

WATER RESOURCES PROGRAM

Showing of Compliance with RCW 90.44.100(3)

Water Right Certificate or Permit Number: _____

Parcel tax identification number: _____

County: _____

Landowner(s)
name: _____

Lat.Long. of well: **Original:** _____

New: _____

To amend the associated water right permit or certificate when drilling an additional or replacement well, you must submit this signed form with supporting documents to the Department of Ecology to affirm that you have met the statutory criteria of RCW 90.44.100(3). Please attach the water well report for the new well and any other information you have to support this affidavit.

Affidavit:

I, _____, do certify that the well described in the attached water well report has been drilled as an additional or replacement well for use under Water Right Number _____. This notice and attached documents describe and support my assertion that the replacement or additional well complies with RCW 90.44.100(3) (a-g) and RCW 90.44.100(4):

Please check one:

- This is an additional well (Attach well report)
- This is a replacement well (Attach well report for new well & Decommissioning Report for old well)

Please confirm the following:

- a. The new well(s) tap the same body of public groundwater as the original well.
- b. If a replacement well was constructed, the original well(s) have been properly decommissioned.
- c. The combined withdrawal of water from all wells is not greater than that authorized by the water right, and, if certificated, maintained by regular use of water (i.e. no increase in total instantaneous (Qi) or annual (Qa) withdrawals).
- d. The construction and use of the new well(s) does not interfere with or impair water rights with an earlier priority date.
- e. The new well(s) is located no closer than the original well to a well or surface water body with which it might interfere.
- f. The new well was constructed in compliance with chapter 18.104 RCW and chapter 173-160 WAC, as well as any other conditions specified.
- g. The new well(s) is located within the area described as the point of withdrawal in the most current legal description published for the right.

Therefore the well is in compliance with the requirements for a statutorily granted amendment to the water right permit or certificate.

I understand that the Department of Ecology accepting this affidavit and attachments does not affirm the validity of any water right permit or certificate. The responsibility to comply with RCW 90.44.100(3) is with the water right permit or certificate holder asserting an amendment pursuant to RCW 90.44.100(3).
