## PIERCE COUNTY

---

**AMG Investments Group**  
**11214 Pacific Ave S, Tacoma**

**Facility Site ID# 4106**

**Cleanup Site ID# 12396**

*Cleanup Complete*

Ecology determined no further action is required at this site. During closure of a heating oil underground storage tank, contaminated soil was removed to the extent practicable by excavation. Some diesel in the soil could not be removed because it was under site infrastructure. An environmental covenant was used to close the site.

## WHITMAN COUNTY

---

## Market on Grand Site

Facility Site ID# 61251359 Cleanup Site ID# 14424

### 160 South Grand, Pullman

#### *Cleanup Complete*

Ecology determined no further action is required at the Market on Grand site following a limited groundwater investigation. The former automotive shop contained an in-ground hydraulic lift that was removed along with associated diesel- and heavy oil-contaminated soil. The property owners worked with the **Voluntary Cleanup Program** to demonstrate that contaminated water observed in the lift excavation was limited in extent and not representative of groundwater conditions at the site. Ecology has determined that the excavation pit water is non-potable, and unlikely to migrate offsite or affect potential sources of drinking water, including the deeper groundwater aquifer.

## GLOSSARY

**Agreed order** - A legal agreement with Ecology to make sure the cleanup meets the standards of Washington State's cleanup law, the Model Toxics Control Act (MTCA).

**Cleanup action plan (CAP)** - A document that describes the selected cleanup method(s) and specifies cleanup standards and other requirements. It is based on information and technical analyses generated during the RI/FS and consideration of public comments and community concerns. A draft of the CAP (DCAP) is made available for public review and comment before finalizing.

**Comment period** - A time period during which the public can review and comment on various documents and Ecology or EPA actions. For example, a comment period is provided to allow community members to review and comment on proposed cleanup action alternatives and proposed plans. Also, a comment period is held to allow community members to review and comment on draft feasibility studies.

**Consent decree** - A formal legal agreement that is filed with a court. It describes studies and/or cleanup work to be done at a site and the terms under which that work is to be done.

**Engineering design report** - Engineering design reports outline the specific details for implementation and operation of the first phase of the cleanup actions.

**ERTS** - Environmental Report Tracking System

**Five-year periodic review** - A periodic review is conducted at least every five years after the initiation of a cleanup action at a site, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions, after cleanup is considered complete, and to ensure protection of human health and the environment.

**Formal cleanups** - TCP conducts or supervises formal cleanups (also called formal oversight) when site owners are under court order or decree, or when cleanups are funded by legislative initiatives. Formal cleanups will meet MTCA standards. The public can provide input during public meetings and comment periods.

**Hazardous Sites List** - A statewide list of contaminated properties. Ecology may remove a site from the list only after determining that all remedial actions except confirmatory monitoring have been completed and compliance with the cleanup standards has been achieved at the site, or the listing was erroneous.

**Independent cleanups** - Property owners conduct independent cleanups on their own, or with help from our Voluntary Cleanup Program (VCP). Independent cleanups still meet MTCA standards, but property owners set their own timelines. Owners can ask for our help through the VCP but do not have to. They only need to hold public meetings or comment periods if a site needs to be de-listed.

**Independent cleanup action** - Any remedial action without department oversight or approval and not under an order or decree.

# Site Register

**LUST** - Leaking Underground Storage Tank

**NFA** - No Further Action

**Public participation plan** - Outlines and describes the tools Ecology will use to inform the public about site activities, and it identifies opportunities for the community to become involved in this process.

**PSI** - Puget Sound Initiative

**RCW** - Revised Code of Washington

**Remedial action** - Construction work done to clean up a contaminated site.

**Remedial investigation/feasibility study** - Two distinct but related studies. They are usually performed at the same time, and together referred to as the "RI/FS."

**RI/FS** - See Remedial Investigation/Feasibility Study

**SEPA** - State Environmental Policy Act

**Site Hazard Assessment (SHA)** - An assessment to gather information about a site to confirm whether a release of hazardous substances has occurred and to enable Ecology to evaluate the relative potential hazard posed by the release.

**TCP** - Ecology's Toxics Cleanup Program

**Total petroleum hydrocarbons (TPH)** - A term used to describe a large family of several hundred chemical compounds that originally come from crude oil. TPH is a mixture of chemicals made mainly from hydrogen and carbon.

**UXO** - Unexploded Ordnance

**Voluntary Cleanup Program (VCP)** - The VCP is one of several options for cleaning up a hazardous waste site under the state's cleanup law. Under this option, property owners may perform a cleanup independently and request services from Ecology for a fee.

**WAC** - Washington Administrative Code

**WARM, Washington Ranking Method** - The method used to rank sites placed on the Hazardous Sites List.

**Find more glossary terms on Ecology's website:** [www.ecy.wa.gov/programs/tcp/tcp\\_acronym\\_list.htm](http://www.ecy.wa.gov/programs/tcp/tcp_acronym_list.htm)
