Introduction	6
Reasons for Issuing the Permit	7
Public Involvement Actions	7
List of Commenters	8
Appendix A. Copies of All Public Notices	

Introduction

The Washington State Department of Ecology's Nuclear Waste Program (Ecology) manages dangerous waste within the state by writing permits to regulate its treatment, storage, and disposal. When a new permit or a significant modification to an existing permit is proposed, Ecology holds a public comment period to allow the public to review the change and provide formal feedback. (See <u>Washington Administrative Code [WAC] 173-303-830</u> for types of permit changes.)

The Response to Comments is the last step before issuing the final permit, and its purpose is to:

- Specify which changes, if any, of a permit will become effective upon issuance of the final permit, providing reasons for those changes.
- Describe and document public involvement actions.
- List and respond to all significant comments received during the public comment period and any related public hearings.

Comment period	Integrated Disposal Facility Agency-initiated Permit Modification, June 3 – July 2024
Permit	Hanford Facility Resource Conservation and Recovery Act (RCRA) Permit for the Treatment, Storage, and Disposal of Dangerous Waste, Integrated Disposal Facility
Permittees	U.S. Department of Energy Central Plateau Cleanup Company LLC
Original Issuance date	September 28, 1994
Effective date	September 25, 2024

This Response to Comments is prepared for:

To see more information related to the Hanford Site and nuclear waste in Washington, please visit our webpage, <u>Hanford Cleanup</u>³.

³ <u>https://www.ecology.wa.gov/Hanford</u>

Reasons for Issuing the Permit

Ecology proposed this agency-initiated permit modification to the Hanford Sitewide Permit Revision 8C. The modification affects the Dangerous Waste Portion for the Treatment, Storage, and Disposal of Dangerous Waste for the Integrated Disposal Facility, located in Part III, Operating Unit Group 11.

The Integrated Disposal Facility (IDF) is located on 202 acres of land within the south-central portion of the 200 East Area of the Hanford Site. IDF provides disposal for the permanent, environmentally safe disposition of vitrified Immobilized low-activity waste (ILAW) packages and other operational waste streams that meet (RCRA) requirements for land disposal.

This permit modification updates and modifies the following IDF Permit files of the final Class 3 Permit Modification 8C.2023.1F in accordance with the settlement agreement⁴:

- Unit-Specific Permit Conditions.
- Addendum F, Preparedness and Prevention.
- Addendum I, Inspection Plan.
- Addendum J, Contingency Plan.

The proposed changes have been made to these permit files to reflect the changes specified within the Settlement Agreement.

Public Involvement Actions

We encouraged public comment on the draft IDF Agency-Initiated permit modification during a 45-day, public comment period held June 3 – July 19, 2024.

We took the following actions to notify the public:

- Mailed a public notice announcing the comment period to 931 members of the public.
- Placed a public announcement legal classified notice in the Tri-City Herald on June 2, 2024.
- Emailed a notice announcing the start of the comment period to the Hanford-Info email list, which has 1,722 recipients.
- Posted the comment period notice on the Washington Department of Ecology Hanford's Facebook and Twitter pages.

The Hanford information repositories located in Richland, Spokane, and Seattle, Washington, and Portland, Oregon, received the following documents for public review:

- Focus sheet
- Transmittal letter
- Fact Sheet for the proposed IDF Agency-Initiated Permit Modification
- Draft IDF Agency-Initiated Permit Modification

⁴ <u>https://fortress.wa.gov/ecy/ezshare/NWP/Appeals/2024-3-</u> <u>4IDFSettleAgree.pdf?utm_medium=email&utm_source=govdelivery</u>

The following public notices for this comment period are in <u>Appendix A</u> of this document:

- Focus sheet
- Classified notice in the Tri-City Herald
- Notices sent to the Hanford-Info email list
- Notices posted on the Washington Department of Ecology Hanford's Facebook and Twitter pages

List of Commenters

The table below lists the names of organizations or individuals who submitted a comment on the Draft IDF Agency-Initiated Permit Modification.

No comments were received during the June 3 – July 19, 2024, public comment period.

Appendix A. Copies of All Public Notices

Public notices for this comment period:

- Focus sheet
- Classified notice in the Tri-City Herald
- Notices sent to the Hanford-Info email list
- Notices posted on Washington Department of Ecology Hanford's Facebook and Twitter pages

Integrated Disposal Facility

Agency-initiated Permit Modification

- Public comment period June 3 July 19, 2024
- Updates and modifies several Integrated Disposal Facility (IDF) Permit files.
- The proposed changes reflect changes specified within the Settlement Agreement¹.

Public comment invited

The Washington State Department of Ecology (Ecology) is proposing a change to the Hanford Facility Resource Conservation and Recovery Act Permit, Revision 8C.

This change affects the Dangerous Waste Portion for the Treatment, Storage, and Disposal of Dangerous Waste for IDF.

The permittees are:

U.S. Department of Energy (USDOE) Richland Operations Office P.O Box 550 Richland, WA 99352

Central Plateau Cleanup Company LLC P.O. Box 1464 Richland, WA 99352

Figure 1. Columbia River looking at the Hanford site

Background

The Hanford Site occupies 580 square miles in southeastern Washington State The site produced plutonium for the nation's defense program from 1943 to the late 1980s. Today, waste management and environmental cleanup are the primary missions at Hanford.

IDF is an engineered disposal site located on 202 acres of land within the south-central portion of the 200 East Area of the Hanford Site. It is designed to receive immobilized low-activity waste from the Waste Treatment and Immobilization Plant and other waste from Hanford Site operations.

The IDF is currently in a "pre-active life" status and is not permitted to receive any dangerous waste. When operational (i.e., active-life phase), the IDF will provide disposal for 19,000 metric tons of dangerous radioactive and chemical waste annually.

Overview & Changes

This permit modification will update and modify the following IDF Permit files of the final Class 3 Permit

¹ <u>https://fortress.wa.gov/ecy/ezshare/NWP/Appeals/2024-3-</u> <u>4IDFSettleAgree.pdf</u>

Modification 8C.2023.1F, in accordance with the settlement agreement:

- Unit-Specific Permit Conditions
- Addendum F (Preparedness and Prevention)
- Addendum I (Inspection Plan)
- Addendum J (Contingency Plan)

On May 30, 2023, Ecology issued a final Class 3 Permit Modification 8C.2023.1F to the IDF Permit in the Hanford Sitewide Permit, which updated all chapters of the IDF Permit and provided detailed information to support the operation of IDF. This included the addition of three dangerous waste management units: an additional disposal cell, storage pad, and treatment pad.

On June 28, 2023, the USDOE appealed the Modification 8C.2023.1F² with the Pollution Control Hearings Board (PCHB).

On March 4, 2024, a settlement agreement that is protective of human health and the environment was reached between Ecology and USDOE. On March 13, 2024, the PCHB granted USDOE's motion ³ to voluntarily dismiss the case based on the settlement between the parties.

The proposed changes have been made to these permit files to reflect the changes specified within the Settlement Agreement. Please see the Settlement Agreement (footnote 1) for the specific changes made in this proposed permit modification.

When this permit modification becomes effective, it will move IDF into the active-life phase of the facility to start receiving approved waste.

Figure 2. The Integrated Disposal Facility (Photo courtesy of USDOE)

Reviewing the proposed changes

Ecology invites you to review and comment on this proposed IDF permit modification. See the last page for comment period dates and information on how to submit comments.

Copies of the application for the proposed permit, the draft permit and fact sheet, and supporting documentation will be available during the public comment period online at Ecology's website⁴. The documents will also be available electronically at the Hanford Public Information Repositories listed on the next page.

Ecology will consider and respond to all significant comments received during the public comment period. We will document our responses and issue a response to comments document when we make our final permitting decision.

That aroma of fresh food cooking may be degrading air quality

BY GRACE TOOHEY Los Angeles Times

It's been known for years that cooking indoors can taint the air in a home and cause health problems, especially when cooking without proper ventilation.

But a new study found that emissions from cooking may degrade the air quality outdoors as well.

"If you can smell it, there's a good chance it's impacting air quality," researchers with the National Oceanic and Atmospheric Administration's Chemical Sciences Laboratory recently wrote about a new study looking at the "unrecognized and underappreciated sources of urban air pollution."

Researchers quantified the chemical compounds released when food cooks - a type of volatile organic compounds, or VOCs - along the busy, and restaurant-dense, streets of Las Vegas, finding high concentrations similar to amounts released by

GINA FERAZZI Los Angeles Times/TNS

Customers wait for tacos as AI Pastor cooks on a vertical rotisserie at a street vendor's taco stand in Fontana, Calif., on Dec. 15, 2023. A recent study looks at how emissions from cooking may degrade the air quality outdoors.

gas-powered cars.

The researchers found that "on average, 21% of the total mass of humancaused VOCs present in Las Vegas' outdoor air were from cooking activities," according to the

NOAA report.

"Twenty percent is coming from cooking, and that's about the amount that we saw coming from tailpipes," said Matthew Coggon, a research chemist at NOAA

and lead author on the study. "So basically, cooking is putting out as many volatile organic compounds as your tailpipe emissions." These compounds are

important, he said, be-

FIND. BUY. SELL.

classifieds:si-chtther

cause they are known to react with nitrogen oxide in the atmosphere to form smog, diminishing air quality. The researchers focused on data from Las Vegas, but also included testing in Los Angeles and Boulder, Colorado, according to the study, which was published last month in Atmospheric Chemistry and Physics.

"We're measuring one half of the, if you will, 'recipe' for smog formation," Coggon said. "It's an important part."

As cars have become cleaner in recent decades, Coggon and his team have been working to track down other contributors to poor air quality eventually leading them to emissions from cook-

ing. "You can pick [the aroma] up and know, 'Oh, that's a grill that's cooking," Coggon said. "But we've never really been able to quantify the volatile organic compounds that come out of that."

Until now, that is. The study found similar levels of these cooking emissions surrounding dense restaurant areas to those found in laboratory cooking studies. And extrapolating from the more

limited data set collected in Los Angeles, Coggon said he expects to see similar rates of the reactive compounds in Angelenos' air.

But there's a large caveat to the study, Coggon said, which is that researchers still aren't sure how often these compounds undergo the reactions required to form ozone or particulate matter, which can be very damaging to human health.

Nevertheless, he said, it's a safe assumption because researchers know that these compounds are very reactive. "So if something is very reactive, we expect that it will be a ozone precursor."

Coggon said research to understand the full effect of these compounds is underway.

However, each step that helps better explain the effect of cooking's emissions on the atmosphere is important, he said, so air quality regulators and policymakers can have the most accurate picture of what's driving air pollution.

Currently, "models drastically underestimate how much cooking is in the atmosphere," he said. "We can now make more informed decisions."

This project includes and is not limited to site clearing, excavation and haul, grad-ing, reconfiguring the site irrigation, outdoor area with a small amphithe ater and open space covered in artifi-cial turf, concrete sidewalks and patio, site lighting, decorative fencing, grass sod including establishment and existing tree protection.

Full notice and complete details of the

Integrated Disposal Facility Agency Initiated permit modification public comment period

The Washington State Department of Ecology (Ecology) is proposing a change to the Hanford Facility Resource Conservation and Recovery Act Permit, Revision 8C.

This change affects the Danger-ous Waste Portion for the Treatment, Storage, and Disposal of Dangerous Waste for the Integrated Disposal Fa-cility (IDF). The permittees are the U.S. Department of Energy and the Central Plateau Cleanup Company LLC. The comment period is from June 3 to July 19, 2024

Proposed changes This permit modification will update and modify the some IDF Permit files of the final Class 3 Permit Modification 8C.2023.1F, in accordance with the Settlement Agreement.

Integrated Disposal Facility Agency-Initiated permit modification

Public comment period

June 3 - July 19, 2024

The Washington State Department of Ecology (Ecology) is proposing a change to the Hanford Facility Resource Conservation and Recovery Act Permit, Revision 8C.

This change affects the Dangerous Waste Portion for the Treatment, Storage, and Disposal of Dangerous Waste for the Integrated Disposal Facility (IDF). The permittees are the U.S. Department of Energy and the Central Plateau Cleanup Company LLC.

Proposed changes

This permit modification will update and modify the following IDF Permit files of the final Class 3 Permit Modification 8C.2023.1F, in accordance with the <u>Settlement Agreement</u>:

- Unit-Specific Permit Conditions
- Addendum F (Preparedness and Prevention)
- Addendum I (Inspection Plan)
- Addendum J (Contingency Plan)

How to comment

Ecology invites you to review and comment on the proposed modification. Copies of the proposed modification are available for review online at the Nuclear Waste Program's <u>public</u> <u>comment page</u>.

Electronic copies of the proposed modification are also located at the <u>Administrative Record</u> and <u>Information Repositories</u>.

Review documents

Please submit comments by July 19, 2024. Electronically (preferred) or deliver to:
