News & Notes

NOVEL CORONAVIRUS (COVID-19) INFORMATION

We are joining a statewide effort to slow the spread of the coronavirus (COVID-19) by supporting social distancing and other directives from Governor Inslee as well as federal, state, and local health officials.

We have a few important updates to share with you:

- **As of March 24, all Department of Ecology buildings are closed to the public until further notice under Governor Inslee's "[Stay Home – Stay Healthy](#)" proclamation.**⁵ This includes all headquarter, regional, and field offices.
- **We are still operating**, and you can reach staff from any of our offices via email and phone.
- All currently scheduled public meetings have been changed and/or rescheduled to **online-only meetings**. Visit our [public input and events listings](#)⁶ for up-to-date information on public meetings.
- Due to the potential health risks presented by COVID-19, **in-person document and record reviews are not currently available**. All public libraries and other repositories that are listed in previous Site Register editions as document review locations are also closed. If you would like to request to receive specific records electronically, [please let us know](#).⁷

NOTE: You can access all documents that are listed in the Site Register for public review and comment online:

1. Under the "**For more information**" heading in the left-hand column of each Site Register entry, you will find the link to visit Ecology's webpage for the site.
2. From that site page, there is a "**View Electronic Documents**" link in the right-hand column that will take you to a list of all posted documents.

Thank you for your patience and understanding as we work together to defend the health and well-being of all Washingtonians.

For the latest information, please visit the state's coronavirus website at <https://coronavirus.wa.gov>.

GRANT FUNDING

Independent cleanup grant application review on hold, applications still being accepted

Local governments interested in cleaning up sites through the Voluntary Cleanup Program can submit applications for the next round of [Independent Remedial Action Grants](#).⁸

These applications are accepted on an ongoing basis throughout the biennium, regardless of funding availability.

Limited funding available for integrated planning grants

We have limited Integrated Planning Grant (IPG) funding available, and some funding may be available for affordable housing related cleanup projects. For questions about a potential brownfield

The next funding evaluation cycle is scheduled to close **June 18, 2020**. However, because of the impact of the coronavirus on Washington's economy and the uncertainty of the impact to state revenue, we will not be evaluating applications at this time.

Visit our website for the most up to date information.

redevelopment project and whether it qualifies for an IPG, contact one of the IPG Coordinators listed on our [Integrated Planning Grant webpage](#).⁹

CHAPTER 173-340 WAC UPDATE

Stakeholder & Tribal Advisory Group meetings on June 8 (meeting 5B) and June 25 (meeting 5C)

We will be holding all STAG meetings online until further notice. Because of this, we broke the May meeting into **three shorter webinars** (5A, 5B, and 5C).

Ecology will convene the second and third of three Zoom webinars to discuss updates to sections 350, 360 and 370 of the Model Toxics Control Act (MTCA) Cleanup Rule

- **This Monday, June 8, 2020 from 8:20 a.m.–noon** (meeting 5B) — STAG members and Ecology staff will discuss preliminary draft updates to Section 350 (Remedial investigation and feasibility study).

The webinar will continue from Noon to 1:00 p.m. Ecology staff will be available for an optional brownbag lunch discussion with STAG members

to consider other topics and ideas about the rulemaking. The public is invited to observe.

- **Thursday, June 25, 2020 from 8:20 a.m.–noon** (meeting 5C) — STAG members and Ecology staff will discuss preliminary draft updates to Section 360 (Requirements for cleanup actions) and 370 (Expectations for cleanup action alternatives).

You are welcome to observe STAG meetings online as a member of the public. There will be an opportunity for public comment at the end each meeting. To learn how to join the webinar, visit the [STAG webpage](#)¹⁰ and click on the highlighted link for meeting agendas.

You can learn more about the rulemaking on our [website](#).¹¹ For questions about the cleanup rule update, contact Clint Stanovsky, Rulemaking Lead, at Clinton.Stanovsky@ecy.wa.gov or 360-407-7193.

Formal Cleanups

We oversee complex cleanup sites to protect your health and the environment.

Document review locations

Our standard physical locations are all closed due to the pandemic. Documents are currently only available electronically.

Public comment period June 2–July 2

Proposed removal from the Hazardous Sites List

Ecology is proposing to remove the Unocal Bulk Plant 0853 site from its Hazardous Sites List. The Hazardous Sites List is a statewide list of contaminated properties. The site has been operating as a bulk fuel plant since 1921. Maintenance, office buildings, loading racks, dispenser islands, canopy and paved portions have been added over time. In 1990, during an equipment upgrade, an investigation revealed contamination in soil and groundwater. Contaminated soil was removed but petroleum contaminated groundwater remained. An oxygen compound was injected to help breakdown the contamination and in 2018, the data showed that petroleum was no longer present above state cleanup levels.

Rebecca.Lawson@ecy.wa.gov
360-407-6241

From 1964 to 1993, Pacific Wood Treating (PWT) pressure-treated lumber wood products. The plant operated in the general area of 111 West Division Street in Ridgefield. PWT pressure treated lumber wood products and poles. Their operations and waste disposal methods released hazardous substances that contaminated soil, groundwater, storm water, and sediments.

Union Pacific Railroad Company (Union Pacific) and the Department of Ecology are entering into a De Minimis Consent Decree. This legal agreement requires Union Pacific to pay for a portion of cleanup costs at the PWT site. It reflects the relatively small amount of contamination contributed by Union Pacific. The settlement money will go towards the remaining cleanup of the PWT site.

Document review locations

Due to the pandemic documents are only available electronically.

Document review locations

In-person document review is currently unavailable, following Washington State's Stay Home, Stay Healthy order.

All documents for review are posted on the site webpage listed in the "**For more information**" section above.

Public Comment Period: May 25–June 23, 2020

Agreed Order available for review and comment

You are invited to review and comment on the following documents:

- [Agreed Order](#)¹⁸ – this is a legal agreement that requires the City of Tacoma, Department of Public Utilities, Light Division (also known as Tacoma Power), to prepare the following cleanup reports:
 - A remedial investigation, which describes the types and extent of contamination.
 - A feasibility study, which considers and compares cleanup options.
 - A preliminary cleanup plan, which describes cleanup methods selected by Ecology.
- [Public Participation Plan](#)¹⁹ - describes how we will inform the community about site activities and opportunities to be involved in the cleanup process.

In April 2019, we were notified about seeps of Bunker C oil found on the eastern bank of Rainey Creek near Champion Haul Road and at the former lumber mill area.

In December 2019 as an emergency cleanup action, Tacoma Power capped the seeps to keep oil from moving into Rainey Creek before the water level in Riffe Lake inundated the site. They collected soil and groundwater samples from test pits and soil borings and found other contamination that include diesel, gasoline, and heavy oil.

Approximately 11,000 tons of impacted soil were removed and disposed of appropriately. Possible sources for the seeps are from former lumber mill operations, including old underground storage tanks and piping, or petroleum-impacted soil.

Contact with these hazardous substances can be harmful to human health and the environment. Tacoma Power has closed the area to protect the public until cleanup is complete.

SKAGIT COUNTY

Anacortes Former Water Treatment Plant

14549 River Bend Rd
Mount Vernon

Facility Site ID# **79423677**

360-255-4379

Response to Public Comment Available

A [Response to Comments Summary](#)²¹ is available for review on the [Anacortes Former Water Treatment Plant](#)²² cleanup site webpage.

We conducted a 30-day public comment period from March 16 – April 14, 2020, and hosted an online public meeting March 23, 2020 on two environmental reports for the Anacortes Former Water Treatment Plant cleanup site. The site is located next to the Skagit River in Mount Vernon and is next to the current water treatment plant, which provides the drinking water for the City of Anacortes and surrounding communities.

We have reviewed and considered all comments received on the documents. Based on our evaluation of the comments, no changes were necessary in the documents. See the Response to Comments Summary for details. We are finalizing all documents and will post them on the site webpage when complete.

Field sampling confirmed that there was no release of contaminants to surface water or groundwater. However, contamination was found in some former plant building materials and shallow soils immediately adjacent to two former plant structures. Polychlorinated biphenyls (PCBs) levels in soils are above residential cleanup levels and must be addressed under Washington's cleanup law, the Model Toxics Control Act (MTCA).

In 2017, the City conducted a site-specific human health risk assessment that determined no adverse health effects are likely to have occurred to customers, workers, or plant visitors as a result of the contaminants at the former plant. The City's long-term monitoring confirmed the contaminants have never been detected in any drinking water samples from the former plant.

Document review locations

In-person document review is currently unavailable. All documents for review are posted on the site webpage listed in the “**For more information**” section above.

Public Comment Period: May 8 – June 7, 2020

Draft documents available for public comment

Ecology is extending the comment period until June 28, 2020.

We request your input on an Agreed Order between P&GE, LLC and Ecology and an Interim Action Work Plan that requires to comply with Washington state cleanup regulations during landfill closure and development activities at the Go East Corp Landfill site.

The following documents are available for review and comment:

- [Draft Agreed Order](#)²⁵ — This legal agreement requires P&GE to perform an interim action during landfill closure, prepare a remedial investigation/feasibility study for the site, and prepare a preliminary draft cleanup action plan in accordance with the Model Toxics Control Act.
- [Draft Interim Action Work Plan](#)²⁶ (IAWP) — this document identifies:
 - The interim action area (a.k.a. the “wedge area”), which includes peripheral areas of the existing landfill that will be excavated and consolidated under the engineered landfill cap to be installed during landfill closure.
 - The historical disposal area and provides waste characterization sampling data from the wedge area, as required in the landfill permit.
 - Interim action levels for soil beyond the final landfill boundary, including a confirmation soil sampling plan for the wedge area and a borrow source sampling plan for the onsite soil to be used as construction fill.
 - A sampling and analysis plan and a quality assurance project plan in the IAWP appendices.
- [Public Participation Plan](#)²⁷ – this document explains how people can participate in the cleanup process.

El Sitio del Relleno Sanitario Go East Corp

Periodo de comentarios: 8 de mayo – 28 de junio de 2020

Someter comentarios en español²⁸

Ecología y P&GE se entrarán en una orden acordada para el relleno sanitario Go East Corp. El sitio está ubicado en 4330 108th Street, Everett, WA 98208. Lo invitamos a comentar sobre un acuerdo legal propuesto, el Plan de Acción Provisional de Trabajo, y un plan de participación pública que requiera que P&GE, LLC cumpla con los requisitos aplicables según las regulaciones de limpieza del estado de Washington durante el cierre de rellenos sanitarios y actividades de desarrollo en el Sitio. Para obtener más información en español, comuníquese con Coleman Miller al 509-454-4246 o por correo electrónico a preguntas@ecy.wa.gov.

- **Public comment period June 1–30**

Draft Remedial Investigation & Feasibility Study, Public Participation Plan

You are invited to review and comment on the [draft Remedial Investigation & Feasibility Study \(RI/FS\)](#) and [Public Participation Plan \(PPP\)](#) for the Stubblefield Salvage Yard site. The RI explains the extent and locations of contaminants at the site, and the FS presents cleanup options. The PPP describes ways Ecology will inform the public throughout the cleanup process. This plan identifies how and when the public can get involved during different stages of the investigation and cleanup of contamination.

Ecology will respond to all the comments we receive by June 30 and publish our responses. We will hold an online public meeting on this proposal if 10 people request it. If public comments result in substantial changes to our proposal, we will hold another comment period.

Determination of No Further Action

A 100-gallon mineral oil spill occurred due to equipment failure in an area between two railroad tracks the Port of Ephrata owns. Emerald Transformer, the party responsible, excavated soil contaminated with mineral oil and disposed it at a landfill. Ecology reviewed the follow-up soil sampling results and issued a no further action letter on April 28, 2020.

Washington State Department of Ecology Toxics Cleanup Program

Glossary

Agreed order - A legal agreement with Ecology to make sure a potentially liable party/parties takes specified actions under the Model Toxics Control Act (MTCA) to clean up a contaminated site.

Cleanup action plan (CAP) - A document that describes the selected cleanup method(s) and specifies cleanup standards and other requirements. It is based on information and technical analyses generated during the RI/FS and consideration of public comments and community concerns. A draft of the CAP (dCAP) is made available for public review and comment before finalizing.

Cleanup site – see Site.

Comment period - A time period during which the public can review and comment on various documents and Ecology or EPA actions. For example, a comment period is provided to allow community members to review and comment on proposed cleanup action alternatives and proposed plans. Also, a comment period is held to allow community members to review and comment on draft feasibility studies.

Consent decree - A formal legal agreement that is filed with a court. It describes studies and/or cleanup work to be done at a site and the terms under which that work is to be done.

CSID – Cleanup site identification – a tracking number assigned to a known or suspected cleanup site.

Delisting/delisted – the process of formally removing a site from the Hazardous Sites List.

Enforcement order – A formal legal order to force a potentially liable party/parties to take specific required cleanup actions when negotiations toward an agreed order are unsuccessful.

Engineering design report - Engineering design reports outline the specific details for implementation and operation of the first phase of the cleanup actions.

Formal cleanups - TCP conducts or supervises formal cleanups (also called formal oversight) when site owners are under court order or decree, or when cleanups are funded by legislative initiatives. Formal cleanups will meet MTCA standards. The public can provide input during public meetings and comment periods.

FSID – Facility/Site identification – a tracking number assigned to a facility, business, or location.

Hazardous Sites List - A statewide list of contaminated properties. Ecology may remove a site from the list only after determining that all remedial actions except confirmatory monitoring have been completed and compliance with the cleanup standards has been achieved at the site, or the listing was erroneous.

HOTAP – Heating Oil Technical Assistance Program administered by the Pollution Liability Insurance Agency (PLIA)

Independent cleanups - Property owners conduct independent cleanups on their own, or with help from our Voluntary Cleanup Program (VCP). Independent cleanups still meet MTCA standards, but property owners set their own timelines. Owners can ask for our help through the VCP but do not have to. Ecology will hold public meetings or comment periods if a site needs to be de-listed.

Independent cleanup action - Any remedial action without department oversight or approval and not under an order or decree.

LUST - Leaking Underground Storage Tank

NFA - No Further Action

PAH – Polycyclic aromatic hydrocarbons – a class of organic chemicals from petroleum, organic materials, and the combustion of hydrocarbons. They are carcinogenic (cancer-causing) and linked to cardiovascular and developmental diseases.

PCB – Polychlorinated biphenyls – a group of manmade chemicals that are toxic, potentially carcinogenic, persistent, and bio-accumulative. They are classified as persistent organic pollutants, meaning they do not easily degrade in the environment.

Periodic review - A periodic review is conducted at least every five years after the initiation of a cleanup action at a site, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions, after cleanup is considered complete, and to ensure protection of human health and the environment.

PLIA – Pollution Liability Insurance Agency

Site Register

Washington State Department of Ecology Toxics Cleanup Program

PLP – see Potentially liable party

Potentially liable party (PLP)– A person, business, or entity that is potentially liable (legally responsible) to clean up a contaminated site. If there is more than one PLP, all parties may be jointly and severally liable.

PTAP – Petroleum Technical Assistance Program administered by the Pollution Liability Insurance Agency (PLIA)

Public participation plan - Outlines and describes the tools Ecology will use to inform the public about site activities, and it identifies opportunities for the community to become involved in this process.

Remedial action - Construction work done to clean up a contaminated site.

Remedial investigation/feasibility study - Two distinct but related studies. They are usually performed at the same time, and together referred to as the "RI/FS."

RI/FS - See Remedial Investigation/Feasibility Study

SEPA - State Environmental Policy Act

Site – also called a cleanup site, is a property or location with suspected or verified contamination that must be cleaned under the Model Toxics Control Act (MTCA). A site does not necessarily stop at property boundaries, but is defined by specific contaminants, the extent of contamination, or both.

Site Hazard Assessment (SHA) - An assessment to gather information about a site to confirm whether a release of hazardous substances has occurred and to enable Ecology to evaluate the relative potential hazard posed by the release.

Total petroleum hydrocarbons (TPH) - A term used to describe a large family of several hundred chemical compounds that originally come from crude oil. TPH is a mixture of chemicals made mainly from hydrogen and carbon.

UST – Underground Storage Tank

Voluntary Cleanup Program (VCP) - The VCP is one of several options for cleaning up a hazardous waste site under the state's cleanup law. Under this option, property owners may perform a cleanup independently and request services from Ecology for a fee.
