

Find cleanup sites at ecology.wa.gov/cleanups

Find sites on a map

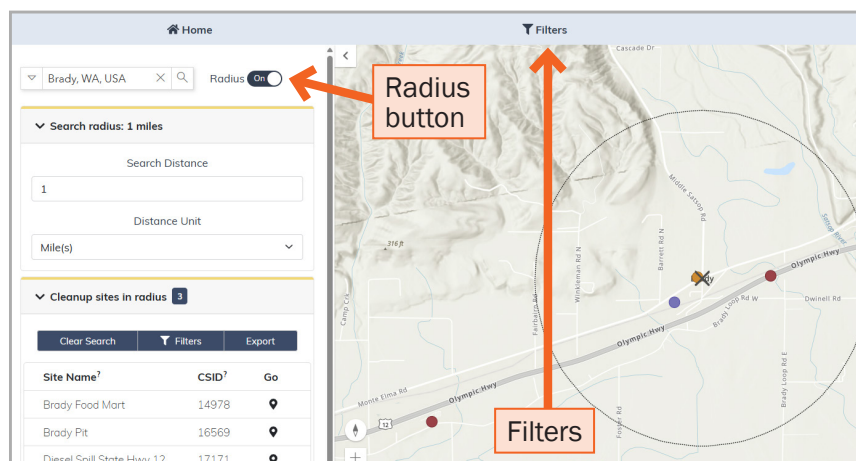

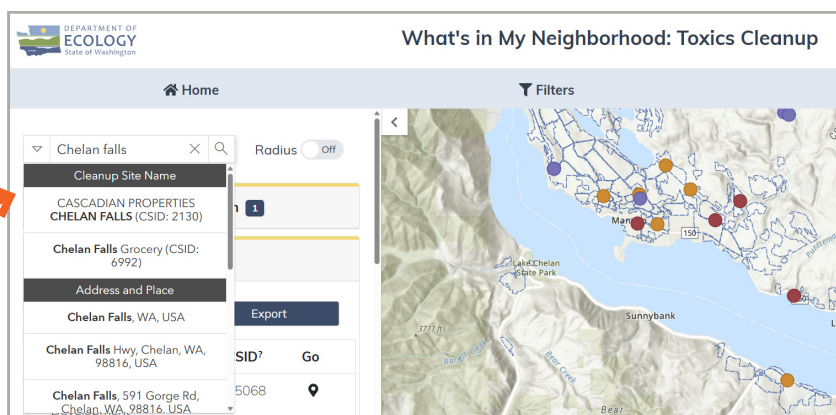

Click on **What's In My Neighborhood** to open the map.

Each dot is a cleanup site. Click a dot to see the address, status, and a link to the cleanup site page. The table under the search bar lists all the sites currently visible on the map.

Search for a single site

1. Enter a site name, address, or place in the search bar.
2. A drop-down menu will appear. Site names are listed first, then 'address and place' results. Choose a result from the drop-down to zoom to it.

Find all sites in an area

1. Move the radius slider to **On**
2. Select a search distance
3. Click on the search button (magnifying glass).

Filter, export, or share

The **filters** menu lets you narrow down results by status, contaminant, and other information. Once you have the sites you're interested in, you can **export** the list as a spreadsheet. To **share** the map search with someone else, copy the URL from your browser's address bar. The address will include all your settings, including where you zoomed in to.

Find sites with Cleanup and Tank Search

1. Start at <https://ecology.wa.gov/cleanups>.
2. Click on **Cleanup and Tank Search**. This will bring you to the list of all cleanup sites in Washington state. The list includes sites that have already been cleaned up.
3. Enter information in one or more fields.

Search tips

Cleanup and Tank Search is picky! Search terms must **exactly** match the information in our database or a site won't show up.

If you're having trouble, try:

- Using fewer search terms or only a key part of the site name.
- Removing the address number and search by street only. A large site might cover several addresses, but it will only be listed under one.
- If you know the general area, use the What's In My Neighborhood map instead. You can get to the cleanup site webpages from either tool. What's In My Neighborhood will also show nearby sites, or a site where the street name changed since we entered it in the database.

To request an ADA accommodation, email TCPwebmail@ecy.wa.gov, call 360-280-3167, or dial 711 to call through the Washington Telecommunications Relay for services like text telephone (TTY). Visit ecology.wa.gov/ADA for more information.
