

# Appendix A. Citation List

## Chapter 173-337 WAC Safer Products Restrictions and Reporting AO # 21-01

### Overview

We developed this citation list to meet the requirements outlined in RCW [70A.350.050](#)<sup>1</sup> and [34.05.272](#).<sup>2</sup> It contains references for data, factual information, studies, or reports which we relied on in the adoption of this rulemaking (RCW 34.05.370(f)), to determine regulatory actions, and to support the identification of priority consumer products.

The following are the types of sources used to support this effort.

1. Peer review overseen by an independent third party.
2. Review by staff internal to Ecology.
3. Review by persons that are external to and selected by Ecology.
4. Documented open public review process that is not limited to invited organizations or individuals.
5. Federal and state statutes.
6. Court and hearings board decisions.
7. Federal and state administrative rules and regulations.
8. Policy and regulatory documents adopted by local governments.
9. Data from primary research, monitoring activities, or other sources, but that has not been incorporated as part of documents reviewed under other processes.
10. Records of best professional judgment of Ecology employees or other individuals.
11. Sources of information that do not fit into one of the other categories listed.
