

We are recruiting for the **Recycling Reform Act Equity Subcommittee**

We are seeking qualified individuals from community-based organizations to join the **Recycling Reform Act Equity Subcommittee**. Selected members will represent community-based organizations and diverse communities of all sizes across Washington. We expect the **time commitment to be up to 4 hours a month**.

About the Equity Subcommittee

As part of implementing the Recycling Reform Act, Ecology is establishing an Advisory Council. The law requires the council to include an Equity Subcommittee that will make recommendations regarding the impacts of program activities on socially vulnerable populations and overburdened communities. This includes ensuring accessibility of services for all residents.

The Equity Subcommittee will advise Ecology, the Advisory Council, and the Producer Responsibility Organization (PRO) on program impacts, including accessibility, language access, and equitable service design.

Ecology is committed to providing translation services and recognizes the value of lived experience. Compensation may be available to support participation from members representing overburdened communities.

About the Recycling Reform Act

The law shifts the cost and responsibility for residential recycling from residents and local governments to producers of residential packaging and paper products. This creates an opportunity to improve access, affordability, and equity in recycling services across Washington. Under the law, producers must join and fund a PRO that will finance the statewide recycling system, including material collection, transportation, sorting and processing. Learn more on the [Recycling Reform Act webpage](#).
