

Vessel Entries And Transits for Washington Waters

VEAT '96

OVERVIEW

This **Vessel Entries And Transit**—"VEAT"—data is offered by the Washington State Office of Marine Safety (OMS) in response to public requests for information about vessel traffic in Washington waters. The data identifies vessels regulated by OMS only. These include:

- Cargo and passenger vessels 300 gross tons and larger; and
- Tank ships and tank barges of any tonnage.

Thus, the data may not match sources characterizing other vessel populations. **VEAT** lists data by vessel destination and vessel type, and does not reflect specific products or commodities transported or delivered.

TERMS AND DEFINITIONS

C & P

Cargo and passenger vessels 300 gross tons or larger.

TANK SHIP

A motor driven tank vessel of any gross tonnage, engaged in the transport of crude oil, refined petroleum products, or chemicals. See next column for detailed description of how tankers are classified and counted for this report.

ENTERING TRANSIT

The passage of a vessel from sea or Canadian waters into Washington State waters, regardless of destination. The trip back to sea is not counted. A vessel may be credited with multiple entering transits over a specified period, such as a calendar year.

Entering transits on the Columbia River that call at a Washington port *and* an Oregon port during a single voyage on the Columbia River are counted as an entering transit bound for a Washington port.

INDIVIDUAL VESSEL

A vessel counted only once within a specified time period (such as a calendar year), even if the vessel calls in Washington State waters more than once during the specified time period.

TANK BARGE

A barge of any tonnage, engaged in the transport of crude oil, refined petroleum products, or chemicals.

TANK BARGE TRANSIT

Any move between two locations, via Washington State waters, while transporting crude oil, refined petroleum products, or chemicals.

FERRY

Any ferry boat of 300 gross tons or larger operating in Washington State waters. Ferries with a fuel capacity of fewer than 6,000 gallons are not regulated by OMS even if they are 300 gross tons or larger. There were no ferries of 300 gross tons or larger operating on the Columbia River or in Grays Harbor/Aberdeen in 1996.

TANK SHIP CLASSIFICATION IN VEAT

CHEMICAL TANKERS

Chemical tankers are counted as petroleum tankers because tankers capable of transporting chemicals are equally capable of transporting petroleum products. Chemical tankers are included in the tank ship section of VEAT, items 10-18.

EDIBLE OIL TANKERS

Edible oil tankers are counted as petroleum tankers because edible oil tankers are capable of and certified to transport petroleum products. Most edible oil tankers are included in the tank ship section of VEAT, items 10-18. However, edible oil tankers that hold long-term oil spill prevention plan waivers because they exclusively transport non-petroleum products, are counted as dry cargo vessels and are included in the cargo and passenger section of VEAT, items 1-9.

LNG, LPG, AND LG TANKERS

Liquefied Natural Gas (LNG), Liquefied Petroleum Gas (LPG), and Liquefied Gas (LG) tankers are counted as bulk cargo carriers. These specialized vessels are not certified to transport conventional petroleum products or chemicals. Some examples of these products are: LNG (methane), LPG (propane), and LG (anhydrous ammonia). LNG, LPG and LG tankers are included in the cargo and passenger section of VEAT, items 1-9.

O/B/O VESSELS (OIL/BULK/ORE)

O/B/O vessels are multi-purpose tanker/bulkers that are certified to transport petroleum products and chemicals. O/B/O vessels are included in the tank ship section of VEAT, items 10-18.

TANKERS BOUND FOR SHIPYARDS

Tankers bound for shipyards for repair and routine maintenance are required to be empty, clean, and gas free. Since these vessels are not transporting petroleum products or chemicals, they are included in the cargo and passenger section of VEAT, items 1-9.

TANKERS BOUND FOR LAY-UP

Tankers bound for lay-up are required to be empty, clean and gas free. These vessels are included in the cargo and passenger section of VEAT, items 1-9.

FISHING VESSEL CLASSIFICATION

COMMERCIAL FISHING VESSEL

Any commercial fishing vessel of 300 gross tons* or larger including: trawlers, seiners, purse seiners, longliners, crabbers, ground fishers, scallopers, etc.

FACTORY FISHING VESSEL/FISH PROCESSOR

Any commercial factory fishing vessel or fish processor of 300 gross tons or larger "that commercially prepares fish or fish products other than by gutting, decapitating, gilling, skinning, shucking, icing, freezing, or brine chilling." [USCG definition contained in *Federal Requirements for Commercial Fishing Industry Vessels*.]

FISHING VESSEL DATA COLLECTION

PREVIOUS DATA

Vessel Entry and Transit Data for Washington waters has been collected by OMS for four years. Fishing vessel data has been calculated for three years. To obtain copies of VEAT '93, VEAT '94, or VEAT '95, please contact OMS.

NOTE: All data in this publication are for calendar year 1996.
