

# Prevent asbestos exposure during dry weather

Swift Creek and downstream Sumas River carry asbestos from the Sumas Mountain landslide. In dry weather, sediments containing asbestos pose a hazard.

*Landslide material in Swift Creek containing naturally-occurring asbestos*

## **AVOID walking, riding, working, or playing**

along Swift Creek and Sumas River, or where flooding may have left deposits

- When disturbed, asbestos fibers in the dry sediments can become airborne.
- Airborne asbestos can be inhaled and potentially cause health problems.

## **For more information**

Learn how to handle sediments to protect yourself and your family.
