WA Dept. of Ecology and Cowlitz County

Dear Washington Dept. of Ecology and Cowlitz County:

I support the "no action" alternative for Millennium Bulk Terminals' facility in Longview, WA. Millennium's proposed coal export terminal would harm our community health and safety, air and water quality, and natural resources. I urge your agencies to protect our region and say no to coal exports in Longview.

MR. Alex Groher-Jick
15 Half Moon Hill

Sierra Club Comment Language:

RE: No coal export terminal in Longview!

Dear US Army Corps of Engineers, WA Dept. of Ecology and Cowlitz County,

I support the "no action" alternative for Millennium Bulk Terminals' facility in Longview, WA. Millennium's proposed coal export terminal will harm our community health and safety, air and water quality, and natural resources. I urge your agencies to protect our region and say no to coal exports in Longview.

Thank you,

Advocacy Message Subject	Advocacy Message Text
We can do better: no coal exports!	I support the “no action” alternative in the Millennium Bulk Terminals Draft Environmental Impact Statement (DEIS). Millennium’s proposed coal export terminal would harm communities throughout the Northwest. This project harms our health and safety, air and water quality, and natural resources. I urge your agencies to protect public health and natural resources and reject coal export.

Table B-18. Mass-Mail Campaign J: Oregon

NO COAL EXPORTS

**Millennium Bulk Terminals
Longview coal export project
c/o Earth Ministry/WAIPL
6512 23rd Ave NW, Suite 317
Seattle, WA 98117**

NO COAL EXPORT!

Dear Army Corps of Engineers, Washington Department of Ecology, and Cowlitz County officials:

As a person of faith, I strongly oppose the construction of a coal export terminal at Longview, WA and transporting coal on trains and ships throughout the Northwest. This proposal would negatively impact my community by increasing congestion and noise with more coal train traffic, polluting our air and waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing grounds, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Montana and Wyoming, and escalate climate change.

I support the "no action" alternative for Millennium Bulk Terminals' facility in Longview, WA. I urge your agencies to protect our region and say no to coal exports.

Faith calls us to be good stewards of God's creation. Shipping coal through Washington communities goes against shared values of stewardship, sustainability, and justice. We can do better. Please reject the Millennium coal export project.

Thank you. _____ [signature]

Put our communities before coal exports

To: The Washington Department of Ecology and Cowlitz County

Re: Millennium Bulk Terminal draft EIS

The proposed Millennium Bulk Terminals coal export facility in Longview would lead to a dramatic increase in coal train traffic through dozens of Montana communities in order to ship coal from Montana and Wyoming mines to the West Coast for export to Asia.

This coal train traffic will lead to increased diesel exhaust and coal dust pollution in communities along the tracks, threatening neighbors' health. It will also lead to increased traffic congestion and safety hazards, as well as delays for emergency response vehicles (e.g. ambulances and fire engines) at rail crossings, where gates will be down for at least an extra hour each day.

Coal exports also create added pressure to expand or build new Montana coal mines. In Montana, we would get all the environmental and public health costs of additional coal mining, all for the sake of corporate profits and Asian energy. Coal seams are aquifers in our region, and increased mining threatens our land, water, people and climate.

I urge you to deny the permit for the proposed coal port in Longview.

Sincerely,

Columbia Riverkeeper Comment Language:

Dear US Army Corps of Engineers, WA Dept. of Ecology and Cowlitz County:

I support the “no action” alternative in the Millennium Bulk Terminals Draft Environmental Impact Statement (EIS). Millennium’s proposed coal export terminal would harm communities throughout the Northwest, with the most intense impacts felt in Longview, Washington, near the proposed terminal site. The project harms our health and safety, air and water quality, and natural resources. I urge your agencies to protect public health and natural resources. Reject coal export.

Climate Change: Washington state is a national leader in the fight to combat climate change. Considering rail and vessel emissions alone, this project would be one of the biggest greenhouse gas emitters in Washington state. Coal export undermines the state’s hard work to combat climate change and protect future generations.

Health & the Environment: The Draft EIS reveals many serious impacts to human health and the environment. It dismisses other impacts without a valid basis. The Final EIS should incorporate the best available science, real world examples, and a comprehensive Health Impact Assessment. The agencies undercut public, tribal, and agency input by failing to complete a Health Impact Assessment before releasing the Draft EIS.

Rail Traffic: The Draft EIS demonstrates Millennium would have a severe impact on rail and road congestion. Because Millennium cannot fix this significant harm—from mine to terminal—the agencies should deny permits.

Weak & Unenforceable Mitigation: In some instances, the Draft EIS claims mitigation can reduce coal dust, rail traffic, and other project impacts. For example, to mitigate coal dust from the terminal, the Draft EIS proposes a reporting process for coal dust complaints. This borders on offensive. A phone call or email to complain about coal dust fouling a person’s lungs, home, and river is not “mitigation.” The agencies should revise the Draft EIS and remove inadequate, unsupported, and unenforceable mitigation.

Thank you,

Other 98% Comment Language:

I urge you to reject this massive coal export terminal immediately. It is a climate-changing carbon bomb, and your Draft Environmental Impact Statement shows that the Millennium coal terminal would do serious harm to communities throughout the Northwest, especially the tribes and other residents living nearby. .

Priorities Coalition Comment language:

SUBJECT: Revise Coal Export DEIS to Protect Health, Safety, & Environment

Dear US Army Corps of Engineers, WA Dept. of Ecology and Cowlitz County:

I support the “no action” alternative in the Millennium Bulk Terminals Draft Environmental Impact Statement (EIS). Millennium’s proposed coal export terminal would harm communities throughout the Northwest, with the most intense impacts felt in Longview, Washington, near the proposed terminal site. The project harms our health and safety, air and water quality, and natural resources. I urge your agencies to protect public health and natural resources. Reject coal export.

Climate Change: Washington state is a national leader in the fight to combat climate change. Considering rail and vessel emissions alone, this project would be one of the biggest greenhouse gas emitters in Washington state. Coal export undermines the state’s hard work to combat climate change and protect future generations.

Health & the Environment: The Draft EIS reveals many serious impacts to human health and the environment. It dismisses other impacts without a valid basis. The Final EIS should incorporate the best available science, real world examples, and a comprehensive Health Impact Assessment. The agencies undercut public, tribal, and agency input by failing to complete a Health Impact Assessment before releasing the Draft EIS.

Rail Traffic: The Draft EIS demonstrates Millennium would have a severe impact on rail and road congestion. Because Millennium cannot fix this significant harm—from mine to terminal—the agencies should deny permits.

Weak & Unenforceable Mitigation: In some instances, the Draft EIS claims mitigation can reduce coal dust, rail traffic, and other project impacts. For example, to mitigate coal dust from the terminal, the Draft EIS proposes a reporting process for coal dust complaints. This borders on offensive. A phone call or email to complain about coal dust fouling a person’s lungs, home, and river is not “mitigation.” The agencies should revise the Draft EIS and remove inadequate, unsupported, and unenforceable mitigation.

Thank you,

Dear US Army Corps of Engineers, WA Dept. of Ecology and Cowlitz County:

I support the “no action” alternative in the Millennium Bulk Terminals Draft Environmental Impact Statement (EIS). Millennium’s proposed coal export terminal would harm communities throughout the Northwest, with the most intense impacts felt in Longview, Washington, near the proposed terminal site. The project harms our health and safety, air and water quality, and natural resources. I urge your agencies to protect public health and natural resources. Reject coal export.

Climate Change: Washington state is a national leader in the fight to combat climate change. Considering rail and vessel emissions alone, this project would be one of the biggest greenhouse gas emitters in Washington state. Coal export undermines the state’s hard work to combat climate change and protect future generations.

Health & the Environment: The Draft EIS reveals many serious impacts to human health and the environment. It dismisses other impacts without a valid basis. The Final EIS should incorporate the best available science, real world examples, and a comprehensive Health Impact Assessment. The agencies undercut public, tribal, and agency input by failing to complete a Health Impact Assessment before releasing the Draft EIS.

Rail Traffic: The Draft EIS demonstrates Millennium would have a severe impact on rail and road congestion. Because Millennium cannot fix this significant harm—from mine to terminal—the agencies should deny permits.

Weak & Unenforceable Mitigation: In some instances, the Draft EIS claims mitigation can reduce coal dust, rail traffic, and other project impacts. For example, to mitigate coal dust from the terminal, the Draft EIS proposes a reporting process for coal dust complaints. A phone call or email to complain about coal dust fouling a person’s lungs, home, and river is not “mitigation.” The agencies should revise the Draft EIS and remove inadequate, unsupported, and unenforceable mitigation.

Thank you,

Power Past Coal Coalition Comment language:

SUBJECT: Revise Coal Export DEIS to Protect Health, Safety, & Environment

Dear US Army Corps of Engineers, WA Dept. of Ecology and Cowlitz County:

I support the “no action” alternative in the Millennium Bulk Terminals Draft Environmental Impact Statement (EIS). Millennium’s proposed coal export terminal would harm communities throughout the Northwest, with the most intense impacts felt in Longview, Washington, near the proposed terminal site. The project harms our health and safety, air and water quality, and natural resources. I urge your agencies to protect public health and natural resources. Reject coal export.

Climate Change: Washington state is a national leader in the fight to combat climate change. Considering rail and vessel emissions alone, this project would be one of the biggest greenhouse gas emitters in Washington state. Coal export undermines the state’s hard work to combat climate change and protect future generations.

Health & the Environment: The Draft EIS reveals many serious impacts to human health and the environment. It dismisses other impacts without a valid basis. The Final EIS should incorporate the best available science, real world examples, and a comprehensive Health Impact Assessment. The agencies undercut public, tribal, and agency input by failing to complete a Health Impact Assessment before releasing the Draft EIS.

Rail Traffic: The Draft EIS demonstrates Millennium would have a severe impact on rail and road congestion. Because Millennium cannot fix this significant harm—from mine to terminal—the agencies should deny permits.

Weak & Unenforceable Mitigation: In some instances, the Draft EIS claims mitigation can reduce coal dust, rail traffic, and other project impacts. For example, to mitigate coal dust from the terminal, the Draft EIS proposes a reporting process for coal dust complaints. This borders on offensive. A phone call or email to complain about coal dust fouling a person’s lungs, home, and river is not “mitigation.” The agencies should revise the Draft EIS and remove inadequate, unsupported, and unenforceable mitigation.

Thank you,

SUBJECT: Revise Coal Export DEIS to Protect Health, Safety, & Environment

Dear US Army Corps of Engineers, WA Dept. of Ecology and Cowlitz County:

I support the “no action” alternative in the Millennium Bulk Terminals Draft Environmental Impact Statement (EIS). Millennium’s proposed coal export terminal would harm communities throughout the Northwest, with the most intense impacts felt in Longview, Washington, near the proposed terminal site. The project harms our health and safety, air and water quality, and natural resources. I urge your agencies to protect public health and natural resources. Reject coal export.

Climate Change: Washington state is a national leader in the fight to combat climate change. Considering rail and vessel emissions alone, this project would be one of the biggest greenhouse gas emitters in Washington state. Coal export undermines the state’s hard work to combat climate change and protect future generations.

Health & the Environment: The Draft EIS reveals many serious impacts to human health and the environment. It dismisses other impacts without a valid basis. The Final EIS should incorporate the best available science, real world examples, and a comprehensive Health Impact Assessment. The agencies undercut public, tribal, and agency input by failing to complete a Health Impact Assessment before releasing the Draft EIS.

Rail Traffic: The Draft EIS demonstrates Millennium would have a severe impact on rail and road congestion. Because Millennium cannot fix this significant harm—from mine to terminal—the agencies should deny permits.

Weak & Unenforceable Mitigation: In some instances, the Draft EIS claims mitigation can reduce coal dust, rail traffic, and other project impacts. For example, to mitigate coal dust from the terminal, the Draft EIS proposes a reporting process for coal dust complaints. This borders on offensive. A phone call or email to complain about coal dust fouling a person’s lungs, home, and river is not “mitigation.” The agencies should revise the Draft EIS and remove inadequate, unsupported, and unenforceable mitigation.

Thank you,

Table B-26. Mass-Mail Campaign R:

2016 COAL EXPORT HEARINGS:

Pledge to make your voice heard on Millennium Bulk Terminals

Dear US Army Corps of Engineers, WA Dept. of Ecology, and
Cowlitz County:

I support the "no action" alternative for Millennium Bulk Terminals' facility in Longview, WA. Millennium's proposed coal export terminal will harm our community health and safety, air and water quality, and natural resources. I urge your agencies to protect our region and say no to coal exports in Longview.

Aaron Crosetto
NAME (please print)

420 Wall St. #102
ADDRESS

Seattle WA 98121
CITY STATE ZIP

arclightexcelsior@gmail.com
EMAIL PHONE

206-496-2493

YES! I want to attend the hearing. Please contact me with all the details.

YES! I want to volunteer!

Unfortunately, I can't come to the hearing, but I support efforts to protect Washington and Oregon communities from dirty coal exports. I join thousands of Northwest families calling on state leaders to take a stand and say no to Millennium Bulk Terminals.

Signing this postcard makes you a participant in the Power Past Coal community. As a participant, you will stay informed and involved in the latest coal export news, information and action alerts.

GET INVOLVED in the 2015 Draft
Environmental Impact Statement

Dear US Army Corps of Engineers, WA Dept. of Ecology and Cowlitz County: I support the [redacted] alternative for Millennium Bulk Terminals' facility in Longview, WA. Millennium's proposed coal export terminal will harm our community health and safety, air and water quality, and natural resources. Please urge your agencies to protect our region and say no to coal exports in Longview. ✓

Jakob Knudsen

cut postcard here to mail

SEATTLE WA 980

31 MAY 2016 PM 6 L

Attend an informational workshop in your community about the draft Environmental Impact Statement.

Go to www.powerpastcoal.org/DEISworkshop to find the workshop closest to you!

Landowners and Citizens for a Safe Community

c/o Columbia Riverkeeper

1520 Commerce Avenue Suite A
Longview, WA 98632

cut postcard here to mail

Dear US Army Corps of Engineers, WA Dept. of Ecology and Cowlitz County:

DB

I support the "no action" alternative for Millennium Bulk Terminals' facility in Longview, WA. Millennium's proposed coal export terminal will harm our community health and safety, air and water quality, and natural resources. I urge your agencies to protect our region and say no to coal exports in Longview.

Alena Novakova 408 507 1110
name phone
9427 225th Way NE Redmond WA 98053
address city state zip
email a.novakova40@gmail.com

Yes, I'll be at a public hearing closest to me:

Longview on 5/24 - 1:00 to 9:00pm

Spokane on 5/26 - 1:00 to 9:00pm

Pasco on 6/2 - 1:00 to 9:00pm

Yes, I'll attend an informational workshop in my community about the draft Environmental Impact Statement. Go to www.powerpastcoal.org/DEISworkshop for more information.

Yes, I want to volunteer!

OPSR Comments re: Millennium Bulk Terminals (MBT) Coal Export Draft Environmental Impact Statement (DEIS)

Thank you for accepting comments on the DEIS for the largest coal export terminal proposal in the nation, the Millennium Bulk Terminals project. Many threats to public health and safety have been identified in the Draft Environmental Impact Statement.

The project would harm public health and our climate. For these and other reasons, I request that you reject the proposal.

This dirty project would undermine local, state and federal efforts to combat climate change. The project would dramatically increase greenhouse gas emissions at a time when our region and our nation must move rapidly toward more sustainable energy sources.

Coal trains and ships emit dangerous and deadly diesel particle pollution. Coal dust would blow off trains, ships, and uncovered piles of coal at the terminal, threatening clean air and water.

Coal trains derail, threatening homes, businesses, and the environment. Coal ships have accidents that threaten the health of our rivers and drinking water supplies. Emergency responders along the rail lines and at the export terminal in Longview, WA would face considerable delays at at-grade crossings and the terminal itself. These threats are well documented in the DEIS.

The DEIS fails to adequately address the cumulative impacts of other fossil fuel export projects proposed to be built in communities along the Columbia River in Washington and Oregon. This must be remedied in the Final EIS.

The project will have disproportionate negative impacts on low-income, minority, and tribal communities along the rail route and near the terminal. I request that a comprehensive Health Impact Assessment with a public review process be included in the Final EIS.

Based on substantial threats to human health and safety that cannot be avoided or mitigated, please deny permits for the Millennium coal export project and select the “No Action Alternative.”

Thank you for consideration of my comments.
Sincerely,

**Table B-31. Mass-Mail Campaign W:

Dear Washington Department of Ecology, I support the “no action” alternative in the Millennium Bulk Terminals Draft Environmental Impact Statement (EIS). Millennium’s proposed coal export terminal would harm communities throughout the Northwest, with the most intense impacts felt in Longview, Washington, near the proposed terminal site. The project harms our health and safety, air and water quality, and natural resources. I urge your agency to protect public health and natural resources and reject coal exports. Here are our top concerns. Climate Change: Washington State is a national leader in the fight to combat climate change. By rail and vessel emissions alone, this project would be one of the biggest greenhouse gas emitters in Washington. Coal exports undermine the state’s hard work to combat climate change and protect future generations. Health and the Environment: The draft EIS reveals many serious impacts to human health and the environment. It dismisses other impacts without a valid basis. The final EIS should incorporate the best available science, real world examples, and a comprehensive health impact assessment. The agencies undercut public, tribal, and other agency input by failing to complete a health impact assessment before releasing the draft EIS. Rail Traffic: The draft EIS shows Millennium’s proposal would have a severe impact on rail and road congestion. Because Millennium cannot fix this significant harm — from mine to terminal — the agencies should deny permits. Weak and Unenforceable Mitigation: In some instances, the draft EIS claims mitigation can reduce coal dust, rail traffic, and other project impacts. For example, to mitigate coal dust from the terminal, the draft EIS proposes a reporting process for complaints. However, a phone call or email does not change the coal dust fouling a person’s lungs, home, and river and is not mitigation. The agencies should revise the draft EIS and remove inadequate, unsupported, and unenforceable mitigation. Again, I urge your agency to protect public health and natural resources in Washington State and reject Millennium’s proposed coal export terminal. Thank you, The Climate Reality Project and Its Supporters

I support the "no action" alternative in the Millennium Bulk Terminals Draft Environmental Impact Statement (EIS). Millennium's proposed coal export terminal would harm communities throughout the Northwest, with the most intense impacts felt in Longview, Washington, near the proposed terminal site - while undermining the state's hard work to combat climate change to protect future generations.

The project harms our health and safety, air and water quality, and natural resources. I urge your agencies to protect public health and natural resources.

Reject coal exports.

Subject: Millennium Bulk Terminal

To whom it may concern:

I support the “no action” alternative in the Millennium Bulk Terminals Draft Environmental Impact Statement (EIS). This project would harm our climate, air and water quality, with the most intense impacts felt by residents of Longview, WA and surrounding towns. This project threatens our climate and would harm our health and safety, air and water quality, and natural resources. I urge your agencies to protect public health and natural resources and reject coal export.

Climate Change: The Northwest is leading the nation in the fight to combat climate change. Considering rail and vessel emissions alone, this project would be one of the biggest greenhouse gas emitters in Washington State. Coal export undermines the region’s hard work to combat climate change and protect future generations.

Health & the Environment: The Draft EIS reveals many serious impacts to human health and the environment. It dismisses other impacts without a valid basis. The Final EIS should incorporate the best available science, real world examples, and a comprehensive Health Impact Assessment. The agencies undercut public, tribal, and agency input by failing to complete a Health Impact Assessment before releasing the Draft EIS.

Rail & Marine Traffic: The Draft EIS demonstrates Millennium would have a severe impact on rail and road congestion and the increased shipping would threaten the tourism and fishing industries on the Columbia River. Because Millennium cannot fix these significant harms --from mine to terminal to the Pacific -- the agencies should deny the permits.

Weak & Unenforceable Mitigation: In some instances, the Draft EIS claims mitigation can reduce coal dust, rail traffic, and other project impacts. For example, to mitigate coal dust from the terminal, the Draft EIS proposes a reporting process for coal dust complaints. This borders on offensive. A phone call or email to complain about coal dust fouling a person’s lungs, home, and river is not “mitigation.” The agencies should revise the Draft EIS and remove inadequate, unsupported, and unenforceable mitigation.

Sincerely,

Carolyn Schellhorn
Ardmore, PA 19003
