## FOREWORD

The first concerted effort by the State of Washington to inventory its ground water resources was begun in 1945 after the legislature had passed the State Ground Water Code which brought drilling of wells and appropriation of ground water under the general administrative procedures applicable to surface waters. At the start, the Division of Hydraulics, now Division of Water Resources, entered into a cooperative agreement with the Ground Water Branch of the U. S. Geological Survey. Under the agreement, the State and the Federal Government would provide funds on a 50-50 matching basis; the funds to be used by the Geological Survey for geo-hydrologic studies of certain areas selected jointly by the Division of Water Resources and the Geological Survey.

As the geologic mapping and basic data collection program was expanded, emphasis of relying entirely upon Geological Survey personnel was changed to include use of Division of Water Resources staff geologists in the overall geo-hydrologic mapping program.

"Geology and Ground Water Resources of Thurston County", Volume I is the first county-wide ground water report prepared entirely by State personnel. We, of the Division of Water Resources, were pleased with the results of the Thurston County report which also received favorable acceptance by our cooperator, the U. S. Geological Survey.

It is felt that the matching service program should be a continuing part of our cooperative program with the Geological Survey. Such a program will permit a more efficient assignment of cooperative work and reduce the overall cost of the ground water inventory to both the State and the Federal Governments and will permit more thorough training of State personnel in the increasingly complicated field of water resource management. It is hoped that the matching service program can be increased commensurate with future acceleration of our ground water program.

Volume I of the Geology and Ground Water Resources of Thurston County was prepared to assist city and county planners, Soil Conservation Service personnel, farmers and other individuals and agencies with the orderly and complete development of the county's ground water resources and to serve as a reference for all agencies or individuals interested in the geology of the Puget Sound Basin. Volume 2, scheduled for release in 1962, will contain a thorough description of the geology of Thurston County and its effect upon the hydrology.

Everything possible has been done to assure the completeness and accuracy of the data presented herein.

-Robert H. Russell  
Assistant Supervisor  
Division of Water Resources

---

INTRODUCTION

Purpose and Scope of the Investigation

This investigation was made by the Division of Water Resources of the Washington State Department of Conservation as part of a continuing program for the collection and interpretation of basic data concerning the ground-water supply of the State of Washington. It was made in cooperation with the Ground Water Branch of the U. S. Geological Survey for the purpose of providing an inventory to aid in the development and administration of the ground-water resources. The investigation was started in November, 1957. Field work was conducted by the writers during parts of 1958, 1959 and 1960.

The basic data in this volume pertaining to Thurston County are released at this time so that they may be used by those concerned with the development and use of ground water. A second volume describing the geology and hydrology of the area is scheduled for future release.

The investigation was made under the general direction of Murray G. Walker, Supervisor, Division of Water Resources and P. E. LaMoreaux, Chief, Ground Water Branch, U. S. Geological Survey and under the direct supervision of Robert H. Russell, Assistant Supervisor, Division of Water Resources and A. A. Garrett, District Engineer of the Ground Water Branch of the Geological Survey.

Ground-water conditions in two areas within Thurston County have been studied by the U. S. Geological Survey. In 1947, Schlax reported on a portion of southwestern Thurston County and in 1951, Mundorff and others (1955) described conditions in the Yelm area. The basic well data included with these reports are reproduced here. However, to avoid a duplication of the earlier effort, field work in these two areas was held to a minimum. Although all important wells drilled since completion of the older reports were inventoried, those that were in existence during the period of the earlier studies were only spot-checked.

Location of wells were originally plotted directly on topographic maps (scale 1:62,500) in the field and later were transposed to a base map of the entire county.

/See page 20 for list of references.

### Location and Extent of the Area

Thurston County is in western Washington at the southern end of Puget Sound (pl. 1). The total area of the county is approximately 717 square miles, which lies within Tps. 15 to 20 N. and Rs. 4 W. to 3 E. of the Willamette base line and meridian.

The county is bounded on the east by the Nisqually River, which separates it from Pierce County. Many narrow inlets of Puget Sound form most of the irregular northern boundary, and the short straight part of this boundary at the northwest corner of the county joins Mason County. The county is adjoined on the west by Grays Harbor County and on the south by Lewis County.

Olympia, the county seat and State Capitol, is in the north-central part of Thurston County. It is the largest city in the county; in 1960 it had a population of 18,057. Olympia is 30 miles southwest of Tacoma, 60 miles southwest of Seattle and 120 miles north of Portland, Oregon.

Although this investigation is intended to include the entire county, most of the field work was done in the lowland portions since most of the upland areas are undeveloped and very little data are available for them.

### Well-Numbering System

In this report wells are designated by symbols that indicate their location according to the official rectangular public-land survey. For example, in the symbol 18/1-5M2, the part preceding the hyphen indicates successively the township and range (T. 18N., R. 1E.) north and east of the Willamette base line and meridian. Because the State lies almost entirely within the northeast quadrant of the Willamette base line and meridian, the letters indicating the directions, north and east, are omitted, but the letter "W" is included when the range lies west of the Willamette meridian. The first number following the hyphen indicates the section (sec. 5), and the letter (M) indicates the 40-acre subdivision of the section, as shown in the accompanying diagram.

The last number is the serial number of the well in the particular 40-acre tract. Thus, well 18/1-5M2 is in the NW $\frac{1}{4}$ , SW $\frac{1}{4}$ , Sec. 5, T. 18N., R. 1E., and is the second well in the tract to be listed.

Acknowledgments

The field work for this report was facilitated by the outstanding cooperation of the many well owners, tenants and well drillers who supplied information and allowed access to the wells. Personnel of the Ground Water Branch of the U. S. Geological Survey have been very helpful in providing procedural suggestions and other valuable information. The assistance of all is greatly acknowledged.

The writers owe a personal debt of gratitude to M. B. Patterson, who has given freely of his time and extensive knowledge of the ground-water conditions in Thurston County.

## GEOGRAPHY

Thurston County lies within the Puget Trough section of the Pacific Border physiographic province (Fenneman, 1931, p. 442-447). The Puget Trough is a long northward trending lowland between the Cascade Mountains on the east and the Coast Range on the west, and it extends from the central part of western Oregon into Canada. Except for numerous scattered "islands" of older consolidated rocks, the entire basin has been partly filled with unconsolidated fluvial and glacial materials of Pleistocene age.

Surface Features

Thurston County is predominantly a drift-covered glacial plain rimmed on the western, southern and southeastern sides by low-lying, maturely dissected hills underlain by deposits of Tertiary age.

The surface features are largely a product of glaciation by an ice sheet moving from the north during Pleistocene time. The surface has had a rather complex development which will be fully discussed in Volume II of this report. The Tertiary, or pre-Pleistocene, hills served an important role in determining the route taken by the advancing ice sheet as it moved southward; additionally, in the southern part of the county, these hills served as an important barrier against which the ice mass terminated in many places. Elsewhere, the terminus of the glacier cannot readily be determined because of the contiguity of the true glacial drift with the pro-glacial outwash materials. The physiographic map (pl. 1) provides a generalized sketch of the principal topographic features throughout the county.

Drainage

Thurston County is drained by five major streams, in addition to several small streams which flow directly into Puget Sound. The five major streams are described below in order from east to west. Of the five, the most easterly two flow into Puget Sound; waters of the other three are discharged into the Pacific Ocean.

The Nisqually River, which is the most easterly of the five major streams,

bounds the county on the east and is fed by glaciers on the south flank of Mount Rainier. It flows in a northwesterly direction into Puget Sound at a point about ten miles northeast of Olympia. The Deschutes River, rising in the hills of Tertiary rock southeast of Yelm, roughly parallels and is five to ten miles southwest of the Nisqually River, flows into Puget Sound at Olympia. The Skookumchuck River, which heads in the Bald Hills of Thurston and Lewis Counties, drains most of the Tertiary hills in the southcentral portion of the county south of the Deschutes drainage area. After its entrance into the county, the Skookumchuck flows along a circuitous route westerly to Bucoda and then turns sharply to flow southwesterly to its confluence with the Chehalis River just west of Centralia in Lewis County.

The Chehalis River flows northwesterly from Centralia and crosses the southwestern corner of Thurston County where it drains the Michigan Hills area and received water from Prairie Creek and Scatter Creek. The Chehalis discharges into the Pacific Ocean at Grays Harbor.

The Black River, like the Skookumchuck, is also tributary to the Chehalis River. The Black River drains a large portion of the easternmost Black Hills and much of the prairie area east of the river. The fall of the Black River is not great enough for effective drainage, and consequently marshy areas occur through most of its course. Its confluence with the Chehalis is about one and a half miles southeast of Oakville in Grays Harbor County.

#### Altitude

In altitude Thurston County ranges from sea level along Puget Sound to 2,984 feet near the southern boundary of the county. However, the glaciated region rarely exceeds 600 to 700 feet in altitude and most of the prairie areas range from 100 to 500 feet.

#### Geologic Setting

Throughout the Tertiary period the Puget Sound region was characterized by many changes in base level. The land and water areas were constantly shifting and deposition of sediments occurred alternately in fresh, brackish, and salt water.

During early Tertiary time, lava flows originating both from fissures in the region and from volcanic cones in the surrounding area were commonplace, and accumulated to great thicknesses. At least in the southern Puget Sound region, a relatively quiet period followed the period of major volcanic activity. During the period of relative quiet, thousands of feet of sedimentary materials were deposited. However, there was still considerable shifting of sea level and some volcanic activity, as indicated by continental and marine sediments with interbedded lava flows in some localities.

During late Miocene time these formations were deformed into large northwest-trending folds, which produced the ancestral Cascade Mountains. Erosion reduced these considerably during early to middle Pliocene time. Then, near the close of the Tertiary period, deformation again occurred, producing a large north-

trending arch that forms the present Cascade Mountains. The Puget Trough and the Olympic Mountains are also believed to have been brought into existence at that time (Sceva, 1957, p. 27). Contemporaneous with, and following, the late Tertiary deformation, streams cutting downward into the uplifted mountains deposited coarse gravels, which extended from the mountains to the lowlands. The deposition of these gravels extended well into the Pleistocene epoch.

During Pleistocene time, the climate had become progressively colder and the northern ice fields and mountain glaciers increased in size and extended to lower altitudes. Ultimately, the glaciers covered most of the Puget Trough north of Tenino in Thurston County. The last major glaciation which took place in Vashon time, is responsible for most of the present day topography of Thurston County and adjacent areas. It is also of prime importance in an evaluation of ground water in this area.

However, it should be mentioned that the glaciation of Vashon age apparently was not the only major glaciation in the Pleistocene epoch. Previous workers have suggested that there were from two to four glaciations with definite erosional and (or) depositional intervals between them. Willis (1898) described deposits of two Pleistocene glaciations and one interglacial interval in the Puget Sound lowland. One or more additional Pleistocene stages have been recognized by other workers, but their relationship to Willis' sequence has been uncertain. However, in the latest mapping of a part of the Tacoma 30-minute quadrangle in the southeastern part of the Puget Sound lowland, which includes sections designated by Willis as typical of certain formations, Crandell and others (1958) have indicated that the Pleistocene deposits record at least four glaciations separated by nonglacial intervals. Because of the variance in opinion regarding the number of glaciations and terminology, and the question of occurrence of the various glacial deposits in Thurston County--except for the Vashon glaciation--it is thought best to omit a discussion of glacial history here. A full discussion will be presented in Volume II after the geology of the entire county has been mapped.

Since the last recession of the Vashon glacier, the area has been subjected to a period of deposition and erosion resulting in Recent partial filling of the Pleistocene valleys and seaways and cutting of the post-Pleistocene valleys and canyons.

## ROCK UNITS AND THEIR WATER-BEARING CHARACTER

The rocks of Thurston County are separated into two groups which differ markedly in age, lithology, and in general water-bearing character. In the following sections, a generalized discussion of the various rocks is presented.

### Consolidated Rocks of Tertiary Age

The oldest rocks known in the county are of Tertiary age. These rocks are chiefly marine and non-marine siltstone, claystone, and sandstone interbedded with rocks of volcanic origin. The Tertiary sedimentary rocks are for the most part moderately hard and compact. Locally, however, the siltstone and claystone

## 6      GEOLOGY AND GROUND-WATER RESOURCES, THURSTON CO., WASH.

are rather soft and are very susceptible to sliding and slumping. These rocks generally have a low permeability and consequently are very poor aquifers. At places where the materials have been deeply weathered, dug wells usually supply enough water for household use.

Relatively few attempts have been made to drill wells into the Tertiary rocks for the following reasons: 1. In those upland areas where Tertiary materials are near the land surface, there has been little need for water; dense vegetal cover and roughness of terrain has precluded residential development. 2. The small yields obtained from Tertiary rocks in general, together with reports of poor water quality have discouraged large-scale development.

With further exploration, moderate supplies might be obtained from the Tertiary sandstone or fractured zones in the volcanic rocks. However, as of 1960, the writers have no knowledge of any wells of large yield drilled into these materials in Thurston County. A few shallow domestic wells are reported to bottom in materials of Tertiary age in the area adjacent to McIntosh Lake on its north side. However, no well logs or records of perforated interval are available for any of them and for that reason the extent to which rocks of Tertiary age contribute to the yield of these wells is unknown. On the basis of available evidence, it appears that rocks of Tertiary age are relatively unimportant as aquifers.

### Rocks of Pleistocene Age

#### Logan Hill Formation

According to Mundorff and others (1955, p. 6), the earliest deposits of Pleistocene age known in Thurston County are considered to be a part of the Logan Hill formation in Lewis County. This formation crops out chiefly as rusty, cemented gravel which is greatly decayed and stained. The gravel particles are so soft they can be cut with a pocket knife.

The formation, as it has been observed in Thurston County, is relatively impermeable and unimportant as an aquifer. The lateral extent of this formation in Thurston County will be ascertained by geologic mapping. In Lewis County, the lower portion of the Logan Hill formation yields a moderate amount of ground water, although it is usually somewhat high in iron content. There, however, wells have been developed only where the formation is as much as 100 to 150 feet thick; it is not thought to be that thick in southern Thurston County. No wells are known to obtain water from this unit in the county.

#### Pre-Vashon Glacially Derived Deposits

As mentioned previously, the history of the Pleistocene deposition from Logan Hill time to Vashon time is somewhat in doubt, but at least in the Yelm area, there is evidence of pre-Vashon glacial deposits. There, Mundorff and others (1955, p. 7) describe these materials as compact sand, gravel, and till, and occasional lenses of clay. A greater degree of induration, more intensive weathering and a different lithology distinguish these strata from the overlying Vashon drift. They attribute deposition of these materials to mountain glaciers

and infer that the strata may be several hundred feet thick. Very few, if any, wells have penetrated these deposits.

There is considerable clay throughout at least the upper portion of this unit resulting largely from alteration and weathering, and this feature has resulted in low porosity and permeability. Thus, the upper portions of these strata do not readily yield water and they also impede percolation of water to the deeper and possibly more permeable zones. The water table almost everywhere is above the top of the pre-Vashon glacial deposits in the Yelm area. At depth in these deposits, alteration and cementation have been less, so that moderate to large supplies may be obtained from them. However, at many places the shallower aquifers above the pre-Vashon deposits yield abundant supplies of water; so there has been no need for extensive development of the pre-Vashon aquifers.

In other sections of the county, there are undoubtedly other pre-Vashon glacially derived materials; Bretz (1913, p. 29) described a decomposed and stained drift of much greater age, overlain by Vashon till, exposed in railroad cuts between Rocky Prairie and Little Rock, in the southcentral part of the county (pl. 1). In northern Thurston County the materials are finer grained, for the most part, and contain more clay-size particles intermixed with the sand and gravel. Blue clay, which is very similar to that described as Admiralty (Bretz, 1913), crops out along some of the wave-cut bluffs in the northern part of the county. No attempt was made in this volume to designate names or stratigraphic positions of these sediments. It is pointed out that numerous deep wells in the northern portion of the county, especially along the beaches, yield excellent supplies of water under artesian pressure. The major aquifers tapped by these wells generally are fine grained and in many cases probably are pre-Vashon in age.

#### Vashon Drift

Most of the surface deposits in Thurston County consist of sand, gravel, and till of the latest glaciation. The materials are relatively fresh and unaltered. In addition to their fresh appearance, an outstanding and distinctive feature is the presence of a considerable quantity of pebbles, cobbles, and boulders that have a composition that is either uncommon or entirely foreign to the surrounding area. These deposits were named the Vashon drift by Willis (1898, p. 126) and are shown on the geologic map of the Tacoma Quadrangle published by Willis and Smith (1899). They were shown by Bretz (1913, p. 61-80) to mantle much of the Puget Sound lowland from the Canadian border to Centralia.

The Vashon drift was deposited both by the ice and as outwash from a great tongue of ice extending southward from ice fields in Canada and northern Washington. The tongue may have been fed partially by glaciers both to the east and to the west of Puget Sound.

Advance outwash. --As the ice moved southward, large quantities of sand and gravel were deposited by meltwater at the front and sides of the ice mass. These deposits consist typically of poorly-sorted to moderately well-sorted, well-rounded gravel in a sandy matrix, interbedded with lenses of sand. The materials have a fresh, unweathered appearance and are generally moderately to very permeable. In the Yelm area advance outwash has been observed unconformably overlying the pre-Vashon deposits, and it is usually overlain by either till or reces-

sional outwash.

The advance outwash, which is composed predominantly of permeable sand and gravel, is one of the most productive aquifers in the county.

Till. -- Till, deposited directly by the ice, covers more of the Puget Sound lowland than does any other unit. At most places, the till is readily recognizable because of its characteristic appearance. Unweathered, it is a grey to light-bluish-grey concrete-like mixture of clay, silt, sand, pebbles, cobbles and boulders. Typically, silt predominates, and the spacing of pebbles and cobbles is similar to that of raisins in raisin bread. The whole aspect is one of toughness and compactness. The till is subglacial and was deposited as a sheet at the base of the ice, and when deposited it formed a mantle covering the pre-ice surface.

Although the till is of low permeability and restricts or greatly impedes the downward percolation of water, small supplies of perched ground water can sometimes be obtained from it under favorable conditions. Water is yielded mostly from cracks or permeable sandy streaks and zones within the till. Wells tapping permeable zones in till cannot generally be relied on to provide large supplies. Under normal conditions water levels in such wells will be very low by early fall and will remain low until the perched zones are recharged by winter rains.

The most successful wells that develop water from till are large-diameter dug wells that afford a large infiltration area and a large storage volume. Till is not an important aquifer in Thurston County because of the limiting factors cited above; it does, however, supply many individuals with water for domestic use.

Recreational outwash. -- The sand and gravel that were deposited by glacial meltwater streams during the recession of the glacier to the north are referred to as recessional outwash deposits. At a few places, where water was ponded by irregularities of topography or by blocking of the drainage with ice, sand and silt were deposited. Except for these silt and sand deposits, the recessional outwash materials generally were laid down rapidly by swift, overloaded streams. Hence, the degree of sorting is variable and stratification is fair at best and great lateral variation is commonplace. Beds commonly are very lenticular; they pinch out within short distances.

Although poorly sorted, the outwash is moderately permeable. Consequently, where favorably situated, moderate to large supplies of water can be withdrawn from these materials. For example, in an area where the recessional outwash has filled a depression that is underlain by till, conditions are favorable for ground-water development. The recessional outwash is a productive aquifer in Thurston County, but owing to its stratigraphic position relative to the other units, it is susceptible to contamination in areas of extensive development. Also, in many areas the recessional outwash lies above the regional water table, a feature which further limits its utilization as an aquifer.

#### EXPLANATION OF DATA

The data collected in the Thurston County area are presented chiefly in tabular form on the pages that follow. They were collected not only during this investigation but also during the two earlier investigations already cited.

Location of Wells

The locations of all wells for which data are available are shown on plate 2. The township and range are given on each page, and only the portion of the well number that indicates the 40-acre tract and the serial number of the well within that particular 40-acre tract is shown along the left side of the line entries.

Records of Wells

Table 1 contains records of most of the municipal, irrigation, and institutional wells and a representative sampling of domestic and community supply wells. Although most of the records tabulated were gathered in 1958 and 1959, records from the two reports previously mentioned are included as well. Those extracted from the Preliminary Report on Ground Water Resources of the Central Chehalis Valley, Washington by Schlax (1947) are preceded by a single asterisk (\*), and those taken from the report Ground Water in the Yelm Area, Thurston and Pierce Counties, Washington by Mundorff and others (1955) are preceded by a double asterisk (\*\*).

Altitudes of land surface at wells were obtained primarily by interpolation from topographic maps so that the degree of accuracy necessarily varies with the contour interval that was available on the various quadrangle sheets. Most altitudes probably are accurate to 50 percent of the contour interval.

Most of the information in Table 1 is based upon reported data obtained from the owners, drillers, or users of the wells. For some wells, such as those with water rights, written records were available; but for the majority of the domestic wells, the information obtained was recorded from people's memory and is subject to error. Water-level measurements expressed in feet and decimal fractions of feet were made either by a member of the staff of the Division of Water Resources or Ground Water Branch of the U. S. Geological Survey.

The written records of water levels submitted by drillers have been placed in the reported class, not because of inaccuracy, but because they are many times approximated to the nearest foot; and even when accurately measured to the nearest tenth (0.1) of a foot, the measuring point is not generally indicated. Consequently, the exact distance of the water level below land surface cannot be ascertained. All measurements recorded to the nearest whole foot were reported by owner, tenant, or driller.

The column in the tabulation headed "Remarks" gives the reader additional information which might be helpful in evaluating a specific area for general availability and quality of water. Much of this information is reported; consequently, it should be evaluated on a relative basis. For example, the remark that the water from a given well is "rusty" or has a "high iron content" does not necessarily mean that the iron content is above the normal limitation of 0.3 parts per million, but only that the water might stain fixtures to some extent or may be harder than the owner has been used to.

Many of the pumping rates listed in the "Remarks" column would be inconclusive for exacting studies of certain areas, but they do provide a rough estimate of the yield one can expect from wells in a given area.

The data from the two previous studies have been retabulated to conform as

closely as possible to the general form of the complete report without undue alterations. In cases where the data were doubtful, they were omitted from this report.

### Hydrographs

Hydrographs showing water-level fluctuation in 12 selected observation wells are presented in figures 1 to 3. Figures 1 and 2 include 2-year records for 10 wells, and figure 3 presents a 10-year record for each of 2 wells that have been measured as part of a state-wide network of observation wells.

Numerous water-level records are available in the files of the Division of Water Resources in Olympia. A list of wells from which these records were obtained and the duration of the measuring period is presented in the following table.

Well Number	Period of Record	Number of Measurements
16/1W-9B1	2/27/58 to 10/2/58	8
16/2W-7H1	2/14/58 to 10/2/58	8
18/1E-8K1	11/19/57 to 7/1/58	6
18/1E-17E2	11/20/57 to 5/7/58	3
18/1W-20R4	4/10/58 to 8/11/58	5
18/1W-21B2	4/9/58 to 7/1/58	4
18/1W-22A2	3/4/58 to 6/3/58	3
18/1W-26B2	2/24/58 to 7/1/58	5
18/1W-28Q2	3/18/58 to 10/1/58	7
18/1W-32D1	4/3/58 to 8/11/58	5
18/1W-35C1	2/25/58 to 6/3/58	4
18/1W-36F1	2/24/58 to 5/7/58	3
18/2W-13J1	6/25/58 to 5/27/59	12
18/2W-25A1	6/19/58 to 10/1/58	4
19/1W-5H1	7/3/58 to 7/1/59	12
19/1W-28B1	7/3/58 to 7/1/59	13
19/2W-16J2	7/8/58 to 11/2/59	17
19/3W-25M1	7/11/58 to 1/7/59	7
19/3W-25N1	7/11/58 to 1/7/59	7
19/3W-27L1	7/11/58 to 1/7/59	7

In addition to the wells listed above partial records for 11 wells in T. 17N., R. 2 E. were published in the report on the Yelm area by Mundorff and others (1955). Also, as part of the state-wide network of observation wells, miscellaneous measurements of levels in five wells have been published in Water Supply Papers of the U. S. Geological Survey. A description of these wells, with references, is presented below.

- 1.) 15/3W-13D1. L. W. Johnson (formerly J. T. Hagerty). Records available: 1947-50. Water-Supply Papers 1100, 1130, 1160 and 1169.

## EXPLANATION OF DATA

11

- 2.) 16/2E-17D1. Roy C. Hansen. Records available: 1951-55. Water-Supply Papers 1269, 1325 and 1408.
- 3.) 16/2W-29E1. Ed Poore (formerly U. S. Army). Records available: 1947-53. Water-Supply Papers 1100, 1130, 1160, 1169, 1195, 1225 and 1269.
- 4.) 16/3W-29N1. Chas. F. Norrie. Records available: 1947-54. Water-Supply Papers 1100, 1130, 1160, 1169, 1195, 1225, 1269 and 1325.
- 5.) 17/1E-14A1. W. R. Simcox. Records available: 1951-55. Water-Supply Papers 1269, 1325 and 1408.

In conclusion, it is pointed out that water-level measurements for the 10 wells whose hydrographs are shown in figures 1 and 2 will be continued until completion of Volume II of this report. In that volume the fluctuation of water levels throughout the county will be discussed in detail.

### Chemical Analyses of Water From Wells

Chemical analyses of ground water samples collected during this and earlier investigations are presented in tables 2, 2A, 2B, and 2C.

Table 2 presents analyses of water samples taken during the summer of 1958 by a representative of the Division of Industrial Research, Washington State University, and by a member of the Division of Water Resources. Analyses for dissolved oxygen, carbon dioxide, pH, electrical conductivity, and total hardness were made in the field as soon as the water samples were taken. The samples were then taken to the Division's Chemistry Laboratory at Pullman, Wash., where complete chemical analyses were performed. These data were published in the Washington State Institute of Technology, Bulletin 235, Supplement A, entitled Water Resources of the State of Washington, (Adams, 1960). In preparing the material for presentation in table 2, no significant changes have been made other than some conversions which were necessitated in order to standardize these data with those presented in the other tables.

Table 2A presents analyses of water samples by the Quality of Water Branch of the U. S. Geological Survey and the writer during late 1959 and 1960 as part of a state-wide program on quality of water. Temperatures of the samples were taken at the time they were collected.

Table 2B presents partial chemical analyses of water samples collected and analyzed by the Division of Water Resources. The depth of the well has been included in this tabulation.

Table 2C presents partial chemical analyses of water samples made available through the two existing reports previously cited. These samples were analyzed by the Ground Water Branch of the U. S. Geological Survey.

### Materials Penetrated by Representative Wells

Well logs in table 3 are based on records obtained from drillers or owners of the wells. A major portion of these records were made at the time of drilling,

## 12 GEOLOGY AND GROUND-WATER RESOURCES, THURSTON CO., WASH.

but some of the records were reported from memory. The records were edited for consistency of presentation but were not changed otherwise.

The description of some materials encountered varies considerably with the background of the driller or owner of the well. For example, tight gravel and clay may be termed "cemented gravel," "hardpan," or in some cases even "bedrock"; compacted sand may be "sandstone" or "sand"; cobbles and boulders sometimes are referred to as "rock". Also, "blue clay" variously indicates blue, blue-gray, or gray claystone, silt, siltstone, shale or clay. Any fine-grained sand that is saturated is referred to by some persons as "quicksand" regardless of whether or not it is "quick".

Tentative stratigraphic designations have been indicated on many of the well logs. Those well numbers preceded by an asterisk are from Schlax (1947) and those preceded by two asterisks are from Mundorff and others (1955). The designations there included are assumed to be correct. The remaining designations were attached by the writer to those logs where the data warranted it. These are strictly interpretive and are subject to change when the geology of the entire county has been mapped.

Volume II of this report will include a tabulation of data for a network of key wells throughout the county with stratigraphic designations for the materials encountered.

Table 1. -- Records of Wells.

**Explanation:**

**Well number:** See p. 2 for description of well-numbering system. Numbers preceded by asterisk indicate records from Schlax and others (1947); those preceded by two asterisks indicate records from Mundorff and others (1955).

**Owner or tenant:** Also includes owner's well number if known.

**Altitude:** Altitude of land surface in feet interpolated from topographic maps.

Degree of accuracy varies with contour interval available on individual maps as indicated in explanation on Plate 1. Most altitudes probably are accurate to 50 percent of the contour interval.

**Type of well:** B, Bored; Dn, Driven; Dr, Drilled; Dg, Dug.

**Depth to water below land surface:** Water-level measurements expressed in feet and decimal fractions of feet were made by the Division of Water Resources or by the Geological Survey. Measurements recorded to nearest whole foot were reported by owner, tenant, or driller; the dates of such measurements often are not known. A flowing well whose static head is known has "+" preceding the

water level indicating static head in feet above land-surface datum.

A flowing well whose static head is not known is indicated by "Flows".

**Type of Pump:** C, centrifugal; H, handpump; J, jet; N, none; P, piston; S, submersible; T, turbine.

**Use:** D, domestic; Ind, industrial; Irr, irrigation; N, not used; PS, public supply; S, stock.

**Remarks:** A, chemical analysis in table 2; A1, chemical analysis in table 2A; A2, partial chemical analysis in table 2B; A3, partial chemical analysis in table 2C; ac, acres; Cert, indicates data from affidavit of use, but not from well record; dd, drawdown; ft, foot or feet; gph, gallons per hour; gpm, gallons per minute; hr(s), hours; L, log in table 3; Obs, observation well for which hydrograph is presented in Figures 1, 2, or 3; Temp, temperature in degrees Fahrenheit; W/L, water-level.

Table 3 -- Materials penetrated by representative wells.

Materials	Thickness (feet)	Depth (feet)
Well 15/1W-5M1		
Clarence R. Whited. About 1 mile southeast of State Highway 1N on Skookumchuck Road. Altitude about 275 feet. Drilled by C. D. Roberts, 1959.		
Soil -----	2	2
Vashon drift:		
Recreational outwash:		
Boulders -----	7	9
Gravel, fine, and sand -----	13	22
Sand; water-bearing -----	2	24
Till:		
Gravel, cemented, and sand -----	7	31
Advance outwash:		
Gravel, fine, and sand; water-bearing -----	21	52
Sand, very little gravel; water-bearing -----	11	63
Gravel and sand; water-bearing -----	6	69
Clay, blue -----	3	72

Casing, 12-inch to 72 ft; perforated 32 to 52 ft and 64 to 69 ft. SWL <sup>a/</sup> 17 ft. Pumped 4 hrs at 345 gpm, dd 25 ft.

## Well 15/1W-6A1

Philip D. Northcraft. About 0.65 mile east of State Highway 1N on Skookumchuck Road at intersection with Northcraft Road. Altitude about 275 feet. Drilled by A. E. Seaunter, 1950.

Materials	Thickness (feet)	Depth (feet)
Vashon drift:		
Recreational outwash:		
Sand, fine -----	22	22
Hardpan -----	2	24
Gravel and water-----	8	32
Till:		
Hardpan (glacial till)-----	7	39
Advance outwash:		
Sand, coarse -----	3	42
Gravel; water-bearing -----	3	45

Casing, 8-Inch to 45 ft; perforated 24 to 32 ft.

a/ Static water level

Materials	Thickness (feet)	Depth (feet)
Well #15/1W-7M1 <sup>a/</sup>		
<b>City of Bucoda. In Bucoda. Altitude about 250 feet. Drilled by N. C. Jannsen Drilling Company.</b>		
Glacial outwash of Vashon age:		
Sand and small gravel -----	1	1
Boulder-----	1	2
Hardpan and boulders -----	15	17
Gravel and boulders, cemented -----	11	28
Gravel, cemented -----	7	35
Sand and gravel, some water -----	9	44
Sand -----	11	55
Gravel and boulders, cemented -----	11	66
Gravel and boulders, cemented, and sandy clay -----	8	74
Sand, coarse, and some gravel; water-bearing -----	11	85
Sand and some gravel; water-bearing -----	15	100
Unclassified:		
Shale, blue -----	27	127

Casing, 12-inch to 107 ft; perforated 67 to 107 ft.

#### Well 15/2W-5E1

Harvey J. Smith. About 0.45 mile southwest of old U. S. Highway 99 and Township Road intersection. Altitude about 205 feet. Drilled by C. D. Roberts, 1952.

Vashon drift:		
Recreational outwash:		
Gravel, loose -----	3	3
Boulders and gravel -----	20	23
Sand, fine - shows a little water -----	7	30
Till (?):		
Sand, packed, and gravel -----	17	47
Advance outwash (?):		
Sand, coarse, and gravel; water-bearing -----	15	62

Casing, 6-inch to 62 ft; perforated 47 to 57 ft. SWL 27 ft. Pumped 4 hrs at 110 gpm, dd 5 ft.

#### Well 15/2W-6J1

Harvey J. Smith. About 0.8 mile southwest of old U. S. Highway 99 and Township Road intersection. Altitude about 210 feet. Drilled by L. B. Richardson, 1951.

Vashon drift:		
Recreational outwash:		
Topsoil and gravel -----	3	3
Clay and gravel -----	6	9
Till:		
Hardpan -----	16	25
Advance outwash:		
Sand, fine, some coarse, gravel and clay -----	6	31
Sand, coarse, gravel and clay -----	16	47

<sup>a/</sup>Asterisk in front of well number indicates log from Schlaux (1947)

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 15/2W-6J1 -- Continued		
Vashon drift -- Continued		
Advance outwash -- Continued		
Hardpan (glacial till) -----	8	55
Sand, coarse, clay and gravel -----	9	64
Sand, coarse, and loose gravel -----	5	69

Casing, 8-inch to 69 ft; perforated 35 to 62 ft. SWL 20 ft. Pumped 1 hr at 60 gpm, dd 5 ft.

#### Well 15/2W-15R1

R. L. Dickey and Frank Middlebusher. About 2.8 miles southwest of Bucoda on State Highway 1N. Altitude about 220 feet. Drilled by A. E. Seaulier.

Vashon drift:		
Recessional outwash:		
Boulders and black loam -----	16	16
Sand -----	2	18
Till:		
Hardpan -----	8	26
Advance outwash:		
Sand -----	6	32
Boulders -----	6	38
Hardpan (glacial till [?]) -----	4	42
Gravel and water -----	2	44
Hardpan (glacial till [?]) -----	5	49
Gravel and water -----	1	50

Casing, 6-inch to 50 ft. SWL 15 ft. Pumped 4 hrs at 37 gpm, dd 20 ft.

#### Well 15/2W-22N1

Frank Townsend. About 0.10 mile northeast of State Highway 1N intersection with county line. Altitude about 210 feet. Drilled by A. E. Seaulier, 1947.

Vashon drift:		
Recessional outwash:		
Loam, black -----	6	6
Clay, red, and rock -----	14	20
Sand, red, and water -----	4	24
Till:		
Hardpan -----	15	39
Advance outwash:		
Gravel -----	2	41

Casing, 6-inch to 41 ft. SWL 12 ft. Pumped 4 hrs at 40 gpm, dd 24 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 15/3W-1K1

William S. Proctor. About 0.5 mile south of Township Road on Apple Avenue. Altitude about 193 feet. Drilled by O. A. Keto, 1954.

Vashon drift, undifferentiated:		
Soil -----	10	10
Sand and some gravel -----	35	45
Gravel, washed -----	3	48
Sand and some gravel -----	5	53
Gravel, washed, and sand -----	2	55
Sand and some gravel -----	7	62
Gravel, good, washed, and some sand -----	3	65

Casing, 8-inch to 65 ft; no perforations. SWL 22 ft. Pumped 4 hrs at 100 gpm, dd 10 ft.

## Well 15/3W-2P1

Peter Vivoda. About 1.1 miles southeast of Township Road intersection on Sargent Road. Altitude about 173 feet. Drilled in 1928.

Vashon drift:		
Recreational outwash:		
Sand and gravel -----	15	15
Till (?):		
Clay -----	15	30
Advance outwash (?):		
Sand and gravel -----	30	60

Casing, 6½-inch to 60 ft; perforated 40 to 60 ft.

## Well 15/3W-4C1

Louis Johnson. About 1.1 miles east of Rochester on Township Road. Altitude about 158 feet. Drilled by C. D. Roberts, 1952.

Vashon drift:		
Recreational outwash:		
Topsoil -----	2	2
Topsoil and gravel, mixed -----	8	10
Gravel and small boulders -----	15	25
Till:		
Gravel, cemented, and sand -----	15	40
Advance outwash:		
Gravel and sand; water-bearing -----	15	55

Casing, 8-inch to 55 ft; perforated 40 to 55 ft. SWL 16 ft. Pumped 4 hrs at 150 gpm, dd 14 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 15/3W-4D1		

Clarence A. Betts. About 0.1 mile southeast of Shamblin Road intersection on State Highway 9. Altitude about 156 feet. Drilled by Chas. King, 1954.

Vashon drift, undifferentiated:		
Surface -----	9	9
Sand, dirty, and gravel -----	20	29
Gravel, dirty, some sand -----	19	48
Gravel, water-bearing -----	15	63

Casing, 8-inch to 63 ft. Pumped 4 hrs at 500 gpm, dd 0.5 ft.

#### Test Well - C. A. Betts

Clarence A. Betts. About 450 feet south of well 4D1. Altitude about 158 feet. Drilled by Chas. King, 1954.

Surface -----	4	4
Tertiary:		
Clay -----	20	24
Clay, blue -----	12	36

Casing, none. Abandoned because of blue clay too close to surface.

#### Well 15/3W-4K1

Chas. Eckard. About 1.9 miles northwest of James Road intersection on State Highway 9. Altitude about 154 feet. Drilled by O. Erdman, 1951.

Vashon drift:		
Recreational outwash:		
Topsoil-----	5'	5
Gravel -----	15	20
Sand -----	10	30
Till:		
Hardpan -----	10	40
Advance outwash:		
Gravel -----	20	60

Casing, 8-inch to 60 ft; perforated 50 to 60 ft. SWL 20 ft. Pumped 4 hrs at 150 gpm, dd 2 ft.

#### Well 15/3W-4Q1

Elmer Waltenberg. About 1.6 miles southeast of Rochester on Jamestown Cut-off Road. Altitude about 150 feet. Drilled by Chas. King, 1949.

Vashon drift, undifferentiated:		
Soil -----	2	2
Sand, yellow and brown, and gravel -----	26	28
Sand, yellow and gray -----	16	44
Gravel, water-bearing -----	3	47
Gravel with some sand -----	4	51

Casing, 6-inch to 50 ft; no perforations; opening about 1 ft from bottom of casing. SWL 28 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 15/3W-4Q2

Elmer Waltenberg. About 1.6 miles southeast of Rochester on Jamestown Cut-off Road. Altitude about 150 feet. Drilled by C. D. Roberts, 1958.

Vashon drift:		
Recessional outwash:		
Topsoil -----	5	5
Till:		
Sand and gravel, cemented, and boulders -----	20	25
Advance outwash:		
Gravel and sand; water-bearing -----	6	31
Gravel and sand, cemented -----	4	35
Sand, very little gravel -----	7	42
Gravel and sand; water-bearing -----	15	57
Gravel, coarse -----	3	60

Casing, 8-inch to 60 ft; perforated 26 to 31 ft and 45 to 55 ft. SWL 10.75 ft. Pumped 4 hrs at 400 gpm, dd 5 ft.

## Well 15/3W-5B1

Melvin Paulson. About 0.5 mile east of Rochester on south side of State Highway 9. Altitude about 155 feet. Drilled by Chas. King, 1944.

Vashon drift, undifferentiated:		
Soil -----	10	10
Sand -----	58	68
Gravel -----	2	70
Mud gravel -----	15	85

Casing, 8-inch to 70 ft; 6-inch from 70 to 85 ft; perforated 70 to 85 ft. SWL 35 ft.

## Well 15/3W-5M1

George Fagerness. About 0.7 mile south of Rochester. Altitude about 139 feet. Drilled by C. D. Roberts, 1951.

Vashon drift:		
Recessional outwash:		
Loam, sandy -----	6	6
Till (?):		
Gravel, cemented, and sand and boulders -----	14	20
Gravel and sand, cemented -----	15	35
Advance outwash:		
Gravel and sand; water-bearing -----	6	41
Gravel and sand, very coarse; water-bearing -----	14	55

Casing, 6-inch to 55 ft; perforated interval not known. SWL 31 ft. Pumped 60 gpm, with no appreciable dd.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 15/3W-6K1

George Steelhammer. About 0.5 mile south of Rochester on Soderlund Road. Altitude about 120 feet. Drilled by C. D. Roberts, 1949.

Vashon drift:		
Recessional outwash (?):		
Clay -----	3	3
Clay and gravel -----	7	10
Till:		
Gravel and sand, cemented -----	10	20
Advance outwash:		
Gravel and sand; water-bearing -----	11	31

Casing, 6-inch to 31 ft; no perforations. SWL 3 ft. Pumped 4 hrs at 100 gpm, dd 10 ft.

## Well 15/3W-6N1

A. Johnson. About 1 mile south and 0.8 mile west of Rochester. Altitude about 110 feet. Drilled by Chas. King.

Vashon drift:		
Recessional outwash (?):		
Surface -----	4	4
Gravel and sand -----	4	8
Sand, dirty, and gravel -----	20	28
Gravel, clean, little sand -----	4	32

Casing, 6-inch to 32 ft. Pumped 3 hrs at 45 gpm, dd 5 ft.

## Well 15/3W-6P1

A. M. Baybarz. About 0.15 mile north of James Road and about 1 mile southwest of Rochester. Altitude about 115 feet. Drilled by Erdman, 1950.

Vashon drift, undifferentiated:		
Clay -----	10	10
Sand and gravel -----	37	47

Casing, 8-inch to 47 ft. Perforated 30 to 47 ft. SWL 8 ft. Pumped 4 hrs at 125 gpm, dd 5 ft.

## Well 15/3W-8G1

Chas. R. Frye. About 0.3 mile south of James Road. Altitude about 120 feet. Drilled by T. J. Pollman, 1947.

Vashon drift:		
Recessional outwash (?):		
Clay -----	6	6
Till:		
Hardpan (clay and gravel) -----	7	13
Advance outwash:		
Boulders -----	2	15
Gravel and sand -----	6	21

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 15/3W-8G1 -- Continued		
Vashon drift -- Continued		
Advance outwash -- Continued		
Sand and gravel; water-bearing -----	6	27
Gravel -----	2	29

Casing, 8-inch to 29 ft; no perforations. Cert for 50 gpm. SWL 12 ft.

#### Well 15/3W-9D2

Wilbert F. Brewer. About 0.24 mile south of Scatter Creek crossing on James Road. Altitude about 140 feet. Drilled by E. C. King, 1955.

Vashon drift, undifferentiated:		
Topsoil -----	2	2
Sand, gravel and small boulders; water-bearing below 17 feet-----	52	54

Casing, 8-inch to 54 ft. SWL 17 ft. Pumped 8 hrs at 130 gpm, dd 4 ft. Cert for 150 gpm.

#### Well 15/3W-9J1

Ted E. Bartlett. About 2.5 miles southeast of Rochester. Altitude about 150 feet. Drilled by Chas. King, 1949.

Vashon drift, undifferentiated:		
Topsoil -----	3	3
Sand, dirty, and gravel-----	21	24
Sand clay -----	30	54
Gravel sand -----	6	60
Gravel -----	3	63

Casing, 6-inch to 63 ft. SWL 30 ft. Pumped for 8 hrs at 100 gpm, dd 32 ft.

#### Well 15/3W-10A1

Clair Tischer. About 1.5 miles northwest of Grand Mound. Altitude about 168 feet. Drilled by L. B. Richardson, 1951.

Vashon drift:		
Recreational outwash:		
Dirt, black, and gravel -----	3	3
Till (?):		
Clay and boulders -----	12	15
Advance outwash (?):		
Sand, coarse, gravel and clay (may be till) -----	15	30
Sand, coarse, and gravel -----	9	39
Sand and gravel, mixed -----	6	45
Sand, coarse, clay and gravel -----	7	52
Sand, coarse and fine, clay with some gravel -----	2	54
Sand, mixed -----	2	56
Sand, coarse, and loose gravel -----	3	59

Casing, 8-inch to 59 ft; perforated 30 to 50 ft. SWL 10.5 ft. Pumped 0.5 hr at 175 gpm, dd 7.3 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 15/3W-10A2

Ludwig Rossmayer. About 1.5 miles northwest of Grand Mound. Altitude about 168 feet. Drilled by owner, 1948.

Vashon drift, undifferentiated:		
Gravel and small rock -----	16	16
Sand strata -----	2	18
Gravel and small rock -----	20	38
Sand -----	1	39
Gravel with sand -----	13	52

Casing, 6-inch to 52 ft; no perforations. SWL 35.5 ft. Pumped 4 hrs at 36 gpm, dd 2 ft.

## Well 15/3W-11H2

Mrs. Elton M. Rich. About 0.5 mile north of Grand Mound. Altitude about 172 feet. Drilled by C. D. Roberts, 1952.

Vashon drift:		
Recessional outwash:		
Pit (probably topsoil and gravel) -----	6	6
Till:		
Gravel, packed -----	21	27
Advance outwash:		
Sand, water-bearing -----	3	30
Gravel and sand; water-bearing -----	16	46

Casing, 8-inch to 46 ft; perforated 30 to 40 ft. SWL 27 ft. Bailed 4 hrs at 60 gpm, dd 2 ft.

## Well \*15/3W-11K3

F. G. Payette. About 0.35 mile west of Intersection Sargent Road and old U. S. Highway 99. Altitude about 167 feet. Drilled by Dempsey, 1944.

Vashon drift, undifferentiated:		
Dug well, no record -----	30	30
Gravel, loose -----	4	34
Clay, yellow, and gravel -----	6	40
Sand and gravel; water-bearing -----	8	48

Casing, 6-inch. SWL 21.5 ft to 34 ft. Bailed 10 gpm.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 15/3W-11L1		
Stanley Waltrip. About 0.75 mile northwest of Grand Mound. Altitude about 165 feet. Drilled by Chas. King, 1954.		
Vashon drift:		
Recessional outwash:		
Topsoil -----	3	3
Till (?):		
Sand gravel and some clay -----	27	30
Advance outwash:		
Sand -----	4	34
Gravel -----	24	58

Casing, 8-Inch to 57½ ft; perforated 49 to 55 ft. SWL 22 ft. Pumped 4 hrs at 100 gpm, dd 0.33 ft.

## Well 15/3W-11M2

Laurence Garske. About 1.2 miles northwest of Grand Mound. Altitude about 164 feet. Drilled by Chas. King, 1950.

Materials	Thickness (feet)	Depth (feet)
Vashon drift, undifferentiated:		
Topsoil -----	3	3
Sand, dirty, and gravel -----	53	56
Gravel -----	4	60

Casing, 6-Inch to 60 ft. SWL 27 ft. Pumped 4 hrs at 85 gpm, dd 18 ft.

## Well 15/3W-11M3

William V. Knight. About 1.2 miles northwest of Grand Mound. Altitude about 165 feet. Drilled by Chas. King.

Materials	Thickness (feet)	Depth (feet)
Vashon drift, undifferentiated:		
Topsoil -----	2	2
Gravel and sand -----	30	32
Sand, dirty, and some gravel -----	16	48
Gravel and sand -----	4	52

Casing, 6-Inch to 52 ft. SWL 32 ft.

## Well 15/3W-12B1

John Salzer. About 0.35 mile northeast of freeway on south side of old U. S. Highway 99. Altitude about 190 feet. Drilled by O. E. Erdman, 1948.

Materials	Thickness (feet)	Depth (feet)
Vashon drift:		
Till:		
Gravel hardpan -----	38	38
Advance outwash:		
Gravel, water-bearing -----	10	48

Casing, 8-Inch to 48 ft; perforated 12 ft on bottom. SWL 16 ft. Pumped 4 hrs at 300 gpm, dd 5 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 15/3W-12B4

Florence M. Salzer. About 1.5 miles northeast of Grand Mound. Altitude about 190 feet. Drilled by C. D. Roberts, 1955.

Vashon drift:		
Recessional outwash:		
Topsoil -----	3	3
Gravel and boulders -----	3	6
Sand-gravel, mixed -----	5	11
Gravel and boulders -----	9	20
Till:		
Gravel, cemented -----	18	38
Advance outwash:		
Gravel and sand, fine; water-bearing -----	12	50
Gravel, coarse, water-bearing -----	3	53

Casing, 8-inch to 53 ft; perforated interval not known. SWL 30 ft. Pumped 4 hrs at 90 gpm, dd 5 ft.

## Well 15/3W-12D1

J. F. McLeod (formerly L. G. Goodknight). About 0.5 mile north of Grand Mound on Meridian Street. Altitude about 175 feet. Drilled by W. W. Sides, 1949.

Vashon drift, undifferentiated:		
Sand soil -----	2	2
Sand and gravel (may be till?) -----	38	40
Sand, fine, and clay -----	2	42
Gravel, coarse -----	9	51

Casing, 8-inch to 51 ft; perforations, no information. SWL 31 ft. Pumped 40 hrs at 150 gpm, dd 10 ft. Recovery 10 minutes.

## Well 15/3W-12F1

Clara Lentz. About 0.22 mile east of freeway and south of old Pacific Highway. Altitude about 185 feet. Drilled by Chas. King, 1945.

Vashon drift:		
Recessional outwash:		
Surface -----	2	2
Till:		
Hardpan of cement gravel and sand -----	36	38
Advance outwash:		
Sand -----	10	48
Gravel -----	5	53

Casing, 6-inch to 53 ft; bottom 6 or 7 ft perforated. Pumps 80-85 gpm. Pumps sand when water level is low. SWL 25 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well \*15/3W-14C1

State of Washington. At Grand Mound State Training School for Girls. Altitude about 150 feet. Drilled by O. E. Erdman, 1941.

Vashon drift, undifferentiated:		
Topsoil -----	2	2
TIII:		
Hardpan, hard-packed gravel -----	43	45
Advance outwash:		
Gravel, fine and sand (water) -----	12	57
Gravel and sand (water) -----	17	74

Casing, 10-inch to 74 ft; perforated 62 to 74 ft. SWL 30.5 ft. Pumped 225 gpm, dd 4.5 ft. Pumped 310 gpm, dd 6.5 ft.

## Well 15/3W-23Q1

E. M. Sorenson. About 0.10 mile north of county line. Altitude about 140 feet.

Vashon drift, undifferentiated:		
Soil -----	1	1
Sand -----	5	6
Gravel -----	24	30

Casing, 6-inch to 30 ft; perforated 20 to 30 ft. Reported summer water level 10 to 15 ft. (Was under water on 2/4/59). Pumped over 4 hrs at 150 gpm, dd 2 ft.

## Well 15/3W-24L1

H. C. Kunselman. About 0.3 mile north of county line on west side of Pacific Highway. Altitude about 158 feet. Drilled by C. D. Roberts, 1950.

Vashon drift:		
Recessional outwash:		
Sand and gravel -----	19	19
TIII:		
Gravel and sand, cemented -----	16	35
Advance outwash:		
Sand -----	5	40
Gravel and coarse sand; water-bearing -----	5	45

Casing, 6-inch to 45 ft. SWL 13 ft. Pumped 4 hrs at 40 gpm, dd 3 ft.

## 150      GEOLOGY AND GROUND-WATER RESOURCES, THURSTON COUNTY, WASH.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 15/4W-2B1		
E. J. McDougall. About 2.5 miles west of Rochester. Altitude about 100 feet. Drilled by Chas. King, 1948.		
Vashon drift, undifferentiated:		
Surface (alluvium) -----	2	2
Sand, gravel and clay -----	32	34
Gravel and some sand -----	5	39
Casing, 6-inch st to 39 ft. SWL 14 ft.		
Well 15/4-12F1		
Evert Sundquist. About 0.25 mile west of Helsing Junction. Altitude about 106 feet. Drilled by C. D. Roberts, 1949.		
Vashon drift:		
Recessional outwash or alluvium:		
Silt, sand -----	8	8
TIII (?):		
Gravel and boulders, cemented -----	9	17
Advance outwash:		
Gravel, water-bearing -----	7	24
Casing, 6-inch to 24 ft; perforated 17 to 24 ft. SWL 7 ft. Pumped 4 hrs at 60 gpm, dd 7 ft.		
Well **16/1-6J1- <sup>1</sup>		
Leon Barnhouse. About 1.8 miles northwest of Rainier, on Rainier-Olympia Road. Altitude about 500 feet. Drilled by Richardson Well Drilling Co., 1950.		
Vashon drift:		
Recessional outwash:		
Old well 96 ft deep, caved to 87 ft -----	96	96
Clay, sandy -----	29	125
TIII:		
Hardpan -----	10	135
Gravel and clay -----	6	141
Pre-Vashon (?) deposits:		
Hardpan -----	74	215
Sand, coarse, and gravel -----	1	216
Casing, 6-inch to 216 ft. Pumped 19 gpm, no dd.		

<sup>1</sup>/ Two asterisks in front of well number indicate log from Mundorff and others (1955)

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well \*\*16/1-7E1

C. B. Frost. About 2.5 miles west of Rainier. Altitude about 425 feet. Drilling by J. P. Davidson.

Vashon drift:		
Recessional outwash:		
Gravel -----	50	50
Clay -----	2	52
Sand -----	15	67
Gravel and sand; water-bearing -----	18	85
Till:		
Hardpan -----	27	112
Advance outwash:		
Sand and gravel; water-bearing -----	40	152
Clay, blue -----	At ?	152

Casing, 24-inch tile to 66 ft; 10-inch to 152 ft.

## Well \*\*16/1-11B1

O. Englund. About 3.7 miles southwest of Yelm. Altitude about 408 feet. Dug by H. Livingston.

Vashon drift:		
Till:		
Soil -----	6	6
Hardpan -----	20	26
Pre-Vashon deposits:		
Sand, yellow -----	1	27
Gravel and clay, yellow -----	50	77
Gravel, cemented -----	26	103
Gravel, fine to medium -----	2	105

## Well 16/1 - 12K2

James Metrakes. About 3 miles west of Rainier. Altitude about 435 feet. Drilled by A. P. Graf, 1953.

Vashon drift:		
Recessional outwash (?):		
Topsoil -----	3	3
Boulders -----	10	13
Till:		
Gravel, cemented -----	28	41
Sand and gravel; some water-bearing -----	2	43
Hardpan -----	8	51
Advance outwash and pre-Vashon deposits, undifferentiated:		
Sand and gravel and boulders -----	7	58
Clay and gravel -----	4	62
Sand and gravel; water-bearing -----	6	68
Clay, gravel, some boulders -----	47	115
Gravel, cemented -----	3	118
Gravel, water-bearing -----	7	125

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 16/1-12K2 -- Continued		
Vashon drift - Continued		
Advance outwash and pre-Vashon deposits, undifferentiated - Continued		
Gravel, cemented -----	18	143
Sand and gravel; water-bearing -----	4	147
Gravel, cemented -----	28	175

Casing, 10-inch to 172 ft; perforated 62 to 68, 118 to 123, and 143 to 147 ft. SWL 44 ft.  
Pumped 4 hrs at 135 gpm, dd 76 ft.

## Well \*\*16/1-13G2

Earl Nelson. About 4.8 miles south of Yelm. Altitude about 443 feet. Drilled by A. P. Graf, 1951.

Topsoil and peat -----	4	4
Vashon drift:		
Till:		
Clay, blue and gravel -----	41	45
Advance outwash:		
Gravel, water-bearing -----	9	54

Casing, 12-inch to 54 ft; perforated 44 to 54 ft.

## Well \*\*16/1-14M1

C. Colman. About 2 miles southeast of Rainier. Altitude about 450 feet. Drilled by E. J. Webber.

Vashon drift:		
Recessional outwash:		
Boulders, sand, and gravel -----	8	8
Till:		
Boulders, and hardpan -----	52	60
Outwash, undifferentiated:		
Boulders, coarse gravel -----	25	85
Sand and gravel; water-bearing -----	15	100
Till (?):		
Hardpan, no water -----	2	102
Outwash, undifferentiated:		
Sand, fine to coarse, with some gravel; water-bearing -----	22	124

Casing, 6-inch to 123 ft. Bailed 16 gpm, dd 12 ft.

## Well 16/1-16Q1

Kenneth L. Gibson. About 1.5 miles south of Rainier. Altitude about 450 feet. Drilled by Richard B. DeRemer, 1952.

Topsoil -----	6	6
Hardpan -----	14	20
Clay and gravel -----	18	38
Gravel, cemented -----	37	75
Sand, cemented -----	6	81
Hardpan -----	9	90

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 16/1-16Q1 -- Continued		
Rock, brown, rotten -----	52	142
Rock, black -----	35	177
Rock, red -----	5	182
Hardpan -----	38	220
Rock, red -----	5	225
Casing, 12 inch to 90 ft; no perforations. SWL 103 ft. Pumped 4 hrs at 42 gpm, dd 50 ft.		
Well 16/1-26R1		
Loren P. Afflerbaugh. About 1 mile southeast of Vail. Altitude about 480 feet. Drilled by G. M. Patterson, 1953.		
Clay and gravel -----	10	10
Clay, sand and gravel -----	12	22
Gravel, cemented -----	55	77
Clay, gravel, sand (shale) -----	12	89
Casing, 6-inch to 85 ft. Pumped 8 hrs at 70 gpm, dd 10 ft.		
Well **16/1-27H1		
Weyerhaeuser Timber Company at Vail. Altitude about 420 feet. Drilled by N. C. Janssen, 1927(?)		
Boulders, large -----	11	11
Gravel, cemented -----	3	14
Gravel and boulders -----	21	35
Gravel -----	10	45
Gravel and sand -----	5	50
Sand and gravel -----	10	60
Gravel and sand, with some water -----	10	70
Boulder and gravel -----	4	74
Gravel, some clay -----	6	80
Gravel and boulder with a little clay -----	5	85
Gravel and sand -----	10	95
Sand and boulders -----	7	102
Boulders, large -----	5	107
Sand rock (sand and boulder?) -----	4	111
Sand and boulders -----	3	114
Clay and "hardpan" -----	18	132
Sand and some gravel -----	21	153
Sand and boulders -----	2	155
Sand and gravel -----	18	173
Gravel, water-bearing -----	5	178
Sand, with a boulder -----	7	185
Gravel, water-bearing -----	2	187
Sand, with some gravel; water-bearing -----	1	188

Casing, 12-inch to 57 ft; 8-inch to 190 ft; perforated 170 to 190 ft. Measured depth of well 190 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 16/2-2B1		
Charles McKown. About 5.5 miles southeast of Yelm. Altitude about 430 feet. Drilled by Pioneer Drillers, 1955.		
Vashon drift:		
Till:		
Topsoil -----	4	4
Hardpan -----	34	38
Advance outwash:		
Sand, gray -----	6	44
Gravel, water-bearing -----	7	51
Pre-Vashon deposits(?):		
Gravel, clay bound -----	11	62
Gravel, cemented, with some large stones -----	21	83
Gravel, clay bound -----	29	112
Clay, blue -----	28	140
Gravel, water-bearing -----	6	146
Clay, blue -----	5	151

Casing, 10-inch to 151 ft; perforated 45 to 56 ft and 138 to 145 ft. SWL 24 ft. Pumped 4 hrs at 90 gpm, dd 95 ft.

## Well 16/2-2G1

A. D. Blackler. About 2.8 miles northeast of Vail. Altitude about 450 feet. Drilled by G. M. Patterson, 1951.

Vashon drift:		
Till (?):		
Gravel and boulders, cemented -----	46	46
Pre-Vashon deposits (?):		
Gravel, clay and sand -----	24	70
Gravel, sand and clay -----	10	80
Clay, brown -----	11	91
Clay, gray -----	9	100
Clay, gravel, and boulders -----	125	225

Casing, 8-inch to 225 ft; no perforations. SWL 89 ft. Pumped 4 hrs at 75 gpm, dd 32 ft.

## Well \*\*16/2-4A2

Charles Johnston. About 3.4 miles southeast of Yelm on Bald Hill Road, about 200 feet southwest of road. Altitude about 380 feet. Drilled by Richardson Well Drilling Co., 1951.

Vashon drift:		
Recreational outwash:		
Gravel and black dirt -----	3	3
Clay, yellow, coarse sand, and gravel -----	21	24
Till:		
Hardpan -----	7	31
Clay, yellow, and gravel -----	14	45
Hardpan -----	13	58

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well **16/2-4A2 -- Continued		
Vashon drift - Continued		
Advance outwash:		
Clay, gravel, some sand -----	4	62
Sand and clay, some gravel -----	4	66
Sand, coarse, and gravel -----	10	76
Pre-Vashon deposits:		
Hardpan -----	5	81
Clay, sand and gravel -----	13	94
Sand, a little gravel -----	2	96
Hardpan -----	11	107
Sand, some coarse gravel -----	3	110
Hardpan -----	6	116
Sand -----	2	118
Hardpan -----	2	120
Sand, clay, and gravel -----	15	135
Clay, gray, and gravel -----	14	149
Sand, fine to coarse (water rose in hole) -----	5	154
Clay, gravel, and sand -----	4	158

Casing, 8-inch to 158 ft; perforated 44 to 60 ft, 69 to 92 ft, 99 to 105 ft, 113 to 118 ft, and 142 to 149 ft.

## Well 16/2-5A1

James L. Mosman. About 2.7 miles southeast of Yelm. Altitude about 382 feet. Dug in August, 1954.

Vashon drift, undifferentiated:		
Topsoil -----	1	1
Gravel and rock -----	13	14
Gravel, fine, and sand -----	5	19

Well diameter, 10 feet. SWL 14 ft. Pumped 10 hrs at 160 gpm, dd 4 ft.

## Well \*\*16/2-5C1

J. and A. McMonigle. About 2.5 miles southeast of Yelm and 0.8 mile east of Norris Road. Altitude about 380 feet. Drilled by A. P. Graf, 1951.

Vashon drift:		
Outwash, undifferentiated:		
Topsoil -----	2	2
Sand, brown -----	15	17
Sand and gravel -----	47	64
Gravel, water-bearing -----	16	80
Pre-Vashon deposits:		
Clay, brown -----	1	81

Casing, 12-inch to 81 ft; perforated 64 to 80 ft.

Table 3 -- Materials penetrated by representative wells, -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 16/2-5M1

Woodrow N. Blair. About 3.3 miles southeast of Yelm. Altitude about 380 feet. Drilled by L. B. Richardson, 1952.

Peat -----	7	7
Clay, blue, and gravel -----	6	13
Clay, yellow, and gravel, boulders -----	11	24
Clay, sandy yellow -----	13	37
Hardpan -----	18	55
Clay, sand and gravel -----	10	65
Sand and gravel, loose; water-bearing (tested 75 gpm) -----	5	70
Sand, clay and gravel -----	31	101
Gravel, clay, streaks of sand; water-bearing (tested 113 gpm, dd 82 ft) -----	5	106
Clay, sand and gravel -----	34	140
Clay, gravel, streaks of sand; water-bearing (test bailed 100 gpm, dd 10 ft) -----	12	152
Clay, blue, and gravel -----	2	154

Casing, 12-inch to 154 ft; perforated 60 to 70 and 110 to 149 ft. Flowing 2 gpm, October 24, 1952. Tested 345 gpm, dd 142 ft.

## Well \*\*16/2-5Q1

Stan Dunagan. About 3.5 miles south-southeast of Yelm, and about 0.2 mile southeast of Smith Road. Altitude about 450 feet. Drilled by A. P. Graf, 1951.

Old well, no log -----	39	39
Gravel, coarse, some water -----	7	46
Pre-Vashon deposits:		
Sand, brown -----	12	58
Boulders and gravel -----	7	65
Sand, brown, and gravel, some water -----	9	74
Sand, brown -----	20	94
Sand, volcanic, some water -----	4	98
Gravel, hard-packed -----	14	112
Sand and gravel, some water -----	32	144
Clay, gravel, and sand, In thin layers -----	33	177

Casing, 12-inch to 177 ft; perforated 40 to 56 ft, 67 to 78 ft, 88 to 98 ft, 112 to 134 ft, and 144 to 177 ft.

## Well \*\*16/2-7Q1

R. W. Shattuck. About 4.5 miles south of Yelm. Altitude about 450 feet. Drilled by A. P. Graf, 1953.

Vashon drift:		
Till:		
Topsoil -----	2	2
Boulders and gravel -----	9	11
Advance outwash:		
Sand and gravel -----	11	22
Gravel, some water -----	4	26

Table 3 -- Materials penetrated by representative wells. -- Continued.

Materials	Thickness (feet)	Depth (feet)
Well **16/2-7Q1 -- Continued		
Pre-Vashon deposits:		
Clay and gravel, some water -----	65	91
Gravel and sand -----	10	101
Hardpan -----	64	165
Gravel, loose, and sand -----	24	189
Hardpan -----	1	190
Gravel, loose, and sand; water-bearing -----	8	198
Sand, black, some water -----	2	200
Sand and gravel, hard-packed -----	78	278
Gravel, some water -----	9	287

Casing, 10-inch to 287 ft; perforated 48 to 50 ft, 85 to 89 ft, 160 to 162 ft, 176 to 184 ft, 190 to 198 ft, and 277 to 283 ft.

## Well 16/2-10D1

Donald R. Warwick. About 4.5 miles southeast of Yelm. Altitude about 465 feet. Drilled by Richardson, 1956.

Vashon drift:		
Till:		
Topsoil -----	5	5
Hardpan, boulders -----	19	24
Pre-Vashon deposits (?):		
Clay, sand, and blue gravel -----	33	57
Clay, sand, and yellow gravel -----	9	66
Hardpan -----	15	81
Boulders -----	4	85
Hardpan -----	42	127
Clay, yellow -----	2	129
Clay, sand and gravel -----	4	133
Sand and gravel (70 gpm, dd 55 feet) -----	1	134
Sand, gravel and clay -----	22	156
Hardpan -----	26	182
Clay, sand and gravel -----	19	201
Hardpan, sand, gravel; water-bearing -----	9	210

Casing, 10-inch to 174 ft; 8-inch from 174 to 210 ft. SWL 41 ft. Pumped 250 gpm, dd 139 ft.

## Well \*\*16/2-17L1

E. Dame. About 5 miles south of Yelm. Altitude about 460 feet.

Vashon drift:		
Till:		
Soil -----	6	6
Gravel, cemented -----	18	24
Boulders and white clay -----	21	45
Advance outwash:		
Gravel, pea size, and black sand -----	?	45

Dug well. Wood curbing, 48-inch square.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well \*\*16/2-18H1

T. J. Boudreau. About 5 miles south of Yelm. Altitude about 445 feet.

Vashon drift:		
Till:		
Hardpan -----	4	4
Gravel -----	4	8
Hardpan -----	23	31

Dug well.

## Well 16/3-31G1

Weyerhaeuser Timber Company. At north end of Clear Lake. Altitude about 520 feet. Drilled by C. D. Roberts, 1959.

Vashon drift:		
Recessional outwash (?):		
Gravel, small, and boulders -----	8	8
Sand, red -----	5	13
Sand, loose, and gravel -----	17	30
Gravel, water-bearing -----	7	37

Casing, 6-inch to 37 ft. SWL 6 ft. Pumped 15 min at 20 gpm, dd 4 ft.

## Well 16/1W-16L1

P. A. Thompson. About 2 miles northeast of Tenino. Altitude about 350 feet. Drilled by A. E. Seaunier.

Sand -----	11	11
Hardpan -----	12	23
Sand -----	65	88
Clay, blue -----		

Casing, 8-Inch.

## 16/1W-19F1

Walter G. Scheel. On North side of Tenino. Altitude about 280 feet.

Loam and rocks -----	7	7
Clay -----	14	21
Sand and clay; water-bearing -----	4	25
Hardpan clay shale -----	13	38
Gravel and sand; water-bearing -----	4	42

Casing, 6-inch to 42 ft; perforated 32 to 42 ft. SWL 6 ft. Pumped 4 hrs at 50 gpm, dd 6 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 16/1W-19M2

Roy Etter. On west side of Tenino. Altitude about 280 feet. Drilled by A. E. Seaunier, 1950.

Vashon drift:		
Recreational outwash (?):		
Gravel-boulders -----	14	14
Gravel, tight, small -----	4	18
Gravel, water-bearing -----	3	21

Casing, 8-inch to 21 ft. SWL 6 ft. Pumped 4 hrs at 50 gpm, dd 1 ft.

## Well 16/1W-19N1

Chester E. Wilcox. At southwest side of Tenino. Altitude about 255 feet. Drilled by King, 1956.

Vashon drift:		
Recreational outwash:		
Soil -----	2	2
Sand and gravel -----	31	33

Casing, 6-inch to 33 ft.

## Well 16/1W-20B1

Floyd E. S. Miller. About 1 mile east of Tenino. Altitude about 270 feet. Drilled by Erdman, 1949.

Vashon drift:		
Recreational outwash:		
Topsoil -----	7	7
Gravel and sand, hard-packed -----	20	27
Gravel, sand; water-bearing -----	20	47

Casing, 8-inch to 47 ft; perforated 37 to 47 ft. SWL 6 ft. Pumped 4 hrs at 80 gpm, dd 4 ft.

## Well 16/1W-31L1

E. L. Fleming. About 1.5 miles north of Bucoda. Altitude about 265 feet. Drilled by A. E. Seaunier, 1949.

Vashon drift:		
Recreational outwash:		
Topsoil and gravel -----	5	5
Boulders -----	17	22
Till:		
Hardpan -----	28	50
Advance outwash:		
Gravel, water-bearing -----	6	56

Casing, 8-inch to 56 ft; no perforations. SWL 42 ft. Pumped 4 hrs at 50 gpm, dd 2 ft.

## 160      GEOLOGY AND GROUND-WATER RESOURCES, THURSTON COUNTY, WASH.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 16/2W-9C1

M. R. Hacker. About 0.2 mile south of Maytown. Altitude about 180 feet. Dug.

Vashon drift, undifferentiated:		
Clay and boulders -----	18	18
Sand and gravel -----	8	26

Casing, 6-inch, has been backfilled.

## Well 16/2W-9P1

P. M. Murphy. About 0.9 mile south of Maytown on Reeder Road. Altitude about 270 feet. Dug well.

Vashon drift:		
Till:		
Topsoil -----	4	4
Hardpan -----	22	26
Advance outwash:		
Gravel seam (water at 26 feet) -----	6	32

Casing, none.

## Well 16/2W-21P1

Sherman Dempsey. About 3.1 miles south of Maytown on Goddard Road. Altitude about 235 feet. Drilled by Erdman, 1941.

Vashon drift:		
Recreational outwash:		
Soil, black -----	2	2
Gravel -----	14	16
Till:		
Hardpan gravel -----	6	22
Sand and clay -----	22	44
Gravel hardpan -----	14	58
Advance outwash:		
Sand, gravel; water-bearing -----	27	85

Casing, 6-inch to 84 ft. SWL 39 ft. Pumped at 50 gpm, dd 6 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 16/2W-25E1

S. J. Agnew. About 1.5 miles southwest of Tenino on old U. S. 99. Altitude about 275 feet.  
Drilled by C. D. Roberts, 1956.

Vashon drift:		
Recessional outwash:		
Boulders -----	10	10
Undifferentiated:		
Gravel and boulders, cemented -----	20	30
Gravel, cemented -----	8	38
Gravel and sand (a little water) -----	14	52
Gravel and sand, cemented -----	11	63
Gravel and sand; water-bearing -----	17	80
Gravel and sand, cemented -----	6	86

Casing, 10-inch to 86 ft; perforated 63 to 80 ft.

## Well 16/2W-25G1

S. J. Agnew. About 1 mile southwest of Tenino on old U. S. 99. Altitude about 278 feet.  
Drilled by A. E. Seaunier.

Vashon drift:		
Recessional outwash:		
Boulders -----	20	20
Till:		
Hardpan -----	23	43
Advance outwash:		
Gravel, water-bearing -----	17	60
Pre-Vashon deposits:		
Shale stone -----	5	65
Clay, red, volcanic -----	14	79
Shale stone -----	5	84

Casing, 6-inch to 84 ft; perforated 41 to 50 ft. SWL 20 ft. Pumped 4 hrs at 33 gpm, dd 10 ft.

## Well 16/2W-27Q1

Mrs. Nellie A. Finley. About 3.2 miles southwest of Tenino on old U. S. 99. Altitude about 240 feet. Drilled by A. E. Seaunier, 1950.

Vashon drift:		
Recessional outwash:		
Boulders -----	16	16
Till:		
Hardpan -----	14	30
Advance outwash:		
Gravel, loose, water-bearing -----	3	33

Casing, 8-inch to 33 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 16/2W-30C1

M. E. Coffin. About 6.1 miles west of Tenino. Altitude about 210 feet. Drilled by A. P. Graf, 1952.

Vashon drift:		
Recessional outwash:		
Topsoil -----	1	1
Gravel and boulders -----	4	5
Till (?):		
Gravel, cemented -----	6	11
Boulders -----	8	19
Gravel (some water, about 5 gpm) -----	4	23
Gravel, cemented -----	9	32
Advance outwash:		
Gravel, coarse; water-bearing -----	24	56

Casing, 8-Inch to 56 ft; perforated 32 to 54 ft. SWL 15 ft. Pumped 1 hr at 65 gpm, dd negligible.

## Well 16/2W-31A1

Ray F. Mittge. About 5.8 miles southwest of Tenino. Altitude about 210 feet. Drilled, 1952.

Vashon drift, undifferentiated:		
Topsoil -----	4	4
Gravel, clay, boulders -----	14	18
Gravel and clay -----	11	29
Clay, sand and gravel -----	11	40
Gravel and clay, hard and dry -----	10	50

Casing, 8-inch. SWL 28 ft. Bailed 50 gpm, dd 3 ft.

## Well 16/2W-31K2

Henry E. Haskin. About 6 miles southwest of Tenino. Altitude about 210 feet. Drilled by Erdman.

Vashon drift, undifferentiated:		
Topsoil -----	10	10
Gravel -----	20	30
Sand and gravel -----	36	66

Casing, 6-inch to 66 ft; perforated 50 to 62 ft. SWL 25 ft. Pumped 4 hrs at 100 gpm, dd 2 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 16/2W-32F1

Robert Thomsen. About 5.5 miles southwest of Tenino. Altitude about 205 feet. Drilled by Richardson, 1952.

Vashon drift, undifferentiated:		
Topsoil -----	6	6
Clay, gravel and boulders -----	13	19
Gravel and clay -----	12	31
Gravel, sand and clay; water-bearing -----	17	48
Clay, dirty, and gravel -----	10	58
Sand and some gravel; water-bearing -----	3	61
Sand, gravel and clay -----	17	78
Sand, coarse and fine, gravel; water-bearing -----	2	80

Casing, 8-inch; perforated 30 to 40 ft. SWL 28 ft. Pumped for 12 hrs at 120 gpm, dd 1 ft.

## Well 16/2W-33E1

S. J. Agnew. About 5 miles southwest of Tenino. Altitude about 215 feet. Drilled by Richardson, 1951.

Vashon drift:		
Recreational outwash:		
Soil, black, and large gravel -----	3	3
Clay and boulders -----	17	20
Till (?):		
Hardpan -----	12	32
Advance outwash:		
Gravel, coarse, sand and clay -----	8	40
Sand, coarse, loose gravel -----	3	43
Sand, coarse, gravel and clay -----	15	58
Sand and gravel, mixed -----	4	62
Sand, coarse, and gravel, showing clay -----	8	70
Sand, coarse, and gravel -----	3	73
Sand and gravel, streaks of clay -----	2	75
Clay and gravel -----	10	85

Casing, 12-inch to 85 ft; perforated 30 to 37 and 45 to 55 ft. SWL 25 ft.. Pumped 370 gpm, dd 13 ft.

## Well 16/3W-12D1

Rodney C. Crisman. About 0.7 mile southeast of Little Rock. Altitude about 175 feet. Drilled by Bedell, 1955.

Topsoil-----	2	2
Gravel, sand and clay -----	16	18
Gravel, clay; some water -----	15	33
Clay, some water -----	12	45
Gravel, water-bearing, 3-4 gpm -----	3	48
Sand and clay; some water -----	4	52
Peat bog - wet -----	8	60

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 16/3W-12D1 -- Continued

Sand, glacial, and clay -----	10	70
Peat, dry -----	6	76
Sand, silty, tight, glacial -----	6	82
Gravel, cemented; some water -----	8	90
Gravel, water-bearing -----	20	110

Casing, 8-inch to 110 ft; perforated 90 to 107 ft. SWL 64 ft. Pumped 4 hrs at 150 gpm, dd 15 ft.

## Well 16/3W-16L1

Cecil R. Palmer. About 0.2 mile north of Mima. Altitude about 142 feet. Drilled by N. C. Jannsen, 1947.

Sandy subsoil -----	23	23
Gravel and clay -----	12	35
Sand, gravel and clay -----	21	56
Gravel, coarse; water-bearing -----	42	98

Casing, 24-inch to 65 ft; 20-inch from 65 to 98 ft; perforated 65 to 98 ft. SWL 65 ft. Pumped 1,000 gpm, dd 1 ft.

## Well \*16/3W-20M1

H. C. Johnston. About 2.6 miles east-northeast of Gate. Altitude about 140 feet. Drilled by C. D. Roberts, 1947.

Topsoil, clay -----	3	3
Tertiary:		
Rock -----	2	5
Clay and gravel -----	7	12
Rock -----	46	58
Mud, blue -----	13	71
Rock -----	64	135
Shale (mud) -----	2	137
Rock -----	63	200
Sand, fine -----	13	213

Casing, 6-inch to 80 ft; perforated 56 to 58 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 16/3W-30B1

Richard R. Kerwood. About 1.8 miles northeast of Gate. Altitude about 125 feet. Drilled by King, 1958.

Clay and boulders -----	7	7
Pre-Vashon: Hard rock, crevices; water-bearing at 165 feet only		

Casing, 6-inch to 7.5 ft.

## Well 16/3W-31A2

H. W. Guiles. About 0.7 mile north of Rochester. Altitude about 142 feet. Drilled by M. B. Patterson, 1956.

Vashon drift, undifferentiated:		
Sand -----	7	7
Gravel, clay -----	33	40
Gravel, clay, boulders -----	23	63
Gravel, sand, clay -----	2	65
Gravel, sand -----	9	74
Sand, gravel, clay -----	3	77
Gravel, sand -----	5	82

Casing, 8-inch to 81 ft; perforated 67 to 70 ft.

## Well 16/3W-32Q1

Lloyd Canaday. On east side of Rochester. Altitude about 149 feet. Drilled by R. B. DeRemer, 1953.

Vashon drift, undifferentiated:		
Topsoil -----	3	3
Sand and gravel -----	5	8
Sand and gravel, cemented -----	38	46
Gravel, water-bearing -----	5	51
Sand and gravel, hard-packed -----	9	60
Sand, water-bearing -----	3	63
Sand and gravel, cemented -----	4	67
Clay, blue, and rock -----	4	71
Clay, brown, and sand -----	6	77
Gravel, water-bearing (high iron content) -----	7	84
Gravel, cemented -----	15	99

Casing, 8-inch to 99 ft; perforated 45 to 59 ft and 64 to 67 ft. SWL 35 ft. Pumped 4 hrs at 200 gpm, dd 2.3 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 16/3W-33R1

John C. Dahl. About 1.8 miles east of Rochester. Altitude about 162 feet. Drilled by Erdman, 1950.

Vashon drift:		
Recessional outwash:		
Topsoil -----	5	5
Gravel -----	30	35
Till:		
Hardpan -----	20	55
Advance outwash:		
Sand and gravel -----	21	76

Casing, 8-inch to 76 ft; perforated 56 to 73 ft. SWL 12 ft. Pumped 300 gpm, dd 4 ft.

## Well 16/3W-34M1

David P. Garrett. About 2 miles north-northeast of Rochester. Altitude about 170 feet. Drilled by King, 1949.

Topsoil -----	2	2
Sand, dirty, and gravel, mixed; water at 30 feet -----	51	53
Gravel, clean, little sand, good water -----	2	55

Casing, 6-inch to 55 ft; no perforations.

## Well 16/4W-35A1

C. M. Bell. About 0.6 mile south of Gate. Altitude about 105 feet. Drilled by King, 1945.

Vashon drift:		
Recessional outwash:		
Mud and clay -----	11	11
Sand and gravel -----	20	31
Sand -----	4	35
Gravel -----	7	42

Casing, 6-inch.

## Well \*\*17/1-13D2

Ed Percival. About 2.0 miles northwest of Yelm, about 400 feet northeast of highway to Olympia. Altitude about 330 feet. Drilled by Richardson Well Drilling Company, 1951.

Vashon drift:		
Recessional outwash:		
Dirt, black, and gravel -----	3	3
Boulders, clay, and gravel -----	9	12
Till:		
Hardpan -----	47	59
Sand -----	2	61
Hardpan -----	3	64

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well **17/1-13D2 -- Continued		
Vashon drift -- Continued		
Advance outwash:		
Clay, coarse sand, and gravel -----	2	66
Pre-Vashon deposits:		
Hardpan -----	8	74
Clay, yellow, sand, and gravel (7 feet of water) -----	7	81
Gravel and clay (water shut off at 87 feet) -----	6	87
Clay, brown, and gravel -----	7	94
Hardpan -----	30	124
Clay, blue and brown -----	4	128
Hardpan -----	30	158

Casing, 8-inch to 158 ft; perforated 60 to 66 ft, 76 to 88 ft, and 92 to 94 ft. SWL 78 ft.  
Pumped 1 hr at 50 gpm, dd 10 ft.

°                                  Well \*\*17/1-14N1

L. A. Crimmins. About 1.3 miles northwest of Yelm. Altitude about 370 feet. Drilled by E. J. Webber, 1950.

Glacial drift, undifferentiated:		
Gravel, cemented (?) -----	88	88
Sand -----	4	92
Gravel -----	41	133
Sand and gravel -----	2	135

Casing, 6-inch.

Well 17/1-18D1

Murray Ball. About 1.8 miles south of Lake St. Clair. Altitude about 230 feet. Drilled by Patterson, 1953.

Dug well -----	21	21
Sand -----	5	26
Sand and clay -----	6	32
Sand and gravel -----	4	36
Sand and clay -----	3	39
Sand and small amount of clay-----	2	41

Casing, 6-inch from 42 inches to 41 ft. Bailed 760 gph, dd 5 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well **17/1-24B1		
Lewis Poultry Farm. About 1.0 mile northwest of Yelm, 0.2 mile north of Olympia Highway. Altitude about 347 feet. Drilled by Richardson Well Drilling Company, 1951.		
Vashon drift:		
Recessional outwash:		
Gravel and black dirt -----	3	3
Boulders and clay -----	5	8
Till:		
Hardpan -----	27	35
Advance outwash:		
Sand, coarse, and loose gravel -----	7	42
Clay, sandy, and gravel -----	4	46
Sand, fine, gravel with clay -----	4	50
Pre-Vashon deposits:		
Clay, yellowish, and fine sand -----	19	69
Sand and blue clay -----	6	75
Hardpan (cemented gravel?) and boulders, water shut off -----	18	93
Sand and gravel, some clay; water-bearing -----	2	95
Hardpan (cemented gravel?) and boulders -----	4	99

Casing, 12-inch to 99 ft; perforated 35 to 42 ft, and 85 to 93 ft.

Well \*\*17/1-24L1

Warren Simmons. About 1 mile west of Yelm. Altitude about 345 feet. Drilled by A. P. Graf, 1953.

Vashon drift:		
Recessional outwash:		
Topsoil -----	2	2
Boulders and gravel -----	9	11
Till:		
Sand and gravel, claybound -----	11	22
Advance outwash:		
Sand and gravel, water-bearing -----	4	26
Gravel, cemented, with a few boulders -----	38	64
Sand and gravel; water-bearing -----	3	67
Pre-Vashon deposits:		
Sand and gravel, claybound -----	27	94
Sand and gravel; water-bearing -----	7	101
Hardpan with a few boulders, very hard, clayey (till?)-----	28	129
Gravel, cemented -----	36	165
Gravel and sand, loose -----	14	179
Gravel, cemented -----	5	184
Clay and gravel, some boulders -----	14	198
Sand, fine, black, about 20 percent gravel -----	13	211
Sand and gravel -----	15	226
Clay and sand -----	14	240
Gravel, cemented -----	13	253
Gravel and black sand -----	4	257
Gravel, cemented -----	18	275

Casing, 12-inch to 263 ft; perforated 22 to 26, 64 to 68, 95 to 101, 201 to 211, and 253 to 257 ft. SWL 12.58 ft. Pumped 4 hrs at 360 gpm, dd 5.26 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/1-34L2

William M. Hensley. About 3.3 miles southwest of Yelm. Altitude about 440 feet. Drilled by Pete Sylte, 1955.

Topsoil -----	3	3
Gravel, cemented -----	112	115
Sand and gravel, dry -----	7	122
Gravel, cemented -----	23	145
Gravel, dry -----	7	152
Sand and gravel, muddy; water-bearing -----	6	158
Gravel and sand; water-bearing -----	2	160
Gravel, cemented -----	8	168
Gravel, good flow of water -----	3	171
Gravel, cemented -----	4	175
Sand, gravel and clay; water-bearing -----	9	184
Gravel, cemented -----	51	235
Gravel and sand, hard-packed -----	20	255
Gravel and clay, cemented, some water -----	23	278
Gravel, cemented, no water -----	7	285

Casing, 10-inch to 285 ft; perforated 159 to 284 ft. SWL 150 ft. Pumped 4 hrs at 220 to 280 gpm, dd 5.2 ft.

## Well \*\*17/2-18N1

Frank A. Scharmann. About 1 mile north of Yelm. Altitude about 325 feet. Drilled by E. J. Webber.

Vashon drift:		
Till:		
Till -----	15	15
Advance outwash:		
Gravel and water -----	5	20
Gravel and clay -----	30	50
Gravel, medium to coarse, and clay -----	20	70
Pre-Vashon deposits:		
Gravel, hard -----	1	71

Casing, 6-inch to 71 ft.

## Well \*\*17/2-19H1

A. Hewitson. About 0.5 mile northeast of Yelm. Altitude about 350 feet. Drilled 1946.

Vashon drift:		
Recreational outwash:		
Gravel and boulders -----	25	25
Sand, fine, black -----	5	30
Gravel, coarse -----	8	38
Till:		
Hardpan -----	3	41
Advance outwash:		
Gravel, pea, black -----	1	42

Casing, 6-inch.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well **17/2-19H3		
A. Hewitson. About 0.5 mile northeast of Yelm. Altitude about 350 feet. Drilled by Richardson Well Drilling Company, 1951.		
Vashon drift:		
Recessional outwash:		
Dirt, black, and gravel -----	2	2
Gravel, boulders, and clay -----	5	7
Till:		
Hardpan -----	13	20
Advance outwash:		
Sand, coarse, and loose gravel, showing some clay; 7 feet of water at 30 feet -----	9	29
Pre-Vashon deposits:		
Hardpan -----	18	47
Clay, yellow, and gravel (water shut off) -----	15	62
Sand, coarse, and gravel -----	1	63
Hardpan -----	52	115
Clay, sand and gravel -----	9	124
Sand, fine, black, some gravel -----	2	126
Hardpan, clay, yellow, sand and gravel -----	13	139
Hardpan -----	8	147
Sand, fine, black, some gravel -----	5	152
Hardpan -----	6	158
Sand, fine, streaked with clay -----	4	162
Sand, some gravel, clay -----	8	170
Gravel, some sand and clay -----	7	177

Casing, 8-inch to 78 ft; 6-inch from 78 to 177 ft; perforated 50 to 60 ft, 60 to 62 ft, 100 to 101 ft, 102 to 104 ft, and 106 to 108 ft.

## Well \*\*17/2-19J3

J. M. Hales. About 0.5 mile northeast of Yelm. Altitude about 350 feet.

Vashon drift:		
Recessional outwash:		
Soil -----	1	1
Gravel, some sand -----	19	20
Till:		
Hardpan -----	13	33
(Well bottomed on large boulder)		

Dug well.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well **17/2-19J5		
J. M. Hales. About 0.5 mile east of Yelm. Altitude about 350 feet. Drilled by Richardson Well Drilling Company, 1951.		
Vashon drift:		
Recreational outwash:		
Gravel and black dirt -----	3	3
Clay, yellow, and gravel -----	6	9
Till:		
Hardpan -----	18	27
Pre-Vashon deposits:		
Clay, yellow, and gravel -----	4	31
Hardpan (cemented gravel?) -----	7	38
Clay, yellow, and gravel -----	3	41
Hardpan (cemented gravel?) -----	20	61
Sand, gravel, and clay -----	1	62
Hardpan (cemented gravel?) -----	11	73
(?) -----	14	87

Casing, 10-inch to 87 ft; perforated 30 to 68 ft.

#### Well \*\*17/2-19L1

Enumclaw Co-Op Creamery Company at Yelm. Altitude about 340 feet. Drilled by J. L. Bell, 1944.

Materials	Thickness (feet)	Depth (feet)
Vashon drift:		
Recreational outwash:		
Gravel and clay -----	15	15
Till:		
Hardpan -----	2.	17
Advance outwash:		
Sand and gravel, loose; water-bearing -----	3	20
Gravel, hard, cemented -----	33	53
Sand and gravel, rock (boulder?); water-bearing -----	3	56
Pre-Vashon deposits:		
Gravel, cemented -----	44	100
Hardpan, brown -----	35	135

Casing, 10-inch to 112 ft; perforated 19 to 24 ft and 50 to 62 ft. SWL 17 ft. Pumped 4 hrs at 265 gpm, dd 1.5 ft.

#### Well 17/2-19M3

Yelm School District No. 2 at Yelm. Altitude about 350 feet. Drilled by Tacoma Pump and Well Drilling Company, 1951.

Materials	Thickness (feet)	Depth (feet)
Vashon drift:		
Recreational outwash:		
Topsoil -----	4	4
Boulders -----	16	20
Till (?):		
Hardpan -----	9	29
Boulders -----	2	31
Hardpan, streaks of hard-packed gravel-----	20	51

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 17/2-19M3 -- Continued		
Vashon drift -- Continued		
Advance outwash (?):		
Sand and gravel, clean; water-bearing -----	10	61
Pre-Vashon deposits (?):		
Gravel, hard-packed; water-bearing -----	10	71
Hardpan -----	6	77
Gravel, hard-packed; water-bearing -----	7	84
Hardpan -----	9	93
Gravel, hard-packed; water-bearing -----	8	101

Casing, 10-inch to 101 ft. Perforated 55 to 61 ft, 77 to 84 ft and 93 to 99 ft. Reported yield 60 gpm.

#### Well \*\*17/2-19N1

Town of Yelm. Near elevated water tank. Altitude about 350 feet. Drilled by Richardson Well Drilling Company, 1950.

Vashon drift:		
Recessional outwash:		
Soil -----	3	3
Boulders and clay -----	8	11
Till:		
Hardpan, gray -----	20	31
Advance outwash:		
Gravel and clay, yellow -----	4	35
Gravel (to 5- or 6-inch) -----	27	62
Pre-Vashon deposits:		
Hardpan, gravel and yellow clay -----	1	63

Casing, 12-inch to 52 ft, screen from 50 to 60 ft. SWL 25.5 ft. Pumped 4 hrs at 550 gpm, dd 0.16 ft.

#### Well 17/2-19N2

Town of Yelm. Near elevated water tank, 27 feet from N1. Altitude about 350 feet. Drilled by L. B. Richardson, 1958.

Vashon drift:		
Recessional outwash:		
Gravel and sand -----	4	4
Gravel and clay -----	6	10
Till:		
Hardpan, blue -----	13	23
Advance outwash:		
Clay, sand and gravel -----	7	30
Sand and gravel, blue -----	6	36
Clay, sand and gravel -----	2	38
Sand and gravel, loose from 53 feet -----	23	61
Pre-Vashon deposits (?):		
Hardpan -----	1	62

Casing, 12-inch to 52 ft. Iron screen from 52 to 61 ft. SWL 25.0 ft. Pumped 1,250 gpm, dd 5.2 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well \*\*17/2-29E3

Arthur Justman. On Washington State Highway 5-H, about 0.2 mile east of intersection with Bald Hill Road, which is about 1 mile southeast of Yelm. Altitude about 346 feet. Drilled by A. P. Graf, 1952.

Vashon drift:		
Recessional outwash:		
Topsoil -----	2	2
Boulders and gravel -----	22	24
Gravel, water-bearing (est. yield 30 gpm) -----	7	31
Till:		
Gravel, cemented -----	2	33
Clay, brown, and gravel -----	15	48
Pre-Vashon deposits:		
Clay and gravel -----	34	82
Gravel, some water, (est. yield 10 gpm) -----	12	94
Clay, brown, and gravel -----	18	112
Gravel, water-bearing -----	5	117
Clay, blue, and small stones -----	2	119

Casing, 10-inch to 119 ft; perforated 22 to 36 ft, 42 to 58 ft, and 78 to 117 ft. SWL 14 ft. Pumped 5½ hrs at 150 gpm, dd 34 ft.

## Well \*\*17/2-29F2

Marion K. Thomas. Washington State Highway 5-H, 1.45 miles east of Yelm center. Altitude about 355 feet. Drilled by Richardson Well Drilling Company, 1950.

Vashon drift:		
Recessional outwash:		
Topsoil -----	2	2
Till:		
Hardpan -----	48	50
Advance outwash:		
Gravel; water-bearing -----	5	55

Casing, 8-inch to 55 ft.

## Well \*\*17/2-29F3

J. T. Sparks. Between Yelm and McKenna, about 0.4 mile east of intersection of Bald Hill Road and Washington State Highway 5-H. Altitude about 358 feet. Drilled by Richardson Well Drilling Company, 1951.

Vashon drift:		
Recessional outwash:		
Topsoil, gravelly -----	3	3
Hardpan, boulders, gravel, and sand with zone of clean gravel at 9 feet -----	29	32
Gravel, pea; water-bearing -----	4	36
Till:		
Clay, bouldery, hard -----	21	57
Pre-Vashon deposits:		
Hardpan, becoming gravelly toward bottom with a little water -----	21	78

Casing, 6-inch to 78 ft; perforated 32 to 37 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well **17/2-29L4		
Gilbert Roehr. About 500 feet southwest of Bald Hill Road, about 1.7 miles southeast of Yelm. Altitude about 350 feet. Drilled by Richardson Well Drilling Company, 1950.		
Vashon drift:		
Recessional outwash:		
Topsoil and boulders -----	3	3
Clay and gravel -----	5	8
Till:		
Hardpan -----	20	28
Advance outwash:		
Gravel, loose, with some sand (7 feet of water at 30 feet) -----	2	30
Clay and gravel -----	2	32
Gravel, loose; water-bearing -----	10	42
Clay and sand, with some pebbles -----	11	53
Sand, fine, heaving -----	13	66
(Well plugged from 53 to 66 feet with boulders and clay)		
Casing, 10-inch to 66 ft; perforated 30 to 42 ft (10 holes per ft, $\frac{1}{2}$ -inch by 2-inch). SWL 28 ft. Pumped 1 hr at 500 gpm, dd 3 ft.		
Well **17/2-29N1		
Frank Vogt. About 1.3 miles southeast of Yelm, on Norris Road. Altitude about 355 feet. Drilled O. E. Erdman, 1950.		
Vashon drift:		
Recessional outwash:		
Topsoil -----	10	10
Gravel and boulders -----	20	30
Till:		
Gravel and sand, hard-packed -----	15	45
Advance outwash:		
Gravel -----	5	50
Casing, 8-inch to 50 ft; perforated 16 to 50 ft. SWL 18 ft. Pumped 60 gpm, dd 27 ft.		
Well **17/2-29P2		
J. A. Peugh. About 1.75 miles southeast of Yelm on Bald Hill Road. Altitude about 355 feet. Drilled by Richardson Well Drilling Company, 1950.		
Vashon drift:		
Recessional outwash:		
Gravel and black dirt -----	3	3
Clay and gravel -----	8	11
Till:		
Hardpan -----	3	14
Advance outwash:		
Sand, coarse, gravel, and clay -----	15	29
Sand, fine, some coarse sand -----	5	34
Sand, coarse, and loose gravel -----	4	38
Sand, coarse, some gravel -----	4	42
Sand, gravel, and clay -----	2	44
Sand, coarse, and coarse loose gravel -----	2	46

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well \*\*17/2-29P2 -- Continued

Pre-Vashon deposits:		
Hardpan (cemented gravel?) -----	9	55
Water shut off		
Clay and gravel -----	2	57

Casing, 12-inch to 57 ft; perforated 25 to 27 ft and 38 to 53 ft, 18 holes per round. SWL 13 ft. Pumped 1 hr at 100 gpm, dd 1 ft.

## Well 17/2-29P3

Roy H. Clark. About 1.5 miles southeast of Yelm. Altitude about 353 feet. Drilled by Tacoma Pump and Well Drilling Company, 1956.

Vashon drift:		
Recreational outwash:		
Sandy loam topsoil -----	3	3
Gravel -----	3	6
Sand and gravel, some rock -----	3	9
Gravel and boulders -----	4	13
Sand, gravel and clay -----	5	18
Till, Advance outwash and Pre-Vashon, undifferentiated:		
Gravel, fairly loose, some clay; water-bearing -----	2	20
Gravel and clay, harder packed, some water -----	16	36
Hardpan -----	5	41
Gravel, clay and water -----	7	48
Hardpan -----	3	51
Gravel, fairly loose, water-bearing -----	4	55
Gravel, drier, more silt -----	4	59
Clay, gravel and sand -----	5	64
Sand, fine to coarse gravel, clay, more water -----	6	70
Sand, fine to coarse gravel, clay, drier -----	3	73
Sand and gravel, some clay, tested 50 gpm (bailer) -----	1	74
Sand and gravel, more clay, less water -----	6	80
Sand, coarse to fine, with clay -----	8	88
Sand, coarse to fine, with clay, some rock, dry -----	9	97
Gravel, coarse, some clay; water-bearing -----	2	99

Casing, 12-inch to 99 ft; perforated 18 to 20 ft, 41 to 48 ft, 51 to 55 ft, 64 to 70 ft and 72 to 75 ft. SWL 9.5 ft. Pumped 4 hrs at 100 gpm, dd 77 ft.

## Well \*\*17/2-29Q1

W. B. Benefield. About 400 feet southwest of Bald Hill Road, about 1.9 miles southeast of Yelm. Altitude about 350 feet. Drilled by Richardson Well Drilling Company, 1951.

Old dug well	23	23
Vashon drift:		
Advance outwash:		
Sand, coarse, clay, and gravel -----	17+	40
Sand, coarse, and fairly loose gravel -----	3	43
Pre-Vashon deposits:		
Hardpan, water shut off -----	3	46
Clay and gravel -----	9	55

Casing, 8-inch to 55 ft; perforated 24 to 44 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well \*\*17/2-32Q2

T. M. Sheldon. About 2.5 miles southeast of Yelm. Altitude about 365 feet. Drilled by A. P. Graf, 1952.

Vashon drift:		
Recessional outwash and till, undifferentiated:		
Topsoil -----	2	2
Gravel and clay, some water -----	36	38
Advance outwash:		
Gravel, sand, and boulders -----	15	53
Pre-Vashon deposits:		
Gravel and boulders -----	19	72
Boulders -----	4	76
Gravel and sand -----	14	90
Gravel -----	2	92
Clay, blue, and gravel -----	53	145
Gravel -----	5	150
Clay and gravel -----	82	232
Sand, black, some water -----	2	234
Gravel, water-bearing -----	15	249
Clay and gravel -----	5	254

Casing, 12-inch to 93 ft, 8-inch from 87 to 254 ft; perforated 13 to 18, 38 to 74, 80 to 90, 145 to 152, and 238 to 251 ft. SWL 8 ft. Pumped 4 hrs at 600 gpm, dd 61 ft.

## Well \*\*17/2-33K2

D. C. Jewell. About 3.25 miles southeast of Yelm on Bald Hill Road. Altitude about 380 feet. Drilled by A. P. Graf, 1951.

Vashon drift:		
Recessional outwash:		
Topsoil -----	2	2
Boulders and coarse gravel -----	19	21
Gravel and sand, some water -----	3	24
Till:		
Gravel, hard-packed -----	24	48
Advance outwash:		
Gravel, loose, and sand, some water -----	4	52
Pre-Vashon deposits:		
Gravel, cemented -----	20	72
Gravel, loose, some water -----	6	78
Gravel, cemented -----	14	92
Gravel, loose, some water -----	10	102
Gravel, cemented -----	3	105

Casing, 10-inch to 105 ft; perforated 24 to 28 ft, 44 to 56 ft, 72 to 78 ft, and 92 to 102 ft. SWL 22 ft. Pumped 4 hrs at 80 gpm, dd 79 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well \*\*17/2-33P1

Louis Peterson. About 3.0 miles southeast of Yelm. About 0.5 mile east and 0.4 mile south of crossing of Yelm Irrigation Ditch and Smith Road. Altitude about 360 feet. Drilled by A. P. Graf, 1952.

Vashon drift:		
Recessional outwash:		
Soil -----	2	2
Gravel, sand, and some boulders -----	28	30
Gravel, fine; water-bearing -----	4	34
Till:		
Gravel and rock, with brown clay binder -----	22	56
Advance outwash:		
Gravel, coarse; water-bearing -----	5	61
Gravel, hard-packed -----	11	72
Gravel, coarse; water-bearing -----	2	74
Pre-Vashon deposits:		
Clay, brown, and gravel -----	17	91
Gravel, some water -----	4	95
Clay, brown, and gravel -----	10	105

Casing, 8-inch to 105 ft; perforated 30 to 97 ft. SWL 14 ft. Pumped 4 hrs at 200 gpm, dd not noticeable.

## Well \*\*17/2-33R1

D. C. Jewell. About 3.5 miles southeast of Yelm on Bald Hill Road. Altitude about 390 feet. Drilled by A. P. Graf, 1951.

Vashon drift:		
Recessional outwash:		
Topsoil -----	2	2
Boulders and coarse gravel-----	36	38
Gravel and sand, some water -----	9	47
Till:		
Gravel and sandy clay -----	7	54
Gravel, hard-packed -----	15	69
Advance outwash (?):		
Gravel and sand -----	9	78
Pre-Vashon deposits:		
Gravel, hard-packed -----	12	90
Gravel and sand -----	5	95
Gravel, hard-packed -----	13	108
Gravel and sand -----	4	112
Gravel and clay -----	16	128
Gravel, hard-packed -----	18	146
Sand and gravel -----	4	150
Clay, brown, and broken rock (boulders?) -----	20	170

Casing, 12-inch to 150 ft; perforated 42 to 146 ft. SWL 38 ft. Pumped 4 hrs at 90 gpm, dd 103 ft.

## 178 GEOLOGY AND GROUND-WATER RESOURCES, THURSTON COUNTY, WASH.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/1W-1H1

Clinton M. Okerstrom. About 0.5 mile southwest of Lake St. Clair. Altitude about 225 feet.  
Drilled by L. B. Richardson, 1952.

Topsoil -----	5	5
Hardpan and boulders -----	26	31
Clay, yellow, sand and gravel -----	7	38
Sand, dry -----	7	45
Clay, sandy -----	5	50
Clay, yellow, sand -----	20	70
Hardpan -----	26	96
Clay, brown, sand and gravel -----	5	101
Clay, yellow, and sand -----	8	109
Hardpan -----	6	115
Clay, yellow, sand and gravel -----	2	117
Hardpan -----	9	126
Sand, coarse, and gravel (water raised 12 feet) -----	2	128
Hardpan -----	15	143
Gravel, loose, and coarse sand -----	2	145
Hardpan -----	29	174
Clay, yellow, and gravel -----	6	180
Hardpan -----	12	192
Sand, fine, and gravel (water) -----	1	193
Hardpan -----	19	212
Sand -----	1	213
Sand and gravel (water) -----	3	216
Hardpan -----	6	222
Sand and gravel (water) -----	1	223
Hardpan -----	13	236

Casing, 10-inch to 236 ft; perforated 142 to 232 ft. SWL 116.5 ft. Pumped 160 gpm, dd 30 ft.

## Well 17/1W-2R2

Howard A. Mahurin. About 0.5 mile southeast of Patterson Lake. Altitude about 203 feet.  
Drilled by Pete Sylte, 1956.

Topsoil, sandy -----	4	4
Gravel, dry packed -----	10	14
Gravel, cemented -----	29	43
Gravel, packed, sand and clay; small flow of water -----	3	46
Gravel and clay -----	8	54
Gravel, small; fair flow of water -----	4	58
Gravel and clay, cemented -----	9	67
Sand, gravel, some water -----	3	70
Gravel, cemented -----	16	86
Gravel and sand; fair flow -----	5	91
Sand, fine -----	18	109
Sand, quick -----	30	139
Sand, fine water -----	12	151
Sand and gravel; water-bearing -----	7	158

Casing, 10-inch to 158 ft; perforated 43 to 47 ft, 54 to 58 ft, 66 to 70 ft, 86 to 91 ft and 153 to 157 ft. SWL 35 ft. Tested at 150 and 165 gpm.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/1W-3A4

Walter Rowe. About 600 feet west of Patterson Lake. Altitude about 201 feet. Drilled by N. C. Jannsen, 1946.

Vashon drift:		
Gravel with clay -----	15	15
Gravel, loose -----	17	32
Sand and gravel with water -----	30	62

Casing, 8-inch to 62 ft; perforated 42 to 62 ft. SWL 32 ft. Pumped about 75 gpm with an estimated dd of 20 ft.

## Well 17/1W-3E1

Walter Rowe. About 0.8 mile southwest of Patterson Lake along railroad track. Altitude about 200 feet. Drilled by N. C. Jannsen, 1947.

Vashon drift:		
Recreational outwash:		
Sandy loam -----	12	12
Sand and gravel -----	6	18
Gravel, washed -----	10	28
Gravel and sand -----	38	66
Till:		
Hardpan -----	2	68

Casing, 24-inch to 25 ft; 20-inch from 0 to 68 ft; perforated 25 to 60 ft. Pumped at 1,000 gpm.

## Well 17/1W-3Q1

George M. Stewart. About 0.65 mile southwest of Patterson Lake. Altitude about 205 feet. Drilled by A. P. Graf, 1955.

Vashon drift:		
Recreational outwash:		
Topsoil -----	3	3
Clay, sandy -----	15	18
Gravel and clay -----	14	32
Gravel, water-bearing -----	3	35
Till (?):		
Gravel, cemented -----	6	41
Advance outwash:		
Gravel, coarse, and loose sand -----	7	48
Gravel, water-bearing -----	3	51
Pre-Vashon (?) deposits, undifferentiated:		
Gravelly clay -----	9	60
Gravel, water-bearing -----	8	68
Sand and gravel -----	11	79
Clay, blue and sand -----	3	82
Gravel, cemented -----	26	108
Sand, loose, and gravel, some water -----	18	126

Casing, 10-inch to 127 ft; perforated 60 to 68 ft, 76 to 81 ft and 119 to 124 ft. Cement plug at 114 ft. SWL 28 ft. Pumped 3 hrs at 400 gpm, dd 47.5 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 17/1W-4B1		
J. H. Spencer. About 1.2 miles west of south end of Patterson Lake. Altitude about 205 feet. Drilled by N. C. Janssen, 1946.		
Vashon drift:		
Recessional outwash:		
Soil, black sandy -----	5	5
Sand -----	5	10
Till (?):		
Clay, hard, with sand -----	6	16
Clay with gravel -----	13	29
Advance outwash (?):		
Gravel, water -----	3	32
Sand -----	4	36
Gravel, large -----	4	40
Pre-Vashon (?) deposits, undifferentiated:		
Clay with gravel -----	2	42
Gravel, large -----	15	57
Gravel, hard-packed -----	19	76
Gravel, sand -----	25	101
Sand -----	9	110
Gravel, sand with water -----	3	113
Clay and gravel -----	8	121
Gravel -----	9	130
Sand, coarse -----	29	159
Hardpan with large rocks -----	4	163
Gravel, cemented -----	7	170
Gravel, cemented with large rocks -----	8	178
Hardpan -----	17	195
Clay, brown, with gravel -----	30	225
Clay, blue, with gravel -----	18	243

Casing, 24-inch to 30 ft; 14-inch to 76 ft; 10-inch from 57 to 185 ft; perforated 100 to 160 ft.  
SWL 25 ft. Pumped 800 gpm, dd 25 ft.

## Well 17/1W-4C1

J. H. Spencer. About 1,320 feet west of 4B1. Altitude about 205 feet. Drilled by N. C. Janssen, 1946.

Vashon drift:		
Recessional outwash:		
Soil, black sandy -----	3	3
Sand -----	2	5
Till (?):		
Clay, sandy -----	16	21
Gravel -----	5	26
Gravel with clay -----	6	32
Advance outwash (?):		
Gravel, large loose, with sand and water -----	10	42
Sand, coarse, and water -----	16	58
Gravel with water -----	4	62
Pre-Vashon (?) deposits, undifferentiated:		
Gravel, hard-packed, some water -----	10	72

Casing, 24-inch to 30 ft; 16-inch to 72 ft; perforated 32 to 72 ft. SWL 25 ft. Pumped 600 gpm, dd 25 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/1W-401

F. E. Wilder. About 1,320 feet west of 4C1. Altitude about 205 feet. Drilled by N. C. Janssen, 1946.

Vashon drift:		
Recessional outwash:		
Topsoil -----	4	4
Clay, sandy -----	6	10
Sand, loose -----	15	25
Undifferentiated:		
Gravel with clay and water -----	3	28
Gravel with water -----	48	76
Gravel with clay and water -----	8	84

Casing, 24-inch to 34 ft; 14-inch from 34 to 84 ft; perforated 44 to 84 ft. SWL 25 ft. Pumped 900 gpm, dd 5 ft.

## Well 17/1W-4H3

L. J. Wyckoff. About 1.3 miles southwest of Patterson Lake. Altitude about 190 feet. Drilled by Patterson, 1958.

Sand, loam, gravel -----	19	19
Hardpan, cemented gravel -----	9	28
Gravel -----	3	31
Hardpan		

Casing, 6-inch to 31 ft. SWL 17 ft. Tested at 1,200 gph, no apparent dd.

## Well 17/1W-4L1

Walter Rowe. About 0.3 mile south of 4B1. Altitude about 195 feet. Drilled by N. C. Janssen, 1946.

Vashon drift, undifferentiated:		
Topsoil -----	4	4
Sand -----	10	14
Gravel with clay -----	13	27
Sand, water, and gravel -----	12	39
Rocks, large, gravel, sand and water -----	10	49
Gravel and water -----	10	59
Hardpan -----	6	65
Sand, water, and gravel -----	17	82
Quicksand in clay -----	5	87

Casing, 24-inch to 32 ft; 20-inch to 87 ft; perforated 30 to 86 ft. SWL 20 ft. Pumped 750 gpm, dd 25 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 17/1W-5J1		
Walter Rowe. About 4.5 miles southeast of Tumwater. Altitude about 205 feet. Drilled by N. C. Jannsen, 1946.		
Vashon drift:		
Recessional outwash:		
Topsoil -----	5	5
Sand -----	14	19
Gravel -----	16	35
Till:		
Hardpan -----	10	45
Advance outwash:		
Gravel with water -----	37	82
Pre-Vashon (?) deposits, undifferentiated:		
Gravel with clay -----	10	92
Gravel, sand and water -----	36	128
Gravel with clay -----	2	130

Casing, 24-inch to 28 ft; 14-inch to 78 ft; 10-inch from 65 to 130 ft; perforated 28 to 75 ft and 85 to 128 ft. SWL 27 ft. Pumped 300 gpm, dd 28 ft.

## Well 17/1W-6C1

E. A. Ohman. About 2.2 miles north of East Olympia. Altitude about 195 feet. Drilled by Patterson, 1953.

Loam, sandy -----	2	2
Gravel, sand -----	23	25
Sand and gravel -----	5	30
Sand -----	20	50
Sand and gravel -----	5	55
Sand and clay -----		

Casing, 6-inch to 50 ft. SWL 24 ft. Bailed 1,100 gph, dd 6 ft.

## Well 17/1W-6C3

Elmer Lowe. About 3.5 miles west of Patterson Lake on East Olympia Road. Altitude about 195 feet. Drilled by Seauzier, 1950.

Vashon drift:		
Till:		
Hardpan-----	15	15
Advance outwash:		
Sand -----	75	90
Gravel -----	10	100

Casing, 6-inch to 100 ft; perforations, no information. Log from owner's memory.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/1W-6P2

Fred Frohlich. About 1.6 miles north of East Olympia. Altitude about 195 feet. Drilled by Patterson Drilling Company, 1958.

Vashon drift, undifferentiated:		
Sand -----	21	21
Gravel, cemented -----	46	67
Gravel, sand -----	3	70
Gravel, cemented -----	5	75
Gravel, sand -----	10	85
Gravel, cemented -----	5	90
Gravel, sand -----	2	92
Gravel, cemented -----	4	96
Gravel -----	7	103
Gravel, cemented -----	3	106

Casing, 8-inch to 106 ft; perforated 72 to 103 ft. SWL 47 ft. Bailed 18 gpm, dd 0.5 ft.

## Well 17/1W-7R1

L. M. Alkire. About 0.4 mile west of East Olympia. Altitude about 210 feet. Drilled by Patterson Drilling Company, 1953.

Clay, soil and rocks -----	4	4
Gravel, clay, boulders and sand-----	54	58
Gravel, cemented, and boulders -----	10	68
Gravel, clay and sand -----	60	128
Sand, clay and gravel -----	1	129
Sand and silt -----	191	320

Casing, 10-inch to 99 ft; 8-inch from 98 to 129 ft; perforated 98 to 129 ft. SWL 50 ft. Pumped 2½ hrs at 75 gpm, dd 68 ft. Pumped too much sand.

## Well 17/1W-7R2

L. M. Alkire. About 120 feet north of 7R1. Altitude about 210 feet. Drilled by C. D. Roberts, 1958.

Topsoil -----	3	3
Clay -----	4	7
Gravel and boulders -----	8	15
Gravel, loose, and sand -----	34	49
Gravel and sand; water-bearing -----	18	67
Sand, brown -----	4	71
Sand, coarse, and some gravel -----	5	76
Gravel, very coarse, and sand, water-bearing -----	7	83
Gravel, cemented, and sand -----	7	90
Gravel and sand; water-bearing -----	23	113
Sand, cemented -----	13	126
Sand, little coarse gravel; water-bearing -----	6	132
Sand, fine, little gravel -----	14	146

Casing, 8-inch to 146 ft; perforated 78 to 83 ft and 92 to 113 ft. SWL 45 ft. Pumped 4 hrs at 60 gpm, dd 55 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/1W-11G1

O. C. McLaughlin. About 0.65 mile south of Patterson Lake. Altitude about 200 feet. Drilled by Patterson, 1952.

Gravel, cemented -----	30	30
Sand, clay and gravel -----	3	33
Gravel, cemented -----	16	49
Gravel, some water -----	2	51
Gravel, cemented -----	3	54
Gravel, water-bearing -----	6	60

Casing, 6-inch to 60 ft. SWL 44 ft. Bailed 1,900 gph, dd 1 ft.

## Well 17/1W-11G2

Kenneth Navin. About 0.2 mile east of 11G1. Altitude about 200 feet. Drilled by Patterson, 1952.

Sand and clay -----	6	6
Gravel, cemented -----	9	15
Clay -----	2	17
Gravel, cemented -----	11	28
Clay and sand -----	4	32
Gravel, water-bearing -----	2	34
Gravel, cemented -----	22	56
Gravel, water-bearing -----	8	64

Casing, 6-inch to 64 ft. SWL 32.5 ft. Bailed 700 gph, dd 17 ft.

## Well 17/1W-16E1

George Kendall. About 0.8 mile southeast of East Olympia. Altitude about 230 feet. Drilled in 1957.

Vashon drift:		
Recessional outwash:		
Soil and sand -----	20	20
Gravel -----	2	22
Till:		
Hardpan -----	64	86

Casing, 6-inch to 86 ft; perforations, no information. Log reported by owner.

Table 3 -- Materials penetrated by representative wells, -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/1W-33G1

Richard E. Wells. About 0.4 mile east of Offutt Lake. Altitude about 245 feet. Drilled by Seunier.

Vashon drift:		
Recessional outwash:		
Gravel, river laid (?) -----	11	11
Till (?):		
Hardpan -----	30	41
Gravel, very thin layer -----		
Hardpan -----	13	54
Undifferentiated:		
Clay, blue -----	18	72

Casing, 6-inch. After hitting blue clay, unsuccessful attempts were made to pull casing, then a blast was set off at 32 ft and drilling stopped.

## Well 17/2W-4M1

Leroy McGuire. About 1.3 miles east of Black Lake. Altitude about 180 feet. Drilled by Patterson, 1952.

Dug -----	4	4
Sand and clay -----	36	40
Sand and gravel -----	3	43
Gravel and sand -----	3	46
Gravel -----	3	49

Casing, 6-inch to 49 ft. SWL 14.5 ft. Bailed 30 gpm, dd 4 ft.

## Well 17/2W-6J1

Camp Kennydale Girl Scout Camp. On east shore of Black Lake. Drilled by Patterson, 1956.

Clay and sand -----	18	18
Sand and clay -----	18	36
Sand and gravel -----	8	44
Sand and clay -----	6	50

Casing, 6-inch to 37 ft. Six-ft screen set to 44 ft. SWL 12 ft. Bailed 20 gpm, dd 15 ft.

## Well 17/2W-8H1

Centralia Fruit Farms. About 1.2 miles east of south end of Black Lake. Altitude about 195 feet. Drilled by Richardson Well Drilling Company, 1954.

Topsoil and sand -----	3	3
Sand, black, and soil -----	7	10
Clay, yellow, and sand -----	28	38
Sand, coarse, and gravel, some water -----	7	45
Hardpan, drilled through log at 46 feet -----	2	47
Sand, fine, and yellow clay -----	4	51
Sand, coarse, and gravel, some water -----	2	53
Hardpan -----	14	67

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 17/2W-8H1 -- Continued		
Sand, coarse, and gravel -----	3	70
Gravel and clay -----	2	72
Sand, coarse, and gravel -----	4	76
Gravel, loose, and clay -----	3	79

Casing, 12-inch to 79 ft; perforated 42 to 44 ft and 54 to 75 ft. SWL 10 ft. Test pumped well to maximum of 596 gpm, dd 54 ft; at 503 gpm, dd 48 ft. Recovery in 52 seconds.

#### Well 17/2W-8H2

Centralia Fruit Farms. About 600 feet north of 8H1. Altitude about 195 feet. Drilled by Richardson Well Drilling Company, 1953.

Sand and clay -----	12	12
Clay, sand, and gravel -----	12	24
Hardpan (seepage) -----	11	35
Sand, coarse and loose, and gravel (14 ft of water at 35 ft)-----	3	38
Hardpan -----	8	46
Sand and gravel with streaks of clay (Bailed and pulled in bottom at 48 ft. Tested 20 gpm at 54 ft.)-----	9	55
Sand, coarse, and gravel, water (Bailed 60 gpm, dd 12 ft at 59 ft. SWL 16 ft.)-----	4	59
Hardpan -----	12	71
Sand, coarse, loose, and gravel, water (Bailed 60 gpm, dd 4 ft at 72½ ft. Set 60 ft column and maximum 180 gpm. Bottom pulled in.)-----	2	73
Hardpan -----	7	80
Clay, yellow, sand and gravel -----	8	88
Sand, fine -----	5	93
Sand, fine, gravel and clay -----	5	98
Sand, fine, clay and a little gravel -----	12	110
Clay, sand and gravel -----	3	113
Hardpan -----	26	139
Gravel, large, sand streaked with clay -----	4	143
Gravel, clay and sand -----	4	147
Clay, yellow -----	3	150
Clay, sandy yellow, with gravel -----	30	180
Clay, sticky brown clay with a little gravel -----	2	182
Clay, blue -----	16	198
Clay, sticky brown, some blue clay remaining -----	7	205
Clay, sticky, blue -----	11	216
Clay, brown and blue, streaks of fine sand -----	12	228
Clay, blue, very fine sand -----		

Casing, 8-inch to 228 ft; perforated 35 to 55 ft and 57 to 75 ft. SWL 12 ft. Pumped 4 hrs at 350 gpm, dd 40 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/2W-8R4

L. R. Sorrell. About 1.3 miles southeast of Black Lake. Altitude about 189 feet. Drilled by Patterson, 1956.

Topsoil -----	5	5
Gravel, clay and sand (hard) -----	35	40
Gravel, sand and clay -----	7	47

Casing, 6-inch to 47 ft. SWL 13 ft. Bailed 57 gpm, dd 14 ft.

## Well 17/2W-9B2

Frank Abbott. At south city limits of Tumwater on road to Little Rock. Altitude about 190 feet. Drilled by A. P. Graf, 1955.

Vashon drift, undifferentiated:		
Topsoil -----	2	2
Sand, brown -----	31	33
Gravel, water-bearing -----	5	38
Gravel and clay -----	6	44
Sand -----	1	45

Casing, 8-inch to 45 ft; perforated 39 to 44 ft. SWL 14.5 ft. Pumped 2 hrs at 115 gpm, dd 10.5 ft. Perforating below primary aquifer (33 to 38 ft) was necessitated by upper sand sifting through coarse gravel.

## Well 17/2W-9F3

Arthur G. Adams. About 6 miles southwest of Olympia on Little Rock - Tumwater Road. Altitude about 190 feet. Drilled by Patterson, 1955.

Vashon drift, undifferentiated:		
Pit -----	10	10
Clay and sand -----	5	15
Sand and clay -----	14	29
Gravel and sand -----	2	31
Gravel, clay and sand -----	13	44
Gravel and sand -----	2	46
Gravel, clay and sand -----	2	48
Clay and sand -----	1	49
Sand and gravel -----	1	50
Gravel -----	2	52
Gravel and sand -----	2	54

Casing 6-inch from 8 to 54 ft. SWL 16 ft. Pumped 6 hrs at 90 gpm, dd 11.5 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/2W-11A1

Robert F. Reinke. About 0.3 mile southwest of Munn Lake. Altitude about 175 feet. Drilled by Patterson, 1951.

Topsoil -----	5	5
Sand, clay -----	34	39
Sand, water -----	3	42
Sand, clay -----	30	72
Sand, coarse -----	9	81
Sand, gravel; water-bearing -----	6	87

Casing, 6-inch to 76 ft. Screen 76 to 87 ft. SWL 37 ft. Pumped 4 hrs at 50 gpm, no apparent dd.

## Well 17/2W-11H1

Centralia Fruit Farms. About 0.55 mile southwest of Munn Lake on Maple Bowl Road. Altitude about 205 feet. Drilled by Martz, 1946.

Vashon drift:		
Recessional outwash and undifferentiated deposits:		
Sand -----	60	60
Gravel and sand; water-bearing -----	25	85
Clay and quicksand -----	65	150
Gravel and sand; water-bearing -----	10	160
Till (?):		
Hardpan -----	30	190
Advance outwash:		
Gravel -----	2	192

Casing, 10-inch to 192 ft; perforated 75 to 82 ft and 150 to 160 ft. SWL 65 ft. Pumped 256 gpm, dd 70 ft.

## Well 17/2W-12C1

Mrs. Helen C. Shank. At Trail's End Ranch south of Munn Lake. Altitude about 185 feet. Drilled by Patterson, 1953.

Sand and gravel -----	55	55
Gravel and sand; water-bearing -----	17	72
Gravel, sand, and red silt -----	7	79
Sand and gravel -----	4	83
Sand -----	9	92

Casing, 6-inch to 88 ft. No. 14 everdur screen 88 to 92 ft. SWL 56 ft. Bailed 24 gpm, dd 15 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/2W-12N2

J. Hofert Company. About 4 miles south of Olympia. Altitude about 205 feet. Drilled by Patterson, 1957.

Sand -----	30	30
Gravel, sand and clay -----	35	65
Sand and clay -----	28	93
Gravel, sand; water-bearing -----	7	100
Sand, clay -----	156	256
Sand, gravel -----	26	282
Clay -----	3	285
Sand, clay, little gravel -----	18	303

Casing, 12-inch to 304 ft; perforated 260 to 280 ft. SWL 67 ft. Pumped 7 hrs at 230 gpm, dd 82 ft.

## Well 17/2W-13R1

Alvie E. Young. About 2.3 miles southeast of Olympia Airport. Altitude about 225 feet. Drilled by Patterson, 1954.

Gravel -----	22	22
Gravel, cemented -----	20	42
Gravel, clay and sand -----	10	52
Clay, sand and gravel -----	10	62
Sand and clay -----	11	73
Sand and pea gravel -----	1	74
Sand and clay -----	8	82
Sand and gravel; water-bearing -----	1	83
Sand and clay -----	1	84
Gravel and sand -----	4	88

Casing, 6-inch to 88 ft. SWL 40 ft. Bailed 20 gpm, dd 17 ft.

## Well 17/2W-14M2

L. R. Armstrong. About 1.3 miles southwest of Olympia Airport. Altitude about 200 feet. Drilled by A. P. Graf, 1955.

Topsoil -----	2	2
Sand -----	12	14
Clay with gravel -----	4	18
Gravel, water-bearing (not much water) -----	3	21
Clay, gravelly -----	21	42
Gravel, water-bearing -----	6	48
Clay with gravel -----	3	51

Casing, 10-inch to 51 ft; perforated 40 to 48 ft. SWL 14 ft. Pumped 4 hrs at 95 gpm, dd 45 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/2W-14M4

Rudolph F. Szolas. About 1.3 miles southwest of Olympia Airport. Altitude about 198 feet.  
Drilled by A. E. Seaunier, 1947.

Sand -----	14	14
Hardpan -----	18	32
Gravel, water-bearing -----	3	35

Casing, 5-inch to 35 ft.

## Well 17/2W-14N1

Walter Saeger. About 1.8 miles southwest of Olympia Airport. Altitude about 198 feet. Dug well.

Loam and sand -----	14	14
Quicksand -----	13	27
Gravel and cement rock -----	1	28

Casing, 30-inch.

## Well 17/2W-14N2

Chester A. Parker. About 1.8 miles southwest of Olympia Airport. Altitude about 198 feet.  
Drilled by W. C. Day, 1948.

Sand, dry -----	15	15
Sand and water -----	10	25
Hardpan, dry -----	5	30
Gravel, water-bearing -----	30	60

Casing, 8-inch to 60 ft. Perforated 30 to 58 ft. SWL 10 ft. Pumped 120 gpm, dd 10 ft.

## Well 17/2W-15P1

Henri Schiottman. About 5 miles southwest of Olympia. Altitude about 198 feet. Drilled by A. E. Seaunier, 1952.

Not recorded -----	17	17
Hardpan -----	29	46
Gravel, water-bearing -----	21	67
Gravel, water-bearing -----	2	69
Hardpan -----	8	77
Sand -----	3	80
Shale -----	2	82

Casing, 8-inch to 67 ft; 6-inch to 70 ft; perforated 45 to 66 ft. SWL 17 ft. Pumped for 4 hrs at 126 gpm, dd 42 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 17/2W-16R1		
Aubrey P. Thomas. About 2.3 miles southwest of Olympia Airport. Altitude about 195 feet. Drilled by Davidson, 1951.		
Gravel, loose -----	14	14
Hardpan -----	7	21
Gravel, water-bearing -----	2	23
Sand, loose, and gravel -----	11	34
Hardpan -----		
Casing, 8-inch to 28 ft; screen 28 to 34 ft. SWL 9 ft. Pumped 4 hrs at 140 gpm, dd 12 ft.		
Well 17/2W-17R1		
Lloyd A. Brethauer. About 3.3 miles southwest of Olympia Airport. Altitude about 185 feet. Drilled by Seauzier, 1956.		
Loam, sandy -----	6	6
Hardpan -----	26	32
Gravel -----	1	33
Casing, 6-inch to 33 ft. Tested at 75 gpm.		
Well 17/2W-18K1		
Charles Curtarelli. About 1.1 miles south of Black Lake. Altitude about 170 feet. Drilled by Seauzier, 1953.		
Topsoil -----	10	10
Sand and gravel -----	4	14
Hardpan -----	6	20
Gravel, water-bearing -----	25	45
Casing, 8-inch to 45 ft; perforated 32 to 44 ft. SWL 14 ft. Pumped 4 hrs at 135 gpm, dd 8 ft.		
Well 17/2W-19K1		
Keith Homes. About 2 miles south of Black Lake on Little Rock Road. Altitude about 160 feet. Drilled by Patterson, 1955.		
Clay, brown, and gravel -----	6	6
Gravel, cemented -----	8	14
Sand -----	6	20
Clay, blue, and gravel -----	4	24
Gravel, sand and clay -----	2	26
Gravel and clay -----	16	42
Gravel -----	2	44
Casing, 6-inch to 44 ft. SWL 13 ft. Bailed 38 gpm, dd 10 ft.		

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/2W-20B2

W. J. Hazard. About 2 miles southeast of Black Lake. Altitude about 185 feet. Drilled by M. B. Patterson, 1956.

No record -----	17	17
Gravel, clay -----	5	22
Gravel, cemented -----	10	32
Gravel, sand and clay -----	13	45
Sand -----	5	50
Gravel, sand and clay -----	5	55
Gravel, sand -----	4	59
Gravel, heavy, sand -----	1	60

Casing, 6-inch to 38 ft; 5-inch 37 to 60 ft; perforated 38 to 60 ft. SWL 14.2 ft. Bailed 57 gpm, dd 1 ft.

## Well 17/2W-20G1

State Department of Natural Resources. About 7 miles southwest of Olympia. Altitude about 185 feet. Drilled by M. B. Patterson, 1957.

Sand -----	32	32
Gravel -----	3	35
Sand, gravel, clay -----	5	40
Gravel -----	10	50
Sand -----	2	52
Sand, gravel -----	8	60
Clay, gravel -----	5	65
Gravel, sand -----	5	70
Gravel, clay -----	10	80

Casing, 12-inch to 48 ft; 10-inch 48 to 80 ft; perforated 48 to 80 ft. SWL 13 ft. Pumped for 7 hrs at 620 gpm, dd 7 ft.

## Well 17/2W-20H1

State Department of Natural Resources. About 0.3 mile east of Well 20H2. Altitude about 185 feet. Drilled by M. B. Patterson, 1956.

Sand -----	21	21
Clay, sand, gravel -----	16	37
Gravel, sand, clay -----	12	49
Gravel, sand -----	16	65
Gravel, sand, clay -----	3	68
Clay, yellow -----	2	70

Casing, 12-inch to 41 ft; 10-inch 39 to 69 ft; perforated 40 to 70 ft. SWL 8.4 ft. Pumped 6 hrs at 495 gpm, dd 8 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/2W-22J1

Harry and June Patterson. About 0.2 mile west of South Union. Altitude about 205 feet.  
Drilled by A. C. Seauier, 1951.

Sand -----	27	27
Hardpan -----	9	36
Gravel and water -----	5	41
Gravel, tight, some water -----	3	44
Gravel, loose; water-bearing -----	4	48

Casing, 6-inch to 48 ft; perforated 38 to 47 ft.

## Well 17/2W-22J2

Joe Oderman. At South Union. Altitude about 195 feet. Drilled by Mykol, 1956.

Soil -----	3	3
Hardpan -----	48	51
Sand and gravel -----	3	54
Sand -----	16	70

Casing, 6-inch to 65 ft; perforated 65 to 70 ft. SWL 12 ft. Pumped 4 hrs at 60 gpm, dd 48 ft.

## Well 17/2W-23D1

John J. Brand. About 0.6 mile north of South Union. Altitude about 197 feet. Dug well.

Sand -----	6	6
Clay -----	4	10
Gravel -----	1	11
Sand -----	14	25
Gravel -----	1	26

Casing, 36-inch. SWL 18 ft. Pumped 6 hrs at 35 gpm, dd 4 ft.

## Well 17/2W-29L1

Eldon W. Countryman. About 3 miles southwest of South Union. Altitude about 180 feet. Drilled by L. B. Richardson, 1952.

Clay, sandy brown -----	5	5
Clay, sandy, and gravel -----	2	7
Clay, sandy brown -----	8	15
Clay, sand, gravel -----	6	21

Casing, 18-inch to 15 ft; 12-inch perforated liner 15 to 21 ft. Bottom 6 ft gravel packed. SWL 6 ft. Pumped 4 hrs at 200 gpm, dd 12 ft.

Table 3 -- Materials penetrated by representative wells. --Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/2W-32C1

Reinhold Newman. About 3.1 miles southwest of South Union. Altitude about 185 feet. Drilled by L. B. Richardson, 1951.

Topsoll -----	2	2
Clay, sandy yellow -----	10	12
Sand, gravel and some clay -----	10	22
Sand, gravel -----	4	26
Clay -----		

Casing, 18-inch to 15 ft. Eight inch everdur screen 15 to 26 ft, gravel packed. Tested at 225 gpm.

## Well 17/2W-32D1

Theodore Hedges. About 2.1 miles northwest of Maytown. Altitude about 181 feet. Drilled by L. B. Richardson, 1951.

Clay, sandy -----	7	7
Gravel -----	3	10
Clay, sandy -----	2	12
Clay, sand and gravel -----	3	15
Sand and water -----	8	23
Sand and gravel; water-bearing -----	9	32

Casing, 18-inch to 22 ft; 12-inch perforated 22 to 32 ft, gravel packed. SWL 1 ft. Pumped 2 hrs at 350 gpm, dd 10 ft.

## Well 17/3W-12A1

H. C. Campbell. About 0.5 mile west of Black Lake. Altitude about 200 feet. Drilled by Martz. Portion dug.

Sand and gravel -----	8	8
Hardpan -----	8	16
Sand and fine gravel (stood up) -----	25	41
Drilled portion -----	31	72

Casing, 6-inch.

## Well 17/3W-12B1

H. M. Reynolds. About 0.5 mile west of Black Lake. Altitude about 200 feet. Drilled by Patterson, 1953.

Topsoil and gravel -----	6	6
Gravel, cement -----	82	88
Sand and gravel (hard) -----	2	90
Sand -----	1	91
Gravel -----	1	92

Casing, 6-inch to 92 ft. SWL 78 ft. Bailed 18 gpm, dd 3 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/3W-23H1

G. H. Kirkham. About 3.3 miles north of Little Rock. Altitude about 195 feet. Dug well.

Sand and gravel -----	25	25
Hardpan -----	4	29
Sand and gravel -----	38	67

Casing, 30-inch to 25 ft; 18-inch from 25 to 67 ft.

## Well 17/3W-23R1

Carl E. Kinney. About 2.8 miles north of Little Rock. Altitude about 173 feet. Drilled by Patterson, 1958.

Topsoil -----	4	4
Gravel, cemented -----	21	25
Clay -----	10	35
Gravel, cemented -----	8	43
Sand, water-bearing -----	1	44
Gravel, cemented -----	11	55
Sand and pea gravel; yield 6 gpm -----	1	56
Gravel, cemented -----	9	65
Gravel, sand -----	3	68

Casing, 6-inch to 68 ft. SWL 32 ft. Bailed 10 gpm.

## Well 17/3W-25P1

Jess W. Summiller. About 1.9 miles northeast of Little Rock. Altitude about 145 feet. Drilled by Patterson, 1952.

Gravel, clay, sand -----	20	20
Gravel, cemented -----	3	23
Sand, gravel, clay -----	2	25
Gravel, clay -----	12	37
Gravel, cemented -----	16	53
Gravel, clay -----	11	64
Gravel -----	2	66

Casing, 6-inch to 66 ft. SWL 12 ft. Bailed 10 gpm, dd 37 ft.

## Well 17/3W-35E1

W. A. White. About 1.3 miles northwest of Little Rock. Altitude about 145 feet. Drilled by Patterson, 1952.

Gravel, sand, clay -----	17	17
Gravel, cemented -----	23	40
Gravel, sand -----	3	43

Casing, 6-inch to 43 ft. SWL 17 ft. Bailed 30 gpm, dd 6 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 17/3W-35L1

Weiks Dairy. About 0.8 mile north of Little Rock. Altitude about 140 feet. Drilled by Patterson, 1953.

Topsoil -----	5	5
Gravel and clay -----	5	10
Gravel -----	10	20
Gravel and clay -----	30	50
Gravel -----	1	51
Deepened -----	21	72

Casing 8-inch. SWL 13 ft. Pumped 4 hrs at 108 gpm, dd 2 ft. Deepening increased yield to 700 gpm.

## Well 18/1-8D3

West Coast Lumbermen's Association. About 0.65 mile southwest of Nisqually River Bridge. Altitude about 10 feet. Drilled by L. R. Gaudio, 1950.

Clay -----	10	10
Clay, sandy with pieces of pumice up to $\frac{1}{2}$ -inch -----	77	87
Sand, fine, black -----	8	95
Gravel, $\frac{1}{2}$ -Inch to 4-Inch in size -----	9	104
Sand, coarse and gravel -----	8	112

Casing, 8-Inch to 101 ft; 10-ft iron screen 101 to 110 ft. SWL 1.2 ft. Pumped 45 minutes at 810 gpm, dd 6.8 ft.

## Well 18/1-8K1

Pendleton Miller and Anton Klechle. About 0.5 mile north of Nisqually. Altitude about 13 feet. Drilled by A. P. Graf, 1953.

Topsoil -----	2	2
Sand -----	29	31
Sand, some gravel -----	14	45
Sand, blue -----	21	66
Gravel with some sand; water-bearing -----	8	74
Clay, sandy -----	4	78

Casing, 8-Inch to 78 ft; perforated 64 to 72 ft. SWL 10.2 ft. Pumped for one week at 125 gpm, dd 2 ft.

## Well 18/1-16L1

S. W. Staatz. About 1 mile southeast of Nisqually. Altitude about 35 feet. Drilled by R. E. Charlton, 1953.

Sand and clay -----	40	40
Gravel -----	8	48

Casing, 8-Inch to 48 ft; perforated 41 to 48 ft. SWL 6 ft. Pumped 4 hrs at 150 gpm, dd 12 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/1-18A1

E. Deck, Jr. About 1.1 miles southwest of Nisqually. Altitude about 20 feet. Drilled by A. P. Graf, 1953.

Sand and sea mud -----	99	99
Sand, mud and gravel -----	12	111
Sand, coarse, and gravel; water-bearing -----	9	120

Casing, 8-inch to 120 ft; perforated 112 to 117 ft. Flow measured at 250 gpm.

## Well 18/1-20L1

Jess Thompson. About 0.5 mile east of McAllister Springs. Altitude about 125 feet. Drilled by Mykol, 1945.

Sand -----	25	25
Gravel -----	78	103
Sand (2 ft of water) -----	9	112
Sand, gravel; water-bearing -----	20	132

Casing, 6-inch to 127 ft; bronze screen 127 to 132 ft.

## Well 18/1-31E1

S. A. Grove. About 0.5 mile west of Lake St. Clair. Altitude about 225 feet. Drilled by Patterson, 1954.

Gravel, boulders -----	16	16
Sand, boulders -----	24	40
Sand, gravel, clay -----	50	90
Sand, clay, gravel -----	37	127
Gravel, cemented -----	12	139
Gravel, sand, clay -----	1	140
Gravel, cemented -----	15	155
Gravel, sand, clay -----	20	175

Casing, 6-Inch to 175 ft. SWL 150 ft. Bailed 1,140 gph, dd 5 ft.

## Well \*\*18/1-32M1

L. K. Pomeroy. Lake St. Clair, at neck of peninsula jutting northward from south shore. Altitude about 152 feet. Drilled by Richardson Well Drilling Company, 1951.

Vashon drift:		
Recreational outwash:		
Gravel and sand, with some boulders -----	80	80
Alternately hard and soft, similar to hardpan -----	5	85
Sand, black -----	5	90
Gravel and coarser sand -----	22	112
Till (?):		
Hard at bottom -----		112+

Casing, 6-inch to 112 ft. Memory log.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 18/1W-2P1		
Bruno Betti. About 3 miles southeast of South Bay. Altitude about 220 feet. Drilled by Tacoma Pump and Drilling, 1949.		
Gravel, pea -----	22	22
Hardpan -----	87	109
Sand -----	51	160
Clay, blue -----	3	163
Sand, fine -----	75	238

Casing, 6-inch.

## Well 18/1W-2P2

Bruno Betti. About 0.15 mile northwest of Well 2P1 on county road. Altitude about 220 feet. Drilled by Patterson, 1954.

Topsoil, gravel -----	40	40
Hardpan -----	110	150
Sand, gravel -----	15	165
Gravel, coarse -----	8	173
Sand -----	5	178
Gravel, pea, sand and gravel -----	5	183

Casing, 6-inch.

## Well 18/1W-3NI

John Nelson. About 1.7 miles southeast of South Bay. Altitude about 75 feet. Drilled by Patterson, 1953.

Dug -----	28	28
Sand, brown -----	18	46
Sand and clay, blue -----	2	48
Sand, fine -----	8	56
Sand -----	7	63
Clay -----	2	65
Sand, fine -----	5	70
Sand, blue -----	15	85

Casing, 6-inch to 75 ft. Screen 79 to 85 ft. SWL 22 ft. Bailed 10 gpm, dd 18 ft.

## Well 18/1W-5B1

Harry Longmire. About 0.4 mile south of South Bay. Altitude about 115 feet. Dug well.

Soil and clay -----	6	6
Hardpan -----	14	20
Sand, coarse; water-bearing -----	6	26

Well, 48-inch diameter.

Table 3 -- Materials penetrated by representative wells. -- Continued.

Materials	Thickness (feet)	Depth (feet)
Well 18/1W-5P1		
G. C. Dawley. About 1.2 miles south of South Bay. Altitude about 140 feet. Drilled by Mykol, 1956.		
Soil -----	5	5
Hardpan -----	2	7
Gravel, sand -----	12	19
Clay, blue -----	3	22
Sand and gravel -----	38	60

Casing, 6-inch. Water at 25 and 59 ft.

#### Well 18/1W-5R2

B. A. Michaelis. About 1.3 miles south of South Bay. Altitude about 75 feet. Drilled by Patterson, 1956.

Dug -----	17	17
Sand, clay -----	6	23
Sand, gravel -----	3	26
Sand, fine to coarse -----	18	44
Sand -----	13	57
Sand, clay -----	1	58

Casing, 6-inch to 53 ft. Screen 53 to 58 ft. SWL 10 ft. Bailed 15 gpm, dd 23 ft.

#### Well 18/1W-7A4.

M. Allen. About 1.7 miles southwest of South Bay. Altitude about 160 feet. Drilled by Patterson, 1951.

Sand -----	26	26
Sand, gravel -----	4	30
Gravel, cemented-----	20	50
Clay, gravel, sand -----	2	52
Sand, gravel -----	11	63
Gravel -----	3	66

Casing, 6-inch. SWL 20.8 ft. Bailed 20 gpm, dd 29 ft.

#### Well 18/1W-7H1

Mike LeMay. About 1.9 miles southwest of South Bay. Altitude about 187 feet. Drilled by Patterson, 1950.

Not recorded -----	44	44
Gravel, cemented-----	35	79
Sand and gravel -----	3	82

Casing, 6-inch to 82 ft. SWL 44.8 ft. Bailed 10 gpm, dd 21 ft.

## 200 GEOLOGY AND GROUND-WATER RESOURCES, THURSTON COUNTY, WASH.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 18/1W-7H2		
Capitol Feed Company. About 2.1 miles southwest of South Bay. Altitude about 200 feet. Drilled by Patterson, 1952.		
Topsoil -----	3	3
Clay, sand, gravel -----	6	9
Gravel, clay -----	12	21
Sand, clay, gravel -----	12	33
Gravel, clay -----	9	42
Gravel, cemented -----	15	57
Gravel, clay -----	9	66
Gravel, cemented -----	29	95
Sand, clay -----	45	140

Casing, 6-inch to 95 ft. Casing pulled back. SWL 54 ft. Bailed 19 gpm, dd 33 ft.

## Well 18/1W-7M1

Paul B. Carey. About 1.5 miles northeast of Olympia. Altitude about 175 feet. Drilled by Patterson, 1952.

Clay and sand -----	10	10
Sand and clay -----	17	27
Gravel, cemented -----	13	40
Sand, gravel, clay -----	9	49
Gravel, cemented -----	6	55

Clay -----	8	141
Sand and clay -----	9	150
Sand -----	4	154
Gravel -----	2	156

Casing, 6-inch to 155 ft. SWL 75 ft. Bailed 14 gpm, dd 20 ft.

## Well 18/1W-8K2

H. C. Guyett. About 0.7 mile north of Freeway. Altitude about 195 feet. Drilled by Patterson.

Soil -----	6	6
Hardpan -----	48	54
Gravel, pea; water-bearing -----	8	62

Casing, 6-inch.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/1W-8Q1

C. E. Callahan. About 2.5 miles east of Olympia. Altitude about 200 feet. Drilled by Patterson, 1955.

Gravel -----	16	16
Gravel, cemented -----	14	30
Gravel, sand, clay -----	7	37
Gravel, pea; water-bearing -----	4	41
Gravel, sand -----	10	51

Casing, 6-inch to 50 ft. SWL 18.5 ft. Bailed 15 gpm, dd 18 ft.

## Well 18/1W-9L2

Tom Peoples. About 2.3 miles southerly from South Bay. Altitude about 140 feet. Drilled by Patterson, 1953.

Dug -----	54	54
Sand and clay -----	23	77
Clay, blue -----	9	86
Clay, blue, and gravel -----	15	101
Gravel and sand -----	3	104

Casing, 6-inch to 104 ft. SWL 52 ft. Bailed 20 gpm, dd 27 ft.

## Well 18/1W-9M2

R. McLaughlin. About 2.3 miles southerly from South Bay. Altitude about 140 feet. Drilled by Patterson, 1956.

Sand, clay, gravel -----	45	45
Sand, clay -----	30	75
Clay, sand -----	10	85
Clay, blue -----	12	97
Clay, gravel, sand -----	41	138
Clay, sand -----	22	160
Clay, sand, gravel -----	5	165
Sand, clay, gravel -----	4	169
Sand and clay -----	6	175

Casing, 6-inch to 172 ft. Screen 169 to 175 ft. SWL 51 ft. Bailed 30 gpm, dd 95 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 18/1W-9N1		
Alvin Huber. About 4 miles east of Olympia. Altitude about 135 feet. Drilled by Patterson, 1957.		
Clay -----	10	10
Sand, clay -----	16	26
Sand, clay, and gravel -----	20	46
Sand -----	6	52
Sand, clay, and gravel -----	4	56
Clay, blue -----	20	76
Gravel, sand -----	2	78
Sand, gravel -----	25	103

Casing, 6-inch to 85 ft; 15 ft No. 25 slot screen 84 to 99 ft and 5 ft No. 20 slot screen 99 to 104 ft. SWL 47 ft. Pumped 120 gpm, dd 33 ft.

#### Well 18/1W-10L1

Olympia Sand and Gravel Company. About 1 mile northeast of Lacey. Altitude about 205 feet. Drilled by Patterson, 1958.

Clay -----	6	6
Gravel, clay -----	28	34
Gravel -----	4	38
Gravel, clay -----	4	42
Gravel -----	8	50
Sand, black -----	27	77
Clay, blue -----	19	96

Casing, 12-inch to 96 ft. Well not finished.

#### Well 18/1W-10R2

Thurston County P.U.D. 1. Thompson Place. Altitude about 200 feet. Drilled by Patterson, 1950.

Topsoil and gravel -----	5	5
Gravel, cemented -----	62	67
Gravel and clay -----	15	82
Sand and gravel -----	8	90
Clay -----	14	104
Sand, gravel and clay -----	11	115
Soil (gas) -----	23	138
Clay -----	12	150
Sand and gravel; water-bearing -----	21	171

Casing, 8-inch to 161 ft; No. 20 screen from 161 to 171 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)

## Well 18/1W-10R3

Thurston County P.U.D. 1. Thompson Place. Altitude about 200 feet. Drilled by Patterson, 1951.

Gravel -----	7	7
Gravel, cemented -----	30	37
Clay and sand -----	18	55
Gravel, sand and clay -----	13	68
Gravel, sand and clay -----	22	90
Clay, brown, sand and gravel; gas (93 to 100 ft) -----	73	163
Sand and clay (brown) -----	5	168
Sand and clay (blue) -----	10	178

Casing, 6-inch to 167 ft; No. 25 screen from 165 to 177 ft.

## Well 18/1W-11P4

Robert J. Hamlin. About 5 miles east of Olympia. Altitude about 205 feet. Drilled by A. E. Seauier, 1954.

Gravel, rock and topsoil -----	10	10
Hardpan -----	43	53
Gravel, water-bearing -----	8	61
Hardpan -----	3	64
Gravel, water-bearing -----	4	68

Casing, 6-inch to 68 ft.

## Well 18/1W-14H4

Olympia Mushroom Farms, Inc. About 2.5 miles east of old Highway 99. Altitude about 213 feet. Drilled by Patterson, 1956.

Topsoil -----	1	1
Gravel, clay and sand -----	24	25
Gravel, sand and clay -----	20	45
Gravel, cemented -----	10	55
Gravel, clay and sand -----	9	64
Sand and gravel -----	10	74
Gravel and clay -----	8	82
Gravel, sand and clay -----	24	106
Clay -----	44	150
Clay, sand and gravel -----	40	190
Gravel, sand and gravel -----	15	205
Gravel and sand -----	55	260
Gravel, sand and clay -----	?	?

Casing, 8-inch to 240 ft; 6-inch perforated from 240 to 260 ft. SWL 199 ft. Pumped 4 hrs at 210 gpm, dd 0.5 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/1W-14M2

Richard Hart. About 0.5 mile west of Mushroom Corner. Altitude about 225 feet.

Dug -----	43	43
Gravel, cemented -----	50	93
Gravel -----	3	96

Casing, 4-inch to 92 ft. SWL 57.5 ft. Bailed 25 gpm, dd 10 ft.

## Well 18/1W-15H1

P.U.D. 1 of Thurston County. At Thompson Place, south side of Freeway. Altitude about 170 feet. Drilled by L. R. Gaudio, 1957.

Topsoil -----	3	3
Hardpan -----	37	40
Sand, dirty, and gravel (small amount of water) -----	4	44
Sand, fine, some gravel -----	5	49
Clay, sandy -----	41	90
Sand, fine, some gravel -----	32	122
Clay -----	26	148
Hardpan -----	8	156
Sand and gravel -----	6	162
Hardpan -----	4	166
Sand and gravel (clay on some of gravel) -----	11	177
Hardpan -----	9	186

Casing, 12-inch to 167 ft. Screen 167 to 177 ft. SWL 135.1 ft. Pumped 100 gpm, dd 10 ft. Pumped 150 gpm, dd 15 ft. Pumped 225 gpm, dd 24 ft.

## Well 18/1W-15L3

W. F. Ray. About 1.2 miles west of Mushroom Corner. Altitude about 175 feet. Drilled by Fred Martz.

Soil -----	7	7
Hardpan -----	3	10
Sand, blue -----	30	40
Clay, rotten, black -----	30	70

Casing, 3-Inch.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/1W-16Q3

Herman Reinhardt. About 0.5 mile north of Lacey. Altitude about 180 feet. Drilled by Patterson, 1955.

Dug well -----	37	37
Gravel, sand and clay -----	10	47
Gravel, cemented -----	3	50
Gravel, clay and sand -----	20	70
Sand, clay and gravel -----	46	116
Gravel, clay and sand -----	21	137

Casing, 8-inch to 122 ft; screen 122 to 137 ft.

## Well 18/1W-17G1

Wolfenbarger-Rhoades. About 2.5 miles east of Olympia. Altitude about 200 feet. Drilled by Patterson, 1952.

No record -----	35	35
Gravel, cemented, with boulders -----	9	44
Gravel, cemented -----	16	60
Gravel -----	16	76

Casing, 6-inch to 75 ft. SWL 33.5 ft. Bailed 346 gph, dd 27 ft.

## Well 18/1W-18C1

L. M. Robertson. About 1 mile northeast of Olympia. Altitude about 185 feet. Drilled by Patterson, 1952.

Clay, sand -----	4	4
Sand, clay -----	11	15
Sand -----	15	30
Sand, coarse, and gravel -----	7	37
Sand -----	5	42
Sand, clay -----	16	58
Gravel, cemented -----	7	65
Gravel -----	11	76

Casing, 6-inch to 76 ft. SWL 54 ft. Bailed 26 gpm, dd 5 ft.

## Well 18/1W-18Q1

W. J. Burkhart. About 1 mile west of Lacey. Altitude about 175 feet. Drilled by Patterson, 1957.

Clay, sand -----	18	18
Sand, clay, gravel -----	17	35
Sand -----	17	52
Sand, gravel -----	6	58
Gravel, clay, sand -----	11	69
Gravel, sand -----	7	76

Casing, 6-inch to 72 ft. Screen 70 to 76 ft. SWL 16 ft. Bailed 38 gpm, dd 18 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 18/1W-19K2		
Darrell W. Jones. About 3 miles east of Olympia. Altitude about 200 feet. Drilled by Patterson, 1953.		
Topsoil -----	4	4
Gravel, sand -----	11	15
Clay, gravel -----	15	30
Sand, gravel -----	20	50
Gravel, sand -----	47	97

Casing, 8-inch to 87 ft. Screen 87 to 97 ft.

## Well 18/1W-19M5

Eugene James Reed. About 3 miles southeast of Olympia. Altitude about 195 feet. Drilled.

Soil -----	4	4
Quicksand -----	120	124
Gravel -----	9	133

Casing, 3-inch to 133 ft.

## Well 18/1W-20K1

Mt. View Golf Course. About 1.5 miles southwest of Lacey. Altitude about 215 feet. Drilled by A. P. Graf, 1951.

Topsoil -----	4	4
Sand, brown -----	17	21
Gravel -----	2	23
Clay with gravel -----	35	58
Gravel, water-bearing -----	23	81
Clay, sandy -----	4	85

Casing, 12-inch to 85 ft; perforated 60 to 82 ft. SWL 19.2 ft. Pumped 4 hrs at 260 gpm, dd 49.7 ft.

## Well 18/1W-20Q1

Huntamer Water Service, Inc. About 4 miles east and south of Olympia. Altitude about 200 feet. Drilled by H. F. Mykol, 1958.

Sand, dry -----	17	17
Sand and gravel, dry -----	8	25
Sand -----	4	29
Gravel, cemented -----	5	34
Sand and gravel -----	9	43
Gravel, cemented -----	8	51
Sand, clay and gravel -----	2	53
Sand and gravel -----	3	56
Gravel, cemented -----	3	59
Gravel, seepage -----	4	63
Sand and gravel, seepage -----	14	77
Sand, packed and clay -----	5	82

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 18/1W-20Q1 -- Continued		
Gravel, water-bearing, SWL 32 ft -----	2	84
Sand, packed, gravel and clay -----	11	95
Clay and gravel -----	2	97
Gravel and sand; water-bearing, SWL 31 ft -----	4	101
Sand, packed -----	7	108
Peat -----	12	120
Sand and gravel -----	2	122
Clay -----	4	126
Sand, clay and gravel -----	21	147
Sand, gravel; water-bearing -----	5	152
Sand, yellow, seepage -----	11	163

Casing, 8-inch to 160 ft; perforated 82 to 84 ft; 97 to 101 ft; and 147 to 153 ft. Cement plug 157 to 160 ft.

#### Well 18/1W-21B4

Thurston County Water District 2. About 4 miles east of Olympia. Altitude about 120 feet. Drilled by Patterson, 1958.

Loam, sandy -----	4	4
Sand, clay, gravel -----	43	47
Sand, gravel, clay -----	13	60
Clay, gravel, sand -----	6	66
Gravel, sand -----	2	68
Sand, clay, gravel -----	10	78
Gravel, sand -----	16	94
Gravel, sand, clay -----	4	98
Gravel, sand -----	15	113
Gravel, sand, clay -----	2	115
Gravel, sand -----	3	118
Gravel, sand, clay -----	2	120
Sand, clay, very little gravel -----	10	130

Casing, 10-inch to 100 ft; 8-inch, perforated 100 to 120 ft. SWL 64.5 ft. Pumped 4 hrs at 575 gpm, dd 11.8 ft.

#### Well 18/1W-21B5

Thurston County Fire District 3. At Lacey. Altitude about 180 feet. Drilled by Mykol, 1953.

Sand, silt, gravel and small rock -----	58	58
Hardpan or cemented gravel -----	12	70
Clay, blue -----	5	75
Sand, gravel, clay, and silt; water-bearing -----	15	90
Sand, gravel and water -----	17	107

Casing, 8-inch to 97 ft. Screen 97 to 107 ft. SWL 60 ft. Pumped 4 hrs at 50 gpm, dd 20 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/1W-21D1

L. C. Huntamer. Near Lacey. Altitude about 195 feet. Dug well.

Soil -----	3	3
Sand, fine -----	2	5
Gravel, coarse -----	6	11
Sand, fine, clayey -----	4	15
Clay, bluish yellow -----	5	20
Gravel, pea -----	2	22

Casing, 36-inch. SWL 12.6 ft. Tested for 5.5 hrs at 200 gpm, dd 0.2 ft.

## Well 18/1W-21D2

L. C. Huntamer. Near Lacey. Altitude about 190 feet. Drilled by H. F. Mykol, 1956.

Clay, sandy -----	23	23
Gravel, packed -----	6	29
Clay -----	3	32
Gravel, coarse sand; water-bearing -----	6	38

Casing, 8-inch to 33 ft. Screen, No. 30 slot, 33 to 38 ft. SWL 8 ft. Pumped 4 hrs at 350 gpm, dd 27 ft.

## Well 18/1W-21D3

L. C. Huntamer. Near Lacey. Altitude about 190 feet. Drilled by H. F. Mykol, 1953.

Sand, dry -----	18	18
Sand, water-bearing -----	15	33
Clay and gravel -----	2	35
Gravel -----	1	36
Hardpan -----	8	44
Sand, clay and gravel; wet -----	16	60
Gravel, coarse; water-bearing -----	7	67
Clay, soupy, fine sand and gravel -----	25	92
Gravel, fine, coarse gravel and coarse sand -----	14	106
Sand, fine -----	23	129
Clay, blue, and gravel -----	6	135
Clay, brown, and gravel -----	4	139
Gravel, coarse sand; water-bearing -----	14	153

Casing, 10-inch to 139 ft. Screen 139 to 153 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/1W-21H1

A. G. Homann. About 0.5 mile south of Lacey. Altitude about 160 feet. Drilled by Patterson, 1955.

Sand and clay -----	20	20
Gravel, sand and clay -----	2	22
Sand and clay -----	98	120
Sand, gravel and clay -----	6	126
Clay, sand and gravel -----	10	136
Gravel, clay and sand -----	19	155
Clay, sand and gravel -----	15	170
Sand, clay and gravel -----	15	185
Clay, sand and gravel -----	10	195

Casing, 10-inch to 182 ft. Screen 182 to 195 ft. (No. 60 slot Johnson screen).

## Well 18/1W-21P1

Huntamer Water Service, Inc. About 1 mile southwest of Lacey. Altitude about 210 feet. Drilled by H. F. Mykol, 1959.

Topsoil -----	4	4
Gravel, cemented -----	4	8
Sand -----	14	22
Gravel, packed -----	13	35
Hardpan, seamy -----	13	48
Sand, coarse, dry -----	19	67
Sand, dry, and gravel -----	8	75
Sand, dry -----	13	88
Sand, fine, and clay -----	10	98
Sand, water-bearing -----	4	102
Gravel, sand; water-bearing -----	14	116
Gravel, coarse sand; water-bearing -----	3	119

Casing, 8-inch to 109 ft. Screen 109 to 119 ft. SWL 85 ft. Pumped 4 hrs at 300 gpm, dd 5 ft.

## Well 18/1W-22N3

Gordon Willie. On northwest side of Hicks Lake. Altitude about 185 feet. Drilled by Patterson, 1950.

Sand -----	48	48
Clay, blue -----	3	51
Sand, fine -----	9	.60
Sand -----	17	.77
Sand, water-bearing -----	17	.94
Sand, fine -----	9	103

Casing, 6-inch to 85 ft. Screen 85 to 96 ft. SWL 26.5 ft. Bailed 37 gpm, dd 8 ft.

## 210      GEOLOGY AND GROUND-WATER RESOURCES, THURSTON COUNTY, WASH.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/1W-25L1

N. M. Draper. About 0.5 mile east of Long Lake. Altitude about 175 feet. Drilled by Patterson, 1952.

Dug well -----	26	26
Gravel -----	4	30
Gravel, clay and sand -----	13	43
Sand, gravel and clay -----	16	59

Casing, 10-inch to 45 ft. Screen 46 to 59 ft.

## Well 18/1W-26A1

Warren E. Dexter. About 0.5 mile east of Long Lake. Altitude about 200 feet. Drilled by Patterson, 1953.

Sand -----	50	50
Gravel, cemented -----	3	53
Gravel, sand -----	22	75
Gravel, cemented -----	3	78
Gravel -----	5	83
Gravel, cemented, sand -----	2	85
Gravel and sand -----	4	89

Casing, 6-inch to 89 ft. SWL 64 ft. Bailed 5 gpm, dd 16 ft.

## Well 18/1W-26F1

United Brotherhood of Carpenters. East side of Long Lake. Altitude about 200 feet. Drilled by Patterson, 1952.

Sand -----	39	39
Sand and gravel -----	34	73
Sand and gravel; water-bearing -----	17	90
Sand -----	1	91

Casing, 6-inch to 86 ft. Screen 86 to 91 ft. SWL 63.5 ft. Pumped 4½ hrs at 70 gpm, dd 6 ft.

## Well 18/1W-26N1

Huntamer's Water Service, Inc. At south end of Long Lake. Altitude about 175 feet. Drilled by Mykol, 1957.

Gravel and sand -----	42	42
Hardpan -----	16	58
Gravel, sand; water-bearing -----	3	61
Hardpan -----	12	73
Sand, water-bearing -----	5	78
Sand, packed, and clay -----	2	80
Gravel, water-bearing -----	5	85

Casing, 8-inch to 80 ft. Screen 80 to 85 ft. SWL 33.5 ft. Tested 4 hrs at 50 gpm, dd 36 ft. (Well reportedly has been deepened to 160 ft.)

Table 3 -- Materials penetrated by representative wells. -- Continued . .

Sand, water -----	1	125
Gravel, cemented -----	41	166
Clay, blue -----	37	203
Clay, sandy -----	12	215
(Swamp gas 208 to 213 ft)		
Sand, very fine; water-bearing -----	16	231
Peat and clay -----	2	233
Sand, very fine; water-bearing -----	2	235
Sand, hard-packed, muddy -----	10	245
Sand, heave -----	5	250
Sand, very fine; water-bearing -----	2	252
Sand, heave -----	11	263
Sand, fine; water-bearing -----	2	265
Silt, dry -----	1	266
Quicksand -----	15	281
Sand, fine; water-bearing -----	1	282
Silt, peat and sand -----	3	285
Clay and sand -----	21	306
Sand, fine; water-bearing -----	7	313
Sand, muddy and some pea gravel; water-bearing -----	12	325

Casing, 10-inch. Well has not been used, may have too many fine-grained sediments.

#### Well 18/1W-31K2

Philip H. Evans. About 0.9 mile east of Hewitt Lake. Altitude about 200 feet. Drilled by A. P. Graf, 1951.

Topsoil -----	2	2
Sand, brown, and clay -----	26	28
Sand, brown, and gravel -----	37	65
Gravel, water-bearing -----	6	71

Casing, 8-inch to 71 ft. SWL 22 ft. Balled 60 gpm, dd 8 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 18/IW-31N1		
Sand and clay seams -----	80	80
Gravel, cemented -----	15	95
Sand and gravel; water-bearing -----	35	130
Gravel, water-bearing -----	5	135

Casing, 8-inch to 135 ft; perforated 85 to 135 ft. SWL 50 ft. Tested at 150 gpm, dd 17 ft.

#### Well 18/IW-31N2

Edward W. Ashburn. About 0.2 mile south of 31N1. Altitude about 190 feet. Drilled by A. P. Graf, 1953.

Topsoil -----	2	2
Sand, brown -----	28	30
Sand and 10% gravel; water-bearing -----	4	34
Gravel and sand -----	18	52
Gravel, coarse, and sand -----	10	62
Gravel, water-bearing -----	6	68
Sand -----	5	73
Clay -----	8	81
Hardpan -----	9	90
Gravel and layers of clay -----	11	101
Gravel, clay; water-bearing -----	25	126
Gravel, very coarse; water-bearing -----	3	129
Clay and gravel -----	1	130

Casing, 10-inch to 130 ft; perforated 63 to 68 ft, 77 to 84 ft, 90 to 126 ft, and 126 to 129 ft. SWL 12 ft. Pumped 4 hrs at 285 gpm, dd 33 ft.

#### Well 18/IW-31Q2

H. L. James. About 2.4 miles northeast of East Olympia. Altitude about 195 feet. Drilled by A. P. Graf, 1953.

Topsoil -----	2	2
Sand, brown -----	41	43
Sand, coarse, and gravel; water-bearing -----	6	49

Casing, 8-inch to 49 ft.

#### Well 18/IW-31R1

Joseph Strobl. About 1 mile southeasterly from Hewitt Lake. Altitude about 202 feet. Drilled by Patterson, 1952.

Sand -----	8	8
Gravel, sand, clay -----	32	40
Sand -----	20	60
Sand, blue -----	38	98
Gravel, sand -----	4	102

Casing, 6-inch to 99 ft. SWL 29.1 ft. Bailed 20 gpm, dd 57.2 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/1W-32J1

Robert H. Wohleb. About 0.9 mile west of Southwick Lake. Altitude about 200 feet. Drilled by Patterson, 1956.

Gravel, cemented, sand -----	40	40
Sand, gravel, clay -----	23	63
Sand, gravel, hard clay -----	2	65
Sand, gravel, clay -----	5	70
Sand -----	30	100
Sand, fine to coarse -----	10	110
Sand, clay -----	5	115
Sand, gravel -----	13	128
Sand, gravel, some clay -----	48	176

Casing, 6-inch 25 to 142 ft; 5-inch 138 to 176 ft; perforated 142 to 176 ft. SWL 34 ft. Bailed 57 gpm, dd 7 ft.

## Well 18/1W-32P1

Lewis W. Young. About 2.1 miles north of East Olympia. Altitude about 200 feet. Drilled by Pete Sylte, 1958.

Sandy topsoil -----	5	5
Gravel, cemented -----	13	18
Gravel, packed, dry -----	12	30
Sand, fine, muddy; small flow of water -----	6	36
Gravel and sand, good flow of water -----	8	44
Sand, fine, brown -----	11	55
(Fine blue sand at bottom of well)		

Casing, 10-inch to 55 ft; perforated 38 to 44 ft. SWL 25 ft. Bailed 50 gpm, no appreciable dd.

## Well 18/1W-33B1

Charles Shrewsbury. About 0.2 mile north of Southwick Lake. Altitude about 210 feet. Drilled by Patterson, 1959.

Sandy loam, black -----	5	5
Silt, sand, brown -----	30	35
Gravel, sand -----	15	50
Sand -----	8	58
Gravel, sand -----	2	60
Clay, gravel, sand -----	6	66
Sand, gravel -----	9	75
Clay, sand, gravel -----	24	99
Sand -----	2	101
Sand, gravel -----	6	107
Gravel, sand -----	1	108
Sand, gravel -----	10	118

Casing, 8-inch to 98 ft; 6-inch 96 to 118 ft; perforated 96 to 118 ft. SWL 40 ft. Pumped 4 hrs at 115 gpm, dd 32.8 ft.

## 216 GEOLOGY AND GROUND-WATER RESOURCES, THURSTON COUNTY, WASH.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/1W-33G2

Ervin Jackson. About 0.15 mile west of Southwick Lake. Altitude about 198 feet. Drilled by Kincy Hardware, 1959.

Sand, black -----	30	30
Sand, yellow -----	15	45
Gravel, dry -----	3	48
Quicksand, water-bearing -----	10	58
Sand, gravel, dry -----	12	70
Gravel, water-bearing -----	5	75
Gravel, cemented -----	10	85
Sand, gravel -----	17	102

Casing, 8-inch to 85 ft; 6-inch, perforated 85 to 102 ft.

## Well 18/1W-33R1

William Lenhart and Hilda Driver. About 2.5 miles northeast of East Olympia. Altitude about 205 feet. Drilled by H. F. Mykol, 1959.

Sand -----	17	17
Gravel, packed -----	11	28
Gravel and soupy sand -----	9	37
Sand, water-bearing -----	12	49
Gravel, sand; water-bearing -----	11	60
Gravel, packed -----	1	61

Casing, 8-inch to 61 ft. Cement plug 60 to 61 ft.

## Well 18/1W-34M2

Clem C. Clarke. At southeast end of Southwick Lake. Altitude about 200 feet. Drilled by Patterson, 1953.

Sand -----	8	8
Sand, gravel with clay -----	39	47
Gravel, water-bearing -----	3	50
Gravel, sand and clay -----	3	53
Clay, gravel and sand -----	3	56
Gravel and clay -----	6	62
Gravel and sand -----	7	69
Sand, water-bearing -----	7	76

Casing, 10-inch to 62 ft. Screen 62 to 76 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/2W-1F3

Richardson Peterson. About 2.5 miles southwest of South Bay. Altitude about 155 feet. Drilled by Patterson, 1958.

Dug well -----	11	11
Gravel and clay -----	27	38
Gravel, clay and sand -----	6	44
Sand, gravel and clay (50 percent sand) -----	3	47
Gravel, clay and sand; yield 3 gpm -----	10	57
Gravel and clay, hard -----	6	63
Clay and gravel -----	4	67
Sand, fine, and silt -----	1	68
Clay, brown, and sand -----	11	79

Casing, 6-inch to 55 ft. Originally drilled 79 ft, pulled casing back to 55 ft. SWL 16 ft. Bailed dry at 4 gpm.

## Well 18/2W-1J1

Lorne Berger. About 3 miles northeast of Olympia. Altitude about 150 feet. Drilled by Patterson, 1957.

Sandy loam -----	5	5
Sand, clay -----	24	29
Gravel, blue clay, sand -----	11	40
Clay, sand, gravel -----	25	65
Sand, gravel, clay -----	17	82
Sand, black -----	6	88

Casing, 6-inch to 88 ft. SWL 10 ft. Bailed 40 gpm, dd 10 ft.

## Well 18/2W-4H2

Mildred Lemon. About 2.7 miles northwest of Olympia. Altitude about 135 feet. Drilled by Patterson, 1958.

Sand, clay, gravel -----	22	22
Sand, clay -----	102	124
Sand, water-bearing -----	11	135
Gravel and blue clay at bottom		

Casing, 6-inch to 121 ft. Screen 121 to 135 ft. SWL 55 ft. Bailed dry at 25 gpm. Water quality poor.

## Well 18/2W-5J4

L. D. Preston. About 3 miles northwest of Olympia. Altitude about 145 feet. Drilled by Patterson, 1954,

Dug well -----	30	30
Clay, blue, and sand -----	3	33
Sand and clay -----	22	55
Gravel and sand -----	16	71
Gravel, sand and clay -----	1	72
Sand and gravel -----	3	75

Casing, 6-inch to 66 ft. Screen 66 to 71 ft. SWL 16 ft. Bailed 800 gph, dd 16 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/2W-6R1

F. R. Stockton. About 3.7 miles northwest of Olympia. Altitude about 180 feet. Drilled by Patterson, 1952.

Dug well -----	20	20
Gravel and sand -----	3	23
Clay, gravel and sand -----	8	31
Sand and clay -----	1	32
Gravel, cemented -----	27	59
Gravel and clay -----	6	65
Clay and sand -----	3	68
Gravel -----	5	73

Casing, 6-inch to 73 ft. SWL 56 ft. Bailed 26 gpm, dd 3 ft.

## Well 18/2W-7A1

Lee Brennan. About 3.5 miles northwest of Olympia. Altitude about 170 feet. Drilled by L. B. Richardson, 1955.

Dug well -----	30	30
Hardpan and boulders -----	10	40
Clay and gravel -----	6	46
Sand, large gravel -----	4	50

Casing, 6-inch. SWL 21 ft. Bailed 50 gpm, dd 10 ft.

## Well 18/2W-7J2

Lawrence D. Craven. About 3.5 miles west northwest of Olympia. Altitude about 145 feet. Drilled by Patterson, 1958.

Topsoil and clay -----	15	15
Sand, gravel, hard clay -----	75	90
Sand -----	6	96
Gravel -----	2	98
Clay, blue -----	5	103

Casing, 6-Inch to 97 ft. SWL 83 ft. Bailed 25 gpm, dd 5 ft.

## Well 18/2W-7L1

V. H. Clark. About 3.5 miles west northwest of Olympia. Altitude about 130 feet. Drilled by Patterson, 1959.

Dug -----	15	15
Gravel and hard clay -----	13	28
Gravel, clay and sand -----	9	37
Gravel, clay -----	25	62
Gravel, clay, sand -----	6	68
Gravel and sand; water-bearing -----	12	80

Casing, 6-Inch to 80 ft. SWL 57 ft. Bailed 20 gpm, dd 3 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/2W-7R1

L. D. Ziegler. About 3.5 miles west of Olympia. Altitude about 178 feet. Drilled by J. P. Davidson, 1951.

Topsoil -----	4	4
Sand and gravel -----	31	35
Hardpan with layers of sand and gravel -----	51	86
Sand, water-bearing -----	16	102
Hardpan -----	7	109
Sand, water-bearing -----	9	118
Sand, coarse, and gravel -----	7	125

Casing, 8-inch to 120 ft. Screen 120 to 125 ft. SWL 80 ft. Tested for 8 hrs at 30 gpm, dd about 20 ft.

## Well 18/2W-8M2

Horace James. About 3.3 miles west northwest of Olympia. Altitude about 155 feet. Drilled by Patterson, 1956.

Clay and sand -----	15	15
Clay and gravel -----	7	22
Gravel, sand and clay -----	3	25
Gravel, cemented -----	10	35
Clay, sand and gravel -----	29	64
Gravel, cemented -----	19	83
Gravel and sand -----	10	93
Sand and gravel -----	2	95

Casing, 6-inch to 93 ft. SWL 74 ft. Bailed 20 gpm, dd 3 ft.

## Well 18/2W-8Q1

C. R. Daugherty. About 3 miles west of Olympia on Kaiser Road. Altitude about 145 feet. Drilled by Patterson, 1951.

Sand and clay -----	4	4
Gravel, cemented -----	35	39
Gravel and clay -----	10	49
Gravel, water-bearing -----	3	52
Gravel, cemented -----	7	59
Gravel and sand -----	6	65

Casing, 6-inch to 66 ft. SWL 40.4 ft. Bailed 1,240 gph, dd 5 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/2W-8R3

O. B. Ferguson, formerly E. B. King. About 2.4 miles west of Olympia. Altitude about 155 feet.  
Drilled by Patterson, 1952.

Sand and clay -----	5	5
Gravel, cemented -----	44	49
Sand, gravel and clay -----	3	52
Gravel, cemented -----	18	70
Gravel -----	2	72
Gravel, cemented -----	3	75
Gravel, sand and clay -----	2	77
Gravel -----	14	91

Casing, 6-inch to 90 ft. SWL 68.5 ft. Bailed 1,040 gph, dd 6 ft.

## Well 18/2W-9E1

Elmer Strand, formerly Elliott. About 2.3 miles northwest of Olympia. Altitude about 290 feet.  
Drilled by Patterson, 1958.

Gravel, cemented -----	6	6
Clay and gravel -----	6	12
Clay, blue -----	76	88
Gravel, cemented -----	47	135
Gravel and clay -----	9	144

Casing, 6-inch to 144 ft. SWL 131 ft. Bailed 13 gpm, dd 3 ft.

## Well 18/2W-9P2

Alvin Camus. About 2.1 miles northwest of Olympia on Walnut Road. Altitude about 170 feet.  
Drilled by Patterson, 1957.

Clay, gravel -----	25	25
Sand, clay and gravel -----	25	50
Gravel, cemented -----	15	65
Gravel, clay -----	25	90
Gravel -----	3	93

Casing, 6-inch to 93 ft. SWL 74 ft. Bailed 17 gpm, dd 2 ft.

## Well 18/2W-13A2

C. E. Mattern. On east side of Olympia. Altitude about 160 feet. Drilled by Patterson, 1949.

Clay and sand -----	26	26
Gravel, cemented -----	13	39
Gravel -----	3	42

Casing, 6-inch to 41 ft. SWL 5 ft. Bailed 10 gpm, dd 2.5 ft; bailed 20 gpm, dd 18 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 18/2W-14E1		
Olympia Shingle Company in Olympia. Altitude about 10 feet. Drilled by Patterson, 1950.		
Sand -----	18	18
Gravel -----	4	22
Sand -----	12	34
Clay, sandy -----	121	155
Sand, fine -----	130	285
Sand, coarse; water-bearing -----	20	305

Casing, 6-inch to 290 ft. Screen 290 to 305 ft. Flowing 25 gpm, 3/2/51.

Well 18/2W-14M1

Olympia Lodge 186, B.P.O.E. In Olympia. Altitude about 6 feet. Drilled by Patterson, 1958.

Gravel and brown clay -----	1	1
Sand, gray silt, gravel and shells -----	4	5
Sand, gray silt and some shells -----	17	22
Gray silt, sand and some gravel -----	20	42
Silt, gray, gravel and sand -----	5	47
Clay and gravel -----	3	50
Sand and some gravel -----	6	56
Sand, fine, to coarse gravel -----	4	60
Sand and some gravel -----	5	65
Clay, blue, and silt -----	23	88

Casing, 6-inch to 58 ft. Screen 57 to 63 ft. SWL 2 ft. Tested 4 hrs at 85 gpm, dd 11 ft.

Well 18/2W-14N1

Northern Pacific Railway Company. In Olympia. Altitude about 10 feet. Drilled, 1930.

Clay, sandy -----	20	20
Sand, fine -----	20	40
Sand, clay -----	2	42
Sand, fine, quick -----	118	160
Sand, fine compacted, with trace of clay -----	20	180

Casing, 3-inch to 180 ft. Flowing well.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/2W-17C1

Frank Cheadle. About 2.7 miles west of Olympia on Kaiser Road. Altitude about 170 feet. Drilled by Patterson, 1957.

Topsoll -----	6	6
Gravel, cemented -----	14	20
Sand and clay -----	16	36
Clay, gravel and sand -----	14	50
Gravel and clay -----	10	60
Sand and gravel -----	1	61
Gravel and clay -----	4	65
Gravel, sand, clay -----	13	78
Gravel and sand -----	3	81
Sand and gravel -----	8	89

Casing, 6-inch to 87 ft. SWL 57 ft. Bailed 1,140 gph, dd 3 ft.

## Well 18/2W-17C2

Corabelle Slacka. About 2.7 miles west of Olympia. Altitude about 175 feet. Drilled by Patterson.

Sand, clay -----	11	11
Gravel, clay -----	27	38
Gravel, clay, sand -----	58	96
Gravel, sand, clay -----	6	102
Sand, clay -----	14	116
Sand, gravel, clay -----	12	128
Sand, gravel -----	8	136
Gravel, sand -----	3	139
Clay, sand -----	3	142

Casing, 6-inch to 139 ft. SWL 86 ft.

## Well 18/2W-17J2

Jack Silva. About 2.1 miles west of Olympia. Altitude about 170 feet. Drilled by Patterson, 1949.

Dug well -----	19	19
Gravel, cemented -----	70	89
Sand and gravel -----	6	95

Casing, 6-inch to 94 ft. SWL 76.4 ft. Bailed 10 gpm, dd 1 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/2W-17M1

Grant Disette. About 3 miles west of Olympia. Altitude about 155 feet. Drilled by Patterson, 1953.

Clay and sand -----	3	3
Clay, sand and gravel -----	12	15
Clay and sand -----	16	31
Gravel -----	2	33
Sand and clay -----	19	52
Gravel, cement -----	28	80
Clay, yellow -----	2	82
Clay, blue -----	3	85
Clay, yellow -----	2	87
Gravel, cement -----	6	93
Gravel and sand -----	4	97
Gravel -----	3	100
Sand, clay and gravel -----	5	105
Sand and gravel -----	17	122

Casing, 6-inch to 121 ft. SWL 99 ft. Bailed 700 gph, dd 10 ft.

## Well 18/2W-17Q1

Verne Fuhlstrom. About 2 miles west of Olympia. Altitude about 170 feet. Drilled by Keto.

Gravel and boulders -----	12	12
Gravel, hard cement -----	58	70
Sand and gravel -----	16	86
Gravel, sand -----	23	109
Sand, hard -----	19	128
(Water showing 70 to 128 feet)		

Casing, 6-inch.

## Well 18/2W-18F1

R. L. Eagan. About 3.5 miles west of Olympia. Altitude about 75 feet. Drilled by Patterson, 1959.

Gravel, fill -----	6	6
Clay, gravel (hard) -----	39	45
Clay, gravel (soft) -----	25	70
Gravel, water-bearing -----	5	75

Casing, 6-inch to 73 ft. SWL 50 ft. Bailed 17 gpm, dd 16 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/2W-21B2

Olympia Oil and Wood. About 1.6 miles west of Olympia. Altitude about 145 feet. Drilled by Patterson, 1959.

Gravel, cemented, and boulders -----	28	28
Clay -----	7	35
Sand, gravel, clay; little water -----	21	56
Clay, blue -----	19	75
Gravel, cemented -----	5	80
Clay -----	5	85
Gravel -----	2	87
Gravel, cemented -----	5	92
Sand and gravel -----	3	95
Gravel and clay -----	15	110
Gravel -----	6	116
Clay, blue -----	9	125
Sand -----	70	195
Clay, sand, gravel -----	22	217
Sand and gravel -----	10	227
Clay, green, and gravel -----	4	231
Clay and gravel -----	14	245

Casing, 8-inch to 245 ft; perforated 95 to 118 ft, and 220 to 245 ft. SWL 25 ft. Bailed 60 gpm, dd 25 ft.

## Well 18/2W-26L1

Olympia Lodge No. 1, F.&A.M. Located east of Tumwater Square. Altitude about 176 feet. Drilled by Patterson, 1954.

Sand, brown, and clay -----	36	36
Sand, blue, and clay -----	18	54
Clay, sand and gravel -----	60	114
Sand, gravel and clay -----	18	132
Gravel, sand and clay -----	8	140
Sand, fine, and clay -----	8	148
Sand, fine, gravel and clay -----	4	152
Clay, gravel and sand -----	3	155
Basalt, gravel and clay -----	1	156
Basalt -----	2	158

Casing, 10-inch to 152 ft. Screen 152 to 158 ft. SWL 10.2 ft. Tested at 235 gpm, dd 105 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/2W-31A1

Eva M. Goldsby. Located on west side of Black Lake. Altitude about 140 feet. Drilled by Patterson, 1958.

Topsoil -----	3	3
Clay and sand -----	13	16
Gravel and clay -----	19	35
Boulders, gravel and clay -----	11	46
Clay, brown and gravel -----	5	51
Clay, yellow and brown -----	5	56
Clay, yellow -----	40	96
Basalt		

Casing, 6-inch to 59 ft; perforated 25 to 35 ft. SWL 7 ft. Bailed 2.5 gpm, dd 33 ft. Open hole provides 180 gallon storage.

## Well 18/2W-31P1

Fred Gideon. Located on west side of Black Lake. Altitude about 165 feet. Drilled by Patterson, 1953.

Sand and gravel -----	22	22
Sand and clay -----	3	25
Sand and gravel -----	15	40
Gravel and sand -----	5	45

Casing, 6-inch to 44 ft. SWL 19 ft. Bailed 500 gph, dd 9 ft.

## Well 18/2W-31Q1

John Grunenfelder. Located on west side of Black Lake. Altitude about 155 feet. Drilled by Patterson, 1958.

Dug -----	23	23
Sand and clay -----	4	27
Gravel and clay (hard) -----	13	40
Clay, blue, and gravel -----	3	43
Gravel, sand and clay; yields 300 gph -----	1	44
Gravel and sand -----	6	50
Gravel, sand and clay; yields 150 gph -----	5	55
Gravel, sand and clay; yields 180 gph -----	3	58
Gravel, sand and clay; yields 900 gph -----	17	75
Gravel and clay -----	35	110
Clay, sand and silt -----	8	118
Gravel and clay -----	10	128

Casing, 6-inch to 128 ft; perforated 45 to 75 ft. SWL 15 ft. Bailed 24 gpm, dd 25 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

## Well 18/2W-32A5

R. D. Teague. About 0.7 mile east of Black Lake. Altitude about 185 feet. Drilled by Patterson, 1958.

Topsoil, black -----	3	3
Clay and sand -----	7	10
Gravel, clay and sand -----	15	25
Sand, some gravel -----	8	33
Sand and clay -----	3	36
Gravel and clay; yields 5 gpm -----	9	45
Gravel and clay -----	3	48
Gravel, sand and clay -----	7	55

Casing, 6-inch to 55 ft. SWL 20 ft. Bailed 20 gpm, dd 20 ft.

## Well 18/2W-32E4

George J. Normoyle. Located on east side of Black Lake. Altitude about 140 feet. Drilled by Kincy Hardware, 1959.

Topsoil -----	3	3
Hardpan -----	67	70
Clay, water-bearing -----	18	88
Sand, brown, and coarse gravel -----	1	89

Casing, 6-inch to 89 ft. SWL 7 ft.

## Well 18/2W-32J1

Bonneville Power Administration. About 0.8 mile east of Black Lake. Altitude about 180 feet. Drilled by Jannsen, 1950.

Clay and fine sand -----	23	23
Sand, medium-fine -----	19	42
Sand, coarse -----	4	46
Sand, medium and fine -----	4	50
Gravel, medium -----	10	60
Sand, coarse and fine gravel -----	5	65

Casing, 20-inch to 46 ft; 10-inch to 65 ft. SWL 20 ft. Pumped 120 gpm, dd 14 ft.

Bonneville Power Administration - test drilling

Clay and fine sand -----	23	23
Sand, medium-fine -----	19	42
Sand, coarse -----	4	46
Sand, medium and fine -----	4	50
Gravel, fine -----	10	60
Sand, coarse and fine gravel -----	6	66
Mud and sand -----	15	81
Mud and boulders -----	39	120
Shale, red -----	8	128
Rock, black -----	17	145
Shale, dark -----	55	200
Shale and hard rock -----	46	246

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 18/2W-32M1		
Clay, gravel and sand -----	13	13
Gravel and clay -----	14	27
Gravel and sand; at 29 ft, yields 20 gpm -----	5	32
Gravel and clay -----	11	43
Gravel and clay; yields 5 gpm -----	7	50
Gravel and clay -----	4	54
Gravel and clay; yields 5 gpm -----	12	66
Sand -----	3	69
Gravel and clay; at 71 ft, yields 21 gpm -----	7	76
Sand -----	2	78
Sand and pea gravel -----	6	84
Pea gravel and sand -----	5	89

Casing, 6-inch to 88 ft. SWL 16 ft. Bailed 63 gpm, dd 3 ft.

#### Well 18/2W-34N1

Olympia Memorial Gardens. About 0.5 mile west of Tumwater. Altitude about 165 feet. Drilled by H. F. Mykol, 1956.

Topsoil and sand -----	2	2
Sand -----	8	10
Sand, water-bearing -----	22	32
Sand, gravel; water-bearing -----	6	38

Casing, 6-inch to 33 ft. Screen 33 to 38 ft. SWL 10 ft. Tested 4 hrs at 50 gpm, dd 23 ft.

#### Well 18/2W-35M1

Town of Tumwater. At South Tumwater. Altitude about 94 feet. Drilled by N. C. Jannsen, 1949.

Topsoil -----	2	2
Sand and large gravel -----	3	5
Clay, blue -----	10	15
Sand -----	6	21
Sand and gravel -----	20	41
Hardpan -----	18	59
Gravel, large, and sand; water-bearing -----	30	89
Hardpan -----	1	90

Casing, 20-inch to 10-inch to 90 ft; perforated 60 to 90 ft. SWL 8 ft. Tested 1,180 gpm, dd 51 ft.

#### Well 18/2W-35M2

Town of Tumwater. Altitude about 105 feet. Drilled in 1938.

Sand and gravel -----	6	6
Hardpan -----	4	10
Sand and gravel -----	82	.92
(Water-bearing formation encountered at 70 feet; well bottoms in hard formation.)		

Casing, 12-inch to 92 ft; perforated 80 to 92 ft. SWL 8 ft. Tested at 350 gpm, dd 30 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 18/2W-35M3		
Town of Tumwater. Altitude about 105 feet. Drilled in 1944.		
Sand and gravel -----	6	6
Hardpan -----	4	10
Sand and gravel -----	86	96
(Water-bearing formation encountered at 70 feet, but no hard formation at bottom.)		

Casing, 12-inch to 96 ft; perforated 84 to 96 ft. SWL 8 ft. Tested at 250 gpm, dd 53 ft.

## Well 18/2W-35M4

Town of Tumwater. Altitude about 105 feet. Drilled by N. C. Jannsen.

Topsoil -----	2	2
Sand and large gravel -----	3	5
Clay, blue -----	10	15
Sand -----	6	21
Sand and gravel -----	20	41
Hardpan -----	18	59
Gravel, large, and sand; water-bearing -----	30	89
Hardpan -----	1	90

Casing, 20-inch to 56 ft; 10-inch to 90 ft. Perforated 60 to 90 ft. SWL 8 ft. Tested at 1,180 gpm, dd 51 ft.

## Well 18/2W-36J1

Edward W. Ashburn. About 2.5 miles southwest of Tumwater. Altitude about 200 feet. Drilled by Sylte, 1956.

Sand -----	19	19
Gravel, cemented, and sand -----	6	25
Sand, dry, and gravel -----	47	72
Gravel, good flow of water -----	11	83
Gravel, cemented -----	20	103
Gravel and clay -----	6	109
Gravel, cemented -----	13	122
Sand, gravel and clay, small flow of water -----	5	127
Gravel and sand, fair flow of water -----	14	141

Casing, 10-inch to 141 ft; perforated 71 to 83, and 122 to 144 ft. SWL 61.6 ft. Tested 4 hrs at 700 gpm, dd 3.4 ft.

## Well 18/3W-1D2

Reve D. Phillips and L. C. Volght. About 0.5-mile east of Griffin School. Altitude about 10 feet. Drilled by Patterson, 1946.

Gravel, light, cemented, and clay -----	59	59
Gravel and some sand; water-bearing -----	6	65

Casing, 6-inch to 59 ft. Screen 60 to 65 ft. Well flows 30 gpm, at high tide.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 18/3W-2G3

Madrona Beach Water Association. About 0.5 mile south of Griffin School. Altitude about 110 feet. Drilled by Patterson, 1959.

Clay, sand, gravel -----	25	25
Clay, sand -----	5	30
Clay, sand, gravel -----	18	48
Sand, clay -----	16	64
Clay, gravel, sand -----	14	78
Clay -----	5	83
Sand, gravel, clay -----	32	115
Sand, cemented, gravel -----	5	120
Gravel, sand -----	2	122
Clay, blue -----	11	133
Gravel -----	1	134
Clay, blue -----	3	137
Basalt -----	9	146

Casing, 6-inch to 139 ft; perforated 75 to 135 ft. SWL 109 ft. Tested 4 hrs at 45 gpm, dd 20 ft.

## Well 18/3W-2H2

Lionel W. Sexton. About 0.3 mile east of Griffin School. Altitude about 6 feet. Drilled by Patterson, 1955.

Gravel, clay and sand -----	19	19
Gravel and sand -----	4	23
Sand and clay -----	27	50
Sand, coarse -----	11	61
Gravel and sand -----	1	62
Sand and gravel -----	1	63
Gravel and sand -----	8	71

Casing, 8-inch to 71 ft.

## Well 18/3W-24H1

Haydn H. Hilling. About 4.3 miles west of Olympia. Altitude about 15 feet. Drilled by A. P. Graf, 1953.

Clay -----	7	7
Hardpan -----	11	18
Clay, blue, fine sandy -----	28	46
Sand, fine, some water -----	6	52
Clay, blue -----	127	179
Gravel, some clay -----	2	181
Gravel and sand; water-bearing -----	22	203
Hardpan -----	2	205
Gravel and sand; water-bearing -----	2	207
Hardpan -----		

Casing, 10-inch to 207 ft; perforated 180 to 202 ft. Flowing well 16 to 40 gpm. Tested 4 hrs at 300 gpm, dd 17 ft.

## 230 GEOLOGY AND GROUND-WATER RESOURCES, THURSTON COUNTY, WASH.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 18/3W-25A1		
Clay, sand -----	4	4
Clay, yellow -----	16	20
Clay, blue -----	35	55
Clay, fine sand -----	63	118
Clay, medium sand -----	8	126
Gravel, coarse sand -----	5	131

Casing, 6-inch to 131 ft. Flowing well. Bailed 13 gpm, dd 19 ft.

## Well 18/4W-9M1

Walter Bourgalt. About 0.10 mile east of Grays Harbor - Thurston County Line. Altitude about 360 feet. Drilled by O. E. Erdman, 1949.

Clay and gravel -----	15	15
Gravel, water-bearing -----	21	36

Casing, 8-inch to 36 ft; perforated 23 to 35 ft. SWL 12 ft. Tested at 200 gpm, dd 5 ft.

## Well 19/1-30M1

C. P. Foreman. About 2.9 miles north of Freeway. Altitude about 55 feet. Drilled by Patterson, 1954.

Clay and gravel -----	34	34
Clay and sand -----	17	51
Clay -----	19	70
Gravel and sand -----	3	73

Casing, 6-inch to 72 ft. SWL 40 ft. Bailed 20 gpm, dd 12 ft.

## Well 19/1W-4H2

A. M. Buell. About 0.2 mile east of Baird Cove. Altitude about 10 feet. Drilled by Patterson, 1954.

Clay, brown -----	4	4
Clay, boulders, brown -----	4	8
Clay, brown, gravel -----	17	25
Gravel, brown clay -----	20	45
Sand, brown clay, gravel -----	3	48
Sand, gravel, brown clay -----	6	54
Gravel, sand, brown clay -----	3	57
Brown clay, sand, gravel -----	1	58
Gravel, sand -----	1	59

Casing, 6-inch to 59 ft. SWL 46 ft. Bailed 18 gpm, dd 5 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/IW-4J2

Axel Wakkures. About 0.2 mile southeast of H2. Altitude about 50 feet. Drilled by Patterson, 1957.

Sand and gravel -----	8	8
Gravel and clay -----	8	16
Gravel, cemented, hardpan -----	31	47
Gravel, clay -----	13	60
Sand -----	5	65
Gravel -----	1	66

Casing, 6-inch.

## Well 19/IW-5H1

Stuart E. Shumway. About 1 mile southwest of Johnson Point. Altitude about 60 feet. Drilled by Patterson, 1949.

Sand and clay -----	26	26
Gravel, cemented, hardpan -----	9	35
Sand, clay, and gravel -----	55	90
Sand -----	9	99

Casing, 6-inch to 95 ft. Screen 95 to 99 ft. SWL 57.5 ft. Pumped 5 gpm, dd 5 ft.

## Well 19/IW-5H2

A. E. Zittel. North of H1. Altitude about 60 feet. Drilled by Patterson, 1955.

Clay -----	32	32
Gravel, cemented, hardpan -----	31	63
Gravel, blue clay -----	19	82
Clay, blue, gravel -----	3	85
Gravel, clay -----	3	88
Sand, blue, gravel -----	5	93

Casing, 5½-inch.

## Well 19/IW-5H3

S. E. Ailbln. North of Well H2. Altitude about 60 feet. Drilled by Patterson, 1951.

Clay -----	12	12
Gravel, cemented, hardpan -----	10	22
Sand, gravel, clay -----	51	73
Clay, blue -----	6	79
Sand, gravel, clay -----	3	82
Sand, gravel; water-bearing -----	6	88

Casing, 6-inch to 87 ft. SWL 64 ft. Bailed 20 gpm, dd 11 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/IW-5J2

W. S. Walter. About 1.3 miles southwest of Johnson Point. Altitude about 40 feet. Drilled by Patterson.

Clay, gravel -----	15	15
Gravel, clay -----	15	30
Gravel, clay, sand -----	16	46
Gravel, cemented -----	4	50
Sand, clay, gravel -----	16	66
Clay, blue, gravel -----	8	74
Sand, blue clay, gravel; water-bearing -----	7	81
Clay, blue, gravel -----	5	86
Sand, blue clay, gravel -----	1	87
Clay, blue -----	6	93

Casing, 11½-inch to 75 ft. SWL 35 ft. Bailed 4 gpm, dd 31 ft.

## Well 19/IW-6J1

Leo V. Smith. Located near Dickenson Point. Altitude about 35 feet. Drilled by Patterson, 1953.

Clay, brown -----	9	9
Gravel and clay -----	21	30
Clay, blue -----	35	65
Clay, blue, and sand -----	5	70
Clay, blue -----	40	110
Clay, blue, and sand -----	5	115
Sand and blue clay -----	12	127
Clay, blue -----	23	150

Casing, 6-inch to 108 ft. SWL 51 ft. Bailed dry at 0.5 gpm. Drilled 150 feet. Driller put down 728 ft hole about 100 ft NW of this well, but never penetrated the blue clay.

## Well 19/IW-8H1

Ossie Tranum. About 2 miles south of Johnson Point. Altitude about 45 feet. Drilled by Patterson, 1958.

Clay, brown, gravel, sand -----	35	35
Gravel, cemented, hardpan -----	20	55
Clay, brown, with gravel (water at 63 ft) -----	8	63
Sand, fine to medium -----	5	68
Sand, coarser, gravel -----	7	75
Sand and gravel -----	3	78
Sand and less gravel -----	1	79

Casing, 6-inch to 79 ft. SWL 42 ft. Bailed 19 gpm, dd 3 ft. (Driller reports yield could be increased considerably if screen were inserted from 68 to 78 ft.)

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/1W-9D1

Alvin W. Huber. About 1.8 miles south of Johnson Point. Altitude about 165 feet. Drilled by Patterson, 1951.

Topsoil -----	2	2
Gravel, cemented -----	18	20
Gravel, sand and clay -----	7	27
Sand, gravel and clay -----	8	35
Sand, fine -----	9	44
Clay, blue -----	71	115
Sand, clay and gravel -----	5	120

Casing, 6-inch to 116 ft. Screen 116 to 120 ft.

## Well 19/1W-9Q1

Ralph Zink. About 2.3 miles southeast of Johnson Point. Altitude about 160 feet. Drilled by Patterson, 1952.

No record -----	34	34
Gravel, cemented -----	2	36
Clay, sand -----	7	43
Gravel, cemented -----	8	51
Gravel -----	3	54

Casing, 6-Inch to 54 ft. SWL 30 ft. Bailed 18 gpm, dd 9 ft.

## Well 19/1W-15K2

Kathryn Allard. About 3.5 miles south of Johnson Point. Altitude about 75 feet.

Topsoil -----	1	1
Clay and sand -----	12	13
Clay, gravel and sand -----	13	26
Sand and brown clay -----	51	77
Clay, brown, and sand -----	22	99
Sand and clay -----	11	110
Sand -----	3	113
Clay, brown, and sand -----	25	138
Sand -----	9	147

Casing, 6-Inch to 141 ft. Screen 141 to 147 ft. SWL 82 ft. Bailed 9 gpm, dd 45 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 19/1W-17M1		
Sand -----	28	28
Sand and gravel -----	17	45
Shale (clay or silt), blue, some gravel -----	50	95
Sand, running -----	5	100
Shale, blue, sticky -----	25	125
Shale, black and blue -----	15	140
Gravel -----	3	143
Clay and shale (silt?) -----	7	150
Clay, shale (silt?); gravel, hard -----	2	152
Shale (silt?), gray -----	13	165
Shale (silt?), gray with streaks of sand -----	35	200
Shale (silt or clay), very hard -----	10	210
Shale (silt or clay) and gravel -----	6	216
Sandstone (sand), hard -----	4	220
Shale (silt?), hard, small pebbles -----	5	225
Shale (silt?) and sandstone -----	5	230
Sand, black -----	37	267
Quicksand -----	5	272
Sand, some clay -----	23	295
Clay -----	9	304
Clay, little sand -----	4	308
Clay, gray -----	12	320
Clay, some sand -----	12	332
Clay, gray -----	179	511
Sand -----	10	521
Clay or shale, gray -----	124	645
Clay, gray, shot with gravel -----	20	665
Shale (clay) -----	10	675
Clay, gray, shot with gravel -----	20	695
Shale (clay) -----	17	712
Shale (clay) and tuff (?) -----	7	719
Clay, gray, shot with gravel -----	9	728
Shale (clay) and tuff(?) -----	11	739
Shale (clay), gray -----	68	807
Sand and clay, mostly clay -----	63	870
Sand, light, running -----	55	925
Sand and clay -----	25	950
Sand, running -----	31	981
Sand, running, with gravel -----	4	985
Sand, running -----	5	990
Gravel, small -----	10	1,000

Casing, 12-inch to 182 ft; 8-inch to 735 ft; 6-inch to 995 ft. Flowing artesian. ↴

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/1W-18D1

P. J. Dorian. About 1.8 miles south of Dickenson Point. Altitude about 110 feet. Drilled by Patterson, 1955.

Topsoll -----	1	1
Clay, brown, sand and gravel -----	10	11
Clay, blue -----	52	63
Clay, blue, sand and gravel -----	15	78
Clay, blue, and sand -----	4	82
Clay, brown, and gravel -----	14	96
Clay, brown, sand and gravel -----	18	114
Gravel, cemented -----	3	117
Gravel and sand -----	11	128

Casing, 6-inch to 128 ft. SWL 110 ft. Bailed 1,000 gph, dd 3 ft.

## Well 19/1W-20P1

J. H. Chaffee. About 1.7 miles north of South Bay. Altitude about 110 feet. Drilled by Patterson, 1952.

No record -----	40	40
Gravel, cemented -----	12	52
Clay -----	19	71
Sand and clay -----	6	77
Clay, hard -----	13	90
Sand, clay and peat -----	3	93
Gravel, cemented -----	2	95
Sand and clay -----	5	100
Gravel, cemented -----	18	118
Gravel, sand and clay -----	5	123
Gravel -----	11	134

Casing, 6-inch to 135 ft. SWL 113 ft. Bailed 1,040 gph, dd 6 ft.

## Well 19/1W-20Q1

Murray Wright. About 1.7 miles north of South Bay. Altitude about 95 feet. Drilled by Patterson, 1954.

Clay, brown, and sand -----	15	15
Sand and clay -----	10	25
Sand and gravel -----	3	28
Clay, brown, and gravel -----	12	40
Clay, blue, and sand -----	13	53
Sand and clay -----	22	75
Gravel, cemented -----	5	80
Sand, gravel and clay -----	25	105
Gravel and sand -----	11	116

Casing, 6-inch to 116 ft. SWL 96 ft. Bailed 25 gpm, dd 5 ft.

## 236 GEOLOGY AND GROUND-WATER RESOURCES, THURSTON COUNTY, WASH.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/1W-21H1

L. M. Wright. About 2 miles north of South Bay. Altitude about 140 feet. Drilled by Patterson, 1952.

Clay and sand -----	4	4
Gravel, cemented -----	39	43
Gravel and clay -----	10	53
Sand and clay -----	34	87
Clay -----	13	100
Sand, little clay -----	12	112

Casing, 6-inch to 107 ft. Screen 107 to 112 ft. SWL 80 ft. Bailed 26 gpm, dd 10 ft.

## Well 19/1W-22K1

H. E. Patterson. About 4.3 miles southeast of Johnson Point. Altitude about 150 feet. Drilled by Patterson, 1947.

Sand, gravel, topsoil -----	4	4
Cement, blue, hardpan -----	90	94
Sand -----	56	150

Casing, 6-inch.

## Well 19/1W-28C1

Walter R. Hansen. About 1.5 miles north of South Bay. Altitude about 165 feet. Drilled by Patterson, 1952.

Topsoil -----	5	5
Gravel, cemented -----	72	77
Sand and clay -----	35	112
Sand -----	21	133

Casing, 6-inch to 128 ft. Screen 128 to 133 ft. SWL 112 ft. Bailed 10 gpm, dd 3 ft.

## Well 19/1W-30A1

C. O. Akehurst, formerly Hockhalter. About 6.5 miles northeast of Olympia. Altitude about 140 feet. Drilled by J. P. Davidson, 1946.

Topsoil, some gravel -----	12	12
Hardpan and clay, Intermittent layers -----	28	40
Clay, blue, some sand, mixed with clay -----	15	55
Hardpan and clay, layers -----	8	63
Sand, water-bearing, small amount -----	23	86

Casing, 6-inch to 80 ft. Screen 80 to 85 ft. SWL 60 ft. Tested at 48 gpm, dd 20 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/IW-30H2

George Stohl. About 1.5 miles north of South Bay. Altitude about 125 feet. Drilled by Patterson, 1959.

Clay, brown, and sand -----	27	27
Clay, blue, sand and silt -----	28	55
Sand -----	5	60
Sand, fine, and silt -----	10	70
Sand -----	12	82
Sand grading to gravel -----	9	91
Sand -----		

Casing, 6-inch to 86 ft. Screen 86 to 91 ft. SWL 36 ft. Bailed 50 gpm, dd 7 ft; 18 gpm, dd 1 ft.

## Well 19/IW-30J1

Harry Galivan. About 1 mile northwest of South Bay. Altitude about 125 feet. Drilled in 1952.

Topsoil -----	10	10
Gravel, cemented -----	54	64
Gravel, river -----	3	67

Casing, 6-inch to 67 ft.

## Well 19/IW-30Q2

R. H. Severance. About 1 mile northwest of South Bay. Altitude about 125 feet. Drilled by Patterson, 1959.

Clay and sand -----	22	22
Sand and clay -----	19	41
Sand and gravel, too much sand; at 40 ft yields 30 gpm -----	4	45
Sand (active) -----	14	59
Sand, fine (active--pulled back) -----	2	61

Casing, 6-inch to 52 ft. Screen 52 to 58 ft. SWL 23 ft. Bailed 30 gpm, dd 5 ft.

## Well 19/IW-31A3

Arthur Hansen. About 0.6 mile northwest of South Bay on Shincke Road. Altitude about 128 feet. Drilled by Patterson, 1952.

Sand and brown clay -----	42	42
Clay, blue -----	48	90
Gravel and sand -----	5	95

Casing, 6-inch to 95 ft. SWL 41 ft. Bailed 20 gpm, dd 2 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/1W-31E1

H. D. Wright. About 1.5 miles west of South Bay on Libby Road. Altitude about 130 feet. Drilled by Patterson, 1957.

No record -----	29	29
Gravel, cemented -----	10	39
Sand, gravel and clay; yields 3½ gpm at 44 ft -----	7	46
Sand -----	2	48
Gravel and clay -----	7	55
Gravel and sand -----	3	58
Sand -----	6	64

Casing, 6-inch to 57 ft. SWL 27 ft. Bailed 5 gpm, dd 23 ft.

## Well 19/1W-32N2

Wallace Lien. About 0.3 mile southwest of South Bay. Altitude about 150 feet. Drilled by Patterson, 1958.

Gravel and clay -----	25	25
Clay, gravel and sand -----	22	47
Gravel, water-bearing -----	3	50
Clay, gravelly -----	7	57
Gravel and sand -----	6	63

Casing, 6-inch to 63 ft. SWL 45 ft. Bailed 17 gpm, dd 1 ft.

## Well 19/1W-32P1

E. A. Patterson. Located at South Bay. Altitude about 145 feet. Drilled by Patterson, 1959.

Clay -----	14	14
Gravel, cemented -----	42	56
Sand and gravel -----	5	61
Sand, clay and gravel -----	7	68

Casing, 6-inch to 68 ft. SWL 53 ft. Bailed 22 gpm, dd 4 ft.

## Well 19/1W-32Q1

Harry L. Longmire. About 0.2 mile south of South Bay. Altitude about 135 feet. Drilled by G. M. Patterson, 1954.

Silt and sandy loam -----	28	28
Clay, blue and sand -----	2	30
Gravel, cemented -----	30	60
Gravel, sand and clay -----	10	70
Gravel, sand -----	6	76
Sand -----	4	80

Casing, 8-inch to 75 ft; perforated 63 to 73 ft. SWL 50 ft. Pumped 6 hrs at 100 gpm, dd 4 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/1W-33K1

Bert Henry. About 1 mile east of South Bay. Altitude about 150 feet. Drilled by H. F. Mykol, 1957.

Clay -----	6	6
Hardpan -----	26	32
Sand -----	68	100

Casing, 6-inch to 95 ft. Screen 95 to 100 ft.

## Well 19/2W-3F1

Warren S. Rigen. About 1.7 miles southeast of Steamboat Island. Altitude about 30 feet. Drilled by Patterson.

Clay, blue -----	95	95
Sand and gravel -----	21	116

Casing, 6-inch to 110 ft. SWL 29 ft. Bailed 20 gpm, dd 18 ft.

## Well 19/2W-4F3

Vincent D. Crawford. About 1.4 miles south of Steamboat Island. Altitude about 115 feet. Drilled by Evergreen Drilling Company, 1959.

Clay, blue -----	36	36
Gravel -----	6	42
Sand, clay, blue -----	52	94
Hardpan -----	20	114
Clay, blue -----	28	142
Sand and some gravel; water-bearing -----	14	156

Casing, 6-inch to 156 ft; perforated 150 to 154 ft. SWL 110 ft. Tested for 8 hrs at 20 gpm, dd 20 ft.

## Well 19/2W-8J1

John Riedel. About 0.7 mile west of Sanderson Harbor. Altitude about 110 feet. Dug well.

Topsoil, and sand and gravel -----	4	4
Hardpan -----	44	48
Sand -----	1	49

Casing, 48-inch (square) to 4 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/2W-9A1

Theodore F. Schmidt. About 0.4 mile northeast of Sanderson Harbor. Altitude about 110 feet.  
Drilled by Patterson, 1957.

Clay -----	6	6
Sand, clay and gravel -----	14	20
Sand and clay -----	29	49
Sand, gravel and clay -----	7	56
Sand and clay -----	13	69
Clay, sand and gravel -----	11	80
Clay and sand -----	35	115
Sand, gravel and clay -----	17	132
Gravel and sand -----	14	146
Sand, gravel, clay -----	7	153
Sand, blue -----	10	163
Sand, brown, gravel, clay -----	3	166
Sand, blue, gravel -----	24	190

Casing, 6-inch to 180 ft. Screen 179 to 188 ft. SWL 118 ft. Tested 4 hrs at 50 gpm, dd 7 ft.

## Well 19/2W-9R1

Coopers Point Water Company, Inc. About 0.25 mile south of Cooper Point. Altitude about 10 feet.  
Drilled by Patterson, 1955.

Clay and gravel -----	15	15
Gravel, clay and sand -----	12	27
Clay and gravel -----	3	30
Sand and gravel -----	35	65
Sand, clay and gravel -----	85	150
Clay, blue and sand -----	10	160
Clay, brown, and sand -----	20	180
Clay, blue, and sand -----	30	210
Gravel, blue clay and sand -----	10	220
Clay, blue, and sand -----	36	256
Sand and gravel -----	5	261
Clay, blue, gravel and sand -----	13	274
Sand and blue clay -----	5	279
Sand and gravel -----	7	286
Clay, blue and sand -----	13	299
Clay, blue -----	11	310
Clay, blue and sand -----	5	315
Clay, blue -----	6	321
Clay, blue, and sand -----	4	325
Clay, green -----	15	340
Clay, blue, and sand -----	9	349
Sand, blue clay and gravel -----	5	354
Gravel, clay and sand -----	6	360
(Clay and sand at 360 ft)		

Casing, 8-inch to 348 ft. Screen 345 to 360 ft. Flowing well.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 19/2W-9R2		
Coopers Point Water Company, Inc. Old 4-inch well, about 5 feet distant from well 9R1. Not used.		
Gravel, cemented -----	30	30
Sand and gravel; water-bearing (salt) -----	30	60
Clay, blue -----	270	330
Sand, water-bearing, with thin strata of clay about every 10 feet -----	130	460

Casing, 4-inch to 330 ft.

## Well 19/2W-11R1

Joseph Dvorak. Located on east side of Zangle Cove. Altitude about 85 feet. Drilled by Patterson, 1957.

Clay, brown -----	6	6
Gravel, brown clay and sand -----	5	11
Clay, brown -----	19	30
Clay, brown, and sand -----	45	75
Clay, blue, and sand -----	5	80
Clay, blue -----	20	100
Clay, blue, and silt -----	15	115
Clay, blue -----	90	205
Clay, blue, and silt -----	10	215
Clay, blue -----	58	273
Clay, blue, and silt -----	12	285
Clay, blue -----	105	390
Clay, blue, and sand -----	15	405
Clay, blue -----	22	427
Clay, blue, and sand -----	8	435
Clay, blue -----	50	485
Clay, hard blue, with sand seams -----	20	505
Clay, blue -----	19	524
Gravel and sand -----		

Casing, 6-inch to 524 ft. SWL 87 ft. Bailed 1,100 gph, dd 1 ft.

## Well 19/2W-12L1

L. D. Burrus, H. R. Kruse and Ed Ayer. About 1.1 mile northeast of Boston Harbor. Altitude about 125 feet. Drilled by Patterson, 1953.

Soil, sand and gravel, clayey -----	27	27
Clay, blue -----	471	498
Sand and gravel -----	15	513

Casing, 6-inch to 497 ft. Screen 497 to 513 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/2W-13N1

Andy Mathis. About 1 mile southeast of Boston Harbor. Altitude about 150 feet. Drilled by Patterson, 1959.

Clay and sand -----	10	10
Sand, gravel and clay -----	58	68
Sand, fine -----	26	94

Casing, 6-inch to 90 ft. Screen 90 to 94 ft. SWL 68 ft. Bailed 20 gpm, dd 7 ft.

## Well 19/2W-14N1

Ralph Conner. About 0.5 mile south of Boston Harbor. Altitude about 75 feet. Drilled by Patterson, 1958.

Clay, brown -----	22	22
Clay, blue, and gravel -----	7	29
Clay, brown, and sand -----	13	42
Clay, gravel and sand -----	11	53
Gravel and clay -----	23	76
Gravel, sand and clay; yield 2 gpm -----	10	86
Gravel and sand -----	3	89

Casing, 6-inch to 89 ft. SWL 69 ft. Bailed 15 gpm, dd 3 ft.

## Well 19/2W-14R1

Emrey Stone. About 1 mile southeast of Boston Harbor. Altitude about 160 feet. Drilled by Patterson, 1951.

Gravel, clay and sand -----	48	48
Sand, clay and gravel -----	2	50
Gravel, clay and sand -----	30	80
Clay and fine sand -----	43	123
Sand, fine -----	10	133

Casing, 6-inch, set to 128 feet. Screen 128 to 133 ft. SWL 84 ft. Bailed 29 gpm, dd 43 ft.

## Well 19/2W-15N1

Clearwell Water Company. About 1.3 miles south of Cooper Point. Altitude about 80 feet. Drilled by Patterson, 1955.

Clay, brown, gravel -----	25	25
Clay, gravel, sand -----	24	49
Clay, blue, and sand -----	13	62
Sand, fine, silt -----	17	79
Clay, gravel -----	6	85
Clay, gravel, sand -----	13	98
Clay, gravel -----	3	101
Gravel, sand -----	4	105
Gravel, sand, clay -----	3	108
Gravel, sand -----	9	117

Casing, 6-inch to 112 ft. Screen 111 to 117 ft. Bailed 18 gpm, dd 2 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/2W-16J1

Cornelius Reckers. About 1 mile south of Cooper Point. Altitude about 125 feet. Drilled by Patterson, 1955.

Clay -----	31	31
Sand, blue, and gravel -----	28	59
Sand, brown, and gravel -----	2	61
Gravel, cemented -----	35	96
Clay and sand -----	2	98
Gravel, cemented -----	42	140
Gravel and sand -----	12	152

Casing, 6-inch to 152 ft. SWL 132 ft. Bailed 18 gpm, dd 3 ft.

## Well 19/2W-16Q2

D. L. Montgomery. About 1.1 miles south of Cooper Point. Altitude about 135 feet. Drilled by Patterson, 1952.

Clay and sand -----	2	2
Clay -----	13	15
Sand and clay -----	2	17
Clay -----	41	58
Gravel, cemented -----	40	98
Sand and clay -----	2	100
Gravel, cemented -----	8	108
Clay -----	6	114
Gravel, cemented -----	33	147
Clay and gravel -----	11	158
Gravel, cemented -----	11	169
Gravel -----	2	171

Casing, 6-inch to 172 ft. SWL 145 ft. Bailed 936 gph, dd 10 ft.

## Well 19/2W-18K2

A. E. Robbins. About 4.2 miles southwest of Steamboat Island. Altitude about 130 feet. Drilled by Patterson, 1951.

Dug -----	35	35
Gravel and clay -----	17	52
Sand and clay -----	8	60
Silt -----	48	108
Sand, clay and gravel -----	2	110
Clay, gravel and sand (hard) -----	30	140
Clay and gravel -----	12	152
Sand and gravel -----	14	166

Casing, 6-inch to 159 ft. Screen 159 to 166 ft. SWL 106 ft. Bailed 10 gpm, dd 21 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/2W-21E1

R. M. Murray. About 2 miles south of Cooper Point. Altitude about 85 feet. Drilled by Patterson.

Clay and sand -----	20	20
Sand and clay -----	20	40
Clay and gravel -----	10	50
Clay and sand -----	15	65
Clay, yellow -----	10	75
Clay and sand -----	7	82
Gravel -----	3	85
Clay, yellow -----	10	95
Sand, water-bearing -----	8	103
Sand and clay -----	7	110
Sand and gravel -----	8	118
Clay and sand -----	7	125
Sand and gravel -----	5	130
Gravel and sand -----	23	153
Clay and gravel (water-bearing gravel at 155 ft, stopped drilling, water turned salty)		
Gravel and clay -----	8	163
Gravel -----	3	166
Sand -----	39	205
Gravel and sand -----	11	216
Clay, blue -----	24	240
Clay and sand -----	5	245
Clay, blue -----	51	296
Gravel and sand -----	11	307

Casing, 6-inch to 306 ft. SWL 75 ft. No pump test, gravel and sand aquifer very active.

## Well 19/2W-21L2

Frank Mathews. About 2.1 miles south of Cooper Point. Altitude about 20 feet. Drilled by Patterson, 1959.

Topsoil, sand and gravel -----	4	4
Sand, clay and gravel -----	5	9
Sand, clay -----	27	36
Clay, blue -----	7	43
Sand and gravel -----	2	45
Sand, red, and gravel -----	25	70
Gravel and fine sand; yields 30 gpm at 74 ft -----	3	73
Gravel, pea -----	8	81
Sand -----	2	83

Casing, 6-inch to 77 ft. Screen 77 to 83 ft. SWL 3.8 ft. Bailed 50 gpm, dd 3 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 19/2W-22E1		
Clay, sand and gravel -----	5	.5
Clay and sand -----	21	26
Gravel and clay -----	11	37
Gravel and sand -----	2	39
Gravel, clay and sand -----	1	40
Gravel and sand -----	14	54

Casing, 6-inch to 54 ft. SWL 35 ft. Bailed 18 gpm, dd 1 ft.

Well 19/2W-22M5

W. C. Dillaway. About 1.9 miles south of Cooper Point. Altitude about 55 feet. Drilled by Patterson, 1957.

Clay and gravel -----	18	18
Sand and clay -----	22	40
Gravel and clay -----	17	57
Gravel and sand -----	6	63
Sand and gravel -----	2	65

Casing, 6-inch to 65 ft. SWL 52 ft. Bailed 17 gpm, dd 1 ft.

Well 19/2W-22N4

R. G. Hall. About 2.4 miles south of Cooper Point. Altitude about 80 feet. Drilled by Patterson, 1950.

Clay -----	8	8
Sand and gravel, cemented -----	30	38
Gravel and sand -----	3	41
Clay, blue -----	11	52
Sand, gravel and clay -----	15	67
Clay, blue -----	6	73
Gravel, cemented -----	20	93
Gravel -----	9	102

Casing, 6-inch to 102 ft. SWL 86 ft. Bailed 20 gpm, dd 2 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 19/2W-23Q1		
Olympia Canning Company. Located at Gulf Harbor development. Altitude about 15 feet. Drilled well.		
Hardpan -----	22	22
Sand, fine -----	153	175
Sand and fine gravel -----	9	184
Clay, blue -----	3	187
Sand, red -----	7	194
Clay, blue -----	3	197
Sand and fairly coarse gravel -----	8	205
Sand -----	5	210
Clay mixed with sand -----	22	232
Sand -----	34	266
Clay, sandy -----	25	291
Sand and gravel, some very coarse -----	77	268
Sand, very hard packed -----	17	385
Sharp sand at 385 feet		

Casing, 6-inch to 373 ft; flowing artesian, influenced by tide.

#### Well 19/2W-24G1

T. C. Williams. About 0.65 mile west of Woodward Bay. Altitude about 130 feet. Drilled by J. P. Davidson.

Clay -----	7	7
Hardpan -----	41	48
Sand and gravel -----	9	57
Sand, fine, and gravel -----	13	70
(Water started to show at 70 feet) -----	16	86
Sand, blue, and silt -----	30	116
Sand and silt, blue mud -----	4	120
Clay, sandy, and silt -----	6	126
Clay, dry sandy -----	13	139

Casing, 8-inch to 139 ft. Drilled ahead to 151 ft and encountered blue sand and silt, water-bearing.

#### Well 19/2W-25A1

G. E. Cummings. About 2.2 miles northwest of South Bay. Altitude about 95 feet. Drilled by Patterson, 1953.

Clay -----	12	12
Sand, gravel and clay -----	7	19
Gravel, cemented -----	11	30
Sand and gravel -----	3	33
Sand, fine -----	8	41
Sand, gravel -----	10	51
Clay, blue -----	10	61

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
Well 19/2W-25A1 - Continued		
Sand, fine -----	19	80
Sand and clay -----	2	82
Clay, blue -----	25	107
Sand, blue, (hard) -----	11	118
Sand, brown -----	7	125

Casing, 6-inch to 125 ft. Probably screened 118 to 125 ft. SWL 40 ft. Bailed 800 gph, dd 60 ft; 300 gph, dd 14 ft.

## Well 19/2W-25D1

C. P. Seward. About 2.8 miles northwest of South Bay. Altitude about 90 feet. Drilled by Patterson, 1958.

Clay and sand -----	3	3
Clay and gravel -----	26	29
Clay, sand and gravel -----	11	40
Gravel and clay -----	10	50
Clay and silt -----	18	68
Gravel, clay and sand -----	4	72
Gravel and clay -----	7	79
Sand, clay and gravel -----	11	90
Sand, brown, and clay -----	9	99
Sand, gravel and clay -----	11	110
Sand and clay -----	13	123

Casing, 6-inch to 118 ft. Screen 118 to 123 ft. SWL 89 ft. Bailed 20 gpm, dd 12 ft.

## Well 19/2W-26B1

Marguerite Cushman. About 4 miles north of Olympia. Altitude about 20 feet. Drilled by Patterson, 1952.

Gravel, beach -----	10	10
Gravel, sand and clay -----	20	30
Sand -----	30	60
Sand, blue -----	27	87
Sand, coarse blue -----	29	116

Casing, 6-inch to 95 ft. Screen 93 to 115 ft. SWL 1 to 7 ft. Tested at 150 gpm, dd 12 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/2W-27D1

William Guffey. About 2.4 miles south of Cooper Point. Altitude about 10 feet. Drilled by Patterson, 1958.

Fill dirt -----	6	6
Gravel and clay -----	4	10
Sand, gravel and clay -----	5	15
Gravel and clay -----	3	18
Clay, blue, and sand -----	10	28
Sand and gravel -----	6	34
Clay, blue -----	48	82
Sand, fine to coarse, little gravel -----	3	85
Sand, gravel and clay -----	10	95
Sand -----	6	101
Sand and blue clay -----	14	115
Sand, fine to medium -----	4	119
Sand, fine to coarse -----	2	121
Clay, blue, and silt -----	12	133
Sand, fine to coarse, some gravel -----	17	150
Clay, bluish green -----	3	153

Casing, 6-inch to 140 ft. Screen 140 to 153 ft. SWL varies from flowing well at high tide to 11 ft below datum.

## Well 19/2W-29B2

C. L. Blackmer. About 5.2 miles north northwest of Olympia. Altitude about 25 feet. Drilled by Patterson, 1957.

Clay, brown -----	10	10
Clay and gravel -----	9	19
Gravel and clay -----	11	30
Gravel and sand -----	1	31
Gravel and clay -----	6	37
Sand and gravel -----	3	40
Gravel -----	4	44

Casing, 6-inch to 44 ft. SWL 33 ft. Bailed 10 gpm, dd 6 ft.

## Well 19/2W-33L1

Gordon R. Searles. About 4 miles south of Cooper Point. Altitude about 155 feet. Drilled by Patterson, 1958.

Gravel and clay -----	18	18
Gravel, cemented -----	12	30
Gravel, cemented, and boulders -----	20	50
Clay -----	20	70
Gravel and clay -----	20	90
Clay and gravel -----	29	119

Casing, 6-inch to 108 ft. SWL 90 ft. Bailed 10 gpm, dd 5 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/2W-33M2

Ronald R. Moss. About 3.5 miles northwest of Olympia. Altitude about 135 feet. Drilled by Patterson, 1959.

Loam, sandy, gravel -----	6	6
Gravel, clay -----	18	24
Sand, gravel, clay -----	2	26
Gravel, cemented -----	31	57
Sand, gravel, clay -----	2	59
Gravel, clay -----	16	75
Silt, contained peat, wood -----	1	76
Gravel, clay -----	11	87
Gravel, sand -----	10	97
Clay, blue -----	4	101

Casing, 8-inch to 93 ft; 7-inch perforated pipe 91 to 101 ft. SWL 83 ft. Tested 4 hrs at 125 gpm, dd 4.2 ft.

## Well 19/2W-33Q1

Butler's Cove Water Company. About 3.5 miles northwest of Olympia. Altitude about 10 feet. Drilled by Patterson, 1947.

Topsoil and gravel -----	6	6
Gravel, cemented -----	53	59
Clay and gravel -----	5	64
Gravel, cemented -----	7	71
Clay, sandy -----	21	92
Clay and gravel -----	13	105
Clay, sandy -----	4	109
Sand, water-bearing -----	15	124
Gravel, water-bearing -----	3	127
Clay and gravel -----	3	130
Clay, blue -----	57	187
Sand and gravel; water-bearing -----	27	214
Sand, water-bearing -----	46	260
Clay, sandy -----	5	265
Sand and gravel; water-bearing -----	21	286
Clay and gravel -----	3	289
Sand and gravel; water-bearing -----	74	363

Casing, 8-inch to 333 ft; 5-inch pipe and screens to 358 ft. Flowing 200 gpm on 7/11/47.

## Well 19/3W-13K1

Justin Taylor. About 0.9 mile southwest of Gallagher Cove on beach. Altitude about 10 feet. Drilled by Fred Martz.

Hardpan -----	18	18
Sand, red -----	30	48
Sand, blue -----	30	78
Gravel, fine -----	8	86

Casing, 6-inch.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/3W-13Q1

H. H. Houston. About 1.1 miles southwest of Gallagher Cove. Altitude about 25 feet. Drilled by Patterson, 1949.

Sand and gravel -----	7	7
Gravel, cemented -----	8	15
Gravel and clay, soft -----	2	17
Gravel, cemented -----	7	24
Gravel and clay -----	13	37
Gravel and clay; water-bearing, water level 15 feet -----	10	47
Sand, brown, clay and some gravel -----	13	60
Sand, blue, clay and small gravel -----	5	65
Sand, blue, and clay -----	12	77
Sand, blue, clay and fine gravel -----	13	90
Gravel, clay and blue sand -----	3	93
Sand, blue, clay and gravel -----	8	101
Clay, gravel, gray sand -----	8	109
Sand, gravel, brown clay; water-bearing -----	3	112
Sand, gravel and clay, gray; water-bearing -----	9	121
Clay and gravel, hard -----	1	122

Casing, 8-inch to 112 ft. Screen 112 to 122 ft.

## Well 19/3W-24C1

Melvin Dobson. About 3 miles north of Griffin School. Altitude about 95 feet. Drilled by Stan J. Pederson, 1960.

Clay and stones -----	5	5
Gravel and brown clay -----	20	25
Clay, brown, and sand -----	22	47
Sand, beach -----	29	76
Clay layer, blue, and sand; yields about 200 gph at 85 ft -----	9	85
Gravel, concrete -----	35	120
Sand, brown rusty, casing pulled back and screen installed --	17	137

Casing, 6-inch to 115 ft. Screen 115 to 120 ft.

## Well 19/3W-27L1

R. Berg. About 0.1 mile south of Byrns Cove. Altitude about 60 feet. Drilled by A. P. Graf, 1952.

Clay, brown -----	25	25
Clay, blue and gravel -----	10	35
Gravel, coarse, and rock -----	2	37
Sand, fine (some water) -----	16	53
Rock and gravel -----	2	55
Clay, blue -----	33	88
Gravel, fine blue; water-bearing -----	9	97
Gravel, coarse loose -----	6	103

Casing, 8-inch to 103 ft. Perforated 85 to 100 ft. SWL 28 ft. Pumped 4 hrs at 200 gpm, dd 64 ft.

Table 3 -- Materials penetrated by representative wells. -- Continued

Materials	Thickness (feet)	Depth (feet)
-----------	---------------------	-----------------

## Well 19/3W-35G2

S. D. Flocch. About 0.75 mile north of Griffin School. Altitude about 170 feet. Dug well.

Clay -----	10	10
Hardpan -----	50	60
Sand, fine hard -----	10	70
Sand, fine, then gravel -----	6	76

Casing, 48-inch, set to 10 ft.

## Well 19/3W-36A2

Clyde H. Morris. About 0.6 mile southwest of Youngs Cove. Altitude about 180 feet. Drilled by L. Nelson, 1946.

Soil (sandy loam) -----	4	4
Hardpan -----	14	18
Clay, blue near bottom -----	20	38
Hardpan -----	10	48
Gravel, water-bearing -----	6	54
Hardpan -----	30	84
Clay, blue, and hardpan -----	42	126
Gravel, water-bearing -----	6	132

Casing, 6-inch to 132 ft.

## Well 20/1W-33L2

Dr. R. C. Brown. At Johnson Point. Altitude about 5 feet. Drilled in 1940.

Reported miscellaneous information pertaining to drilling of well: Salt water to 380 feet (cedar log hit at 370 feet) Brackish water below 380 feet Shale from 418 to 432 feet Fresh water at 432 feet Shale from 464 to 484 feet Good artesian flow at 485 feet, with blue sand and odor H <sub>2</sub> S		
--	--	--

Casing, 5-inch to 485 ft. Flows at high tide. Bailed 100 gpm, dd 40 ft.

## Well 20/2W-28P1

Steamboat Islanders, Inc. Located on Steamboat Island. Altitude about 10 feet. Drilled by Patterson, 1958.

Clay, gravel (hard) -----	20	20
Sand, gravel (salt-water) -----	230	250
Clay, silt -----	165	415
Sand, gravel; water-bearing -----	10	425

Casing, 6-inch to 419 ft. Probably screened 419 to 425 ft. Flowing well. Tested at 100 gpm, dd 2 ft.
