

Industrial Stormwater General Permit Discharge/Sample Update Form

Permit No. WAR-
Facility Name:
County:

Use this form to add, remove or change discharge and/or sample points at your facility, or update receiving water information. Attach extra sheets of paper if necessary.

I. Discharge/Sample Point Info

Discharge point(s)

- **Discharge Identifier:** List the name, number, or letter used on the map to identify the point(s) where stormwater is discharged off-site. The identifier may be a maximum of three characters long and must be unique for each discharge point.
- **Latitude/Longitude:** Provide latitude and longitude. For assistance with latitude/longitude, use the following website: [iTouch Map Lat/Long Tool](http://itouchmap.com/latlong.html) ¹.
- **Description:** In the Description column, provide a brief description of the discharge point (e.g., Catch Basin #1).
- **Indicate which discharge points you collect stormwater samples from by checking the "SP" (sample point) box.**
- **New or Removed?** For each discharge point listed, indicate the status. If you are *changing* a discharge/sample point to a new location, list the old point in one row of the table (indicate "R"), and list the new point in another row on the table (indicate "N"). Assign the new point a different Discharge Identifier than what you used previously for the removed point.
- **Associated outfalls:** The outfall is the location where the discharge ultimately enters a receiving waterbody (e.g., creek, river, bay, etc.), typically after passing through a ditch and/or municipal storm drain system. Most facilities have one discharge point they sample and will have only one outfall. This column is for facilities with multiple discharge points.
