

WIN-WIN SOLUTIONS FOR YOUR FACILITY

- ✓ Reduce waste and utility costs, increase efficiency.
- ✓ Save time, money and resources.
- ✓ Easily follow environmental regulations.
- ✓ Stay ahead of the competition.

“This was a successful project, with tremendous waste savings and cost savings.”

Greg Konkol
Plant Manager

KEEP YOUR BUSINESS CLEAN AND COMPETITIVE

WHO WE ARE

FACILITIES SAVED

HOW WE HELP

Efficiency is essential to every successful manufacturing or industrial process.

Ecology has a technical assistance team made up of engineers and scientists ready to help you called TREE (Technical Resources for Engineering Efficiency). TREE uses current state assessments and engineering analysis to improve the efficiency of your operations without sacrificing the quality of your products.

These services are non-regulatory and free. We focus on small and medium-sized plants.

More than \$6 million.

More than 25 million kilowatt-hours of energy.

More than 345,000 pounds of dangerous waste.

TREE works with manufacturing clients to find custom solutions that address their unique needs and improve the environment.

Our engineers will learn about your operation and business goals, analyze your industrial processes, and report back to you with practical ideas and options for improvement.

We advise, you decide!
