

MEMORANDUM

March 17, 1975

State of
Washington
Department
of Ecology

To: Mark Primo

From: Lew Kittle

Subject: Analyses of Aquatic Growth in Kent-Highlands Landfill
and Mason Creek.

The three (3) samples from the Kent-Highlands Sanitary Landfill contained approximately 80% Sphaerotilus bacteria, 10% Leptomitus fungi, and 10% miscellaneous algae and detrital material.

The samples from Mason Creek contained approximately 95% Sphaerotilus bacteria and 5% miscellaneous algae and detrital material.
