Subject: Notification that WDOE Project No. 3 ("Routine Monitoring of Major Point Sources") for the Commencement Bay Nearshore/Tideflats Investigation is Completed

Data on priority pollutants/hazardous substances, TOC, TSS, specific conductivity, pll, and flow in 28 discharges to Commencement Bay collected by Dale Norton September 1983 to May 1984 have now been transmitted to Tetra Tech, Inc. for inclusion in the project data base. Data on 11 source-related sediment samples were included. One hundred ten individual priority pollutant samples were analyzed for this project. A list of the samples collected and a map showing the locations of these discharges are attached.
