# Introduction

The Washington State Department of Ecology's (Ecology) Water Quality Program (WQP) administers four major funding programs under the Water Quality Combined Funding Program (WQC) through an annual funding cycle. Ecology awards grants and loans on a competitive basis to eligible applicants for high-priority water quality projects throughout Washington.

This document (Draft List) presents the proposed distribution of funding for the State Fiscal Year 2023 (SFY23) Funding Cycle. The Draft List also discusses the goals and objectives for meeting water quality priorities and state and federal funding requirements through the four funding programs.

The Draft List describes how Ecology intends to use and administer funding from the Centennial Clean Water Program (Centennial), the federal Clean Water Act (CWA) Section 319 Program (Section 319), the Stormwater Financial Assistance Program (SFAP), and the Washington State Water Pollution Control Revolving Fund, nationally referred to as the Clean Water State Revolving Fund (CWSRF). The Draft List also serves as the Intended Use Plan (IUP) required by the federal Environmental Protection Agency (EPA) for providing information on how Ecology will administer the CWSRF. Due to the integrated nature of the funding programs, Ecology publishes one combined document.

## Overview of the Funding Programs

### CWSRF

CWSRF is a low-interest rate loan program established by Congress under Title VI of the CWA Amendments of 1987 to fund water quality related projects. CWSRF funds a broad range of facility and activity projects, including:

- Planning, design, and construction of wastewater facilities, stormwater facilities, and large onsite sewage systems.
- Planning and implementation of nonpoint source pollution control activities.
- Planning and implementation of estuary conservation and management activities.
- Onsite sewage system repair and replacement programs.

Ecology also uses CWSRF to provide special funding for financially challenged (hardship) communities and for projects or portions of projects that meet one or more of EPA's criteria for green project reserve (GPR).

Since the program's inception, Ecology has received a federal Capitalization Grant from EPA each federal fiscal year (FFY) to help fund CWSRF; the grant is based on Congressional appropriation. The state must provide a match of the Capitalization Grant. Each year Ecology estimates the funds available for CWSRF from multiple sources and offers the combined total in new loans to eligible public bodies for high priority water quality projects (see Table 4).

In November 2021 President Biden signed the Bipartisan Infrastructure Law (BIL). The BIL authorizes a new Capitalization Grant to provide further funding for CWSRF. Ecology plans to combine the two Capitalization Grants to help fund projects described in the Draft List. Throughout the remainder of this document, when needed, Ecology will differentiate between the grants using the phrases, “base Capitalization Grant” and “BIL Capitalization Grant”, respectively, or use the phrase “combined Capitalization Grant” to refer to the combined total of both grants.

Ecology must manage CWSRF in accordance with state and federal laws and rules, and conditions imposed through the Capitalization Grant. The key state law is [Chapter 90.50A RCW](#)<sup>3</sup>, and the key state rule is [Chapter 173-98 WAC](#)<sup>4</sup>.

## Interest Rates

Ecology bases interest rates for non-hardship projects on the average market interest rate for tax-exempt municipal bonds. Ecology uses the average 11-Bond GO (General Obligation) Index rate for the period 30-180 days prior to the beginning of a new funding cycle and sets the interest rate, depending on the loan term, at 80%, 60%, or 30% of that average for most projects. Table 1 shows the term and interest rates for standard CWSRF loans for SFY23.

**Table 1: SFY23 Interest Rates for Standard CWSRF Loans**

Loan Term	Interest Rate for Most Projects	Interest Rate for Nonpoint Source Activity Projects
5 Years	0.5%	0.4%
20 Years	1.1%	0.7%
30 Years	1.4%	1.1%

## Hardship for Wastewater Facility Construction

Wastewater facility construction projects funded through CWSRF are eligible for financial hardship consideration if the project meets the following criteria:

- The existing residential population of the service area for the project is 25,000 or less at the time of application.
- Financing the project without subsidy would cause existing residential sewer fees to be 2% or more of the median household income (MHI) for the service area.

If Ecology determines that financial hardship exists, it may structure a funding offer that includes a combination of grant, forgivable principal loan (FP loan), and further subsidized loan interest rates. Table 2 shows the wastewater facility construction hardship interest rate and grant/FP loan eligibility for SFY23.

<sup>3</sup> <http://apps.leg.wa.gov/rcw/default.aspx?cite=90.50A&full=true>

<sup>4</sup> <http://apps.leg.wa.gov/wac/default.aspx?cite=173-98&full=true>

**Table 2: SFY23 Hardship Interest Rates and Grant/Forgivable Principal Loan Eligibility**

Sewer fee divided by MHI is:	Below 2% (non-hardship)	Above 2% but below 3% (moderate hardship)	Above 3% but below 5% (elevated hardship)	Above 5% (severe hardship)
5 years loan term:	0.5%	0.4%	0.2%	0.0%
20 years loan term:	1.1%	0.7%	0.4%	0.0%
30 years loan term:	1.4%	1.1%	0.7%	0.4%
Grant/FP loan eligibility:	Not eligible	50% up to \$5M	75% up to \$5M	100% up to \$5M

## Hardship for Wastewater and Stormwater Facility Preconstruction

Wastewater and stormwater facility preconstruction projects funded through CWSRF are eligible for financial hardship consideration if the project meets the following criteria:

- The existing residential population of the service area for the project is 25,000 or less at the time of application.
- The MHI for the service area is less than 80% of the state MHI.

Ecology may award applicants that meet these criteria a FP loan and/or a Centennial grant for 50% of the eligible preconstruction project costs.

## SFAP

SFAP is a state grant program established through legislative appropriation. SFAP funds stormwater facilities and stormwater activities that reduce water pollution from stormwater caused by existing infrastructure and development. Cities, counties, and ports are eligible for SFAP grants.

Funding for SFAP comes from the Model Toxics Control Act (MTCA) Stormwater Account.

The state rule [Chapter 173-323 WAC](#)<sup>5</sup> applies to SFAP. In addition, Ecology must implement the program in accordance with any conditions in the SFAP funding appropriation. Ecology works with the Financial Advisory Council to update guidelines for program implementation. These guidelines are integrated into the [Funding Guidelines State Fiscal Year 2023 Water Quality Financial Assistance](#)<sup>6</sup> publication.

## Hardship for Stormwater Projects Funded Through SFAP

Stormwater projects in cities and counties funded through SFAP are eligible for financial hardship consideration if the project meets the following criteria:

- The existing residential population is 25,000 or less at the time of application.
- The MHI for the city or county is less than 80% of the state MHI.

<sup>5</sup> <https://apps.leg.wa.gov/WAC/default.aspx?cite=173-323&full=true>

<sup>6</sup> <https://apps.ecology.wa.gov/publications/documents/2110028.pdf>

Cities or counties that meet these criteria are eligible for a SFAP grant with a match requirement of 15% of the total eligible project cost. Non-hardship projects require the standard 25% match.

Ports are not eligible for hardship funding under SFAP.

## Centennial

Centennial is a state funding program established by the State Legislature in 1986. It provides grants to eligible public bodies for wastewater facility preconstruction and construction in qualified hardship communities, a limited range of stormwater activity projects, and nonpoint source pollution control activity projects. Nonpoint source pollution control projects include:

- Stream restoration and buffers.
- Water quality-focused agricultural best management practices (BMPs).
- Onsite sewage system repair and replacement.

Although rare, Centennial can also be used to make loans with rates and terms aligned with CWSRF.

Centennial may be funded from various state sources.

Ecology must manage Centennial in accordance with state laws and rules. The key state law is [Chapter 70A.135 RCW](#)<sup>7</sup>, and the key state rule is [Chapter 173-95A WAC](#)<sup>8</sup>.

## Section 319

Congress established Section 319 as part of the CWA amendments of 1987 to address nonpoint sources of water pollution.

Section 319 provides grants for a variety of activity projects that address nonpoint sources of pollution. Projects include:

- Stream restoration and buffers.
- Water quality-focused agricultural BMPs.

Projects that implement BMPs are required to collect and report data that estimate load reductions of nitrogen, phosphorus, and sediments. Ecology must report the reductions to EPA annually. Eligible applicants include public bodies and not-for-profit groups.

Based on Congressional appropriations, EPA offers an annual grant to Washington State to implement [Washington's Water Quality Management Plan to Control Nonpoint Sources of Pollution](#)<sup>9</sup>. The grant from EPA requires a 40% state match. Ecology provides this match by awarding Centennial grants to nonpoint source pollution control projects.

---

<sup>7</sup> <https://apps.leg.wa.gov/rcw/default.aspx?cite=70A.135&full=true>

<sup>8</sup> <https://apps.leg.wa.gov/WAC/default.aspx?cite=173-95A&full=true>

<sup>9</sup> <https://apps.ecology.wa.gov/publications/documents/1510015.pdf>

There are no specific state laws or rules for Section 319, but Ecology uses a combination of federal laws, rules, and guidelines and the Centennial law and rule to govern the program.

## Mission, Goals, and Objectives

The overall mission of Ecology is to protect, preserve, and enhance Washington’s environment and promote the wise management of our air, land, and water. In addition, the goals of Ecology’s WQP include:

- Prevent and reduce water pollution.
- Clean up polluted waters and engage citizens in the work to protect and restore water quality.
- Provide excellent technical and financial assistance.

The following combined list of short- and long-term goals and objectives help achieve the overall mission of Ecology and the WQP through the financial assistance programs.

### Short- and Long-term Goals and Objectives

#### **Goal 1: Identify and fund the highest priority water quality focused projects statewide.**

##### **Objectives**

- Communicate with regional Ecology experts to identify water quality priorities.
- Coordinate with external partners, including advisory groups, tribes, special purpose districts, and state, federal, and local governments for input on water quality priorities.
- Communicate with the Legislature about needs and priorities for funding.

#### **Goal 2: Provide funding through a fair, objective, and transparent process.**

##### **Objectives**

- Involve stakeholders, including the public, in major funding program development, including rules and funding offer lists.
- Conduct two application Evaluators’ meetings with a focus on consistency and objectivity in scoring.

#### **Goal 3: Provide the best possible funding packages for small, financially challenged communities.**

##### **Objectives**

- Set aside one-third of Centennial for wastewater facility construction projects and wastewater facility preconstruction projects in small communities. The set-aside applies to construction projects that would otherwise result in sewer fees for residential ratepayers

that are more than 2% of the median household income (MHI). The set-aside also applies to preconstruction projects in communities with MHI's less than 80% of the state MHI.

- Set aside 5% of CWSRF for facility preconstruction projects in small communities with MHIs less than the state MHI. Provide forgivable principal loans and/or Centennial grants in those communities if the MHI is less than 80% of the state MHI.
- Reduce the SFAP grant match requirement for stormwater projects in small communities with MHIs less than 80% of the state MHI.
- Reduce the CWSRF interest rates for local onsite sewage system repair and replacement programs if they target loans to financially challenged homeowners.

## **Goal 4: Provide technical assistance to funding applicants and recipients.**

### **Objectives**

- Work with EPA, other federal agencies, and other state agencies to ensure effective coordination associated with major federal and state requirements.
- Provide outreach at workshops, conferences, and meetings to present information related to the funding programs and requirements.
- Conduct annual funding applicant training workshops.
- Conduct annual funding recipient training workshops.
- Maintain and update the Water Quality Grants and Loans webpages.

## **Goal 5: Provide sound financial management of the funding programs and projects.**

### **Objectives**

- Evaluate CWSRF annually to ensure the availability of funds in perpetuity as defined by [Chapter 173-98 WAC](#)<sup>10</sup>.
- Conduct financial capability assessments of loan recipients prior to signing agreements.
- Coordinate with Ecology's Fiscal Office on overall financial management issues.
- Conduct internal workgroup meetings to identify problems, needs, and emerging issues.
- Coordinate with advisory groups, councils, and other funding agencies and programs.

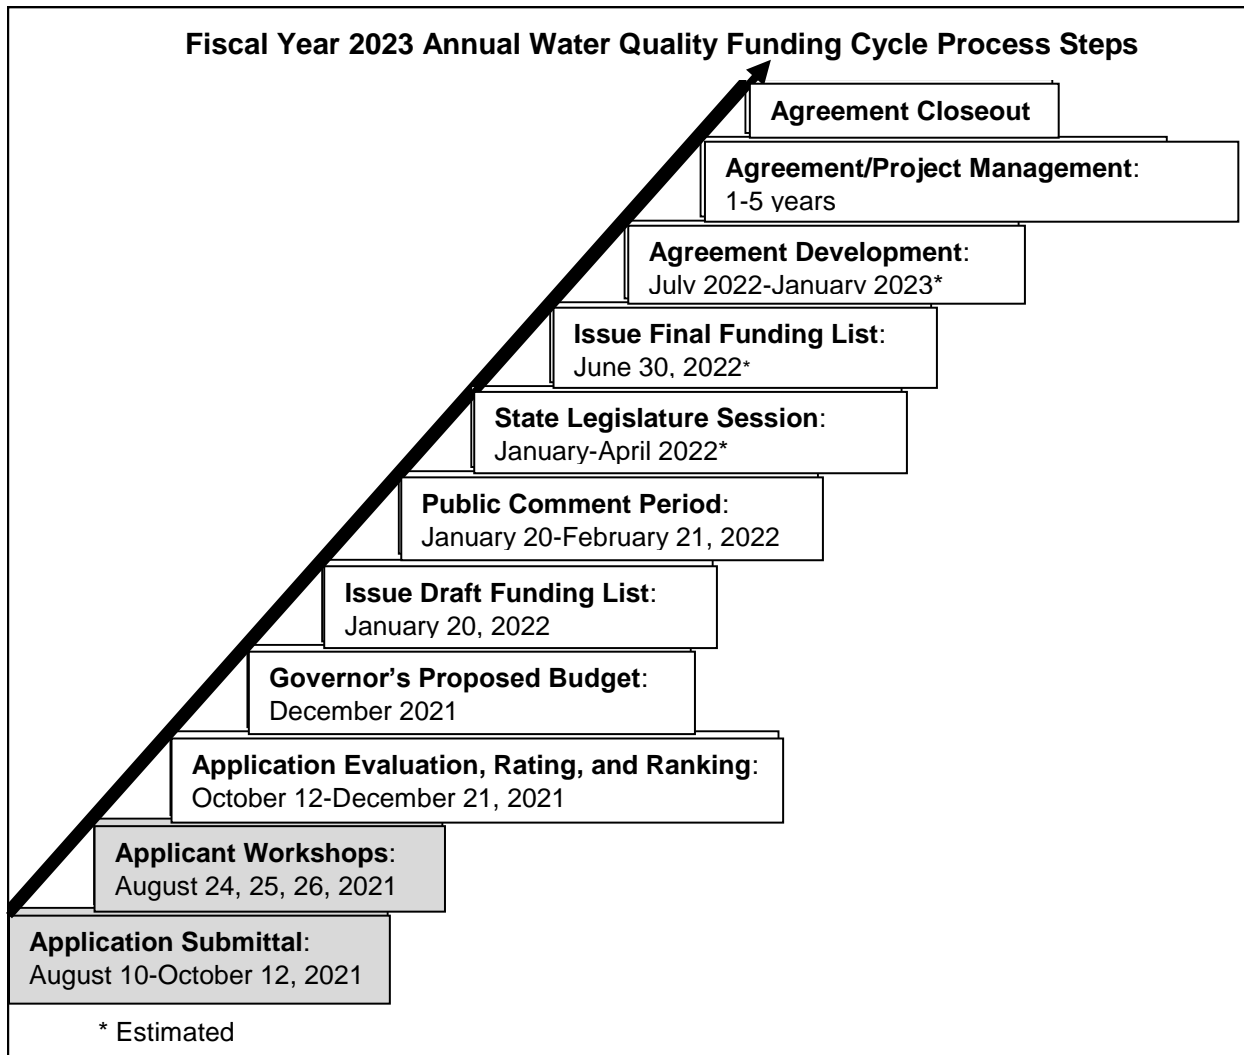

## **SFY23 Funding Cycle**

The annual funding cycle combines the four major funding programs into one process, using one application, one rating and ranking process, and preparing one prioritized offer list.

---

<sup>10</sup> <http://apps.leg.wa.gov/wac/default.aspx?cite=173-98&full=true>

Applicants submit applications for funding through the [Ecology Administration of Grants and Loans \(EAGL\)](#)<sup>11</sup>. Figure 1 is a diagram of the SFY23 Funding Cycle process.

**Figure 1: SFY23 Funding Cycle Process**

## Rating Criteria and Rating and Ranking Process

### Rating Criteria

The SFY23 application rating criteria and points are listed in Table 3.

<sup>11</sup> <https://ecology.wa.gov/About-us/Payments-contracts-grants/Grants-loans>

**Table 3: SFY23 Application Rating Criteria**

<b>Application Rating Criteria and Guidance</b>
<b>Funding Request</b>
0-15 points: Applicant has identified adequate matching funds. (Full points if no match is required.)
<b>Scope of Work - Additional Tasks WQC</b>
0-75 points: The scope of work represents a complete and concise description of the project tasks and outcomes, including deliverables. To receive full points, scope of work must align with the schedule and detailed budget.
<b>Task Costs and Budget</b>
0-50 points: The application demonstrates how the applicant arrived at the cost estimate for each task. The process used by the applicant to develop this estimate is based on real-world data.
0-85 points: The cost to complete the scope of work is reasonable when compared to similar projects in the region.
<b>Project Team</b>
0-50 points: Team members' roles and responsibilities are well defined and adequate for the scope of work. Team members' past experience is relevant to the proposed project. Applicant has a plan in place to maintain sufficient staffing levels to complete the project.
0-15 points: The applicant documents successful performance on other funded water quality projects, including Ecology funded projects. Previously constructed projects provided the water quality benefits described in the project application on time and within budget.
<b>Project Planning and Schedule</b>
0-40 points: Applicant used a complete and well-defined set of criteria to determine the value and feasibility of the proposed project and included the useful life and long-term maintenance costs in their evaluation of the project and project alternatives.
0-20 points: Applicant has provided documentation showing that key stakeholders have been identified and how they will support the project.
0-25 points: The project schedule includes all tasks including pre-project administrative elements such as permitting, MOUs, landowner agreements, etc., and provides sufficient time to complete all elements.
0-75 points: The applicant is ready to start on the proposed scope of work within 10 months of publication of the Final Offer List.
<b>Water Quality and Public Health Improvements</b>
0-135 points: Project proposes to reduce or prevent pollution in a waterbody that has been identified as a priority by a local, state or federal agency through the development of a federal, state or local water quality plan.
0-150 points: The proposed project area is directly connected to the water body identified for improvement and applicant has provided sufficient technical justification to show the proposed project will reduce the pollutants of concern in the water body identified for improvement.
0-50 points: Applicant has identified how the project will be evaluated in order to determine success, noted if the measure is quantitative or qualitative, and defined a goal.
0-100 points: The water quality and public health improvements that will be achieved represent a good value.
0-50 points: Applicant has a plan and commitments in place to fund long-term maintenance and sustain the water quality benefits of this project.
0-15 points: How well does the applicant and the project address greenhouse gas emission reductions in accordance with RCW 70.235.070?
<b>Financial Hardship</b>
0 points: If the applicant does not meet the criteria for financial hardship.
50 points: If the applicant meets the criteria for financial hardship.

## Rating and Ranking Process

Before rating and ranking projects, Ecology headquarters staff screened and verified the general eligibility of each application. Then two Ecology regional staff with water quality technical expertise independently rated each eligible proposal. One evaluator was from the region where the proposal originated, and the other was from a different region. Ecology then averaged the two scores to obtain the final score. In cases where the two scores deviated by more than 100 points, an evaluator from Ecology headquarters conducted a third independent evaluation, and staff averaged the two closest scores to obtain the final score.

In order to be eligible for funding, a proposal must have received an overall score of at least 600 points and scored at least 250 points on the Water Quality and Public Health Improvements portion of the application.

### Unrated Proposals

Staff determined that 3 proposals were ineligible for funding. These were not rated or ranked. There were 3 eligible wastewater facility refinance proposals. These were not rated or ranked, but funding is proposed for them. There were 2 requests for additional funding for already-funded projects and 1 already-funded project that didn't request funding. These were not rated or ranked, but Ecology will propose additional funding for all 3 projects through amendments to existing funding agreements.

### Tiebreakers

If two projects had the same total score, Ecology first used scores on the Water Quality and Public Health Improvements form to break the tie. If a tie remained, Ecology used scores on the Project Schedule form. If a tie still remained, Ecology then used scores on the Task Costs/Budget form to break the tie. If a tie still remained, and both projects were eligible for FP loans, but there was insufficient FP loan available for both projects, Ecology proposed the FP loan to the applicant with the highest unemployment rate.

After completing the rating process, Ecology staff generated the ranked list of project proposals based on the final average scores. The full ranked list is presented in Appendix 1.

## Available Funding, Set-asides, and Limits

Funding levels vary from year to year, depending on state and federal appropriations. Administrative rules, program policies, legislative directives, federal grant conditions, and funding levels result in requirements that Ecology set aside portions of the available funding for particular purposes and impose limits on uses and amounts. The set-asides and limitations vary from year to year. The SFY23 Draft List represents the second year of the 2021-23 Biennium, and fund levels are based on the 2021-2023 Biennial Budget plus any additional funding in the Governor's proposed Supplemental Budget released in December 2021.

The following are some specific funding levels, set-asides, and limitations for the programs.

## CWSRF

There is \$310,818,652 available for CWSRF loans based on Ecology's cash flow model calculations, accounting for income, disbursements, and early loan repayments. See Appendix 1a for a list of projects proposed CWSRF funding.

Note: The Governor's budget included new appropriation authority of \$200 million to provide access for Ecology to award funds on this list that were deposited in the CWSRF account from unanticipated early loan repayments over the past year.

The following are set-asides and limits on CWSRF.

- 10% of the Capitalization Grant is set-aside for GPR projects or project components.
  - GPR-eligible projects or project elements may receive up to 25% FP loan.
- 10% of the base Capitalization Grant is set aside for FP loans.
- 49% of the BIL Capitalization Grant is set aside for FP loans.
- 75% of CWSRF is set aside for wastewater and stormwater facility construction projects.
  - No more than 50% of the amount in this category may be allocated to any applicant.
  - Wastewater facility construction hardship may be eligible for up to 100% FP loan and/or Centennial grant.
    - The combined total of CWSRF FP loan and Centennial grant may not exceed \$5,000,000 for any project.
  - A Step 4 (Design and Construction) project may not exceed \$7,000,000 in total costs.
- 20% of CWSRF is set aside for nonpoint source pollution control activities projects.
  - No more than 50% of the amount in this category may be allocated to any applicant.
- 5% of CWSRF is set aside for wastewater and stormwater facility preconstruction projects in communities with populations less than 25,000 and MHIs less than the state MHI. In addition, if the MHI is less than 80% of the state MHI, the community may qualify for up to 50% FP loan and/or Centennial grant.
  - No more than 20% of the amount in this category may be allocated to any applicant.
- \$5,000,000 standard loan is set aside for the ongoing CWSRF Emergency Funding Program.
- \$5,000,000 standard loan and \$5,000,000 FP loan is set aside for the proposed new planning and other predesign work funding opportunity described in the *Request for Comments on New Proposals* section.
- A "to be determined" amount of standard loan and FP loan is proposed to be directed to potential wastewater construction hardship projects listed in Table 12 described in the *Request for Comments on New Proposals* section.
- Except for GPR, funds may be moved from one category to another if there is limited demand.

## SFAP

There is a total of \$33,333,601 available for SFAP grants. See Appendix 1d for a list of projects proposed SFAP funding.

The following are set-asides and limits on SFAP.

- 100% is provided to cities, counties, and ports implementing stormwater-related projects.
- The total SFAP project funding provided to any community may not exceed \$5,000,000.

## Centennial

There is \$19,000,000 available for Centennial grants. See Appendix 1b for a list of projects proposed Centennial funding.

The following are set-asides and limits on Centennial.

- 33.33% for wastewater facility construction hardship projects.
- 33.33% for nonpoint source pollution control activities projects. (This also meets the 40% required state match for EPA grant for Section 319.)
  - Projects awarded a grant of \$250,000 or less may have any combination of the three types of match: Cash, In Kind Interlocal, and In Kind Other.
  - Projects awarded a grant of more than \$250,000 up to the maximum amount of \$500,000 must have a Cash match.
- A “to be determined” amount proposed to be directed to potential wastewater construction hardship projects listed in Table 12 described in the *Request for Comments on New Proposals* section.
- The remaining funding is available, competitively, to fund either wastewater facility construction hardship or nonpoint source projects based on ranked priority.
- Funds may be moved from one category to another if there is limited demand.

## Section 319

There is \$1,579,509 available for Section 319 grants. See Appendix 1c for a list of projects proposed Section 319 funding.

The following are set-asides and limits on Section 319.

- 100% is for nonpoint source pollution control activities projects.
  - Projects awarded a grant of \$250,000 or less may have any combination of the three types of match: Cash, In Kind Interlocal, and In Kind Other.
  - Projects awarded a grant of more than \$250,000 up to the maximum amount of \$500,000 must have a Cash match.

Table 4 shows the estimated SFY23 funding for the various programs, with detailed information on CWSRF. Table 5 summarizes the SFY23 set-asides for each program by category.

**Table 4: SFY23 Estimated Available Funding**

	<b>Cumulative Through SFY21</b>	<b>Estimated for SFY22</b>	<b>Estimated for SFY23</b>	<b>Totals</b>

Wastewater Facility Construction in Hardship Communities				\$6,333,333	

## Demand for Funds, Allocation Process, and Allocation of Funds

### Demand for Funds

Ecology received 124 applications for funding. Applicants requested a total of \$413,486,555 in funding. Table 6 provides a summary of project applications and funding requests by category.

**Table 6: SFY23 Funding Requested**

Category	Projects	Loan Requested/ Willing to Accept	Grant Requested/ Eligible
Nonpoint Source Pollution Control Activity	45	\$922,009	\$12,608,663
Onsite Sewage System	3	\$0	\$702,388
Stormwater Activity	8	\$0	\$1,666,568
Stormwater Facility	40	\$6,612,005	\$35,568,039
Wastewater Facility-Hardship	5	\$30,794,538	\$10,877,228
Wastewater Facility	17	\$308,399,345	\$0
Wastewater Facility-Refinance	6	\$5,335,772	\$0
<b>Totals</b>	<b>124</b>	<b>\$352,063,669</b>	<b>\$61,422,886</b>
<b>Total Funding Requested</b>		<b>\$413,486,555</b>	

## Allocation Process

Ecology developed the list of projects, proposed funding, and the allocation of funds, based on available funds, project priority, project type, funding source requirements, rating scores, and demand. CWSRF loans are only proposed to applicants eligible for and willing to accept loans.

Due to the integrated nature of the process, the allocation of funds does not necessarily strictly follow the project ranking. In cases where the demand for the funds did not meet the set-asides, Ecology shifted the funds to other projects in ranked priority order.

## Allocation of Funds

Ecology is proposing grant and loan funding for 117 projects for a total of \$364,731,762. The total includes \$310,818,652 from CWSRF, \$33,333,601 from SFAP, \$19,000,000 from Centennial, and \$1,579,509 from Section 319.

Detailed information on all proposals received and proposed funding can be found in Appendix 1. Tables 7 through 11 present information on the proposed funding for specific categories of significant interest.

- Table 7 summarizes the allocation of proposed funding by category, funding program, and funding type.
- Table 8 provides information on the proposed CWSRF and Centennial funding for wastewater facility construction hardship projects.
- Table 9 provides information on the proposed CWSRF and Centennial funding for wastewater and stormwater facility preconstruction projects in communities with a population less than 25,000 and a MHI less than the state MHI.
- Table 10 provides information on the proposed CWSRF funding for nonpoint projects.

- Table 11 provides information on the proposed funding for projects located in the Puget Sound watershed.

**Table 7: SFY23 Summary of Allocation of Funds**

Category	Projects	CWSRF Standard Loan	CWSRF FP Loan	SFAP Grant	Centennial Grant	Section 319 Grant
Nonpoint Source Pollution Control Activity	40	\$0	\$0	\$0	\$9,394,333	\$1,579,509

## Anticipated Centennial Grant and CWSRF FP Loan Need in the Next Biennium

Ecology anticipates an ongoing strong demand for Centennial grants and CWSRF FP loans in the next biennium. Centennial grants, in combination with CWSRF low interest loans and FP loans, often represent the only available sources of funding for small communities to affordably meet their wastewater infrastructure needs and to help communities address nonpoint source pollution, riparian restoration, and onsite sewage system repair and replacement projects.

Table 12 lists the estimated funding need, including Centennial grant and CWSRF FP loan hardship needs in the next biennium. The wastewater projects in this list are based on projects Ecology has already rated and ranked and provided funding for, or projects for which applications were submitted, rated and ranked, but not yet offered or awarded funding.

By including this Table 12 list of projects in this Draft List and Intended Use Plan, Ecology is proposing a new simplified funding process to help meet the anticipated wastewater infrastructure needs for small financially disadvantaged communities. Please see the *Request for Comments on New Proposals* section for additional information and request for comment on the proposals.

**Table 12: Estimated Centennial Grant and CWSRF FP Loan Need in the Next Biennium**

Community	Project Title	Project Category	Current Phase	Next Phase	Estimated Cost for Current Phase	Estimated Cost for Next Phase(s) During Next Biennium
Aberdeen, city of	Pump Station Improvement Project	Wastewater Facility	Design	Construction	\$735,000	\$7,350,000

## CWSRF Key Conditions

This section addresses several of the key conditions that apply to CWSRF. These conditions are listed alphabetically by topic. Other sections of this document address the remaining key conditions that apply to CWSRF.

### Accounting Standards

Recipients must maintain accurate records and accounts for the project in accordance with Generally Accepted Accounting Principles (GAAP) as issued by the Governmental Accounting Standards Board (GASB), including standards related to the reporting of infrastructure assets, or in accordance with the state standards in [Chapter 43.09.200 RCW](#)<sup>12</sup>.

### Additional Subsidization

The FFY22 combined Capitalization Grant is expected to require Ecology to award a minimum of \$19,904,939 in Additional Subsidization (AS). This figure is based on expectations that the FFY22 base Capitalization Grant will be \$45,428,602 and require a minimum of 10% for AS, and that

<sup>12</sup> <http://app.leg.wa.gov/rcw/default.aspx?cite=43.09.200>

the FFY22 BIL Capitalization Grant will be \$31,351,181 and require 49% for AS. AS may be awarded in the form of FP loans, negative interest rate loans, or grants. Ecology always awards AS in the form of FP loans.

Ecology may award FP loans to the following types of projects:

- Wastewater and stormwater facility preconstruction hardship projects where the project involves sustainable planning or design.
- Wastewater facility construction hardship projects meeting the criteria described in the *Affordability Criteria* section.
- GPR-eligible projects.

Table 13 contains a list of projects proposed AS in the form of FP loans.

**Table 13: SFY23 CWSRF Forgivable Principal Loan Funding**

Rank	Application Number	Applicant	CWSRF FP Loan	Additional Subsidization Category
2	WQC-2023-EaSoWd-00130	Eastsound Sewer & Water District	\$200,000	Sustainable Planning or Design; Affordability
3	WQC-2023-Warden-00095	Warden, City of	\$34,750	Sustainable Planning or Design; Affordability
6	WQC-2023-Rearda-00154	Reardan town of	\$146,450	Sustainable Planning or Design; Affordability
8	WQC-2023-CiOrov-00113	Oroville city of	\$177,633	Sustainable Planning or Design; Affordability
10	WQC-2023-SnPaUd-00098	Snoqualmie Pass Utility District	\$785,000	Sustainable Planning or Design; Affordability
15	WQC-2023-CiKitt-00080	Kittitas city of	\$97,000	Sustainable Planning or Design; Affordability
17	WQC-2023-FiBaSD-00031	Fisherman Bay Sewer District	\$382,000	Sustainable Planning or Design; Affordability
27	WQC-2023-CiTeko-00135	Tekoa city of	\$75,000	Sustainable Planning or Design; Affordability
35	WQC-2023-RitzCi-00104	Ritzville City of	\$162,500	Sustainable Planning or Design; Affordability
46	WQC-2023-StJohn-00100	St John town of	\$2,133,266	Sustainable Planning or Design; Affordability
50	WQC-2023-GarfTo-00079	Garfield, Town of	\$50,000	Sustainable Planning or Design; Affordability
54	WQC-2023-LyndPW-00043	Lynden city of - Public Works Department	\$44,832	Green Project Reserve
86	WQC-2023-ToAlmi-00174	Almira town of	\$30,486	Sustainable Planning or Design; Affordability
100	WQC-2023-Kennew-00139	Kennewick city of	\$6,125,000	Green Project Reserve
<b>Total</b>			<b>\$10,443,917</b>	

Ecology acknowledges that the total proposed AS in Table 13 does not meet the minimum AS that is expected to be required by the FFY22 combined Capitalization Grant. However, Ecology is proposing options for meeting the expected minimum AS requirements. Please see the *Request for Comments on New Proposals* section for additional information and a request for comment on the proposals.

## Administration Expenses

When CWSRF loans enter repayment, Ecology applies an administration charge to the declining loan balance. Account 564 is used for tracking CWSRF Administration Charge revenue and expenditure activity. The current administration charge is 0.3%. Ecology deducts the charge from the loan interest rate for loans with an interest rate greater than the charge.

Ecology may use the funds in Account 564 for CWSRF administration purposes or transfer them to the CWSRF account (Account 727) to make them available for loans for high priority water quality projects.

Ecology estimates Account 564 will have a balance of \$5,000,000 at the end of SFY22. Ecology estimates the balance will be \$10,512,000 at end of SFY23. Ecology anticipates spending \$2,225,000 from the account in SFY22 and \$3,144,000 from the account in SFY23.

The CWSRF Capitalization Grant allows several options for using additional funds for administration expenses. The annual CWSRF administrative allowance is the greater of the following:

- 4% of the cumulative Capitalization Grant minus cumulative administration expenses paid from the Capitalization Grant.
- \$400,000.
- 0.112% of the Total Net Position of the CWSRF fund based on the prior years audited financial reports.

All SFY23 CWSRF administration expenses are expected to be covered with Account 564 funds. However, Ecology reserves the maximum allowable authority of the Capitalization Grant for administration expenses.

## Affordability Criteria

For the purposes of providing AS, Ecology's "affordability" (hardship) criteria must include the following:

- Income.
- Population trends.
- Unemployment data.

Ecology uses income and population trends during the assessment of eligibility for AS. Ecology uses unemployment data as a rating tiebreaker in cases where two projects are eligible for FP loans, but there is insufficient FP loan available for both projects, and Ecology is unable to break

the tie using the first three tiebreakers as described in the *Tiebreakers* section. In such cases, Ecology will offer the FP loan to the applicant with the highest unemployment rate.

## American Iron and Steel and Buy America Build America Act

Since 2014, recipients of CWSRF funding for wastewater and stormwater facility Step 3 (Construction) and Step 4 (Design and Construction) projects have been required to meet the American Iron and Steel (AIS) requirements. However, following passage of the BIL in November 2021, such recipients will now be required to meet the Buy America Build America Act (BABAA) requirements in addition to the AIS requirements. EPA is currently developing guidelines in coordination with the Office of Management and Budget, to describe how the BABAA requirements must be met. When final guidance is available, Ecology will include provisions addressing the requirements in all funding agreements for such projects.

## Architectural and Engineering Services Procurement

Ecology requires Designated Equivalency Projects (DEPs) and Alternate DEPs to procure architectural and engineering (A/E) services according to the federal requirements found in [Chapter 11 of Title 40, USC](#)<sup>13</sup>. (See the “Equivalency Requirements, Designated Equivalency Projects, and Alternate Equivalency Projects” section for more information about DEPs.)

A/E services include, but are not limited to, program management, construction management, feasibility studies, preliminary engineering, design, engineering, surveying, mapping, and architectural related services. Ecology includes provisions addressing the requirements in all funding agreements for such projects.

## Assurances and Certifications

The 2021 Operating Agreement between Ecology and EPA for CWSRF includes the necessary assurances and certifications required by EPA and the CWA. The Operating Agreement specifies a number of conditions that must be met for CWSRF. Each Capitalization Grant typically contains additional conditions that must be met. Ecology is committed to being in compliance with all conditions in the Operating Agreement and any additional conditions found in the Capitalization Grant for any given year.

## Binding Commitments

Ecology must make binding commitments for 120% of the federal funds received within one year following receipt of payment. Table 14 shows that Ecology expects to meet the requirement. Table 15 lists all of the projects proposed funding for SFY23 through CWSRF in ranked order and the projected binding commitment date.

## By-pass for CWSRF

If an applicant declines the CWSRF funding or CWSRF funds are otherwise unobligated, Ecology will shift the funds to the next project in ranked priority order.

## Cost and Effectiveness Analysis

Ecology requires a Cost and Effectiveness Analysis certification for all CWSRF-funded projects.

- A cost-effectiveness analysis must include a comparison of the life cycle costs of alternatives taking into account:
  - The cost of constructing the project or activity.
  - The cost of operating and maintaining the project or activity over the life of the project or activity.
  - The cost of replacing the project or activity.
  - The selection, to the maximum extent practicable, of a project or activity that maximizes the potential for efficient water use, reuse, recapture, and conservation, and energy conservation.

Recipients must complete the certification in EAGL prior to loan signing.

## Clean Water State Revolving Fund Data System

Ecology must enter information on all CWSRF-funded projects into the Clean Water State Revolving Fund Data System within a month of signing an agreement or amendment. Ecology enters additional financial information related to the CWSRF fund for the prior SFY into the Clean Water State Revolving Fund Data system by August 31 each year.

## Davis-Bacon Act Wages

Recipients of CWSRF funding for wastewater and stormwater facility Step 3 and Step 4 projects must comply with the federal Davis-Bacon Act wage requirements. Ecology includes provisions that address the requirements in funding agreements for such projects.

## Deposits of the State Match

The Washington State Treasurer deposits into the CWSRF account the state’s match of the Capitalization Grant on or before the date on which each grant payment is made. Table 16 shows the SFY23 estimated schedule of payments for the FFY22 combined Capitalization Grant; the state match will be deposited on or before the listed dates. The source of the state match is the Public Works Assistance Account.

**Table 16: Estimated Schedule of Payments for FFY22 Combined Capitalization Grant**

Federal Quarter Beginning	FFY22 Title VI Grant Payments
7/1/2022	\$76,779,783
10/1/2022	
1/1/2023	
4/1/2023	
<b>Total</b>	<b>\$76,779,783</b>

## Disadvantaged Business Enterprise

Ecology requires all recipients of CWSRF funding to comply with the federal Disadvantaged Business Enterprise (DBE) standards. Ecology requires all such recipients to report on meeting the DBE standards, and Ecology reports the results to EPA annually.

## Drawing Funds from the Capitalization Grant

Ecology pays out all state matching funds prior to drawing any federal capitalization dollars in an effort to simplify the state match process.

## Equivalency Requirements, Designated Equivalency Projects, and Alternate Equivalency Projects

“Equivalency requirements” refer to specific federal laws and authorities that EPA requires Ecology to report on and/or track compliance with by CWSRF loan recipients to an amount equivalent to the amount of the combined Capitalization Grant Ecology receives from EPA.

The equivalency requirements for CWSRF apply to the following (each equivalency requirement is further described elsewhere in its own section):

- Architectural and engineering (A/E) services procurement.
- A report on compliance with specific federal environmental assurances, often referred to by EPA as cross cutters.
- Disadvantaged Business Enterprises (DBE).
- Funding Accountability and Transparency Act (FFATA).
- Prohibition on Certain Telecommunication and Video Surveillance Services or Equipment.

- Signage.
- Single Audit Act (SAA).
- Suspension and debarment.
- Uniform Relocation and Real Property Acquisition Policies Act.

Ecology applies the DBE, signage, and suspension and debarment requirements to all recipients of CWSRF funding. In addition to these, Ecology applies the A/E services procurement, the federal environmental assurances, prohibition on certain telecommunication and video surveillance services or equipment, and the Uniform Relocation and Real Property Acquisition Policies Act to Alternate DEPs. Ecology applies all the equivalency requirements to DEPs, including the FFATA and SAA requirements. Alternate DEPs are required to meet all the federal requirements, but their funding is not considered as “federal” for the purposes of complying with the SAA or Ecology’s FFATA reporting unless their funding agreement is amended to specify the funding is federal. Funding for DEPs is assigned as “CWSRF-SFY23 (Federal)” to the amount of the Capitalization Grant; the remainder is assigned as “CWSRF-SFY23 (State)”. Funding for any Alternate DEPs is assigned as “CWSRF-SFY23 (State)”.

The core criteria for determining which projects are DEPs and any identified Alternate DEPs are:

- Step 3 and Step 4 wastewater facility projects.
- Population of the applicant is 25,000 or more.

Ecology maintains the option to modify the criteria for determining DEPs and Alternate DEPs if needed to ensure the funding for DEPs is adequate to equal or exceed the amount of the Capitalization Grant. Ecology also maintains the option to remove projects from the DEPs list or Alternate DEPs list if deemed appropriate, for example, if they are unlikely to have a significant environmental impact, and removing them will not impact Ecology’s ability to meet EPA’s equivalency requirements. Table 17 shows the projects assigned as DEPs for SFY23.

**Table 17: SFY23 Designated Equivalency Projects**

Rank	Application Number	Applicant	Population of Applicant	CWSRF-SFY23 (Federal)	CWSRF-SFY23 (State)
Not rated	WQC-2023-KCoNRP-00125	King County - Natural Resources and Parks Department	2,195,502	76,779,783	\$23,349,110

## Federal Environmental Assurances (a.k.a., Cross Cutters)

All DEPs and Alternate DEPs must report compliance on a specific list of federal environmental assurances, which EPA refers to as environmental cross cutters. Compliance requirements are described in Ecology’s policy and guidance. Compliance must be met prior to signing a funding agreement for Step 3 projects and prior to beginning construction for Step 4 projects.

## Financial Capability Assessment

Ecology is required to conduct a Financial Capability Assessment (FCA) for all projects funded with CWSRF standard loans. Ecology uses information obtained from the Office of the Washington State Auditor's [Financial Intelligence Tool \(FIT\)](#)<sup>14</sup> and information obtained from applicants requesting CWSRF loan funding to conduct a FCA prior to signing a funding agreement. Ecology posts the completed FCAs in the project files in EAGL.

## Fiscal Sustainability Plan (a.k.a., Asset Management Plan)

Recipients of CWSRF funding for wastewater and stormwater facilities with a construction component must certify that they have prepared an Asset Management Plan containing:

- An inventory of critical assets that are part of the system.
- An evaluation of the condition and performance of the critical assets.
- A plan to maintain, repair, and replace the critical assets and to fund those activities.
- A process to evaluate and implement water and energy conservation efforts as part of the plan.

Recipients must complete the certification in EAGL prior to loan signing. Recipients who do not already have a plan that meets the minimum requirements must prepare one as part of the Scope of Work for the project and submit a new certification statement upon completion.

## Federal Funding Accountability and Transparency Act

Ecology applies the FFATA requirements to DEPs. Ecology requires all DEPs to complete a FFATA Data Collection Form. Ecology enters information on CWSRF agreements for DEPs into the FFATA Sub-Award Reporting System (FSRS) until reaching the amount of the Capitalization Grant.

## Green Project Reserve

The FFY22 combined Capitalization Grant is expected to require Ecology to award a minimum of \$7,677,978 for projects or portions of projects that meet one or more of EPA's GPR criteria. This figure is based on an expected FFY22 combined Capitalization Grant of \$76,779,783 and the expectation that 10% of the amount must be awarded to GPR-eligible projects.

Ecology must also make a "*timely and concerted solicitation*" of GPR projects. Ecology meets this requirement by explaining the advantages of GPR projects at trainings and in presentations throughout the year. Ecology provides up to 25% FP loans to the highest ranked priority GPR-eligible projects. Table 18 shows the list of GPR-eligible projects proposed funding in SFY23.

---

<sup>14</sup> <https://portal.sao.wa.gov/FIT/>

**Table 18: SFY23 CWSRF Funding for Green Project Reserve**

Rank	Application Number	Applicant	CWSRF Standard Loan	CWSRF FP Loan	GPR Category
54	WQC-2023-LyndPW-00043	Lynden city of - Public Works Department	\$134,498	\$44,832	1.2-1. Implementation of green streets.
100	WQC-2023-Kennew-00139	Kennewick city of	\$22,975,000	\$6,125,000	4.4-1b. Technology or approach that is not widely used in the State, but does perform as well or better than conventional technology/approaches at lower cost.
<b>Total</b>			<b>\$23,109,498</b>	<b>\$6,169,832</b>	

## Loan Terms and Project Life

Loan terms cannot be longer than 30 years or the life of the project being funded, whichever is shorter. Ecology prepares or obtains documentation regarding the projected project life and posts it in project files in EAGL for all CWSRF-funded projects.

## Prohibition on Certain Telecommunication and Video Surveillance Services or Equipment

Effective August 13, 2021, recipients of federal funds must comply with regulations at [2 CFR 200.216](#)<sup>15</sup>, *Prohibition on certain telecommunication and video surveillance services or equipment*, implementing section 889 of [Public Law 115-232](#)<sup>16</sup>. The regulation prohibits the use of federal funds to procure (enter into, extend, or renew contracts) or obtain equipment, systems, or services that use “covered telecommunications equipment or services” identified in the regulation as a substantial or essential component of any system, or as critical technology as part of any system. Covered telecommunications equipment or services include:

- Telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities).
- For the purpose of public safety, security of government facilities, physical security surveillance of critical infrastructure, and other national security purposes, video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities).
- Telecommunications or video surveillance services provided by such entities or using such equipment.
- Telecommunications or video surveillance equipment or services produced or provided by an entity that the Secretary of Defense, in consultation with the Director of the National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be

<sup>15</sup> [https://www.ecfr.gov/cgi-bin/text-idx?SID=2312b40f5181614169488e0699a25e61&mc=true&node=se2.1.200\\_1216&rgn=div8](https://www.ecfr.gov/cgi-bin/text-idx?SID=2312b40f5181614169488e0699a25e61&mc=true&node=se2.1.200_1216&rgn=div8)

<sup>16</sup> <https://www.congress.gov/115/plaws/publ232/PLAW-115publ232.pdf>

an entity owned or controlled by, or otherwise connected to, the government of a covered foreign country.

For existing funding agreements for DEPs, Ecology will require the recipient to include a statement certifying compliance with the prohibition with each payment request submitted on or after August 13, 2021. For future funding agreements for DEPs, Ecology will include the prohibition in the funding agreement.

## Signage

Ecology requires all funding recipients to inform the public about the project and about Ecology and EPA participation for the following:

- Any site-specific project that is accessible to the public must acknowledge state and federal participation by one of the following means:
  - Standard signage (appropriately sized and weather resistant).
  - Posters and wall signage in a public building or location.
  - Newspaper or periodical advertisement for project construction, groundbreaking ceremony, or operation of the new or improved facility.
  - Online signage placed on community website or social media outlet.
  - Press release.
- All publications must include acknowledgment of state and federal participation.

## Single Audit Act

All recipients of federal funding of \$750,000 or more must comply with the federal SAA. Compliance typically involves an annual audit from an independent auditor that examines the recipient's financial management and compliance with rules and conditions associated with receiving the funds.

Ecology's Fiscal Office sends annual notices to all DEPs regarding their obligations under the SAA. The notices specify the amount of funds disbursed during the prior year that are considered "federal" for the purposes of complying with the SAA.

## State Environmental Review Process

Recipients of CWSRF funding for wastewater and stormwater facility projects must comply with the State Environmental Review Process (SERP) requirements described in Ecology policy and guidance. Ecology posts information on SERP determinations on our [Environmental Review Webpage](#)<sup>17</sup>.

---

<sup>17</sup> <https://www.ecology.wa.gov/About-us/How-we-operate/Grants-loans/Find-a-grant-or-loan/Water-Quality-grants-and-loans/Environmental-review>

## Suspension and Debarment

Ecology requires all recipients of CWSRF funding to comply with the federal suspension and debarment requirements. Ecology confirms compliance before signing funding agreements.

## Technical Assistance

The FFY22 combined Capitalization Grant is expected to allow states to use up to 2% of the grant to provide technical assistance and “bank” any unused portion. Ecology’s CWSRF Administrative Charge Account 564 is used for administration of the CWSRF, including providing technical assistance. Thus, Ecology chooses to “bank” the 2% allowance for potential use in future funding cycles.

## Timely and Expedient Use of Funds

In accordance with EPA Memorandum #SRF 99-05, Ecology must execute binding commitments at least equal to the amount of all CWSRF funds available within one year of fund availability. Table 19 shows the projected cumulative funds received, cumulative principal and interest collected, and the cumulative administration expenditures through SFY22 in addition to the projected cumulative loan obligations through SFY23. The table shows that Ecology projects it will commit more than 100% of the cumulative funds available through SFY23.

**Table 19: Timely and Expedient Use of Federal Funds**

	<b>Amounts</b>
Federal Funds Received (Cumulative Projected Through SFY22)	\$908,291,143
State Match (Cumulative Projected Through SFY22)	\$168,028,984
Principal and Interest Collected (Cumulative Projected Through SFY22)	\$1,293,093,770
State Treasurer's Office Interest (Cumulative Projected Through SFY22/Cash Basis)	\$52,174,105
Administration From Capitalization Grants (Cumulative Projected Through SFY22)	(\$29,661,714)
Total Funds (Cumulative Projected Through SFY22)	\$2,391,926,288
Loan Obligations (Cumulative Projected Through SFY23)	\$2,773,852,535
<b>Loan Obligations to Total Funds Available</b>	<b>116.0%</b>

## Uniform Relocation and Real Property Acquisition Policies Act

The Uniform Relocation and Real Property Acquisition Policies Act is a federal law that applies to property acquisition. Ecology requires all DEPs and Alternate DEPs to comply with the act if the project includes property acquisition.

# Public Outreach and Draft List Comment Period

## Public Outreach

Ecology conducted an extensive outreach campaign for the SFY23 Funding Cycle, including holding three applicant workshops where staff presented information on the funding programs and the application process. Ecology held the workshops:

- August 24, 2021, via WebEx with a focus on stormwater projects.
- August 25, 2021, via WebEx with a focus on nonpoint and onsite sewage system projects.
- August 26, 2021, via WebEx with a focus on wastewater projects.

Ecology also conducted outreach at conferences, meetings, technical workgroups, and other information-sharing sessions whenever possible.

## Public Comment Period

There is a 30-day public comment period for the Draft List. Comments will be accepted through February 21, 2022. Comments must be submitted via [eComments](#)<sup>18</sup>. If you have questions but don't necessarily want to submit comments, please contact Daniel Thompson at [daniel.thompson@ecy.wa.gov](mailto:daniel.thompson@ecy.wa.gov) or 360-407-6510 or attend the public meeting Ecology is holding at 1:00pm on Thursday, February 3, via [Zoom](#)<sup>19</sup>. Ecology will respond to all comments received during the comment period when we publish the Final List. Because this is the second year of the 2021-2023 Biennium, we expect to publish the Final List in May 2022. All commenters will be notified by email when the Final List is published.

## Request for Comments on New Proposals

In addition to requesting comments on the proposed funding in the Draft List, Ecology is requesting comments on the proposals described in the two next sections.

### **Proposed Planning and Other Predesign Work Funding Opportunity for Small Communities**

In order to help small communities prepare for design and/or construction projects (design and/or implementation for nonpoint projects) and to simplify the application and funding processes, Ecology is proposing to create a new planning and other predesign work funding opportunity for communities with a population of 25,000 or less. The funding opportunity would be noncompetitive and open year-round, with quarterly eligibility checks by Ecology staff followed by funding offers and development of funding agreements. While the funding would be noncompetitive, in order to be eligible applications would have to meet review criteria such as water quality improvement and readiness to proceed.

---

<sup>18</sup> <https://wq.ecology.commentinput.com/?id=93GbP>

<sup>19</sup> <https://waecy-wa-gov.zoom.us/j/85726480164?pwd=OVJ0T3V1d3VyeitLY0djbEZ4VWtYZz09>

Funding for the program would be via an annual CWSRF set-aside of \$5,000,000 in standard loan and \$5,000,000 in forgivable loan.

### **Proposed Guaranteed Funding Through Construction for Potential Wastewater Hardship Projects in Table 12**

In order to help existing recipients in the small communities cited in Table 12 plan for their wastewater construction projects, and to simplify the application and funding processes, Ecology is proposing to guarantee funding through construction provided the recipients meet the review and approval requirements and progress timelines defined in their existing funding agreements. Existing recipients would not need to apply for design or construction funding through the WQC. Funding for subsequent phases would be amended into existing funding agreements. Ecology would assess construction hardship for the projects by obtaining information from the recipients, rather than requiring completion of the Financial Hardship form in the WQC application.

Loan, grant, and FP loan funding for such projects would be listed and described in the funding lists for subsequent WQC funding cycles.

Ecology is seeking comment on these 2 proposals and will be discussing them with the Financial Advisory Council in February.

## **Appendix 1: Combined List of all Projects and Proposed Funding**

Appendix 1 contains a list of all proposals received and proposed funding in ranked order and includes a variety of information, including summaries, for each proposal. Appendices 1a through 1d provide a breakout of proposed funding for each of the four funding programs. Appendix 1e provides a summary list of all applications received and proposed funding as a quick reference; it is sorted alphabetically by applicant name.

**State Fiscal Year 2023 Draft Water Quality Funding Offer List and Intended Use Plan  
Draft Combined Summary List**

Rank	Total Points	County	Grant/ Subsidy Requested	Loan Funds Requested	Centennial Grant Funding Proposed	Section 319 Grant Funding Proposed	Revolving Fund Standard Loan Proposed	Revolving Fund Forgivable Principal Loan Proposed	SFAP Grant Funding Proposed	Footnotes

<b>Applicant Name:</b>		College Place city of - Engineering Department					<b>Application Number:</b>		WQC-2023-CoPIED-00138		
<b>Project Title:</b>		College Place WWTP Construction			<b>Project Category:</b>		Wastewater Facility-Hardship				
1	894.5	Walla Walla	\$5,000,000	\$21,090,000	\$5,000,000	\$0	\$21,090,000	\$0	\$0	6, 7, 8, 9, 10	

This project improves water quality in Garrison Creek and the Walla Walla River through the construction of wastewater treatment facility upgrades at the RECIPIENT's wastewater treatment plant located in Walla Walla County within the city limits. The project replaces aged infrastructure and increases storage capacity at the treatment facility to prevent discharge to Garrison Creek during the critical period as required per the TMDL Action Plan and Compliance Schedule.

<b>Applicant Name:</b>		Eastsound Sewer & Water District					<b>Application Number:</b>		WQC-2023-EaSoWd-00130		
<b>Project Title:</b>		Eastsound Sewer and Water District Upgrades Phase II			<b>Project Category:</b>		Wastewater Facility-Hardship		Step 4: Design & Construction		
2	887.5	San Juan	\$1,771,725	\$3,669,041	\$1,771,725	\$0	\$3,469,041	\$200,000	\$0	6, 7, 8, 9, 10, 12	

Eastsound Sewer and Water District is upgrading its existing WWTP to address aging equipment, future flows and loading capacity, and discharge permit requirements. Phase I of the upgrades includes a new 3rd treatment train and other facility upgrades. This application is for Phase II of the project in which treatment trains I and II will be upgraded to a conventional activated sludge process to match the biological nutrient removal capabilities of the new 3rd train.

<b>Applicant Name:</b>		Warden, City of					<b>Application Number:</b>		WQC-2023-Warden-00095		
<b>Project Title:</b>		Lift Station 1 Improvements			<b>Project Category:</b>		Wastewater Facility-Hardship		Step 4: Design & Construction		
3	867	Grant	\$288,280	\$367,720	\$288,280	\$0	\$332,970	\$34,750	\$0	6, 7, 8, 9, 10, 12	

Upgrade Lift Station No. 1 with new pumps, piping, electrical materials and telemetry, a generator, and other site improvements.

<b>Applicant Name:</b>		King County - Water and Land Resources Division					<b>Application Number:</b>		WQC-2023-KCWLRD-00026		
<b>Project Title:</b>		Horsehead Bend Natural Area Revegetation			<b>Project Category:</b>		Nonpoint Source Activity				
4	909	King	\$135,300	\$0	\$135,300	\$0	\$0	\$0	\$0	22	

King County will revegetate 8.5 acres of riparian shoreline along the Green/Duwamish River at Horsehead Bend Natural Area to address high summer water temperatures and to improve fish and wildlife habitat. This project site was identified as having a critical need for tree shade in the Muckleshoot Indian Tribe's riparian sun/shade maps. Planting this site will help implement recommendations from Ecology's 2011 Green River Temperature Total Maximum Daily Load (TMDL) report.

---	-----	---------	-------------	-------------	-------------	-----	-------------	-----------	-----	---------------------------

This project will address infiltration and inflow (I&I) related issues discovered during I&I investigations completed in 2018 and 2020-2021. Scope includes 8,200 linear feet of cured in place pipe (CIPP), 3,700 feet of replaced sewer main, reconnection of sewer services, rehabilitation or replacement of manholes and reconnection of sewer services. Additional work includes installing SCADA control system and emergency backup power connection at the Town's lift station.

---	-------	---------	-----	-------------	-----	-----	-------------	-----	-----	---------------------------

The Town of Waterville's wastewater is collected, conveyed, and treated using gravity/pressure sewer, treatment lagoons, an irrigation pump station, and an irrigation spray field system. A wastewater treatment engineering report was completed and approved in 2017. This funding request is to combine previously acquired Ecology design funding and new requested construction funding for Waterville WWTP recommended alternative in the Town's approved engineering report.

<b>Applicant Name:</b>	Oroville city of							<b>Application Number:</b>	WQC-2023-CiOrov-00113

---	-----	----------	-----	-----------	-----	-----	-----------	-----------	-----	-------------

The City of Oroville will prepare a General Sewer Plan (GSP) conforming to the requirements of WAC 173-240-050. The GSP will include a comprehensive investigation of the City's wastewater conveyance system. The GSP will update system mapping, modeling, video inspection, address inadequate sewers, and capacity issues. The plan will provide capital planning for the future 20-year planning period.

**State Fiscal Year 2023 Draft Water Quality Funding Offer List and Intended Use Plan  
Draft Combined Summary List**

---	-----	----------	-----------	-----	-----	-----------	-----	-----	-----	----

This project will reduce water temperature and suspended sediment in Sorenson Creek and the Upper Yakima River through riparian restoration and project stewardship on 3400 stream feet at three sites. Funds will also reduce turbidity in Sorenson Creek through development of a future water quality improvement project. Outreach will increase awareness while increasing volunteer stewardship at 5 large-scale riparian restoration sites on 7,900 stream feet (3 sites above, and 2 additional sites).

<b>Applicant Name:</b>	Snoqualmie Pass Utility District						<b>Application Number:</b>	WQC-2023-SnPaUd-00098

----	-------	---------	-----------	-----	-----	-----------	-----	-----	-----	----

The Spokane Riverkeeper has begun to address water quality concerns along Hangman Creek and its tributaries, such as Rock Creek, in recent years. The Spokane Riverkeeper will continue to improve nonpoint pollution issues throughout the watershed by installing 50 acres of riparian plantings, establishing three water quality locations, 10 water temperature loggers, and providing education and outreach programs to maximize restoration efforts along this watershed, leveraging NRCS funding.

**State Fiscal Year 2023 Draft Water Quality Funding Offer List and Intended Use Plan

<b>Applicant Name:</b>		<b>Palouse Rock Lake Conservation District</b>					<b>Application Number:</b>		<b>WQC-2023-PaRoCD-00018</b>		
<b>Project Title:</b>		<b>Improving Water Quality on Rebel Flat Creek</b>			<b>Project Category:</b>		<b>Nonpoint Source Activity</b>				
13	869	Whitman	\$416,601	\$0	\$416,601	\$0	\$0	\$0	\$0	22	

Concerns regarding water quality and soil erosion on the Palouse create a high demand for best management practices aimed to reduce nonpoint source pollutants. This project will improve water quality and the culture of conservation by implementing 9,990 acres of conservation tillage, restoring and maintaining two miles of riparian habitat, excluding livestock from stream access, creating cover crop demonstrations, and providing various education and outreach opportunities.

<b>Applicant Name:</b>		<b>Chelan County - Natural Resource Department</b>					<b>Application Number:</b>		<b>WQC-2023-ChCoNR-00039</b>		
<b>Project Title:</b>		<b>Leavenworth Watersheds - Phased Water Quality Improvemen</b>			<b>Project Category:</b>		<b>Nonpoint Source Activity</b>				
14	869	Chelan	\$101,742	\$0	\$101,742	\$0	\$0	\$0	\$0	22	

The Leavenworth Watersheds Phased Water Quality Improvement Project will allow for the continuation of a strategy to address a total of 27 temperature, DO, instream flow, pH and bacteria listings in Chumstick and Icicle Creeks. Building on four prior Water Quality grants (3 in the Chumstick and 1 in the Icicle), this project includes riparian planting on 1726 stream ft and 2.8 acres, monitoring and maintenance of new and past projects, and planning of the next phase of water quality restoration.

<b>Applicant Name:</b>		<b>Kittitas city of</b>					<b>Application Number:</b>		<b>WQC-2023-CiKitt-00080</b>		
<b>Project Title:</b>		<b>General Sewer Plan</b>			<b>Project Category:</b>		<b>Wastewater Facility</b>				
15	868.5	Kittitas	\$0	\$194,000	\$0	\$0	\$97,000	\$97,000	\$0	6, 8, 9, 10	

The proposed General Sewer Plan (Plan) will evaluate the City of Kittitas wastewater collection system's ability to meet the City's current and future needs, by identifying and prioritizing deficiencies, and planning for upgrades necessary to rectify the deficiencies. The Plan will be a useful tool in addressing capacity and operational issues and is a necessary step in obtaining funding and regulatory approval for improvements.

<b>Applicant Name:</b>		<b>Bellingham city of - Public Works Department</b>					<b>Application Number:</b>		<b>WQC-2023-BellPW-00074</b>		
<b>Project Title:</b>		<b>Padden Creek 24th-30th Streets Restoration Phase 2</b>			<b>Project Category:</b>		<b>Nonpoint Source Activity</b>				
16	867.5	Whatcom	\$500,000	\$0	\$500,000	\$0	\$0	\$0	\$0	22	

This project will improve the water quality and aquatic function of Padden Creek, a lowland urban stream in the City of Bellingham. This project will restore a total of approximately 2 acres of stream and riparian habitat through floodplain enhancement, riparian buffer enhancement, wetland restoration, large woody debris additions, and the creation of backwaters, side channels, pools, and riffles. This effort will reduce bacteria and temperature and increase dissolved oxygen in Padden Creek.

<b>Applicant Name:</b>		Fisherman Bay Sewer District					<b>Application Number:</b>		WQC-2023-FiBaSD-00031		
<b>Project Title:</b>		Design of Fisherman Bay Sewer District WWTP Upgrade and I			<b>Project Category:</b>		Wastewater Facility				
17	866	San Juan	\$0	\$764,000	\$0	\$0	\$382,000	\$382,000	\$0	6, 8, 9, 10, 14	

The Fisherman Bay Sewer District is upgrading its existing wastewater treatment facility and outfall to address aging equipment, future flow and loading capacity, standards for redundancy and reliability, and discharge permit requirements. The current lagoon plant has not had a major upgrade since 1995 and is reaching its capacity and end of life. The District has a Median Household Income less than 30,000 and the base sewer rate is 3.6% of the MHI so cost and efficiency are top priorities.

<b>Applicant Name:</b>		Sound Salmon Solutions					<b>Application Number:</b>		WQC-2023-SoSaSo-00033		
<b>Project Title:</b>		Segelsen Stillaguamish Riparian Restoration Phase II			<b>Project Category:</b>		Nonpoint Source Activity				
18	866	Snohomish	\$136,181	\$0	\$0	\$136,181	\$0	\$0	\$0	22	

Sound Salmon Solutions (SSS) will restore 9.52 acres of riparian habitat on 1,600 feet of the North Fork Stillaguamish River by controlling invasive vegetation and planting native trees and shrubs on a 300-foot wide habitat buffer to improve water quality.

<b>Applicant Name:</b>		Aberdeen city of - Public Works					<b>Application Number:</b>		WQC-2023-AberPW-00072		
<b>Project Title:</b>		City of Aberdeen - WWTP Influent Screening and Conveyance			<b>Project Category:</b>		Wastewater Facility

This project reduces risks to water quality in the Chehalis River Estuary and Grays Harbor through the construction of wastewater treatment facilities at the 10 MGD Wastewater Treatment Plant (WWTP) in Aberdeen. Improvements will be made to the influent pump station, headworks and sampling facilities along with flood proofing and code compliance upgrades at these facilities, along with installation of new perforated plate screens, washer/compactors, and a plant drain pump station.

<b>Applicant Name:</b>		Snohomish Conservation District					<b>Application Number:</b>		WQC-2023-SnohCD-00010		
<b>Project Title:</b>		South Fork Stillaguamish Floodplain Restoration			<b>Project Category:</b>		Nonpoint Source Activity				
20	858.5	Snohomish	\$167,206	\$0	\$167,206	\$0	\$0	\$0	\$0	22	

Snohomish Conservation District (District) proposes to address documented impaired water temperatures and dissolved oxygen levels on the South Fork Stillaguamish River that threaten ESA-listed Chinook salmon, other salmonids, and aquatic life through invasive species control and riparian reforestation. The District will actively control invasives and plant 7000 native trees and shrubs on 8.1 acres of floodplain forest and associated wetlands.

<b>Project Title:</b>		Re-Tree Woods Creek Phase II			<b>Project Category:</b>		Nonpoint Source Activity				
21	858	Snohomish	\$152,245	\$0	\$152,245	\$0	\$0	\$0	\$0	22	

The Snohomish Conservation District (SCD) will build off its original Re-tree Woods Creek campaign from 2013 by working with private landowners living along high priority reaches of Woods Creek to build a sense of stewardship for the watershed through a large-scale re-forestation initiative. Six new acres of streamside forest will be planted to address high summer water temperatures for juvenile salmon. Additionally, SCD will continue to maintain plantings installed from a previous grant round.

<b>Applicant Name:</b>		Walla Walla County Conservation District					<b>Application Number:</b>		WQC-2023-WWCoCD-00007		
<b>Project Title:</b>		Canopy Cover Improvements on the Touchet River, Phase 2			<b>Project Category:</b>		Nonpoint Source Activity				
22	855.5	Walla Walla	\$234,648	\$0	\$234,648	\$0	\$0	\$0	\$0	22	

This proposed project will plant primary successional riparian species along a 2.5 mile stretch of the Touchet River to improve canopy cover and address the water temperature TMDL. The presence and in some areas near monoculture of false indigo (*Amorpha fruticosa*) has reduced diversity along the banks of the Touchet River and limited establishment of taller shade trees. For this project, false indigo will be controlled through chemical application prior to planting native vegetation.

<b>Applicant Name:</b>		Snohomish County Conservation Natural Resources Department					<b>Application Number:</b>		WQC-2023-SnCoCN-00093		
<b>Project Title:</b>		Jim Creek Restoration			<b>Project Category:</b>		Nonpoint Source Activity				
23	854.5	Snohomish	\$500,000	\$0	\$500,000	\$0	\$0	\$0	\$0	22	

The Jim Creek Restoration project will be implemented in a stream reach supported by cold tributary discharge described in previous Ecology-funded assessments. The project will construct wood structures, create shade, complex edge habitat, and plant native riparian trees & shrubs to improve rearing and refuge habitat, for ESA-listed salmonids. This project integrates Watershed Characterization and field-based factors (flow/temperature) affecting a 303D-listed stream reach immediately downstream.

<b>Applicant Name:</b>		Bremerton city of - Public Works and Utilities					<b>Application Number:</b>		WQC-2023-BremPW-00148		
<b>Project Title:</b>		Tracyton Beach Road Sewer Improvements			<b>Project Category:</b>		Wastewater Facility		Step 4: Design & Construction		
24	854	Kitsap	\$0	\$5,008,000	\$0	\$0	\$5,008,000	\$0	\$0	6, 7, 8, 9, 10, 12	

This project will remedy an ongoing challenging maintenance and potential environmental concern for the sewer along Tracyton Beach Road in East Bremerton. This 4000 foot long 8-inch diameter sewer requires weekly maintenance by City operations staff due to the low flow velocities through the sewer. The proposed design will remedy this by increasing the velocity through main using pumps and improved sewer collection.

**State Fiscal Year 2023 Draft Water Quality Funding Offer List and Intended Use Plan  
Draft Combined Summary List**

<b>Applicant Name:</b>		Vancouver city of						<b>Application Number:</b>		WQC-2023-Vancou-00186	
<b>Project Title:</b>		Burnt Bridge Creek Critical Lands Acquisition			<b>Project Category:</b>		Nonpoint Source Activity				
25	853.5	Clark	\$375,000	\$0	\$375,000	\$0	\$0	\$0	\$0	22	

Purchasing property in this reach of Burnt Bridge Creek will allow the City to preserve and protect an open space, restore riparian habitat, and increase tree canopy to improve air and water quality, support a healthier aquatic community, and lower risk to human health. Preserving green spaces throughout Vancouver is particularly important in areas with fewer outdoor amenities, and higher percentages of low-income or vulnerable individuals, to improve health equity in our community.

<b>Applicant Name:</b>		Pend Oreille Conservation District						<b>Application Number:</b>		WQC-2023-PeOrCD-00156	
<b>Project Title:</b>		Sandy Shores/Sunnyside Bank Stabilization on the Pend Oreille			<b>Project Category:</b>		Nonpoint Source Activity				
26	853	Pend Oreille	\$328,226	\$0	\$328,226	\$0	\$0	\$0	\$0	22	

The project will stabilize up to 1000 feet of streambank along the Pend Oreille River using engineered site plans to re-slope the bank, install large woody debris, and plant vegetation. This project will directly address the TMDL for temperature on the river, improve fish habitat and overall water quality. Additionally, it will fund a permanent, locally stocked, native riparian nursery and will help to implement a monitoring program for previous and current bank stabilization projects.

<b>Applicant Name:</b>		Tekoa city of						<b>Application Number:</b>		WQC-2023-CiTeko-00135	
<b>Project Title:</b>		Wastewater Treatment Plant Facilities Plan			<b>Project Category:</b>		Wastewater Facility				
27	853	Whitman	\$0	\$150,000	\$0	\$0	\$75,000	\$75,000	\$0	6, 8, 9, 10	

This project will be the completion of a facilities plan for upgrades at the City of Tekoa's Wastewater Plant. The existing plant requires upgrades to meet new discharge limits put into place on Hangman Creek, the receiving water body for the treated effluent discharged from the wastewater plant.

<b>Applicant Name:</b>		Palouse Rock Lake Conservation District						<b>Application Number:</b>		WQC-2023-PaRoCD-00011	
<b>Project Title:</b>		One Pass at a Time- Conservation of Pine Creek Watershed			<b>Project Category:</b>		Nonpoint Source Activity				
28	850	Whitman	\$368,367	\$0	\$368,367	\$0	\$0	\$0	\$0	22	

Pine Creek fails state water quality standards by multiple parameters. This proposal will address these failures and improve water quality by 1) Implementing 6750 acres of conservation tillage practices in the Pine Creek HUC-10 watershed through cost-sharing to reduce erosion and nonpoint source pollution 2) Implementing 1 mile of riparian enhancement in the Pine Creek HUC-10 3) demonstrate cover cropping as a viable chemical fallow alternative and 4) conduct local outreach and education.

<b>Applicant Name:</b>		Okanogan Highlands Alliance					<b>Application Number:</b>		WQC-2023-OkHiAl-00185		
<b>Project Title:</b>		Triple Creek Water Quality Restoration Project, Phase 3			<b>Project Category:</b>		Nonpoint Source Activity				
29	848.5	Okanogan	\$136,388	\$0	\$0	\$136,388	\$0	\$0	\$0	22	

The Triple Creek Project uses long-range planning and adaptive management to maximize the interplay of geomorphic changes and biological changes, improving water quality and restoring a functional wetland habitat. Aggrading the stream and increasing its sinuosity will recharge the floodplain, enabling positive biofeedback and ecosystem services. Streambank plantings will shade and cool surface water. This project galvanizes lessons learned with outreach activities to the community.

<b>Applicant Name:</b>		Sauk-Suiattle Indian Tribe					<b>Application Number:</b>		WQC-2023-SSIT-00152		
<b>Project Title:</b>		Sauk-Suiattle Indian Tribe Spearhead Lake cleanup project			<b>Project Category:</b>		Onsite Sewage System				
30	844	Skagit	\$22,388	\$0	\$22,388	\$0	\$0	\$0	\$0	22, 34	

The Sauk-Suiattle Indian Tribe is requesting funding for a composting toilet as part of its overall Spearhead Lake Cleanup Plan. Sauk-Suiattle owns this 22-acre lake, and allows public access for fishing and camping, but its remote location and lack of facilities has led to abuses and illegal activities, including contamination from human feces and toilet paper, trash, tree-cutting, and shooting. The composting toilet will help with the fecal contamination.

<b>Applicant Name:</b>		Lower Columbia Fish Enhancement Group					<b>Application Number:</b>		WQC-2023-LoCFEG-00134		
<b>Project Title:</b>		SF TOUTLE LOWER BROWNELL RIPARIAN RESTORATI			<b>Project Category:</b>		Nonpoint Source Activity				
31	843.5	Cowlitz	\$67,848	\$0	\$0	\$67,848	\$0	\$0	\$0	22	

This project will improve water temperature conditions for cold water species in a category 5 listed (listing 72849) reach of the SF Toutle River. The Lower Columbia Fish Enhancement Group is working on a watershed-scale restoration effort on the SFT with projects spanning from the mouth to the base of Mount Saint Helens. This proposal increases the effectiveness of the riparian component of a funded SRFB project (# 21-1061) that will complete instream, floodplain, and riparian work.

<b>Applicant Name:</b>		Skagit County - Public Works Department					<b>Application Number:</b>		WQC-2023-SkCoPW-00001		
<b>Project Title:</b>		Barrel Springs Restoration Project			<b>Project Category:</b>		Nonpoint Source Activity				
32	843	Skagit	\$460,852	\$0	\$460,852	\$0	\$0	\$0	\$0	22	

A privately owned, failing, 13-ft tall dam on Barrel Springs that impacts water quality by impeding and heating critical summer streamflow to Dry Creek and temperature-listed Friday Creek will be removed. Three undersized culverts, two which are perched and failing, will be removed from Barrel Springs and Dry Creek. This, combined with channel restoration, will address an active water quality impairment and eliminate ongoing erosion, while restoring habitat for ESA-listed species.

This project will improve water quality and work towards addressing temperature, nutrient and bacteria loading in Cowlitz Creek, which is listed on the Washington State's 303(d) list for these impairments. The project removes 870 feet of an old railroad berm to allow the establishment of a native riparian buffer to increase shading, buffer the stream, and increase floodplain function and connectivity. The project will also install pools to improve fish habitat and add thermal stratification.

<b>Applicant Name:</b>	<b>Okanogan Conservation District</b>						<b>Application Number:</b>	<b>WQC-2023-OkanCD-00044</b>

----	-------	----------	-----------	-----	-----------	-----	-----	-----	-----	----

Okanogan CD and partners will implement water quality improvement projects, conduct outreach, and plan additional BMPs on Antoine Creek, in Okanogan County, Washington. Two miles of Antoine Creek will be protected from livestock with exclusion fencing. Five acres of riparian planting will be installed on barren streambanks. 13 acres of weed control and reseeding will protect slopes from soil erosion into the creek. Antoine Creek is important habitat for Upper Columbia steelhead.

<b>Applicant Name:</b>		<b>King County - Water and Land Resources Division</b>					<b>Application Number:</b>		<b>WQC-2023-KCWLRD-00090</b>		
<b>Project Title:</b>		<b>Flaming Geyser State Park Riparian Revegetation</b>			<b>Project Category:</b>		<b>Nonpoint Source Activity</b>				
41	827.5	King	\$450,000	\$0	\$450,000	\$0	\$0	\$0	\$0	22	

A 2016 water quality study showed that the Green River increases temperature by 2-3 degrees Celsius between RM 44 and 40.5 in the summer; it flows through Flaming Geyser State Park between RM 44 and 41. The riparian zone through the park was identified by the Muckleshoot Indian Tribe as having a critical need of shade; most of the park's riparian zones lack trees. King County proposes to revegetate 14 ac. along 0.8 mi. of Green R. shoreline in the State Park (phase 2 of a multi-year effort).

<b>Applicant Name:</b>		<b>Kooskooskie Commons</b>					<b>Application Number:</b>		<b>WQC-2023-KooCom-00055</b>		
<b>Project Title:</b>		<b>Water Quality Improvements on Yellowhawk Creek</b>			<b>Project Category:</b>		<b>Nonpoint Source Activity</b>				
42	827.5	Walla Walla	\$238,415	\$0	\$0	\$238,415	\$0	\$0	\$0	22	

The Applicant will implement a riparian restoration program along Yellowhawk Creek and the Walla Walla River to improve temperature and fecal coliform impairments due to legacy agricultural practices. The organization will install riparian buffers, monitor water quality, perform public outreach, and explore land trust easements for long-term protection of riparian areas and water trust agreements to protect flows and cold-water inputs to the stream.

<b>Applicant Name:</b>		<b>North Yakima Conservation District</b>					<b>Application Number:</b>		<b>WQC-2023-NoYaCD-00071</b>		
<b>Project Title:</b>		<b>Trout Meadows Long Range Implementation Project</b>			<b>Project Category:</b>		<b>Nonpoint Source Activity</b>				
43	827.5	Yakima	\$229,510	\$0	\$229,510	\$0	\$0	\$0	\$0	22	

The Trout Meadows Long Range Implementation Project addresses a 303(d) stream temperature listing in the Naches River by implementing riparian vegetation recovery actions. This project will establish 5 acres of floodplain with riparian vegetation and expand the establishment of 75-foot buffers along 9,500 feet of the Naches River mainstem and side channels. This project restores additional floodplain acreage from Task 2 Trout Meadows Riparian Establishment in WQC-2020-NoYaCD-00003.

<b>Applicant Name:</b>		<b>Asotin County - Public Works Department</b>					<b>Application Number:</b>		<b>WQC-2023-AsCoPW-00023</b>		
<b>Project Title:</b>		<b>The Ridges Urban Stormwater Retrofit Construction</b>			<b>Project Category:</b>		<b>Stormwater Facility</b>				
44	825	Asotin	\$727,500	\$0	\$0	\$0	\$0	\$0	\$824,500	6, 15, 22, 29	

This project will improve water quality in the Snake River through the construction of water quality facilities at the Ridges subdivision in the urbanized area of Asotin County. The RECIPIENT will construct a project to provide treatment for total suspended solids (TSS), and oil (total petroleum hydrocarbons), dissolved copper, and dissolved zinc and will also reduce flows to Snake River by increasing stormwater infiltration.

Execution of improvements included in the Wastewater Treatment Facilities Plan (Plan). Upgrades will start with Infiltration and Inflow (I&I) reduction measures taken on separately by the town and immediately/concurrently by design of a new package Wastewater Treatment Plant (WWTP) at the site of the existing WWTP.

<b>Applicant Name:</b>		Spokane city of					<b>Application Number:</b>		WQC-2023-Spokan-00120		
<b>Project Title:</b>		Bioretention Soil Media Study: Development of Non-Vegetated			<b>Project Category:</b>		Stormwater Facility				
47	813.5	Okanogan	\$300,000	\$0	\$0	\$0	\$0	\$0	\$300,000	6, 15, 21, 22, 27, 29	

This study will evaluate the treatment performance of two non-vegetated bioretention soil media (BSM) BMPs in EWA through the TAPE process. The media tested will include the high performance BSM and the 60 sand: 40 compost (60:40) BSM. A rock mulch will be used to protect the surface from erosion. If the bioretention BMPs meet the TAPE performance criteria without vegetation, the results will be used to recommend that these BMPs be approved for general use statewide without vegetation.

<b>Applicant Name:</b>		Kirkland city of - Public Works					<b>Application Number:</b>		WQC-2023-KirkPW-00015		
<b>Project Title:</b>		Juanita/High Woodlands Stormwater Retrofit Planning			<b>Project Category:</b>		Stormwater Facility				
48	812	King	\$335,096	\$0	\$0	\$0	\$0	\$0	\$335,096	6, 15, 21, 22, 27	

Conduct planning for stormwater retrofit facilities in the High Woodlands portion of the Juanita Creek Watershed. Site identification, field investigation, and public engagement will result in Design Reports for the top 3 identified sites/facilities. Work will coordinate with the WSDOT culvert replacement at I-405/NE 145th Street that will open the channel in this area for fish passage. Target pollutants include Total Suspended Solids, dissolved zinc and dissolved copper.

The Wenatchee Watershed Habitat Restoration and Water Quality Project will improve habitat and water quality by implementing habitat restoration projects, watershed education efforts and landowner assistance. This project will restore 5.37 acres of riparian buffer, monitor and maintain 8 previously planted projects, plan 4 new riparian projects, provide water quality technical assistance to 30 landowners, certify 3 new farms as Salmon-Safe and continue watershed education and outreach efforts.

<b>Applicant Name:</b>		Garfield, Town of					<b>Application Number:</b>		WQC-2023-GarfTo-00079		
<b>Project Title:</b>		Garfield Wastewater Treatment Plant Facilities Plan			<b>Project Category:</b>		Wastewater Facility				
50	801	Whitman	\$0	\$100,000	\$0	\$0	\$50,000	\$50,000	\$0	6, 8, 9, 10	

Wastewater Treatment Plant (WWTP) Facilities Plan completion in compliance with Washington Administrative Code (WAC) 173-240-060.

<b>Applicant Name:</b>		Kirkland city of - Public Works					<b>Application Number:</b>		WQC-2023-KirkPW-00132		
<b>Project Title:</b>		Spinney Homestead Stormwater Retrofit Facility Design			<b>Project Category:</b>		Stormwater Facility				
51	791	King	\$528,000	\$0	\$0	\$0	\$0	\$0	\$528,000	6, 22	

This project will improve water quality in Forbes Creek and Lake Washington through stormwater quality treatment and an infiltration vault at Spinney Homestead Park in Kirkland. This project will take the facility to 100 design with advertisement ready documentation. Stormwater will be treated to the Enhanced level, which will reduce total suspended solids, oil, dissolved metals (copper, zinc), and total phosphorous. Infiltration via the vault will reduce stormwater flows to Forbes Creek.

<b>Applicant Name:</b>		Walla Walla city of					<b>Application Number:</b>		WQC-2023-WalWal-00066		
<b>Project Title:</b>		Pine Street/ 2nd Ave to 9th Ave/ Stormwater Green Retrofit Pr			<b>Project Category:</b>		Stormwater Facility				
52	786.5	Walla Walla	\$1,706,189	\$0	\$0	\$0	\$0	\$0	\$1,706,189	6, 21, 22	

Design and construct stormwater facilities to treat and infiltrate stormwater runoff along a six block section of Pine Street in downtown Walla Walla. This project will improve water quality in Butcher Creek, Mill Creek and the Walla Walla River by eliminating existing stormwater discharges into Butcher Creek and Mill Creek. This project will utilize infiltration to reduce total suspended solids, hydrocarbons, metals, fertilizer, pesticides and fecal coliform in receiving water bodies.

<b>Applicant Name:</b>		<b>Pierce County - Public Works and Utility Department</b>					<b>Application Number:</b>		<b>WQC-2023-PiCoPW-00184</b>		
<b>Project Title:</b>		<b>Pierce County Septic Repair Program</b>			<b>Project Category:</b>		<b>Onsite Sewage System</b>				
53	785	Pierce	\$180,000	\$0	\$180,000	\$0	\$0	\$0	\$0	22, 34	

Continue and expand Pierce County’s financial assistance program for homeowners to repair or replace failing on-site sewage systems or, where available, connect to sewer. The program priorities are to resolve sources of sewage that pose a health or water quality risk to shellfish growing areas, swimming beaches, 303(d) listed waterbodies, Puget Sound, stormwater facilities, or other potential surface water threats.

<b>Applicant Name:</b>		<b>Lynden city of - Public Works Department</b>					<b>Application Number:</b>		<b>WQC-2023-LyndPW-00043</b>		
<b>Project Title:</b>		<b>9th Street Judson Area Stormwater LID - Phase 2</b>			<b>Project Category:</b>		<b>Stormwater Facility</b>				
54	782	Whatcom	\$537,991	\$179,330	\$0	\$0	\$134,498	\$44,832	\$537,991	6, 8, 9, 10, 13, 22	

This project is the second phase of construction for a project that will ultimately retrofit five square blocks in downtown Lynden with improved stormwater infrastructure in concert with a roadway maintenance project. This project will improve water quality in the Nooksack River through construction of stormwater low impact development (LID) best management practices (BMPs) This second phase will provide runoff treatment and infiltration for runoff from 1.71-acres of residential development.

<b>Applicant Name:</b>		<b>Puyallup city of - Public Works</b>					<b>Application Number:</b>		<b>WQC-2023-PuyaPW-00062</b>		
<b>Project Title:</b>		<b>5th Ave NW Improvement Project; 4th St NW to 7th St NW</b>			<b>Project Category:</b>		<b>Stormwater Facility</b>				
55	777.5	Pierce	\$2,421,318	\$0	\$0	\$0	\$0	\$0	\$2,421,318	6, 21, 22, 28	

This project will improve water quality in the Puyallup River through installation of approximately 1,800 linear feet of permeable pavement along 5th Avenue NW, 6th Street NW, and 5th Street NW in the City of Puyallup. This project will provide treatment for total suspended solids (TSS), reduce levels of dissolved copper and zinc, and will also reduce flows to the Puyallup River by increasing stormwater infiltration and providing stormwater detention.

<b>Applicant Name:</b>		<b>Whitman Conservation District</b>					<b>Application Number:</b>		<b>WQC-2023-WhitCD-00081</b>		
<b>Project Title:</b>		<b>South Fork of the Palouse River Nature Reserve and Learning</b>			<b>Project Category:</b>		<b>Nonpoint Source Activity</b>				
56	775.5	Whitman	\$367,500	\$0	\$367,500	\$0	\$0	\$0	\$0	22	

An opportunity has arisen to purchase 125-acres with 3,800 feet of the South Fork of the Palouse River bisecting the property. Approximately 30-acres is FEMA designated floodplain and is need of dire restoration work. The property is only ten minutes from Colfax and would be open to the public, it would also serve as an opportunity to teach the local schools and community about water quality issues on the Palouse.

<b>Applicant Name:</b>		Stewardship Partners					<b>Application Number:</b>		WQC-2023-StePar*-00109		
<b>Project Title:</b>		Wallace Acres Livestock Exclusion and Riparian Restoration			<b>Project Category:</b>		Nonpoint Source Activity				
57	773.5	King	\$164,725	\$0	\$0	\$0	\$0	\$0	\$0	5	

The Wallace Acres Livestock Exclusion and Riparian Restoration project improves water quality by installing 1.5 miles of livestock exclusion fencing and restoring approximately 1,540 linear feet (~ 5 acres) of riparian buffer along the mainstem Snoqualmie River with a voluntary agricultural landowner. The project promotes Best Management Practices (BMPs) as part of Stewardship Partners voluntary incentive-based approach to landowner stewardship.

<b>Applicant Name:</b>		Whitman Conservation District					<b>Application Number:</b>		WQC-2023-WhitCD-00086		
<b>Project Title:</b>		North Fork of the Palouse Restoration			<b>Project Category:</b>		Nonpoint Source Activity				
58	772	Whitman	\$180,000	\$0	\$180,000	\$0	\$0	\$0	\$0	22	

In the total maximum daily load (TMDL) report from Department of Ecology's (DOE) Water Quality Program, the North Fork Palouse River has been listed as impaired for DO, pH, and bacteria. A primary causal agent of impairment is cited as nonpoint source pollution. To address these impairments, Whitman Conservation District plans to implement a series of restoration strategies surrounding the confluence of Silver Creek and the North Fork Palouse River at Elberton, WA.

<b>Applicant Name:</b>		Walla Walla city of					<b>Application Number:</b>		WQC-2023-WalWal-00067		
<b>Project Title:</b>		Poplar Street Ph 2/ 5th Ave to 14th Ave/ Stormwater Green Ret			<b>Project Category:</b>		Stormwater Facility				
59	772	Walla Walla	\$2,210,664	\$0	\$0	\$0	\$0	\$0	\$2,210,664	6, 21, 22	

Design and construct stormwater facilities to treat and infiltrate stormwater runoff along an eight block section of Poplar Street in downtown Walla Walla. This project will improve water quality in Lincoln Creek, Mill Creek and the Walla Walla River by eliminating 25 mapped stormwater outfalls that discharge directly into Lincoln and Mill Creek. This will reduce the levels of total suspended solids, hydrocarbons, metals, fertilizer, pesticides and fecal coliform in receiving water bodies.

<b>Applicant Name:</b>		Thurston County - Public Health and Social Services Department					<b>Application Number:</b>		WQC-2023-ThCoPH-00177		
<b>Project Title:</b>		Black Lake Pollution Identification and Correction Project			<b>Project Category:</b>		Nonpoint Source Activity				
60	771.5	Thurston	\$250,000	\$0	\$250,000	\$0	\$0	\$0	\$0	22	

Conduct a pollution identification and correction project in the Black Lake basin to reduce E.coli bacteria sources. A 2021 Herrera study for Black Lake Special District found high levels of E.coli and presence of human biomarker HF183 in 3 drainages to Black Lake. The PIC project will conduct additional sampling to bracket the sources of bacteria, conduct site visits, work with property owners to ensure septic systems are functioning properly and other bacteria sources are addressed.

<b>Applicant Name:</b>		Tumwater city of						<b>Application Number:</b>		WQC-2023-Tumwat-00050	
<b>Project Title:</b>		City of Tumwater's Septic to Sewer Conversion Program			<b>Project Category:</b>		Onsite Sewage System				
65	766.5	Thurston	\$500,000	\$0	\$500,000	\$0	\$0	\$0	\$0	22, 34	

The City of Tumwater is seeking funding to create a more effective septic to sewer conversion program specifically for high-density septic systems in mobile home communities. This grant will fund a social marketing style campaign with a pilot program at a local mobile home park. As a result of this funding, 39 septic systems will be converted to city sewer and a blueprint for how to run an effective septic to sewer program with mobile home parks will be created for broader regional use.

<b>Applicant Name:</b>		Marysville city of - Public Works Department						<b>Application Number:</b>		WQC-2023-MaryPW-00143	
<b>Project Title:</b>		LID Retrofit for Cascade and Shoultes Safe Routes			<b>Project Category:</b>		Stormwater Facility				
66	766.5	Snohomish	\$778,163	\$0	\$0	\$0	\$0	\$0	\$778,163	6, 22, 24	

This project will improve water quality in the Quilceda and Allen Creeks (both tributary to the Ebey Slough, which is tributary to the Snohomish River system) via installation of green infrastructure at both 51st Ave NE & 100th St NE in the City of Marysville. The project will provide treatment for total suspended solids (TSS), oil (total petroleum hydrocarbons), dissolved copper, dissolved zinc, and total phosphorus and will also reduce flows by increasing stormwater infiltration.

<b>Applicant Name:</b>		Kitsap County - Public Works						<b>Application Number:</b>		WQC-2023-KiCoPW-00013	
<b>Project Title:</b>		Suquamish Regional Stormwater Treatment Facility			<b>Project Category:</b>		Stormwater Facility				
67	765	Kitsap	\$2,417,889	\$0	\$0	\$0	\$0	\$0	\$2,417,889	6, 22, 24	

This project will improve water quality in the Puget Sound through installation of a regional stormwater treatment facility in Suquamish, WA. This project will provide treatment for total suspended solids (TSS), dissolved copper, dissolved zinc, and total phosphorus.

<b>Applicant Name:</b>		Bellingham city of - Public Works Department						<b>Application Number:</b>		WQC-2023-BellPW-00110	
<b>Project Title:</b>		Lake Whatcom Vault Retrofit, Phase 1			<b>Project Category:</b>		Stormwater Facility				
68	765	Whatcom	\$552,335	\$0	\$0	\$0	\$0	\$0	\$552,335	6, 22	

This project will retrofit three existing stormwater treatment facility to reduce phosphorus (P) and bacteria loading to Lake Whatcom. This project will implement the second set of a number of planned retrofits that are intended to assist the City of Bellingham in meeting Lake Whatcom TMDL P-reduction targets.

**State Fiscal Year 2023 Draft Water Quality Funding Offer List and Intended Use Plan

<b>Applicant Name:</b>		Tumwater city of					<b>Application Number:</b>		WQC-2023-Tumwat-00049		
<b>Project Title:</b>		City of Tumwater SMAP Basin Planning			<b>Project Category:</b>		Stormwater Facility				
69	764.5	Thurston	\$149,524	\$0	\$0	\$0	\$0	\$0	\$149,524	3, 6, 22, 29	

The City of Tumwater is seeking funding to complete three Stormwater Management Action Plans (SMAPs) for our three highest priority catchment areas within the City. These SMAPs will identify opportunities for stormwater retrofits, land management or development strategy changes, and customized implementation of stormwater management actions to prevent water quality degradation and improve water quality and habitat in receiving waters.

<b>Applicant Name:</b>		Foster Creek Conservation District					<b>Application Number:</b>		WQC-2023-FoCrCD-00059		
<b>Project Title:</b>		Foster Watershed Soil health and Water Quality Initiative			<b>Project Category:</b>		Nonpoint Source Activity				
70	763.5	Douglas	\$250,000	\$0	\$250,000	\$0	\$0	\$0	\$0	22	

In the Foster Watershed, Foster Creek Conservation District (FCCD) will address 303(d) listings for temperature, pH, and dissolved oxygen by updating the watershed plan to prioritize pervasive erosional inputs from surrounding agriculture lands via mapping and stakeholder engagement. This project will also promote conservation through education and outreach, continue the direct seed cost share program and advance their existing water quality and soil health monitoring data collection programs.

<b>Applicant Name:</b>		Puyallup city of - Public Works					<b>Application Number:</b>		WQC-2023-PuyaPW-00091		
<b>Project Title:</b>		Permeable Pavement Enhanced Maintenance Plan and Special			<b>Project Category:</b>		Stormwater Activity				
71	758	Pierce	\$196,703	\$0	\$0	\$0	\$0	\$0	\$196,703	18, 22, 24, 28	

\*The City proposes to purchase a pavement cleaning machine, Triverus Municipal Cleaning Vehicle (MCV), with Ecology grant funds. The MCV specializes in cleaning permeable surfaces and is needed to prolong the lifespan of permeable pavements in the City. Permeable surfaces provide water quality treatment and reduces total stormwater volume runoff, improving water quality in the region.

<b>Applicant Name:</b>		Edmonds city of					<b>Application Number:</b>		WQC-2023-Edmond-00101		
<b>Project Title:</b>		7313 Lake Ballinger Way Floodplain Purchase & Structure Rep			<b>Project Category:</b>		Nonpoint Source Activity				
72	754.5	Snhomish	\$500,000	\$0	\$500,000	\$0	\$0	\$0	\$0	22	

The project proposes to purchase an existing single family residential property located within the Lake Ballinger flood plain and which is subject to seasonal flooding. The City proposes to remove the home and any pollution generating surfaces from the site, restoring the natural floodplain area. The intent is for the purchase and demolition to be followed by a future project to split appropriate flows from the City storm system and provide water quality treatment to the maximum extent feasible.

<b>Applicant Name:</b>		Skagit Fisheries Enhancement Group					<b>Application Number:</b>		WQC-2023-SFEG-00162		
<b>Project Title:</b>		Little Carey's Stream and Wetland Restoration			<b>Project Category:</b>		Nonpoint Source Activity				
77	738	Skagit	\$250,000	\$0	\$0	\$0	\$0	\$0	\$0	5	

SFEG is working with Forterra and the Skagit Conservation District to restore and protect an 20-acre wetland and buffer along 1500 feet of Little Carey's Creek in Hamilton, WA. The property was used for agriculture, and a historic forest/shrub-scrub wetland was cleared and the stream was channelized. The project will replant the wetland and buffer with native trees and shrubs, and restore the stream channel to its former path through a forest area. We will also improve fish passage downstream.

<b>Applicant Name:</b>		Clark Public Utility District					<b>Application Number:</b>		WQC-2023-ClaPUD-00141		
<b>Project Title:</b>		Schaefer Restoration Project			<b>Project Category:</b>		Nonpoint Source Activity				
78	735.5	Clark	\$249,652	\$0	\$249,652	\$0	\$0	\$0	\$0	22	

Restore 20 acres of riparian habitat, previously pasture land, along 2,400 feet of a tributary to the East Fork Lewis river and treat 40 acres of invasive Japanese knotweed and other high priority aquatic invasive species within the East Fork Lewis River watershed. This project complements work which has already been implemented by Clark County further upstream in the wetland this stream feeds into and fits into a plan to restore the wetland and control knotweed at the watershed level.

<b>Applicant Name:</b>		Lynden city of - Public Works Department					<b>Application Number:</b>		WQC-2023-LyndPW-00048		
<b>Project Title:</b>		City of Lynden Enhanced Street Sweeping Project			<b>Project Category:</b>		Stormwater Activity				
79	735	Whatcom	\$241,875	\$0	\$0	\$0	\$0	\$0	\$241,875	18, 22	

The Enhanced Street Sweeping Project will improve water quality in the receiving waters around the City of Lynden by expanding the existing street sweeping program to increase the frequency and effectiveness of roadway material and debris removal from City streets before it enters the stormwater conveyance system. The project includes the finalization of a draft Street Sweeping Enhanced Maintenance Plan (EMP), the purchase of a regenerative air sweeper, and implementation of the EMP.

<b>Applicant Name:</b>		Chelan County - Natural Resource Department					<b>Application Number:</b>		WQC-2023-ChCoNR-00088		
<b>Project Title:</b>		Peshastin Watershed Alluvial Water Storage and Riparian Res			<b>Project Category:</b>		Nonpoint Source Activity				
80	735	Chelan	\$186,814	\$0	\$186,814	\$0	\$0	\$0	\$0	22	

We propose a project to address water quality issues in the Peshastin Watershed, specifically Peshastin and Larsen Creeks. This project includes implementation of alluvial water storage treatments and riparian planting. Proposed monitoring and maintenance will measure project efficacy and allow for adaptive management. Additionally, we propose an effort to prioritize prospective water quality efforts within the Peshastin watershed, and conduct outreach to landowners of high-priority parcels.

<b>Project Title:</b>		Little Squalicum Creek Water Quality Retrofits, Phase 2			<b>Project Category:</b>		Stormwater Facility				
85	722.5	Whatcom	\$1,499,758	\$0	\$0	\$0	\$0	\$0	\$1,499,758	6, 22	

This project will implement the second phase in a multi-year project to provide water quality treatment for runoff that enters Little Squalicum Creek from developed land that is currently untreated. This water quality project will protect the biological and water quality improvements installed as part of the Little Squalicum Estuary project as well as providing water quality improvements throughout this medium-density, mixed land use basin.

<b>Applicant Name:</b>		Almira town of					<b>Application Number:</b>		WQC-2023-ToAlmi-00174		
<b>Project Title:</b>		Almira Lift Station Renovation			<b>Project Category:</b>		Wastewater Facility		Step 4: Design & Construction		
86	720	Lincoln	\$0	\$533,426	\$0	\$0	\$502,940	\$30,486	\$0	6, 7, 8, 9, 10, 12	

The Town of Almira owns and operates a Large On-Site Sewage System permitted by DOH. Then entire town's sewage is pumped to the treatment lagoons by a single lift station which was built in 1982. While the lift station is currently in good working condition, the components of the lift station are old and replacement parts are nearly impossible to find. The Town would like to completely replace all of the lift station components, including the wet well, pumps, emergency generator, and controls.

<b>Applicant Name:</b>		Tukwila city of - Public Works					<b>Application Number:</b>		WQC-2023-Tukwil-00173		
<b>Project Title:</b>		Tukwila's SMAP Basin Planning for Retrofitted Water Quality			<b>Project Category:</b>		Stormwater Facility				
87	718	King	\$63,841	\$0	\$0	\$0	\$0	\$0	\$72,353	6, 15, 22, 29	

The City is developing a stormwater-focused basin plan aimed at reducing stormwater pollution. This effort entails strategically identifying and prioritizing water quality and flow control improvements to protect receiving waters. Tukwila will develop a Stormwater Management Action Plan (SMAP) within the selected basin, including documenting capital improvements for water quality and flow control, policy recommendations and targeted stormwater management actions.

<b>Applicant Name:</b>		East Wenatchee city of					<b>Application Number:</b>		WQC-2023-Ewena-00168		
<b>Project Title:</b>		Grant Road Oil Treatment and Bioretention			<b>Project Category:</b>		Stormwater Facility				
88	717.5	Douglas	\$757,500	\$0	\$0	\$0	\$0	\$0	\$858,500	6, 15, 22	

This project will provide oil control and bioretention of stormwater for around 1 mile of Grant road, which has an ADT of 20,000 vehicles. The City owns a parcel approximately 700' south of Grant Road that is perfectly situated for an oil water separator, and a bioinfiltration pond. This will prevent a significant amount (up to 38,100 cubic feet) of untreated runoff containing hydrocarbons, metals and sediment from discharging into the Columbia River via the Grant Road outfall per rain event.

**State Fiscal Year 2023 Draft Water Quality Funding Offer List and Intended Use Plan  
Draft Combined Summary List**

<b>Applicant Name:</b>		<b>Bothell city of - Public Works</b>					<b>Application Number:</b>		<b>WQC-2023-BothPW-00078</b>		
<b>Project Title:</b>		<b>Bothell Stormwater Pond Retrofit at Canyon Ridge Estates</b>			<b>Project Category:</b>		<b>Stormwater Facility</b>				
89	717	Snohomish	\$108,503	\$0	\$0	\$0	\$0	\$0	\$108,503	6, 22, 30	

The project will complete feasibility and design for retrofitting one stormwater detention facility. The current stormwater pond receives flow at a high velocity and does not provide any real water quality benefit. The retrofit will add water quality elements and increase flow control to improve overall stormwater quality downstream of the facility. The facility is located in Canyon Ridge Estates and contributes flow to North Creek through a downstream wetland system.

<b>Applicant Name:</b>		<b>College Place city of - Engineering Department</b>					<b>Application Number:</b>		<b>WQC-2023-CoPIED-00112</b>		
<b>Project Title:</b>		<b>Lions Park Stormwater Improvements</b>			<b>Project Category:</b>		<b>Stormwater Facility</b>				
90	716	Walla Walla	\$764,250	\$0	\$0	\$0	\$0	\$0	\$866,150	6, 15, 22, 24, 29, 30	

Garrison Creek runs through Lions Park. The City currently has five storm outfalls into Garrison Creek at the Park. These outfalls drain an area of approximately 16 acres and directly discharge to the creek with no treatment. The Lions Park project will install facilities that will provide basic treatment for approximately 15.5 acres of stormwater for the approximate treatment storm. This will be a significant improvement in the quality of the water discharging to Garrison Creek in this area.

<b>Applicant Name:</b>		<b>Grandview city of</b>					<b>Application Number:</b>		<b>WQC-2023-Grandv-00123</b>		
<b>Project Title:</b>		<b>Storm Drainage Improvements Project</b>			<b>Project Category:</b>		<b>Stormwater Facility</b>				
91	714.5	Yakima	\$948,525	\$316,175	\$0	\$0	\$189,705	\$0	\$1,074,995	6, 8, 9, 10, 15, 21, 22, 24	

Funding will be used to construct conveyance, pre-treatment, and detention facilities necessary to manage municipal stormwater from discharging into adjacent waterbodies. Untreated City stormwater from Larson St., W. Fifth St., and Butternut Rd. is directed to existing irrigation infrastructure owned by Sunnyside Valley Irrigation District. The storm drainage is comingled with irrigation water and is discharged to a 303d listed waterbody. This funding application is for construction funding.

<b>Applicant Name:</b>		<b>Jefferson County Public Health</b>					<b>Application Number:</b>		<b>WQC-2023-JeCoPH-00032</b>		
<b>Project Title:</b>		<b>Chimacum-Port Hadlock Pollution Identification and Correctio</b>			<b>Project Category:</b>		<b>Nonpoint Source Activity</b>				
92	712.5	Jefferson	\$305,744	\$0	\$305,744	\$0	\$0	\$0	\$0	22	

Jefferson County Public Health (JCPH) will implement a Pollution Identification and Correction (PIC) project for the Chimacum and Port Hadlock areas to protect water quality from threats of nonpoint source pollution. JCPH will monitor water quality for bacteria to identify areas of concern, followed by property research, corrective actions, and outreach to resolve pollution sources. The project will protect human health, ensure shellfish beds remain open and protect water quality.

----	-------	--------	-----------	-----	-----	-----	-----	-----	-----------	-----------------------

This green retrofit design project proposal will provide for planning, permitting and design of pervious concrete to replace gravel shoulders. By reducing impervious area and treating stormwater with the cation exchange in the soil, water quality in the region will improve. This is the second project in an effort to reduce the amount of City owned impervious gravel surfacing. The first project, designed using \$120K Ecology grant, was constructed in 2016 also using an Ecology grant.

113	602.5	King	\$276,195	\$0	\$0	\$0	\$0	\$0	\$276,195	18, 22, 31	

The City currently contracts for street sweeping services which stipulates the location and frequency of sweeping operations. While this approach has provided good service overall and allowed us to achieve our NPDES requirements, the development of an Enhanced Maintenance Plan and the purchase of a city-owned street sweeper will allow us to reduce spill response times and increase the frequency and effectiveness of sweeping operations in neighborhoods throughout the City.

<b>Applicant Name:</b>		Port Angeles port of					<b>Application Number:</b>		WQC-2023-PorAnp-00144		
<b>Project Title:</b>		Phase 1 – Log Yard Stormwater Treatment			<b>Project Category:</b>		Stormwater Facility				
114	598	Clallam	\$4,880,250	\$5,000,000	\$0	\$0	\$0	\$0	\$0	4, 28	

The Port of Port Angeles (Port) is installing stormwater treatment at the Port’s waterfront Log Yard in 2023. The log yard stormwater treatment system and conveyance will be phased and designed to protect important cultural resources that are beneath the site and to protect water quality in Port Angeles Harbor . The system will treat over 9 million gallons per year. This funding request is for the conveyance paving and treatment system installation at the Port Log Yard.

<b>Applicant Name:</b>		Lynden city of - Public Works Department					<b>Application Number:</b>		WQC-2023-LyndPW-00040		
<b>Project Title:</b>		Pepin Creek Downstream Shoreline Improvements			<b>Project Category:</b>		Nonpoint Source Activity				
115	543.5	Whatcom	\$500,000	\$922,009	\$0	\$0	\$0	\$0	\$0	3, 4	

This project will address a significant water quality problem caused by erosive stream banks along Pepin (Double Ditch) Creek. The RECIPIENT will design and construct stream bank stabilization for 1,000 feet of fragile shoreline along Pepin Creek south of Main Street in the City of Lynden as the first phase of the larger Pepin Creek Relocation project.

<b>Applicant Name:</b>		Metaline town of					<b>Application Number:</b>		WQC-2023-Metali-00037		
<b>Project Title:</b>		Town of Metaline USDA Loan Refinance			<b>Project Category:</b>		Wastewater Facility-Refinance				
Refi	N/A	Pend Oreille	\$0	\$110,000	\$0	\$0	\$110,000	\$0	\$0	2	

The Town of Metaline has a long-term, high interest loan from USDA Rural Development (RD) they would like to refinance with an Ecology standard loan. A standard loan would significantly reduce the amount of loan interest paid and allow the savings to be used for maintenance and equipment replacement at the town's wastewater treatment facility.

------	-----	-------	-----	-----------	-----	-----	-----------	-----	-----	---

The Town of Washtucna has a 40 year, 4.125 interest loan from USDA RD that funded the upgrade of the town's wastewater treatment plant. Refinancing the loan to a shorter term and much lower interest rate would allow the town to pay the loan off sooner and use any saving on annual payments towards extra principal payments on the new loan.

<b>Applicant Name:</b>	Springdale town of						<b>Application Number:</b>	WQC-2023-ToSpri-00042		
------------------------	--------------------	--	--	--	--	--	----------------------------	-----------------------	--	--

------	-----	---------	-----	-----------	-----	-----	-----------	-----	-----	---

The Town of Springdale currently has four USDA Rural Development funded loans that were used to construct the existing collection and treatment system and subsequent upgrade of their main lift station. Each of the loans are high-interest with long repayment terms. The town wishes to consolidate USDA RD loans 92-01 and 92-03, which are each at a 4.5 interest rate, into one Ecology refinance loan.

<b>Applicant Name:</b>		Seattle city of - Public Utilities Department					<b>Application Number:</b>		WQC-2021-SeaPUD-00191_		
<b>Project Title:</b>		Ship Canal Water Quality Project (Project)			<b>Project Category:</b>		Wastewater Facility				
Inel	N/A	King	\$0	\$0	\$0	\$0	\$68,840,000	\$0	\$0	6, 7, 8, 9, 10, 36	
<p>This Project consists of a storage tunnel between the Ballard and Wallingford neighborhoods in the City of Seattle that will significantly reduce combined sewer overflows (CSOs) into the Ship Canal. This is a joint project between Seattle Public Utilities (SPU) and King County Department of Natural Resources (DNRP).The project will control overflows at five SPU outfalls and two DNRP outfalls and is required by both agencies' consent decrees with the Washington State DOE and the EPA.</p>											

<b>Applicant Name:</b>		Puyallup city of - Public Works					<b>Application Number:</b>		WQC-2023-PuyaPW-00092		
<b>Project Title:</b>		Deer Creek Stream and Wetland Restoration, Crossing C Proje			<b>Project Category:</b>		Nonpoint Source Activity				
Inel	N/A	Pierce	\$500,000	\$0	\$0	\$0	\$0	\$0	\$0	1	
<p>The project will improve water quality and addresses nonpoint source activities. The project proposes wetland and stream restoration and a culvert replacement at 27th St. SE. Other project benefits are hydraulics and fish passage improvements; realignment of streams to provide increased channel capacity, flow diversity, and habitat features; reconnecting of wetlands to stream channels; increased flow attenuation; and alleviating flooding on a critical access road to a residential neighborhood.</p>											

<b>Applicant Name:</b>		King County - Natural Resources and Parks Department					<b>Application Number:</b>		WQC-2023-KCoNRP-00126		
<b>Project Title:</b>		Ship Canal Water Quality Project, Construction			<b>Project Category:</b>		Wastewater Facility				
Inel	N/A	King	\$0	\$89,246,500	\$0	\$0	\$29,760,000	\$0	\$0	6, 7, 8, 9, 10, 35	
<p>This project protects water quality with the construction of an offline 18-ft 10-inch inside-diameter storage tunnel and pump station; 5 access shafts; and a 649 foot long 94-inch inside diameter tunnel under the ship canal. These improvements will store combined-sewer overflow and significantly reduce combined-sewer overflows (CSO) into the Lake Washington Ship Canal at five Seattle Public Utilities (SPU) outfalls and two King County Department of Natural Resources and Parks (DNRP) outfalls.</p>											

<b>Applicant Name:</b>		King County - Natural Resources and Parks Department					<b>Application Number:</b>		WQC-2023-KCoNRP-00125

## Footnotes

- 1) The project was not rated and ranked because it was determined to be ineligible for funding.
- 2) The project was not rated and ranked because it is a refinance project. Ecology only funds refinance projects if there are CWSRF funds remaining after all other eligible projects are funded. The project is proposed CWSRF loan.
- 3) The Project Category was adjusted by Ecology to fit the proposed project. This does not affect general funding eligibility.
- 4) The project did not meet the minimum score of 600 points overall required to be eligible for funding.
- 5) The project received more than the minimum score of 600 points required to be eligible for funding, but it was not proposed funding because the applicant is a nonprofit that is only eligible for Section 319 funds, and all available Section 319 funds were proposed to higher ranked projects. If the applicant is willing and able to work with a public body that will become the applicant and funding agreement manager, Ecology may award Centennial grant for the project.
- 6) The project is a facility project proposed funding. If the applicant is required or chooses to plan under the GMA, it must be in compliance with Chapter 36.70a RCW before Ecology can sign a funding agreement.
- 7) The project is a facility design, construction, or design/construction project proposed CWSRF loan and/or Centennial grant. The applicant will be required to conduct an Investment Grade Efficiency Audit (IGEA). The IGEA can be just for the funded project or the entire system; the latter is preferable. If an IGEA was conducted for the entire system within the past 5 years, recipients need only upload a copy of the previously-completed IGEA to EAGL—no additional work is required.
- 8) The project is a facility project proposed CWSRF loan. Where applicable, the applicant will be required to comply with the following: a) the AIS requirements described in the American Iron and Steel section; b) the SERP requirements described in the State Environmental Review Process section; c) the federal prevailing wage requirements described in the Davis-Bacon Act Wages section; and (d) certify it has prepared an Asset Management Plan that meets the minimum criteria described in the Fiscal Sustainability Plan (Asset Management Plan) section before Ecology can sign a funding agreement
- 9) The project is proposed CWSRF loan. Ecology must conduct a FCA before it can sign a funding agreement as described in the Financial Capability Assessment section.
- 10) The project is proposed CWSRF loan. The applicant will be required to certify it prepared/will prepare a CEA that meets the minimum criteria as described in the Cost and Effectiveness Analysis section before Ecology can sign a funding agreement.
- 11) The project is proposed CWSRF loan and identified as a DEP. In addition to any other requirements, the project will be required to meet the following federal requirements: a) the A/E services procurement requirements described in the Architectural and Engineering Services Procurement section; b) the environmental cross cutters reporting requirements described in the Federal Cross Cutters section; c) the SAA

requirements described in the Federal Single Audit Act section; and d) the prohibitions on services or equipment described in the Prohibition on Certain Telecommunication and Video Surveillance Services or Equipment section.

- 12) The project is a Step 4 wastewater project proposed funding. Design must be completed within 1 year of signing a funding agreement.
- 13) The project was determined by Ecology to be eligible for GPR, and the proposed funding includes CWSRF GPR funding.
- 14) The applicant requested a 30-year term loan, but the maximum allowed for planning or design projects is a 20-year term.
- 15) The proposed SFAP grant reflects hardship consideration with a reduced 15% match.
- 16) The proposed SFAP grant resulted in the applicant reaching the \$5,000,000 maximum SFAP grant per applicant.
- 17) The project was not proposed SFAP grant because the applicant was already proposed the \$5,000,000 maximum allowed SFAP grant.
- 18) The proposed SFAP grant for facilities and equipment to implement enhanced maintenance is contingent upon the analysis performed in the Ecology-approved Enhanced Maintenance Plan.
- 19) The proposed SFAP grant for construction is contingent on acquisition of property.
- 20) The proposed SFAP grant is conditional upon submittal of a Landowner Acknowledgement form.
- 21) The project includes BMPs on private property. The proposed funding is contingent on the applicant verifying landowner commitment via a Land Owner Agreement.
- 22) The proposed grant may not exceed 75% of the Total Eligible Costs (85% for SFAP hardship communities).
- 23) Ecology's estimate of Total Eligible Costs differs from the applicant's estimate; the proposed funding was adjusted based on Ecology's estimate.
- 24) Ecology Screeners/Evaluators noted task costs that are unclear. The proposed funding is contingent on satisfactory agreement negotiation and clarification of cost estimates.
- 25) Ecology Screeners/Evaluators noted potentially ineligible costs. Final funding resulting from agreement negotiation will be limited to eligible costs.
- 26) Ecology Screeners/Evaluators noted administration costs that exceed 15% of the Total Eligible Costs; final negotiated administration costs may be adjusted.
- 27) The Scope of Work involves the collection of water quality or soil samples. An Ecology-approved Quality Assurance Project Plan (QAPP) will be required.
- 28) Ecology Screeners/Evaluators noted that proposed project start or completion dates may not align with the dates identified in Section 6.3.4 of the SFY23 Guidelines. Please refer to the funding guidelines for additional information about project timelines and expense eligibility.

- 29) Ecology Screeners/Evaluators noted that the applicant may not have allocated sufficient resources to adequately address potential historic and cultural resource requirements.
- 30) Funding proposed is contingent upon wetland delineation. Work proposed in wetlands may be ineligible.
- 31) The funding source proposed for this project will require the applicant to provide cash match. Applicant has not identified a source of match funding.
- 32) Ecology and EPA are determining the eligibility of the project based on wages documentation provided by the applicant on 01/12/22. If the project is determined to be eligible, Ecology will offer full funding for the project in the Final List.
- 33) The design portion of this project is already funded under WQC-2021-Waterv-00168. Ecology allowed the applicant to request Step 4 funding in this funding cycle in order to speed up the construction schedule. Proposed funding is only for the Construction and Construction Management related portions of the project.
- 34) The proposed funding is based on a 25% match requirement. However, the Funding Request form shows a 100% required match. During the Agreement Negotiation Process, Ecology will change the Grant Request and the Match Required from the automatically generated to show that only a 25% match is required.
- 35) The application requested additional funding for a project that is already funded. The funding proposed will be amended into an existing funding agreement.
- 36) The applicant did not request funding for the already funded project, but Ecology is proposing the additional funding to fully fund it based on previous funding requests and offers. The funding proposed will be amended into an existing funding agreement.
- 37) Ecology allowed the applicant to deviate from the standard Step Process because they're using a relatively new contracting mechanism (Progressive Design Build) that is expected to result in design and construction being completed within the timeframe typically expected for Step 4 projects. All of the standard timelines expected for Step 4 projects apply.
- 38) Due to extenuating circumstances, Ecology approved an extension of the planning document approval date for this project. The planning document must be approved by Ecology's Eastern Region Office by 04/30/22.

## Appendix 1a: List of Projects Proposed CWSRF Funding

Appendix 1a contains a list of projects proposed funding strictly from CWSRF in ranked priority order.
