

# **Telemetered Metering Options**

### Benefits of cellular-based telemetered meters

Cellular-based telemetery is a technology that allows measurements to be taken at the installed water meter and be transmitted via cellular technology, like a text message, to a secure data storage facility. Telemetry has multiple benefits and can be both time and cost efficient for the meter owner. Telemetry allows for:

- Water use monitoring in near real time using a personal computer or smart phone.
- Real-time leak detection and notification, if desired, and system performance monitoring.
- Reduced time spent manually entering and recording data. Data is automatically stored and the owner can easily retrieve data. Additionally, depending on your choice of a meter supplier, Ecology staff can also access data.
- May satisfy Ecology's recording and reporting requirements, depending on your choice of a meter supplier.

If you choose to have a cellular-based telemetered meter installed, please notify your regional Ecology Metering Coordinator for technical assistance.

# Selecting a meter that works for you

There are multiple companies that offer cellular-based telemetered meters. The choice of who you purchase a meter from is up to you.

Through a competitive process, Ecology has an agreement with Metron-Farnier, that allows us access to the water quantity data collected by their telemetered meter. Specific information on Metron-Farnier meters as well as other metering providers is provided. If you decide to order a Metron-Farnier meter please make sure you tell Metron-Farnier that you are installing the meter as required by the state.

When selecting your supplier and meter type, note that it is the sole responsibility of the water right holder to ensure that their meter is installed correctly and is in working order throughout the life of the meter.

If you have additional questions regarding the benefits of telemetered meters, or about your metering requirements in general, please contact your Ecology Metering Coordinator.

#### More information

Visit the Ecology website for information about <u>metering your water use</u>.
