

**Updated web page links for the
Washington Wetland Rating System for Eastern Washington**
(As of 5/12/2020)

Page 6

Information required for documenting a new rare plant location can be found at:

http://www.dnr.wa.gov/Publications/amp_nh_sighting_form.pdf.

Additional information about rare plant locations can be found at:

<http://www.dnr.wa.gov/NHPfieldguide>

Resources to assist in classifying the plant community can be found at:

<http://www.dnr.wa.gov/NHPwetlands>

Page 35

US Army Corps of Engineers National Wetland Plant List (NWPL):

http://wetland-plants.usace.army.mil/nwpl_static/v33/home/home.html

Pages 46, 58, 73, 81, 82

D 3.1, D 3.2, R 3.1, L 3.1, L 3.2, S 3.1, S 3.2: To answer this question you will need to access the Department of Ecology's website that lists all the bodies of water that do not meet water quality standards: <https://fortress.wa.gov/ecy/approvedwqa/ApprovedSearch.aspx>

Water Quality Atlas Map: <https://fortress.wa.gov/ecy/waterqualityatlas/map.aspx>

To view listed waters, go to "Add Map Data," check the box next to "Assessed Waters/Sediment," and select "Go." Use the "Filter Data" tab to select Category 5 waters under "Assessed Water/Sediment."

To determine if the wetland is in the basin of a listed water, look in an area approximate to a 12-digit Hydrologic Unit (4-40 sq mi, for more information see Federal Standards and Procedures for the National Watershed Boundary Dataset at https://pubs.usgs.gov/tm/11/a3/pdf/tm11-a3_4ed.pdf).

View 12-digit HUCs on the Water Quality Atlas Map by going to "Add Map Data," checking the box for "Sub-Watershed (12-digit HUC)," and selecting "Go."

Pages 47, 59, 74, 82

D 3.3, R 3.2, R 3.3, L 3.3, S 3.3: The Department of Ecology's website lists all the bodies of water that have TMDLs:

<https://ecology.wa.gov/Water-Shorelines/Water-quality/Water-improvement/Total-Maximum-Daily-Load-process/Directory-of-improvement-projects>

See also the Water Quality Atlas Map: <https://fortress.wa.gov/ecy/waterqualityatlas/map.aspx>

To view listed waters, go to “Add Map Data, check the box next to “Assessed Waters/Sediment,” and select “Go.” Use the “Filter Data” tab to select Category 4 waters under “Assessed Water/Sediment.” You can also view TMDLs at the watershed level by selecting “WQ Improvement Projects” when adding map data. Click on the map for a pop-up with more information and links to reports.

Page 51

D 5.3: If you are unfamiliar with the methods for mapping contributing basins, the procedure is described in a fact sheet by the NRCS, *How to Read a Topographic Map and Delineate a Watershed*:

https://www.nrcs.usda.gov/Internet/FSE_DOCUMENTS/nrcs144p2_014819.pdf

Page 52

For additional resources to determine if flooding problems occur, NOAA publishes a searchable database of storms that caused damage at: <https://www.ncdc.noaa.gov/stormevents/>

Pages 56-57, 66

R 2.1, R 2.2, R 5.2: Maps of UGAs and urban areas can be found on the Washington Coastal Atlas: <https://fortress.wa.gov/ecy/coastalatlus/tools/Map.aspx>

Go to “Contents,” “Administrative/Regulated,” check the boxes for “City” and “Urban growth area (UGA)” and select “Go.”

R 2.2, R 2.3, R 5.3: Additional resources for mapping the contributing basin include:

- Washington Coastal Atlas Map:
<https://fortress.wa.gov/ecy/coastalatlus/tools/Map.aspx>
 - Go to “Contents,” “Shoreline,” check the box for “Sub-basins,” “Watershed,” or both, and select “Go.”
- USGS StreamStats: <https://water.usgs.gov/osw/streamstats/>
- Washington Department of Natural Resources Lidar Portal:
<https://lidarportal.dnr.wa.gov/>

Pages 57, 97

R 2.3, H 2.1, H 2.2, H 2.3: Additional resources for land cover mapping in eastern Washington include:

- County web maps

- WSDA Agricultural Land Use:
<https://nras.maps.arcgis.com/apps/webappviewer/index.html?id=3d61db30686d467ea6f5e0197be32b25>
- Northwest Large Fire Interactive Map:
<https://gacc.nifc.gov/nwcc/interactivemap/index.html?webmap=ed0a7dad32fe4848b20c6f91c74c79ea>
- National Land Cover Database Land Cover map viewer available from the Multi-Resolution Land Characteristics Consortium: <https://www.mrlc.gov/viewer/>

For information on plants, contact the Natural Heritage Program at Washington Department of Natural Resources (WDNR): <http://www.dnr.wa.gov/NHPlists>

Is a Wetland of High Conservation Value as determined by WDNR. (See question SC 2.0 under Wetlands with Special Characteristics; Chapter 6): <http://www.dnr.wa.gov/NHPwetlandviewer>

Page 110

SC 3.0 More up-to-date information may be available on the WNHP website:

<http://www.dnr.wa.gov/NHPwetlandviewer>

The latest list of land sections with such wetlands is available on the WDNR website:

<http://www.dnr.wa.gov/NHPdata>

Contact information is also available at

<http://www.dnr.wa.gov/natural-heritage-program>

Page 15 of the rating form

SC 3.3 Is the wetland in a Section/Township/Range that contains a Natural Heritage wetland?

<http://www.dnr.wa.gov/NHPdata> or <http://www.dnr.wa.gov/NHPwetlandviewer>

SC 3.0. Wetlands of High Conservation Value (WHCV) Revised Key

SC 3.1. Is the wetland listed by WDNR as a Wetland of High Conservation Value?¹

Yes = **Category 1** No – Go to **SC 2.2**

SC 3.2 Does the wetland have a rare plant species, rare plant community, or high-quality common plant community that may qualify the site as a WHCV?²

Yes = **Submit the site to WA Natural Heritage Program** (see pg. 6 for instructions)

No = **Not a WHCV**

¹Use WDNR-NHP WHCV map viewer (link: <http://www.dnr.wa.gov/NHPwetlandviewer>) to determine if the WDNR-NHP lists the wetland as a WHCV **OR** check to see if wetland is listed in a section/township/range that contains a Wetland of High Conservation Value (=Natural Heritage Wetland, <http://www.dnr.wa.gov/NHPdata>), and if so, contact WDNR-NHP for additional details: <http://www.dnr.wa.gov/natural-heritage-program>

²Contact WDNR-NHP for resources to help determine the presence of these elements.
