Instructions for Identifying Businesses

DEPARTMENT OF
ECOLOGY
State of Washington

Introduction

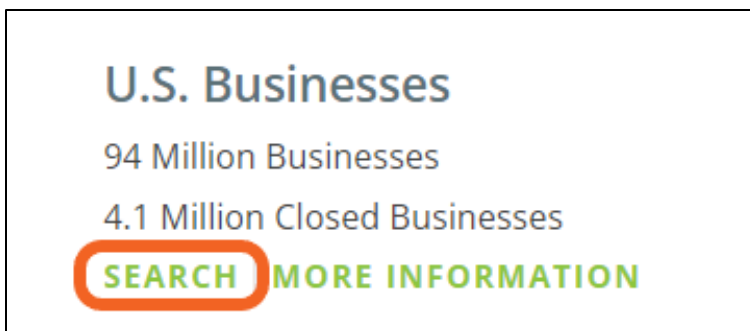

These instructions support local governments in developing a general list of businesses impacted during phase one of implementing the business organics management requirements, which are a product of the [Organics Management Law](#). Using Data Axle, an online resource available through many libraries, this tool will auto-populate businesses and their contact information in a jurisdiction. This list may not identify every business impacted but does provide a starting point for notification of the business requirements.

Email all questions about this tool to organics@ecy.wa.gov.

Note: You will need your local library card to access this resource.

Walkthrough of Data Axle online resource
