Disclaimer

Ecology has reviewed the criteria used by the third-party certifiers that these manufacturers claim have confirmed that their cosmetics do not contain certain toxic ingredients. Based on Ecology's review of the third parties' testing criteria, Ecology believes it is likely the cosmetics on the eligible products list do not include intentionally added toxic substances in violation of Washington's Toxic Free Cosmetics Act or certain equally toxic common substitutes for the prohibited chemicals. However, Ecology cannot guarantee the accuracy of the certifications or that the products are safe for all people and for all purposes.
