

**ECO-FRIENDLY
IS BUSINESS
FRIENDLY.**

WE CAN HELP YOU GET THERE.

LET'S TALK FOOD AND BEVERAGE INDUSTRY.

If you've been thinking about incorporating eco-friendly improvements at your food and beverage processing business, let's talk! There may be grant money available to you, and there are definitely people who want to help you get started.

PICK THE PROJECT YOU WANT TO START

For the food and beverage industry, we can work with you on these projects:

- **Facility and equipment system optimization:** Focus on cleaning system improvements like reducing water and chemical use.
- **Eco-friendly coolants:** Improve your cooling system while reducing environmental impact caused by ozone-depleting refrigerants.
- **Wastewater mitigation and pH training:** Learn about pH best practices through a workshop or webinar.

BENEFITS FOR YOUR BUSINESS

In with the good...

- Improved production efficiency
- Improved employee health and safety
- Improved public image

...out with the bad!

- High operating costs
- High regulatory costs and risks
- High environmental impacts

In exchange for working with us on a project, we'd like to highlight your business's results in a case study.

WHAT YOU'LL GET FOR FREE

- Training, consulting, and compliance assistance.
- Recommendations for improved product quality and operating efficiency.
- Help with implementation events, tools, trainings, and services.
- Wastewater stream assessment and mitigation strategy best practices.
- Model sampling, testing, and reporting templates.
- A summary of accomplishments in cost and pollutant reductions.

Our visits are non-regulatory. We work *with* businesses to achieve environmental improvements. Projects take 1–3 months to complete, and we'll make sure our consultation works within your business production schedule.

HOW TO GET STARTED

We prioritize companies that have:

- Great potential for environmental improvement.
- Strong commitment to the proposed project.

If you want to get started on a project, please reach out to us.
