Nadiifinta dhulka wasakhaysan waxay ka caawisaa ka hortagga wasakhawga inay gaaraan Biyo-mareenka Lower Duwamish

Bay'ada ayaa hogaaminaysa dadaalka lagu nadiifinayo ilaha wasakhaysan ee ka imanaya dhulka kore ee ku hareeraysan biyo mareenka Lower Duwamish ee (LDW) Superfund Site. Midan waxaa loo yaqaanaa 'LDW Source Control'.

Si loo sameeyo Xakamaynta Isha LDW, waxaan raadinaynaa ilaha wasakhaynta waxaanu qaadnaa talaabooyin lagu joojinayo ama lagu dhimayo kahor intaanay gaadhin LDW. Waa qayb muhiim ah oo naga go'an inaan taageerno Hay'adda Ilaalinta Deegaanka ee Maraykanka (EPA) LDW falalka nadiifinta wasakhda. Hadafka dhow ee Xakamaynta Isha LDW waa in wax laga qabto ilaha muhiimka ah ee wasakhda LDW ku filan si ficilada nadiifinta wasakhda ee biyo-mareenka ee EPA ay u bilaabmaan. Hadafkayaga mudada dheer waa inaan yareyno khatarta wasakhaynta wasakhda iyo soo celinta tayada biyaha webiga.

Baaritaanka goobta wasakhaysan iyo nadiifinta waa mid ka mid ah falalka Xakamaynta Isha ee LDW oo badan oo ay hogaamiso Bay'ad. Intaa waxaa dheer, shaqadeena waxaa ka mid ah xakamaynta dheecaannada biyaha duufaanka iyada oo loo marayo kormeerka ganacsiga, la socoshada dheecaannada, hababka maaraynta ugu fiican, tiknoolajiyada daaweynta biyaha roobka; waxbarasho; iyo isku xirka wakaalada. Wasakheeya ku jira ciidda iyo biyaha dhulka hoostiisa ee dhulka ku xeeran LDW waxay khatar ku yihiin caafimaadka dadka iyo deegaanka. Waxay ka heli karaan marinka wabiga iyaga oo soo mara dheecaannada biyaha dhulka hoostiisa mara, qulqulka biyaha duufaanka, xaalufinta carada ama nabaad guurka carada, iyo habab kale.

Qulka biyaha ee kor ilaa hoos

EPA waxay u qaybisaa 5-mayl fidsan ee Duwamish River saddex qaybood oo kala duwan oo loo yaqaan "Upper Reach" (qaybta kore ee ugu fog ee LDW), "Middle Reach", iyo "Lower Reach" (qaybta hoose, ilaa cirifka koonfureed ee Harbor Island). Falalka nadiifinta wasakhda biyaha ee soo haray waxay guud ahaan u dhici doonaan si xiriir ah, laga bilaabo xagga sare, oo ku sii socon doonta midan dhexe, kadibna midn hoose. Habkaas, waxaa yaraanaya suurto galnimada wasakhda la nadiifiyey si loo wasakheeyo sababtoo ah qulqulka webiga oo qaadaya wasakh fadhida ee ka imanaya kor ilaa hoos. Waxaan mudnaanta siinaa kala duwanaanshahayada dadaalada Xakamaynta Isha LDW si aan u taageerno EPA ee kor u socodka habka nadiifinta wasakhda hoose. Si kastaba ha ahaatee, waxaanu qabanaa shaqada Xakamaynta Isha LDW meel kasta oo la gaarto.

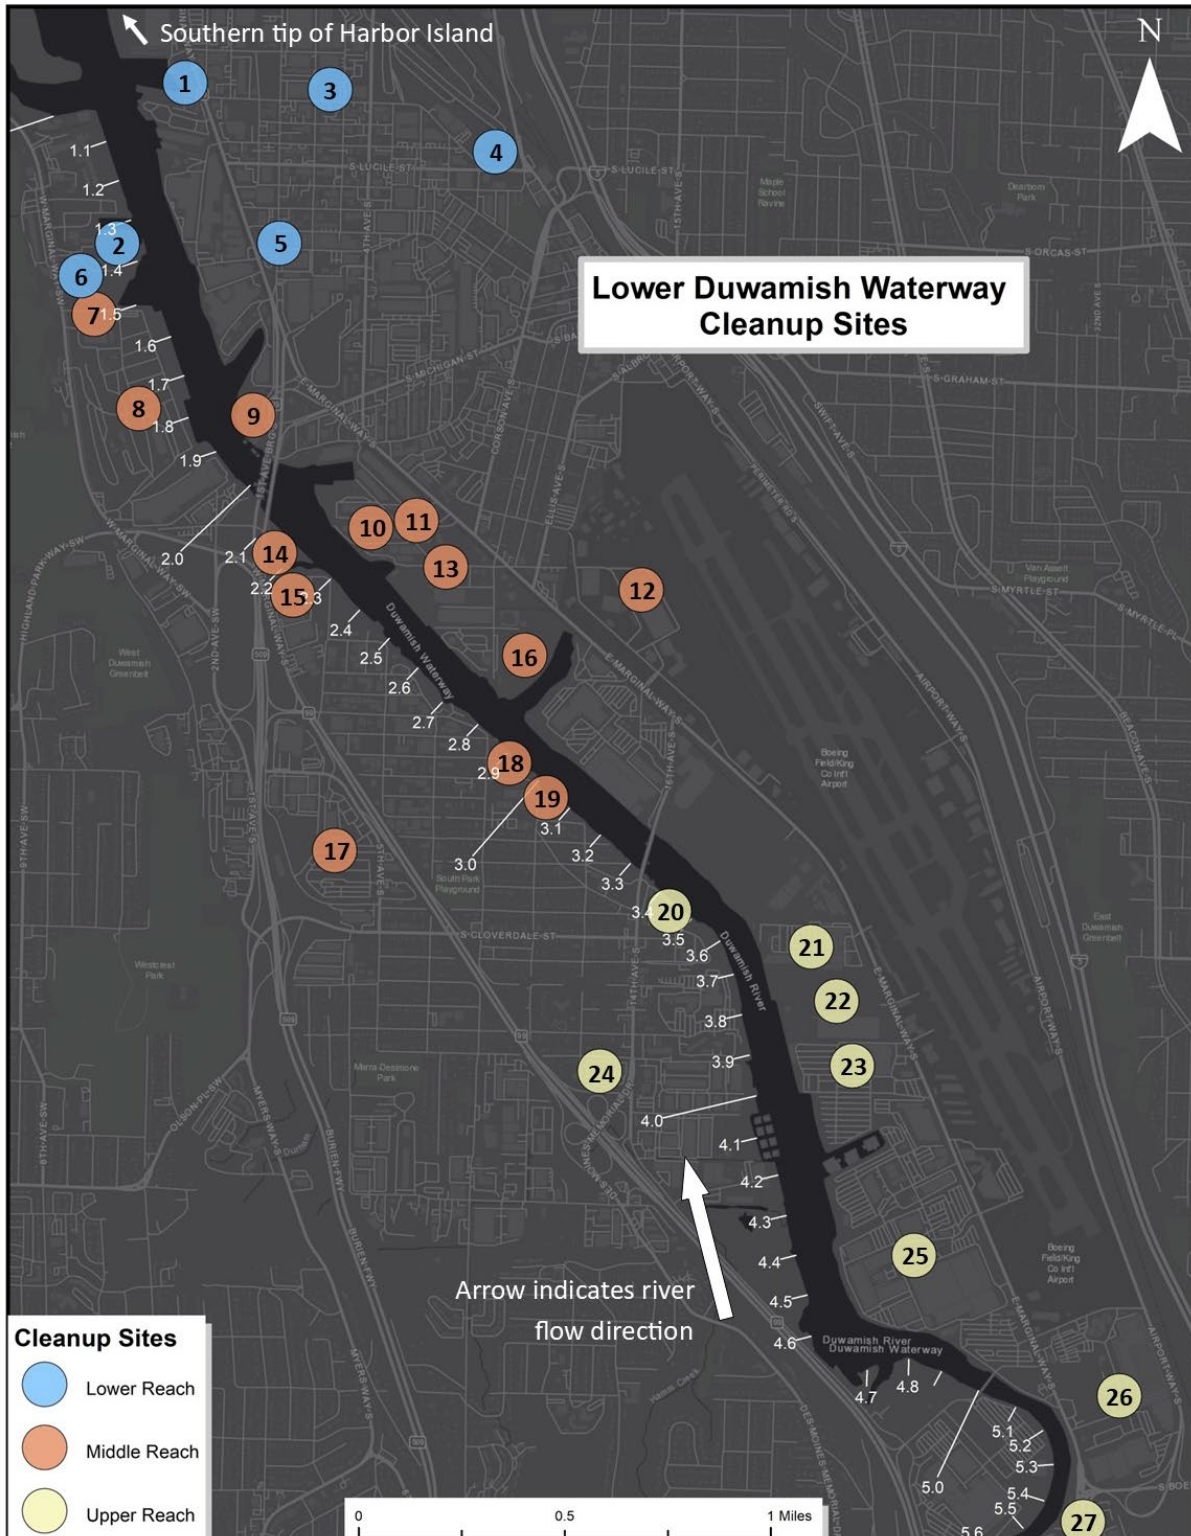

Kormeerka Nadiifinta

Waxaan si firfircoon u kormeerna nadiifinta 25 goobood ee aagga Xakamaynta Isha LDW anagoo heshiis sharci ah raacayna habka nadiifinta ee lagu qeexay Xeerka Xakamaynta Wasakhawga ee Gobolka (MTCA). Barnaamijkeena Nadiifinta Suntu hadda waxa uu kormeeraa 21 goobood oo nadiifin ah iyo barnaamijkayaga yaraynta khatarta qashinka iyo Wasakhda ah wuxuu kormeeraa 4 goobood. Goobaha kale ee wasakhaysan ee dhulka sare ah ayaa si madaxbanaan loo nadiifiyaa iyada oo loo marayo Barnaamijka Nadiifinta Iskaa wax u qabso ee Ecology ama waxay leeyihiin kormeerka EPA ee hoos yimaada sharciyada iyo hababka federaalka.

Barnaamijka Nadiifinta Wasakhda

Hormarka!

25ka goobod ee nadiifinta rasmiga ah iyo labada goobod ee wada xaajoodka rasmiga ah ee u gudbaya habka nadiifinta MTCA ayaa lagu muujiyay jaantuskan oo si kooban hoos loogu soo koobay iyadoo la raacayo heerka goob kasta. Lambarada khariidada hoose waxay u dhigmaan goobo gaar ah. Macluumaad dheeraad ah oo goobta ah ayaa ku yaal bogaga 3 - 11.
